# The State University of Iowa.

Do you know that investigations recently made by the Boston Transcript show that 'the State University of Iowa has this year a larger percentage of increase in attendance than any other representative university or college in the United States?' It is true and to the above might be added the additional fact that this year's growth at the University is only about the same as the Institution enjoyed during the two preceding years.

Does it not occur to you that there must be good and sufficient reasons for this enormous and continued increase in the number of young men and women flocking to the doors of Iowa's State University?

It has been suggested that in the strength of her faculties, the number and conveniences of her buildings, the resources of her laboratories, the extent of her libraries, the completeness of her museums, and in the richness of her general equipment may be found the reason why so many young men and women of Iowa and over half of the other states of the Union are selecting this institution for their education.

You are cordially invited to visit the several colleges and schools of the University during your stay in the city that you may be your own judge as to the correctness of the above suggestion.
