Gentlemen:

I am trying to compile a list of people in this area who have erected and are watching wood duck nesting boxes. I wonder if you could give me a list of people to whom you gave boxes this spring and for that matter, at any earlier year, so that I could add these people to my list and contact them. I am attempting to compile a consolidated report on how many of these boxes are being used by the ducks and from that how many young birds are being hatched.

Further, on a new subject, if you are interested in any more cypress trees I have about 50 that are nice sized seedlings now from two to three feet high that I would be glad to have you use in your planting program if you are interested. It is time to move them now. Please let me know. Thank you.

Yours very truly,

Frederic Leopold
