At Your Service Since 1869

Mr. Frederick Leopold

Dear Sir: Thanks for sending  
 me wood duck nest literature but  
 I have made several nests - but  
 have refrained to bore the 4" hole  
 below the lid until I hear from  
 you further. With the hole that  
 shows to the top of box, can the  
 young ones jump up that far to  
 get out? If you ever get any  
 literature on wood ducks, I  
 would be glad to have some.  
 Here a real good place to place  
 the nests - where they hatch  
 out naturally. The wood duck  
 population is north east  
 Iowa, seems to be on the gain,  
 anyway.

Thanks Again  
 Lee Miller
