Mr F Leopold,

Dear Sir:

I read with interest the article
in Dⁿ Sunday Register today ~~the~~
~~article~~ about the wood ducks.
I thought they were about extinct.
I am a bird lover and some years
ago when I had an acreage at
the edge of town I always had
two crops of Blue birds in my
small orchard every summer, also
plenty of wrens. I usually aim
to put out suet on the trees for
the little tree birds in winter
I would like to have any information
I ~~can~~ can get about the ducks
If possible would like to come over
to Burlington next summer and
see your layout for the ducks
I think you are doing a good work.

Cordially

Clark Hollingsworth
