

Nov 11-23

16-50

Red Breasted Nuthatch  
lating out.

Note the line over the eye.  
which is a positive  
identification even in a  
photo

I prize this the highest of  
all my bird photos thus far  
as this little fellow is a  
rare visitor with us.

Sometimes I do not see one  
for a year or more but this  
fall I have seen records of  
them from Oct 6 to Nov 12

Round Robin  
Dec 28
