## Daily Field Checking List

### General Field Notes

Bob and I observed the Piping  
 Plover at about 50 ft. He was  
 together with Semipalmated  
 Plovers and we noted carefully  
 the gray back instead of  
 brown. I see gray instead of  
 black and color so very light  
 that he was noticeable clear  
 across the pond with the naked  
 eye. He seemed almost white
