. . . Key to your horizons

JUN 79

Another year has come and gone, but not without the Bomb staff's awareness of its events and changes. This yearbook belongs to you, the students, parents and faculty of Iowa State, to all those who spent hours and years on the campus and in the buildings, at the football stadium and in the auditoriums. And because this book is yours, I feel it should reflect all of the time and energy spent here.

The experiences you had here were probably a mixture of good and bad, happy and tearful, yet whatever they were, they belong to you. So to help you to remember them, whether it be today or ten years from now, we've designed this book as a key to the scope of your experiences, as a key to your horizons. This phrase appears on many of the book's pages this year as the theme of *Bomb '79*. We've bound together what we feel are the significant events, activities and feelings of the year and called them your "horizons", the scope of your experiences.

The year has included many things, probably the most memorable, although not the most pleasant of memories, was the snow, and lots of it. Also, on the state level was the surprising upset of incumbent senator Dick Clark by Roger Jepsen. There were many national events to remember from the year, including the Camp David Summit; the recognition of Red China by the United States; the birthday celebration of one of America's beloved characters, Mickey Mouse; the toga craze, brought about by John Belushi and his movie, "Animal House", and many others.

There were some sad aspects to the year too, including the deaths of prominent people such as Golda Meir, Hubert Humphrey, Margaret Mead, Nelson Rockefeller, Norman Rockwell, Pope Paul VI, Pope John Paul I, Charles Boyer, Bob Crane and Jack Warner. They will be remembered fondly by all.

It's been a year of changes and experiences that each of us will remember or forget, yet we were here and these were our horizons. As you read this book it will serve as a marker, a remembrance, a key to your horizons.

We  
are here now  
Facing a part of our lives  
that someday we'll look back on  
and wonder  
what it was like . . .

Registration,  
 those first hectic days  
 moving into the dorm  
 realizing,  
 you forgot your alarm clock  
 and your roommate  
 already has a boyfriend!

Photos by John Riches

Saying good-bye  
to the comfortable surroundings  
of home and friends,  
Meeting new people,  
smile glued in place,

Is it all worthwhile?

Sunrise  
those days of learning,  
Lying on Central Campus  
catching a last glimpse of blue skies  
and golden leaves  
shimmering in the fading sun.

# Come sail . . . . . . away with RHW

Kelli Chapman of Murphy House won the Flush Show held on Thursday night of RHW.

Many houses participated in the Flush Show. The entertaining acts ranged from "creative bands" to comedians.  
John Riches.

RHW Novelty Intramurals were held March 18-19.

"Come Sail Away," urged members of Iowa State's residence halls as "dormies" showed off their dorms during ISU's Residence Hall Week (RHW) March 13-19. Approximately 700 seniors came to see the dorms during RHW.

Residence hall members got right into the thick of things as they started the week off with a Volunteer Day. Students painted walls and bookshelves at the Ames Preschool Center Saturday, March 11.

The formal RHW program started Monday, March 13, with kickoff dinners featuring live ISU musical entertainment in the residence halls. A display of residence hall living was also a week-long feature in North Grand Mall.

Knapp House I swept the annual College Bowl quiz show. Lommen House captured second place in "the battle of the intellects."

Wednesday night was Bar Night in Campustown drinking establishments. The "Bar Knight" gallantly made her way from bar to bar.

The highlight of the evening was the ladies' choice mass campaniling at midnight under the campanile. ISU carillonneur Richard von Grabow serenaded the couples with Irish folk songs, accompanied by the Harriman House Barbershop Quartet.

Singing the Linda Ronstadt hit "Silver Threads and Golden Needles," Kelli Chapman of Murphy House won first prize at the "Flush Show" held Thursday evening March 16, in the Great Hall of the Memorial Union.

High School seniors got a chance to participate in "Name That Tune," a quiz competition over KPGY radio from midnight Friday to the wee hours of Saturday morning. "Name That Tune" winner was the team from Brandt and Kehlenbeck Houses.

Taking advantage of the spring weather and having fun were two good reasons to participate in Novelty Intramurals held March 18-19.

Bringing RHW to a successful finish were the humor of comedy team Edmonds and Curley and the exquisite guitar music of Leo Kottke in C.Y. Stephens Auditorium Saturday night, March 18.

— Debra Bell

# Greek Week

Greek Week 1978 was held April 8-16. The service project for Greek Week was Epicology. Members of the 31 fraternity chapters and 16 sorority chapters on campus received cash pledges from Ames citizens and the Ames business community to clean the city parks. The money earned was donated to the Epilepsy Foundation.

The annual Greek Week Blood Drive donated a total of 2,440 pints of blood to hospitals in Illinois, Missouri, and Iowa, including Veterans Administration Hospital in Iowa City and Des Moines. Blood collection was supervised by the Galesburg Blood Mobile, a unit of Galesburg, Illinois, regional Red Cross Center.

Jackson Browne was the Greek Week concert. He performed on April 19th at Hilton Coliseum.

Many other events were held including the Greek Olympics, a reception for cooks and houseparents from the ISU Greek chapters, and a reception for state legislators and administrators.

The bed race is a popular event at the Greek Olympics, where a bed on wheels is raced around sorority circle.

Dale Coates

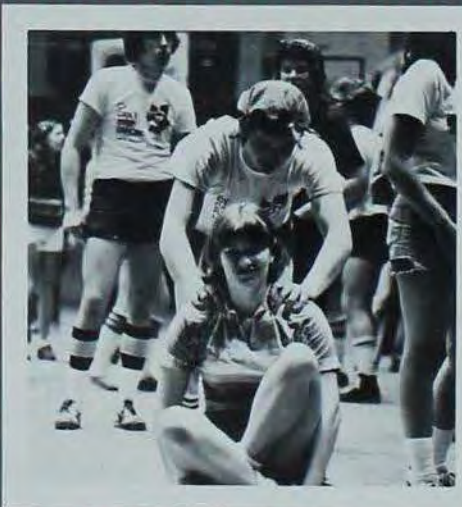

Epicology and the annual Greek Week Blood Drive were this year's service projects sponsored by Greek Week.  
Dale Coates, John Riches

# Cy can't Stop dancing

ISU raised more money for Muscular Dystrophy than any other school in the nation.

Kay Hanes was a member of the Hot Pepper Dance Company, the winning organization that raised the most money for the dance marathon. Hanes represented ISU on the Jerry Lewis Telethon held over Labor Day Weekend.

"I was really scared about being on the telethon," said Hanes. "But, I was so impressed with the whole MDA organization that it was worth it to watch the whole thing."

"Jerry Lewis is a real intense person, but he really kids around with college students. You can't have a prepared speech when talking to Jerry. I was told to keep on going and don't let Jerry Lewis bother me while I was speaking. He really was fun," said Hanes.

John Riches.

# Muscular Dystrophy Dance Marathon

# dance and dance

From Disco to polkas to square dancing, the Muscular Dystrophy dancers danced away.  
John Riches

Dance: to move quickly up and down or about.

Marathon: an endurance contest.

Put them together and you get one thing: FATIGUE. But if you throw in other ingredients like Iowa State, Muscular Dystrophy and 407 energetic couples, you also come up with something else: MONEY.

The fifth annual Iowa State Muscular Dystrophy Dance Marathon raised \$61,043 for the Muscular Dystrophy Association's (MDA) fight against muscular dystrophy and other muscle related diseases.

Of the 407 couples who started dancing Friday evening, 334 finished the 30-hour ordeal. Steve Martinez and K'Linn Kuehl raised \$1,100 to win first prize for couples. The winning organization was the Hot Pepper Dance Company, raising almost \$4,000.

A variety of music was used to prevent boredom and keep the dancers moving. They danced to disco, bluegrass, punk rock and polka music.

"The polkas were the real burnout,"

said Randy Minear, one of the contestants. "Just when one dance ended and you needed a break, they would start playing again and everybody would go crazy."

An estimated audience of 5,000 came to watch the sea of humanity swelling on the dance floor. The spectators also offered some encouragement to the weary dancers.

The money raised at the Dance Marathon goes to the MDA, where it is funneled into two major areas. Program Services receives 82 per cent of the budget for research, medical services, professional education and training, and public health education. The other 18 percent goes towards fund raising and management for the MDA.

As the dancers headed home after the marathon for hot baths and cold beers, they realized that they had not spent another lost weekend in the bars of Ames.

The sixth annual marathon dance was sponsored by the Committee for Muscular Dystrophy. — Bruce Braley

# Black perspectives in contemporary America

"Black Perspectives in Contemporary America" was the theme of the symposium sponsored by the Black Student Organization April 22-26. Actors Ruby Dee and Ossie Davis highlighted the program with "An Evening of Black America" on April 24.

The presentation included dramatic readings, anecdotes and short scenarios by black authors. The symposium was sponsored by the Black Student Organization, Black Cultural Center, office of minority affairs, and was funded by the Government of the Student Body.

Ruby Dee and Ossie Davis presented "An Evening of Black America" on April 24.  
**Dan Geiser.**

# ISU Victory for Parents Weekend

Mr. and Mrs. John Crawford were named Parents of the Year. They were honored at halftime of the ISU vs. Drake football game.  
Mark Perkins

The Iowa State Cyclones defeated the Drake Bulldogs by a score of 35 to 7 much to the delight of many parents attending Parents' Weekend festivities.

Different activities were planned throughout the weekend for parents and students. Friday evening entertainment was provided by Gary Burton and The Vikes Quartet in the Maintenance Shop of the Memorial Union.

Two performances were given by Duck's Breath Mystery Theatre in Fisher Theater on Friday night also.

The 13th annual Milk Maid Contest was sponsored by the Dairy Science Club. Milk Maid Lisa Werbach of Nelson House placed first overall. The Milk Maid contest took place on Friday and Saturday nights.

A modern dance concert "Friends" was presented by former ISU dance

students on Saturday night of Parents' Weekend in the New Physical Education Building.

Gordon Lightfoot gave two concerts at C.Y. Stephens Auditorium Saturday, September 30.

Mr. and Mrs. John Wayne Crawford of rural Independence, Iowa were named Parents of the Year at Iowa State. The Crawfords are the parents of seventeen children — eleven of them have attended Iowa State University. Eight of their children have graduated from ISU. Dennis Crawford nominated his parents for the honor. Mr. and Mrs. Crawford were honored at halftime of the ISU vs Drake football game.

The Iowa State Parents' Association Sponsored Parents' Weekend.

59 coeds sponsored by residence halls and sororities participated in the 13th annual Milk Maid Contest held at the Dairy Farm. Lisa Werbach representing Nelson and Livingston Houses placed first overall, while Teresa Pool representing Harwood and Dana Houses placed second.

Marcy Wilkins

# Campus Chest

**"Chester"**

The Campus Chest Candy Sale was held in the Great Hall.  
Susan Miller

Ever ride in a bed from Des Moines to Ames? Auction yourself off as a wake up service featuring kisses? Play backgammon for 6 hours?

These not-so-run-of-the-mill activities played just a small part in the sometimes crazy, but always charitable activities of Campus Chest this year.

Campus Chest, held from October 1 to October 7 during fall quarter, had its most profitable year ever and sponsored some new and unusual activities. The event raised money for 15 charitable organizations.

Trying a new twist this year, the Campus Chest Central Committee used two mascots instead of the traditional theme. The mascots were named Chester C. Chest and his girlfriend Charity. Publicity Chairperson Suzy Freed described them as "Two cartoony ISU students." "They are a way of attracting attention for Campus Chest," she said.

Along with the mascots, Campus Chest sponsored the Chester Awards, with the word Chester standing for "Campus' highly exceptional students tops in every respect." Students paid a \$5 entry fee and applied for the award. The applicants were screened by a screening committee and the finalists were interviewed. Students could increase an applicant's chance to win

by donating money to Campus Chest in the applicant's name. The winners, Louis Beck and Kathy Baker, were awarded plaques.

Some students, including first-place winner Rick Blabolil, found themselves playing a great deal of backgammon at the backgammon tournament. The contest, held at the Brass Bull on October 2 and 3, totaled about six hours of backgammon playing. It was sponsored by Miller Brewing Company, who also supplied trophies and plaques. The \$2 entry fees went to Campus Chest.

The movie festival was another new event this year. At the Memorial Union Great Hall from 6:00-12:00 p.m. on October 5-6, students could see four films for \$3. "The Sting," "Dirty Harry," "Pink Panther Cartoons," and "Blazing Saddles" comprised the movie fare.

With the help of KCCQ FM radio, Campus Chest held a successful auction of about 100 donated items and services. KCCQ broadcast the auction on October 7 and 8. Final bids for the services and items ranged from 50 cents to over \$200. The services auctioned included washing sweaters, painting a house, dates with fraternity men, and cookie baking.

Two older Campus Chest events had

new formats this year. The plant sale included a candy sale, combining tropical plants and old-fashioned candies. The sales lasted from October 2-5.

A contemporary style show was added to the annual ladies' tea. The "invitation only" tea was held at ISU President Parks' home on October 3. A number of Ames women were present as well as the special guests, Mrs. Robert Ray and Mrs. Parks.

Aim For Ames, for the third year, made money for Campus Chest. About 700-900 participants started the trip from the Capitol in Des Moines to Ames. The students collected pledge donations for their trip and travelled by unusual means — including a trip on a bed in the back of a truck.

The annual Campus Chest Raffle was another moneymaker, raffling off \$750 worth of tickets. The raffle winner, Gene Turk, won a weekend in Minneapolis for two. The trip included Camelot Dinner Theatre tickets, lodging at a Marriott hotel, and tickets to the Vikings-Bears football game.

Campus Chest ended its week of events and activities on October 7 after the Nebraska game. The Campus Chest concert was not held until November 6 and 9, when David Gates and "Bread" performed for sell-out crowds at C. Y. Stephens Auditorium.

— Anita Schmitt

Raffle tickets were raffled off for a trip-for-two to Minneapolis.

The Campus Chest plant sale was held in the Great Hall of the Memorial Union. Greg Miller and Blake Conover delivered plants after the plants were purchased. Susan Miller

# Having fun helping others

Several organizations on campus sponsor fund raising events. Money is raised either for the benefit of the group or outside organizations, namely charities. Sigma Chi, Fairchild House, and Phi Kappa Theta along with Alpha Chi Omega all sponsored events for which the money went to charity.

Fairchild House from the RCA held their 9th Annual Pie-Eating Contest on April 30. If you happened to be strolling on the intramural field between Oak, Elm, and Linden Halls that day, you would have noticed a lot of people wearing strange costumes and wolfing down pies. According to Craig John-

son, who was in charge last spring, a group enters three people to be on a team. A guy's team has to eat three pies and a girl's team has to eat two. The competition is based on how fast the pies are eaten. One girl's team ate two pies in 38 seconds. The money is raised through donations from businesses and from the groups who sponsor a team. This year, \$700 was raised for the Kidney Foundation of Iowa.

Phi Kappa Theta fraternity along with Alpha Chi Omega sorority donated the \$932 they raised in their Mile of Pennies to the Ames Youth and Shelter Services. Two weeks in May were spent collecting money in canisters from businesses and areas around campus for children whose parents cannot keep them. They took the money to the bank and converted it to pennies. The pennies were laid down from Beardshear to Curtiss in ten rows one-tenth mile long.

Sigma Chi fraternity was busy, busy, busy before the Iowa-Iowa State game. On September 16, they sponsored their Derby Days. Fourteen sororities competed in a trampoline marathon. Other games and competitions were also held. Donations were collected from local businesses totaling \$1200. The money was given to Wallace Village, a home for children with minimal brain damage located in Bloomfield, Colorado.

\$10,250 was raised for the American Cancer Society by the Sigma Chi chapters from Iowa State University and the University of Iowa in their second annual Run for Your Life. The two chapters ran side by side from Ames to Iowa City before the game. Pledges were received from all over the state. "Some people ran one mile or as far as they could," said John Boeke. They started the Thursday before the game with a few words from Governor Ray and made it to Iowa City by game time to watch ISU win!

—Beth Fisher

Sigma Chi Derby Days is an annual event held each fall. Different games and competitions are held to raise money for Wallace Village, a home for children with minimal brain damage located in Bloomfield, Colorado. From drinking with a baby bottle to a trampoline marathon, fourteen sororities competed in this fundraiser.

Susan Miller

Ever try to eat a cherry pie as fast as you can? \$700 was raised for the Kidney Foundation of Iowa by teams of students eating pies.

Lory Sulle, Carol Wood, and Anita Lehmann representing Vollmer House wolfed down two pies for the Kidney Foundation of Iowa. The Pie Eating Contest was sponsored by Fairchild House.

Dan Geiser

# Welcome to THE KNOLL

The Knoll was named by Mrs. Storms in 1903 when her husband was president of the University, and has gone through several stages of redecorating and rebuilding since it was first built for President Beardshear in 1900. The front entrance was added and the porch on the left side of the house enclosed in 1966.

All Photos by John Riches

Sunny with three sides of windows, the porch serves as a "good place for holding club meetings," Mrs. Parks said. Most of the furniture in the room belongs to the university and the plants are courtesy of the ISU Horticulture department. Mrs. Parks said the porch is often opened up in the summer time and used for parties and reading.

The book room serves as a library for President and Mrs. Parks. It contains a collection of 18th Century English letters and diaries.

A home has overlooked the campus for the past 78 years. It is The Knoll, the home of ISU's President W. Robert Parks. This house on the hill represents a symbol of ISU to alumni and students alike.

Iowa State College opened its doors in 1868. The first president's home was the old Music Hall, located in the southeast part of campus. More than 30 cottages were built by professors, who were granted the land from the college. Farmhouse, Sloss and Osborn cottages are the only survivors of this community.

The construction of The Knoll began in 1900. Its original cost was about \$12,720. The Edwardian and Victorian style house was modeled after a house on Grand Avenue in Des Moines.

It is a provision of the Presidency that the President should live in The Knoll. He is given a remuneration and a maintenance allowance.

President Beardshear and his wife moved into the beige-colored brick house in 1901. It was located on the corner of Knoll Road and Lincolnway. The President's barn stood at the south end of the present parking ramp. There was also a feedlot and pasture for Beardshear's horse, pony and cow.

The house was named the "Knole" by the wife of President Storms, who lived there from 1903 to 1910. Mrs. Storms, an avid reader, named the house after one of the finest castles in baronial England. It is said that she was disappointed when her husband's successor changed the spelling to "Knoll".

The Knoll has housed people other

than the college presidents and their families. Mrs. Storms rented rooms on the third floor to Japanese students who helped with yard work. A single gentleman who roomed there, met and married President Storm's secretary. In 1912, the Music Hall burned and the department was housed in The Knoll for the remainder of the year.

The Knoll was in deteriorating condition before the Parks moved in with their two daughters in 1965. The Iowa Board of Regents had authorized the university to take preliminary steps towards construction of a new off-campus presidential home.

However after living in the house for several months, President Parks said that he believed The Knoll should be preserved as the presidential home because of its importance to ISU tradition and that the president of a large, modern university should remain close to the center of campus activity.

The three-story house underwent extensive renovation. It contains seven bedrooms and five bathrooms. The house is furnished partially with items given or loaned to The Knoll, and the rest is personal furniture of President Parks and his wife.

ISU students might catch a glimpse of President Parks strolling up Union Hill from his home. The Knoll is located east of the Memorial Union Parking Ramp.

The Knoll is also a social center on the ISU campus. The Parks entertain various alumni, student and community groups throughout the year.

— Nancy Carver

A Japanese figure set carved from ivory greets guests as they arrive in the front of the Parks' home. The mother/daughter set which belongs to the Brunner Gallery collection, has a place on a table near the dining room entrance.

Used mainly for entertaining, the dining room in the center of The Knoll was redecorated after the Parks' moved to The Knoll in 1965.

# Engineer's Week

October 9-14 was observed as Engineer's Week at ISU. Several events and speakers were scheduled throughout the week.

The Keynote Address was given by Dr. Stephen Schneider on Monday, October 9 in the Great Hall of the Memorial Union. Schneider is head of the Climate Project, National Center for Atmospheric Research in Boulder, Colorado.

Russell Helms, the past president of the Iowa Engineering Society and currently with Mid-America Development Company of West Des Moines, was the banquet speaker at the Ramada Inn on Tuesday evening.

Paul Young of Doerfer Engineering at Cedar Falls spoke on Wednesday evening in the Great Hall of the Memorial Union.

A calculator contest and a backgammon tournament were held during the week.

Industrial displays were featured in Marston Hall on Tuesday and Wednesday. Displays of equipment were located in the library parking lot. Auto displays were located in the Armory.

Several industries were on hand during Engineer's Week to meet with interested students. Industrial displays were located in Marston Hall on Tuesday and Wednesday of Engi-

neer's Week. Industrial equipment was displayed in the library parking lot during the week.

**Dan Geiser**

# Career Awareness Week

Students were given a chance to meet future employers during Career Awareness Week held October 9-13. During the week representatives from 70 companies were available for informal meetings with students.

Different areas were focused on throughout the week: Tuesday — engineering and sciences and humanities; Wednesday — home economics, sciences and humanities, and engineering; Thursday — education and the extern program; Friday — graduate and professional schools.

The first annual Career Day, sponsored by the Home Economics Placement Office was held Wednesday. Over 40 employers discussed career possibilities with interested students. Business and industry, education, government and social service agencies were all represented. Students were given the chance to explore career possibilities through direct contact with potential

employers.

On Tuesday, October 10 a business communications seminar featuring mock interviews was conducted by Bill Paquette, director of career planning and placement at Drake University. The seminar was held in the Pioneer Room of the Memorial Union.

On Wednesday, October 11, career opportunities relating to energy research were discussed by W. A. Strauss. Strauss is chairman of the board and chief executive officer of Northern Natural Gas Company, Omaha. He is an ISU graduate. Strauss spoke in the Banquet Room of the Gateway Center.

Other events were scheduled throughout the week in relation to Career Awareness Week. Career Awareness Week was sponsored by the Student Alumni Association.

— Elaine Harvey

The first annual career day, sponsored by the Home Economics Placement Office was held in conjunction with Career Awareness Week. Over 40 employers discussed career possibilities with interested students. The career day activities were located in Lebaron and Mackay Halls.

Dan Geiser

2.

1.

Homecoming started early this year. ISU students could catch the excitement for six days beginning on Monday, October 30. Two new events were featured at GrandDaddy's with a dance contest and monster arm wrestling competition.

Tuesday was celebrated with the annual Train Wreck at noon. Two groups, one starting at Beardshear Hall and the other at Curtiss Hall chugged toward each other, ending with a mass collision near the flagpole.

A Baby Cy contest was held at North Grand Mall to find the best Cy look-alike costume. The contest was open to kindergartners to sixth graders. The winners were featured at the half-time of the ISU-Kansas State football game.

At Wednesday noon, students participated in a "Cy Walk" to generate spirit for the weekend.

Thursday night a bonfire and pep rally were held at the site of the former Clyde Williams Stadium. At midnight a mass companiling was held.

Friday, with classes dismissed at noon, students gathered on central

campus for a pep rally. Featured were Yell-Like-Hell skit finals and Push-Ball tourney finals.

Highlighting Homecoming Week '78 was the ISU-Kansas State game on Saturday.

'Cy's Favorite Alum' was presented at half-time. Dr. James H. Hilton, a 1923 ISU graduate and the only alumnus to be named president of ISU, was named Cy's Favorite Alum for 1978.

The Iowa State Center was the result of a dream Hilton had while president of ISU. Hilton Coliseum is named after him.

ISU was victorious 24-0 over Kansas.

State. Many alums came to help cheer the Cyclones on for their Homecoming victory.

Saturday night featured Moody Blues in Hilton Coliseum for the Homecoming concert.

A Homecoming dance, featuring New York's Don Dino and band was held in the Great Hall.

# WOMEN'S WEEK - OCT. 16-21, 1978

The issues of women and power were the focus of the fifth annual Women's Week Conference. The conference was held from October 16-21.

"Power in Our Lives" was the theme of the workshops, films, and panel discussions held throughout the week.

Major speakers for the conference included Anne Wilson Schaefer, Jane Galvin-Lewis, Jane Trahey and Eleanor Haney.

Schaefer is a nationally known feminist therapist, writer and lecturer and co-founder of the Women's Institute of Alternative Psychotherapy, Boulder, Colorado. Galvin-Lewis is the founder and coordinator of the National Black Feminist Organization, New York, New York. A corporate advertising consultant, Trahey is a founder of the First Women's Bank and Trust Co., New York, New York. Haney is a professor in religious ethics, Concordia College, Moorhead, Minnesota.

Ginni Clemmens, a Chicago folksinger, presented a banjo concert in the Benton Auditorium in the Scheman Building on October 20.

Women's Week is sponsored by the University Committee on Women and is funded by the GSB (Government of the Student Body.)

— Elaine Harvey

Ginni Clemmens, folksinger and banjoist, presented a concert in Benton Auditorium on October 20 in the Scheman Continuing Education Building.  
**Jane Jasper**

During her concert, Ginni Clemmens encouraged local performers to share some of their music. Several women took part, and their music was enjoyed by all.

**Jane Jasper**

"Women and the Power of Nonverbal Communication," was the theme of a workshop held in the Scheman Continuing Education Building on October 16.

**Roger McGregor**

Women's Week Conference was represented at the Activity Fair held in the Great Hall of the Memorial Union on September 29.

**Dan Geiser**

# Get Lucky in Lawrence: Migration '78

Even though Migration '78 didn't attract as many people as hoped, those that did go agreed that "it was a really good time," according to migrant Barb Bushur.

"C-Y They're All Going" was the theme plastered on T-shirts bought by migration enthusiasts. Why did they all go? Well, the way it turned out, to see the Cyclones beat the University of Kansas and to have a good time.

"Everything went as planned," according to Cindy Otto, co-chairperson of the Migration Committee.

About 45 students rode the bus which pulled out of Ames at 1:30 Friday afternoon for the five-hour ride to Lawrence, Kansas. "Once we all got to know each other," Bushur said, "it was smooth sailing."

Friday night the migrants met in a

tent which the committee had arranged to be set up near a Lawrence bar. From 8 p.m. to midnight the group was entertained by the Dixieland Jazz Band. Then it was on to Lawrence community hall for an all night party which, Otto said, "went over the best of everything."

"Not too many people showed for the pep rally Saturday morning," Otto said. The cheerleaders did make it, and after a few rousing chants, off they went to the football game.

Buttons were sold at the game which read, "Get Lucky in Lawrence." Otto said she thought as many Lawrence people bought them as Cyclone fans.

After the game it was back to the tent for a pig roast. The owner of the nearby bar arranged for the food. "He was real nice," Otto said, "and told us

to come back anytime."

Saturday night activities were left up to the whims of the migrants. Bushur said some went to a party thrown by a couple of Kansas Greek houses and the rest were off to the bars.

The bus back to Ames left about 9 Sunday morning.

Otto said about 200 students participated in migration activities though most of them did not buy the \$40 weekend package. No matter how they got there, Otto said she heard only good things from the students who went.

The committee-organized activities were sponsored by the ISU Pep Council and GSB. Otto, Julie Petersen and Laurie Evans were the Migration Committee Chairpersons.

— Pamela Drum

# Kaleidoquiz

Kaleidoquiz '78 was held the first weekend of winter quarter. Students in residence halls answered trivia questions broadcast over KPGY, the campus radio station. KQ started at 3 p.m. December 1 and concluded at 5 p.m. the next day. Each question was worth a certain number of points. The winning houses were: first place — Bennett and Anthony Houses, second place — Brown House, and third place — Lange and Tappan Houses.

Trivia books were the main source for answers to the questions asked at KQ.  
**Roger McGregor**

Manning the phones was an important job during KQ. Houses used code names to identify themselves when answering questions.

**Dan Geiser**

Houses kept score along with KQ Headquarters to make sure that no mistakes were made.

**Dan Geiser**

# Winter ...

Snowfences line the campus in winter to prevent drifting snow.  
**Joel Herr**

Squirrels can be seen on campus year round. Here, a squirrel gathers berries for the winter.  
**Richard Bruce**

Winter is the time for cross country skiing and hikes through the woods.  
**Sherry Edwards**

Winter Quarter . . .  
Most students will admit that  
winter quarter  
is their least favorite of all.  
Impossible.  
Ridiculous.  
A little bit of cold fresh air . . .  
Snow, glistening in the air,  
on the ground, in your hair.  
Bundled up from head to toe,  
walking mummies in a row.  
Making angels in the snow.  
From snowball fights to ice skating,  
and sledding to snowmobiling,  
winter can be fun.  
With winter,  
comes the season to be jolly  
full of mistletoe and holly.  
Christmas caroling around the tree  
spreading joy for you and me.

Happy New Year, we all shout,  
the new year will be grand  
without a doubt.  
Short-cuts across Lake LaVerne,  
falling in is of no concern;  
the lake is frozen solid.  
A fire burning in the fireplace  
will help to erase  
the chill of the night.  
And when it seems right,  
hot chocolate  
with a shot  
of Schnapps  
seems to hit the spot.  
Winter . . .  
cold, but true  
sometimes blue  
but we always make it through.

— Elaine Harvey

Jerry Schray, 12 of Ames, found that the  
winter snow can be used to his benefit.

Braving the cold outside of Old Botany.  
**Richard Bruce**

# Christmas . . . . . . at ISU

Christmas trees complete with presents, decorated the apartments and rooms of ISU students.  
**Sherry Edwards**

ISU students came from all directions, bundled warmly, and headed for the steps of Beardshear Hall. Some carried candles and all waited in anticipation of December 6th's annual lighting of the Central Campus Christmas tree.

Despite the cold weather, the students huddled together listening to University carillonneur, Richard Von Grabow play Christmas music. Then the ISU Singers performed their rendition of traditional Christmas songs under the direction of Robert Mollison, director of ISU choral activities. ISU President W. Robert Parks delivered a holiday message of hope for peace and good will to the cold, shivering students. The students cheered as Parks threw the switch lighting the tree.

After the bright, colored lights were lit, the ISU Singers performed again. When it was over, most students quickly dispersed as the carillon again rang out, signaling the end of this traditional event.

ISU's Christmas spirit did not end there, however.

President Parks addressed the ISU students at the Annual Central Campus Christmas tree lighting ceremony.

**Mark Perkins**

The ISU Singers performed at the Christmas tree lighting ceremony.

**Mark Perkins**

ISU's musical Christmas traditions were carried out during the 23rd Annual Festival of Music held on December 9-10. The concerts were held in C.Y. Stephens Auditorium featuring the theme, "Nowell" (Christ is Born).

The two evening concerts involved the Iowa State Singers, Oratorio Choir, Iowa State Symphony, the Brass Choir and a dance group. The choruses and orchestra performed the Christmas cantata "Hodie" by Ralph Vaughn Williams along with some popular Christmas carols.

At the Sunday matinee, Iowa State Singers, University Chorus and Chamber Singers provided a family-oriented concert. This performance was divided into sections that described and focused on different aspects of Christmas.

In addition to participating in these events, students found time to relax and enjoy the Christmas spirit by going to parties, caroling, and exchanging gifts. And the decorated Christmas trees and lighted windows gave a daily reminder that Christmas 1978 was an important event at Iowa State.

— Anita Schmitt

# Varieties '79

Alpha Gamma Rho and Delta Zeta were the first place winners in the skits division for Varieties '79.  
Bob Carson

E. Stanley placed third with "Little Bit of Everything" in the Vignette division.  
**Bob Carson**

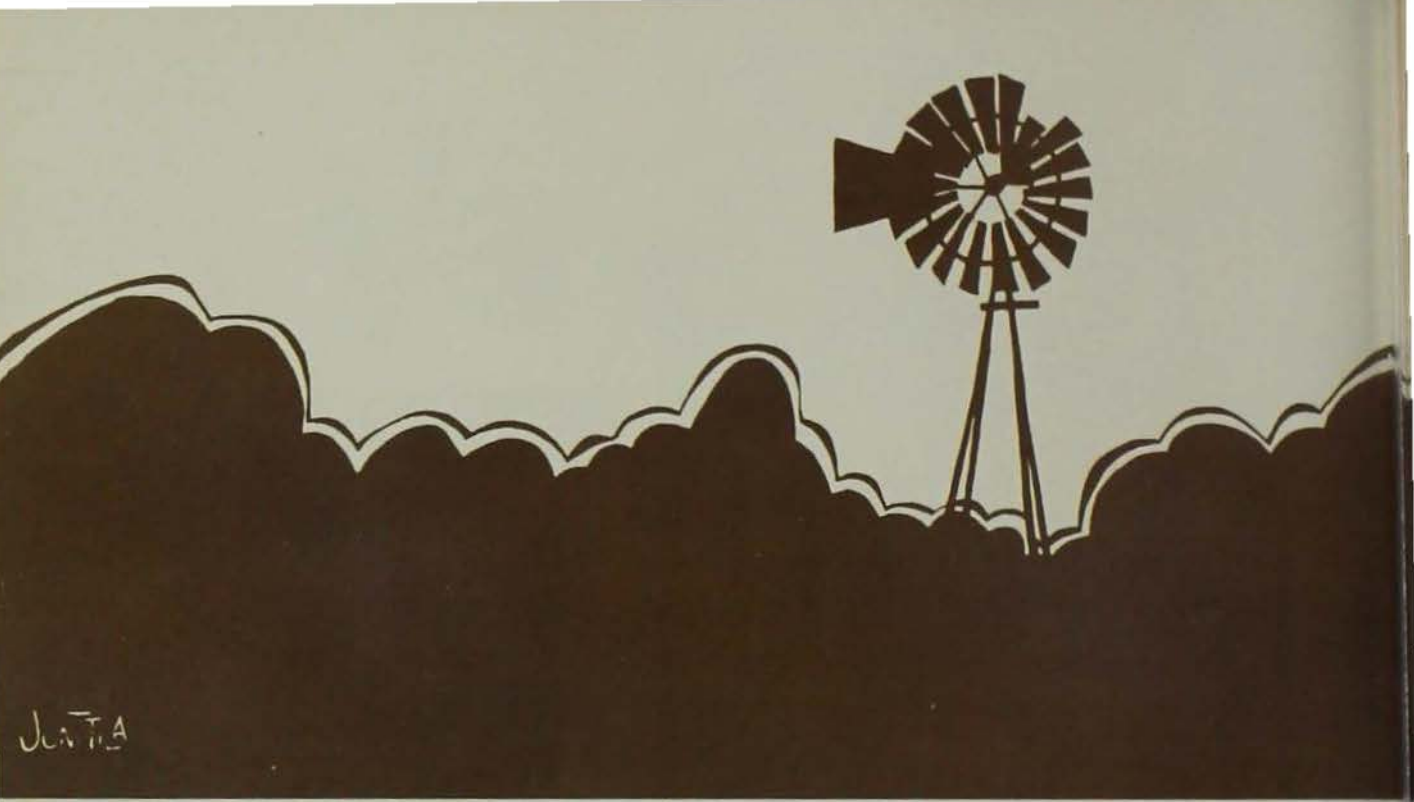

Varieties '79 was a combination of time, energy, hard work, and fun. The excitement was in the air from the first Friday night performance on Jan. 12, until the Sweepstakes performances, given on Feb. 2 and 3. The costumes, dancing, music, and acting all added up to entertainment plus.

The Varieties '79 winners were:  
 Emcees: B. Mamachino, J. Paulo  
 Vignettes: "My Ole Kentucky Home"  
 R. Wiley, J. Yanny, S. Brackledge, P. Corbin, P. Gassman, B. Runge, M. Hennessary (pianist)  
 Skits: "The Good Gesture"  
 Alpha Gamma Rho — Delta Zeta  
 Disco Dancers: Holbrook, Synhorst  
 Tap Dancers: Roth, Roth

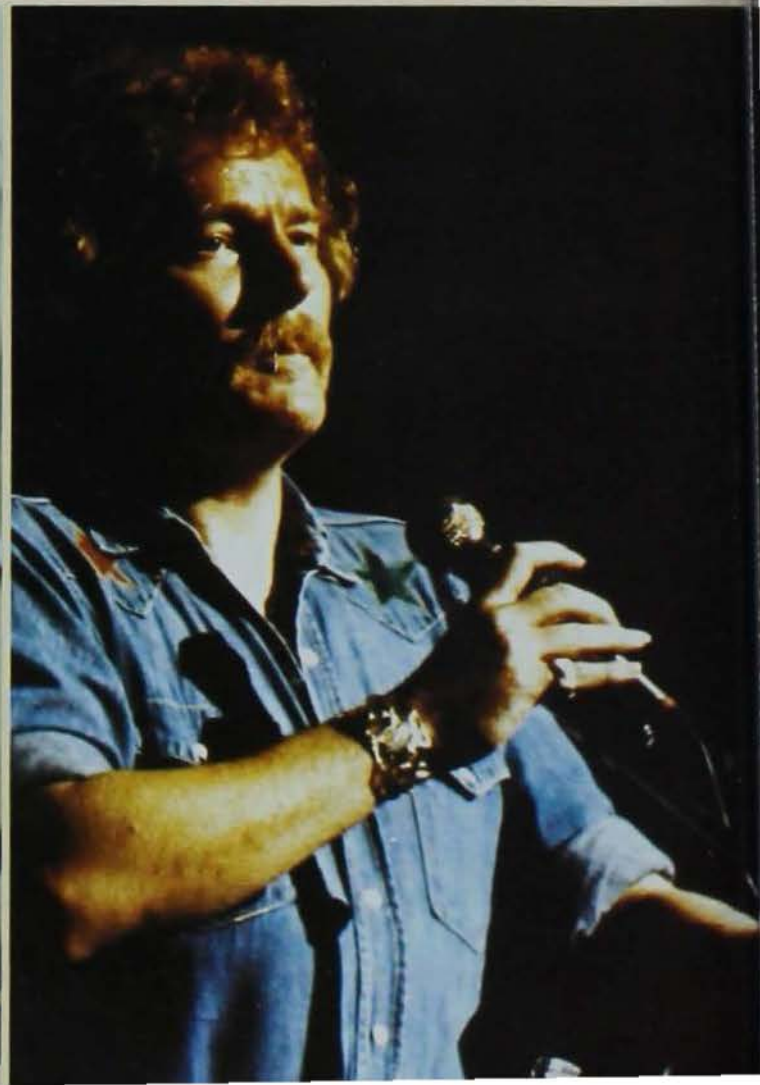

Holbrook, Synhorst took first place in disco dancing for Varieties '79.  
**Bob Carson**

"At the Psychiatrist" was performed by J. King and D. Jantz.  
**Rod Mickels**

JAN 7, 1975

# ARTS & ENTERTAINMENT

. . . Key to your horizons

## What to do • • • when there's nothing

What do you do when there's nothing to do and no money to do it with? Measure the cracks in your walls, count the number of holes in your ceiling, or play a rousing game of tic-tac-toe with your roommate? Just what is there to do in a small college town like Ames? If you look in the right places, you'll find recreation, sports and cultural sites around which are available for free or at a minimal fee.

Where is there to go to enjoy the outdoors in Ames? The city is filled with parks, Brookside, McCarthy Lee and Innis Grove, among other smaller parks. In these parks, you'll find facilities for picnicking, tennis, baseball, football, basketball and for the children, as well as nature trails for hiking.

Now that you have the facilities, how can you put them to their best use? To begin with, check out the Outdoor Resource Center located in the Armory. For minimal daily fees available to students, you'll find campers, tandem bikes, canoes, sailboats, rowboats, tents, back packs, camping kits,

Brookside Park can offer a quiet place for those who enjoy just being outdoors. The Outdoor Resource Center at the Armory provides back-packs, unicycles and more.  
**Doug Sheldon**

coolers, volleyballs, footballs, lawn darts and softball and badminton sets. Whew! And that's just to name a few!

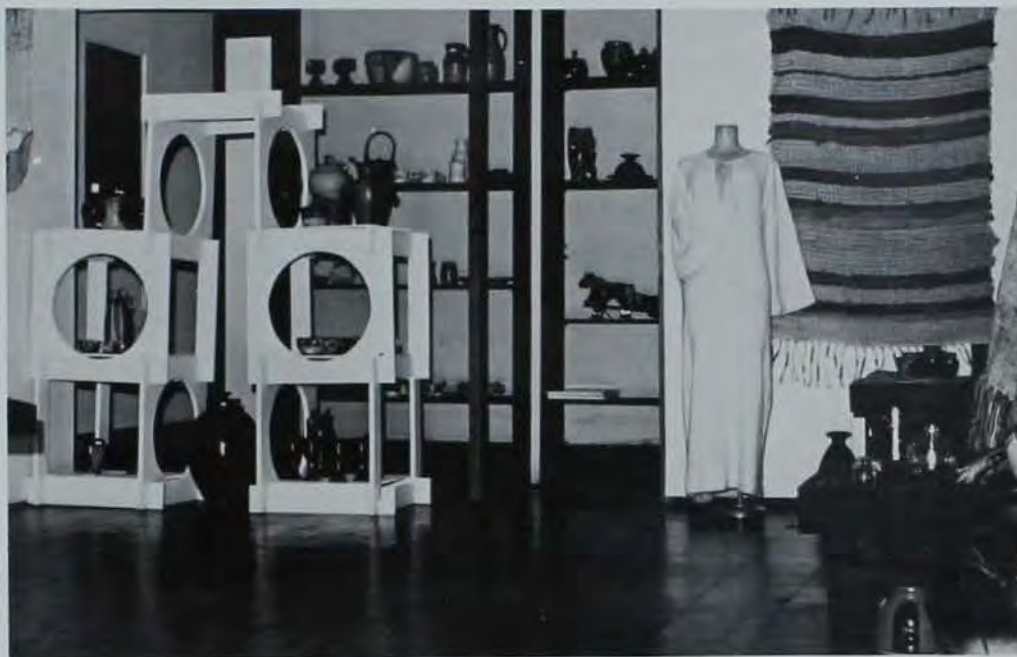

Where could you go if you wanted to go out of town? There are several area parks, Hickory Grove (east of Ames), Ledges (west of Ames), Little Wall Lake (north of Ames), and Jester and Big Creek (south of Ames). Directions to any of these areas can be found through maps checked out from the library or obtained from gas stations.

Where are there cultural exhibits to visit in Ames? The Brunnier Gallery, located in the Scheman Continuing Education Building, houses several different exhibits throughout the year. The Brunnier Collection is also on display as a permanent part of the exhibit. The work of ISU faculty members, ISU students and children's art work is shown in the gallery during different times each year.

Another Art exhibit facility in Ames is the Octagon, located at 232½ Main Street. The Octagon also has a shop located at 427 Douglas where artists sell their work.

What is there to do at night for entertainment? One option is to see a free flick provided by the residence halls for residence hall students.

Biking is a great way to be outdoors on beautiful fall days.  
The Octagon offers local artists a place to show and sell their work.

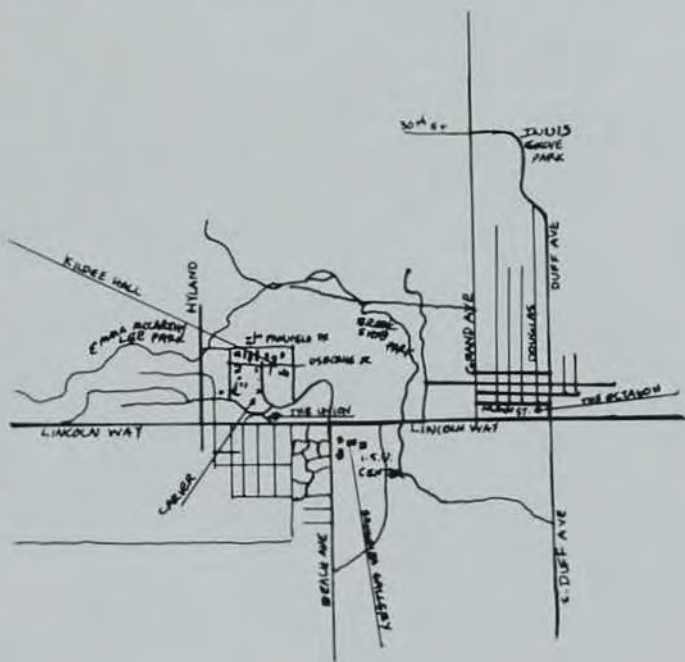

## to do!

Each student is allowed one free guest. The Iowa State Center offers free tickets to several events throughout the year due to funding from GSB.

This stuff is fine for most of the year, but what do you do when winter rolls around? Again, you can turn to the Outdoor Resource Center for such things as cross country skis, snow boots and ice skates, all at minimal fees. Once you have the equipment, you can skate on Lake Laverne or along the city's frozen streams. You could cross country ski anywhere, up and down campus or through fields outside the city. With snow shoes, you could go hiking through parks or up and down large hills in the area.

With all these new opportunities and ideas, you may have a hard time making a choice! Well, if all else fails, fill the cracks in your walls, paint your ceiling and learn how to play chess.

# LECTURES *Donald Kaul*

The United States and Donald Kaul are both going through a "mid-life crisis."

Kaul, a Washington D.C. columnist for the *Des Moines Register*, spoke before a crowd of nearly 1000 people on central campus May 5th as part of the Veishea celebration.

"I think I am entering what they call a male mid-life crisis," said Kaul, who writes "Over the Coffee," a column in the *Register*.

"But that's not necessarily bad because, actually, it sounds like fun. The way I understand it, you quit your job, ride around on a motorcycle and chase pretty girls all the time."

Kaul also says that this "mid-life crisis" is also happening in America in lifestyle and politics. Kaul said that the "mid-life crisis" starts when people get bored with the way things are and start to think everything is not as great as it could be.

Kaul said that, "this country's mid-life crisis can be solved like every other mid-life crisis. We need a boot in the tail. We need to stop feeling sorry for ourselves. And we have to start doing some meaningful work."

— *Jeanne Handorf*  
Dan Geiser

Carol Roorda

# *Judith Jarvis Thomson*

The right to life was the subject of a lecture presented by Judith Jarvis Thomson, April 18 in the Sun Room of the Memorial Union.

Thomson, a professor of philosophy at the Massachusetts Institute of Technology, spoke on "Abortion: the right life," but talked little about abortion. She dealt mainly with the subtopic, the right to life, and cases when it may be "morally permissible to kill."

Thomson drew no argument in favor of or against abortion. She tried to point out that although we have the right to life, at times it may be voided.

# Anthony Lewis

The observance of Law Day 1978 brought Anthony Lewis, a former United States Supreme Court reporter, to Iowa State.

Lewis spoke on "Law and Politics" before an audience of 200 in Benton Auditorium of the Scheman Building, April 19. The two-time Pulitzer Prize winner discussed his philosophy of the judicial role in American politics.

Lewis centered his talk on evaluating the increased criticism directed toward the judiciary. The critics who say judges exercise too much power, he said, should put themselves in the judges' places. That kind of criticism overlooks the consequences that a weakening of the courts would have on life in this country.

The power of judges to overrule government decisions, Lewis said, is essential to our democratic system. He added that enforcement of the Constitution must be left up to the courts.

Lisa Bennett

Lewis said he doubts that Americans would want to live without the protection of the courts.

The right of individuals to take issues to court are the citizen's answer to the lobbying power of big business or big bureaucracy. Therefore, Lewis said, many important decisions arising from individual lawsuits have nourished democracy.

Stressing their accessibility, Lewis said the courts have a useful place in our system and they should remain there.

Lewis is presently a New York Times columnist and a professor at Harvard University.

He is also the author of two books, *Portrait of a Decade* and *Gideon's Trumpet*.

— Mark Halverson

The lecture, sponsored by the ISU Department of Philosophy, was opened with the question, "What is the right to life we all think we have?" Thomson went on to say that she felt this is not a single right but rather a cluster of rights.

"The right not to be killed" was the first issue brought up by Thomson. "It is the right that opponents of abortion put their case on," she said.

Exceptions to this right were times when "it was morally permissible to kill," said Thomson. She gave the example of a man attacking an outside person with an army tank. In this case, the man in the tank presents a threat to the outside person who has given up the right to not be killed. Thomson said that it is morally permissible for the

outside person to use his anti-tank gun on the tank in order to kill the driver.

Controversy began to grow when Thomson talked of trade-off cases. She gave both permissible and non-permissible killing situations in these examples. She used the example of trading one life for five in these cases.

Her discussion turned from here and went toward the absoluteness of rights. If the right is absolute, then any infringement on this right is a violation of it, Thomson said.

Thomson closed by telling the audience "not to take quick argument with this issue. It is an issue that needs to be looked at openly."

# ART IN THE PARK

Art in the Park, one of the largest art fairs in the state, drew 130 artists from all over the Midwest to Ames last September.

The fair, sponsored by Ames' Octagon Art Center, is a regional art festival for the sale of quality art work. The media the artists work in cover a wide range, such as fiber, clay, glass, wood, metal, drawing, painting, photography and print-making. All of the items that were displayed must have been designed and made by the artist.

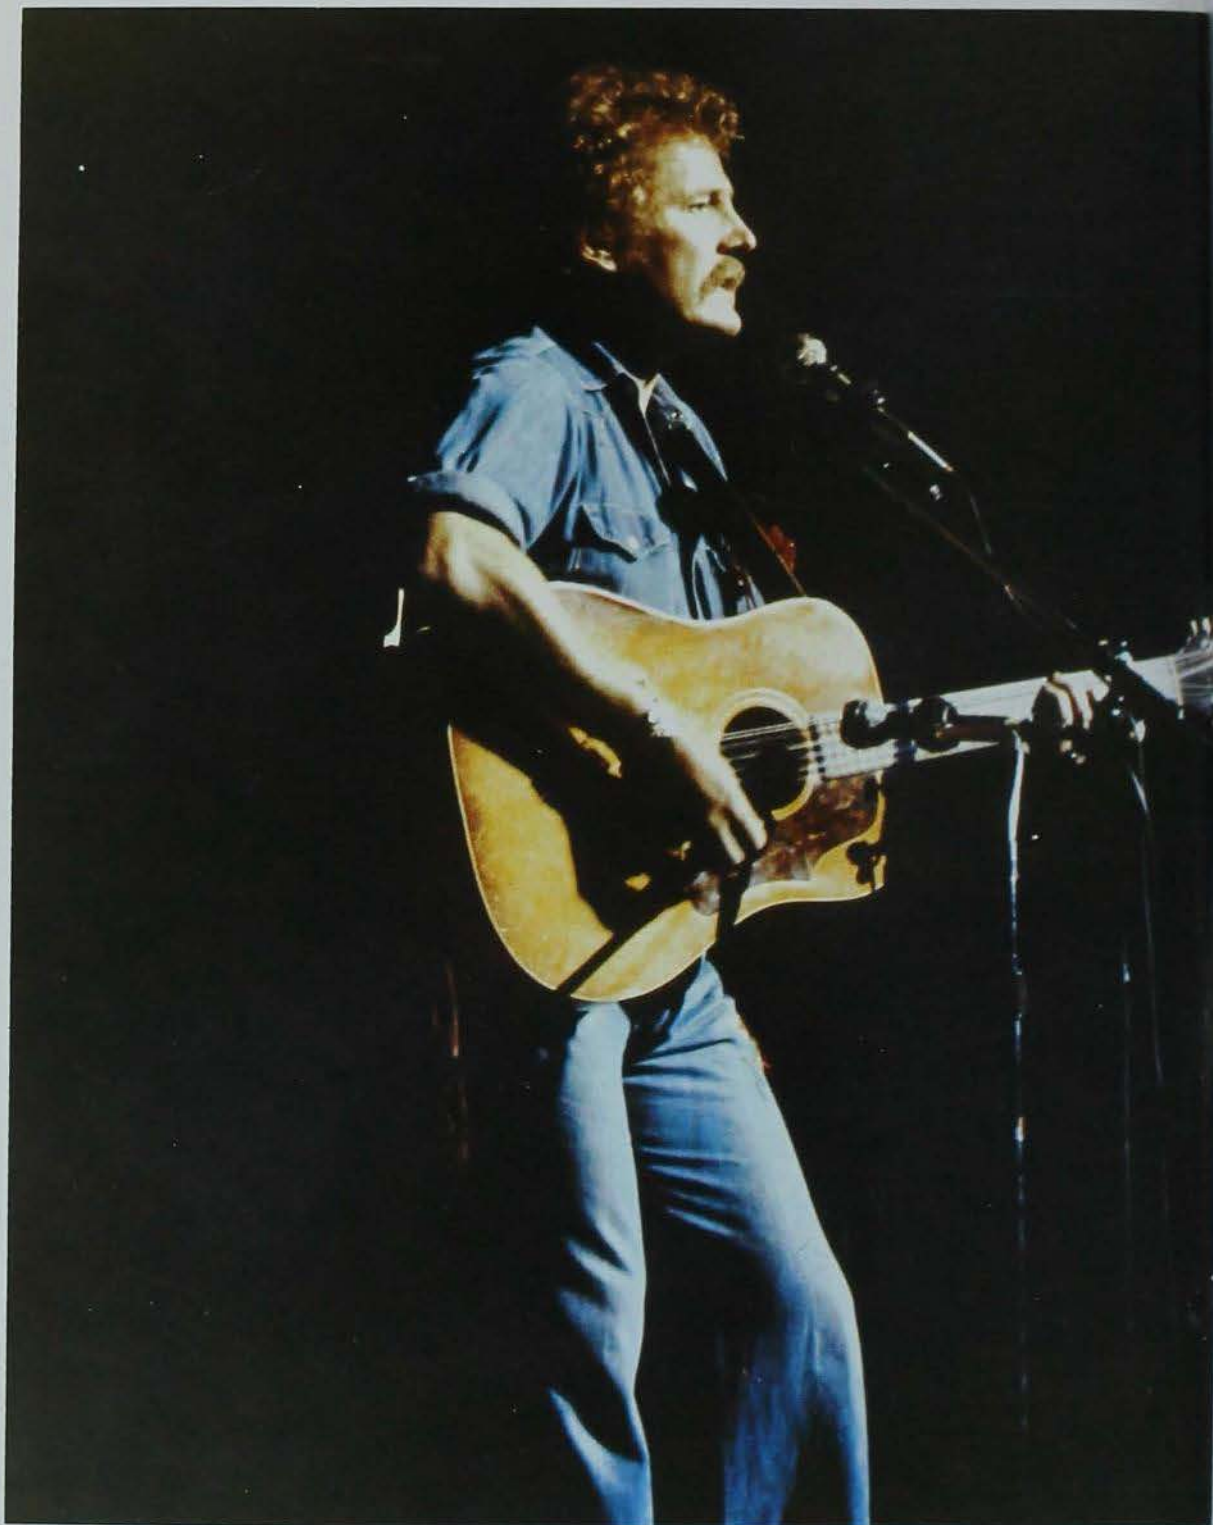

Art in the Park offers Ames area residents the opportunity not only to view and buy artwork, but it also provides food, music and special activities, such as making up children's faces with clown white.

## Band: More than horns and halftime

"Band! Ten-hut! Ten-hut!" "Go State! Go State!" Marching Band is more than just a halftime show on Saturdays. For 240 people, it means practice, practice, practice.

Not even rain or snow will prevent the band from rehearsing two hours a day.

Rehearsal involves learning new formations and new music every week. Drilling is done on turns, three-quarter spins, fast marching and running circles, better known as cyclones.

With all of this, the band still had energy left to perform the Cyclone Shuffle — one of their new cheers this year. Shaking Coke cans to the pop tune "Copacabana" and clarinets exercising to "Sir Duke" were other spices the band added to its shows.

The band's work didn't end with the halftime shows, however. In order to finance their trips, band members and directors took on the big job of cleaning the stadium after the games. This four-hour ordeal involved picking up bottles, cans, confetti, trash, and clean-

ing the bleachers, bathrooms and the field.

Most of the members felt it was worth it since it meant an extra trip to a professional game — the Kansas City Chiefs versus the Cleveland Browns. The band made a second trip to the Iowa Bowl and another to migration at the University of Kansas at Lawrence. Students looked forward to the trips for the excellent food and memorable bus rides.

"The Band wants a keg!" was a chant often heard and which often came true as they played the theme songs of popular brands — Coors, Budweiser, Hamm's and Miller. The

band was an aid to the cheerleaders and pom pon girls in firing up the crowd, yelling cheers like, "Let's Go State!" "Rape, Kill, Pillage and Burn!" They also added a few of their own, the caveman cheer and a silent yell.

The band was always heard to respond to their dismissal — "What Big Eight University Band is the most hard-working, energetic and fun-loving band in Ames, if not the world? Iowa State, Iowa State! Iowa State!"

# Duck's Breath Mystery Theater

Duck's Breath Mystery Theater came alive in a crazy conglomeration of skits in a Saturday Night Live — Monty Python — Steve Martin type format. If you are familiar with any of these comedy specialists, you know that it's nearly impossible to explain their highly visual antics with words alone.

The show began with one actor running out on stage and doing imitations of famous people chewing gum. He did everyone from Farrah Fawcett to President Carter to Chevy Chase.

Another character strolled out holding a little doll and announced, "Redemption": written by the blond guy, directed by the blond guy and starring the blond guy." (The character that announced this was the blond guy!) He got down on his knees, mumbled a prayer, tossed the doll up in the air and screamed, "Give it back, God!" The doll fell back into his hands. He looked up and said, "Thanks, God." Then he got up and walked off stage.

Duck's Breath Mystery Theater is a San Francisco-based troupe of five men who started at the University of Iowa in 1975. They are completely responsible for the writing and directing of all this insanity.

A popular skit with the audience involved the physical demonstration of

classical works of art, such as "The Birth of Venus" and Duchamp's "Nude Descending a Staircase." A museum guide narrated the different works while the other four actors shaped their bodies into these three-dimensional exhibits.

In another routine, a man in a suit and carrying a briefcase introduced himself as John Kordick and gave his three bits of advice: always carry money, never carry anything larger than a pocket calculator and never put anything on your desk that is bigger than your fist. He explained the "why" of these rules which made about as much sense as the rules themselves.

Another actor came out and said, "You're probably thinking to yourself, 'Yes, they are funny, but can they do opera?'" So, guess what they did? They acted out the sale of a used car in opera form. After the opera one of the actors playing an emcee announced, "next week's show will present the epic wrestling match between Beethoven and John Denver."

If all of this sounds like total nonsense to you, you're right. It was. But for those who had never seen a classic work of art before, Duck's Breath created one with its own touch of bizarreness.

— Marla Glen

# Second City

Zany, offbeat comedy ran rampant through C.Y. Stephens Auditorium in September as Second City, the hilarious Chicago-based group, appeared on stage.

The group provided comic relief relating to today's society at every level, covering such topics as love, death, money and politics. Their short, impromptu sketches satirized everything from TV advertising, with a play on the cereal commercial that says, "Let's let Mikey try it first," to psychiatrists with a sketch on group therapy and how to "get rid of your sexual hangups."

The group used few props, no sets, and improvised costumes, usually including street clothes. Their routines are easily adaptable to audiences across the country.

A favorite of the Iowa State audience was a sketch about a taxidermist who

invites his girlfriend home to meet his parents. She arrives at his house to find his parents are unusually quiet — because he's stuffed them too! When the police arrive to rescue her, she finds they are also stuffed.

A unique routine adapted by Second City is a sketch involving the audience. A member of the group acted as narrator and began a sketch with a situation she described. Periodically, the narrator shouted "freeze" and asked members of the audience to supply a word to finish the phrase. The improvisationists would then have to act on that word and take the sketch from there until stopped again.

Second City was something different for the Iowa State audience and certainly an evening enjoyed by all.

# BLACKSTONE

The magic and art of illusion of the renowned Great Blackstone were brought to the stage of C.Y. Stephens Auditorium Saturday, October 7, when Harry Blackstone, Jr. and Company carried on the tradition of the late older Blackstone.

The performance, professing to be "something that you'll remember the longest day you live," was a very theatrical production.

Blackstone, outfitted in a sequined suit, opened the show by popping a caged bird into thin air.

Living up to the honor of being America's official Bicentennial magician in 1976, Blackstone captivated his audience — which consisted of "children of all ages" — by suspending a drum in mid-air from which appeared red, white and blue doves, flags from all fifty states and a live elephant and donkey.

The show was complimented by Blackstone's quick wit, which really shone at the moments when the magician asked for volunteers from the audience to help execute tricks. One such volunteer even had the shirt he was wearing jerked off his back without first having his jacket removed.

More magical were the acts involving Gay, Blackstone's wife. In one stunt, she appeared to have been cut in half by a giant buzz-saw. In another, Blackstone magically made his wife disappear, only to be replaced by a gigantic tiger.

Spirits seemed to be present when the magician made a handkerchief belonging to a man in the audience mystically leap and dance across the stage.

Next, an illuminated green ball floated through the air out over the audience. The onlookers were even

more confused when Blackstone passed a ring around the ball, proving there were no cables involved.

Indeed, Harry Blackstone, Jr. and Company allowed "children of all ages" to sit back and enjoy an evening of magic — where nothing is impossible.

— Doris Siverson

Craig Trumbo

# Hart and Corriere

"Dreams are simply pictures of a person's feelings." Joseph Hart and Richard Corriere emphasized this many times during their lecture, "Dreams, Feelings and Consciousness," Sept. 13.

Hart and Corriere, with their provocative ideas and humorous showmanship, entertained an audience of 300 in the Sun Room of the Memorial Union. Those attending listened intently to their theories on psychotherapy which were spiced with jokes and stories about their own experiences with dreams.

"The way you are in your dreams is the way you are in your waking life. It's just easier to hide your feelings in your waking life," said Hart, an associate professor at the University of California.

"Dreams are pictures of your feelings. If you're confused or anxious in your dreams, that's the way you are in your life," added Corriere, a therapist and co-founder of the Center for Feeling Therapy in Los Angeles, California.

A slide show was presented emphasizing the importance of understanding dreams and introducing the concept of "psychological fitness."

Corriere said, "We like the idea of psychological fitness because over the past few years, people have adopted physical fitness. People are taking care of their bodies. Now, people need to start doing that with their psychological bodies."

They explained that one way of becoming psychologically fit is through understanding their dreams.

Most people do not remember their dreams or remember only fragments of them. Hart and Corriere said they have a simple way to remember dreams. Before going to bed, a person should ask himself how he feels. He should ask this same question when waking up the following morning.

Secondly, they said a person should invent a daydream sometime that

morning based on that same feeling he woke up with.

Corriere said that this process works like a pump primer. "If you do this three or four mornings in a row, within a week, you will begin remembering more and more of your dreams."

The two claimed that by remembering dreams, people are better able to understand how they feel during their waking hours. They also said that this insight could help people evaluate their personalities and work on those parts needing improvement for the sake of happiness and self-fulfillment.

The two are authors of several books, including, *The Dream Maker* and *Going Sane*. They have discussed their theories on many television shows such as, "The Tonight Show" and "Good Morning America."

The lecture was sponsored by the Government of the Student Body and the Committee on Lectures.

Photos by Carol Roorda

# Bill Baird

*"I will defend to the death the right for a woman to choose for herself whether or not to continue her pregnancy."*

— Bill Baird

These words began what was perhaps the most controversial lecture of the year as Bill Baird spoke on the topic of abortion.

Baird, an advocate of abortion rights, spoke to a small yet emotional crowd October 24 in the Sun Room of the Memorial Union, defending women's rights to abortion.

Baird was called the "father of the abortion movement" by the United Press International. He appeared before the U.S. Supreme Court in the 1972 Baird vs. Eisenstadt case which legalized birth control for single people. This case was cited six times in the 1973 Supreme Court decision to legal-

ize abortion nationally.

Baird began the lecture by explaining some unknown facts concerning the misuse and ineffectiveness of many birth control methods. He continued using a chart displaying all the possible birth control devices.

Another chart displayed some of the crude devices which Baird claimed were used by women to self-abort before legal abortions were made available.

Baird questioned the audience, "If you think of abortion as a crime, what penalty would you assign to the woman who seeks an abortion?"

He challenged the audience to name

one state or nation which "decreed by law" an embryo to be a person. "If I handed you an acorn and asked you to give me \$100 for an oak tree or gave you an egg and said it was a chicken, what would you say?" Baird asked. "It is ridiculous to say that an embryo, one-fourth the size of a pencil dot at conception, is a person."

Baird said he had often encountered opposition to his beliefs and added, "Not a week goes by that I don't get a death threat." He said that some of his worst opposition had come from Iowa and the Midwest.

An anti-abortion group attending the lecture was a newly established one from Iowa State called SOUL (Save Our Unwanted Lives). SOUL distributed anti-abortion literature before the lecture and took part in rebuttal with Baird afterwards.

After the question and answer period began, Joni Fangman, SOUL president, announced that SOUL would begin a discussion meeting and invited the audience to leave with her. Approximately 25 people stood up and left the lecture to go to the SOUL meeting.

Some anti-abortion persons, angered by the speech, remained and claimed Baird had spoken untruths and was rude to students expressing opposing views.

Baird has been in and out of jail to support his cause. He said that he used most of the money he received as a lecturer to set up abortion clinics and to fight anti-abortion laws.

Baird left a warning with the audience, "Within three years, you will lose abortion laws in this country through default, so I urge those of you to write your congressmen to support these laws or you'll lose them."

Baird's speech was sponsored by the Committee on Lectures.

## Picassos and pirouettes

*Not knowing the difference is no excuse not to attend art exhibits or ballets.*

What's a Picasso? Is that a pizza? Who's Beethoven? Isn't he the dean of student life? How do you do a pirouette? A what?

If these questions sound confusing to you, you're not alone. Many students have been and are enrolled in university arts appreciation courses to learn more about these "mystifying subjects."

ISU's Applied Art department offers AA 103, Introduction to Design. This non-studio lecture course places emphasis on art elements, principles, design, how an artist designs and what he actually does.

According to Jon Sontag, Chairman of the Applied Art department, although AA 103 involves as many majors as non-majors, the course is taught with the idea that the students have no art background. "We don't assume that our students are art majors. I feel that we shouldn't deal only with the art specialist. It's important that our department and the university as a whole broaden their approaches to the non-specialist. After all, these are the people who will populate the audience for the performer or the artist. You can't support one without the other," Sontag said.

Richard Vongrabow, associate pro-

fessor of Music History and Literature, said the Music department offers four courses in what might be called "music appreciation."

The courses, Music 102, 105, 106 and 107, are designed for the general student. Music majors are prohibited from taking them. "The course outlines are written with the non-musician in mind. It's a type of 'consumer education' designed for the person who doesn't read music," Vongrabow said. "Eighty-five per cent of adults after college graduation are listeners, not performers. Even so, most high school and college courses, like band and chorus, are geared towards the performer."

"These music courses give the student more sensitive ears. They don't teach how to appreciate. You can't teach or tell a person how to appreciate," Vongrabow said. "A teacher can't say you should like this because it's written by Beethoven. If someone hates Beethoven, that's his own business. What a teacher can do is tell the student when a piece is technically good or bad."

Speech 106 is a course which focuses on the discipline and choices of the arts, said assistant speech professor Sue West.

About half of the course focuses on

theater, but film production, dance and music are also included. "Theater is a synthesis art. It's a coming together of all the art forms. Speech 106 is a general course for the non-major, but it's also a beginning point for the actor because it shows him a relationship between the arts," West said.

West said her students learn how to evaluate a performance rather than appreciate it. "Appreciation is a vague word. I don't like it. I like to think that my students evaluate. Evaluation is really a step up from appreciation. It's a tool you use to appreciate," she said.

Dance instructor Margaret Stoffregen said Dance Appreciation, Dance 270, is designed for anyone. Non-majors can learn to understand what they watch, she said, and dance majors can benefit by being able to look at the overall picture, instead of just one narrow view.

Dance 270 leads its students to compare and recognize the differences and the similarities between the different dance forms, Stoffregen said. "We learn why ballet uses toe shoes and modern doesn't, for example. The students can then decide what they like and what they don't like and they'll know why," she said.

—Lory Stille

# Pre-performance shows educate Iowa's "hicks"

Iowa audiences have been said to be "backward" concerning the performing arts. Whether or not you agree with this statement, audiences at the Iowa State Center have no excuse for not understanding a performance.

According to Cynthia Shumate, Audience Education Specialist at the Center, these sessions were designed to give members of the audience background information concerning the event which will give them greater insight, understanding and enjoyment of the total experience.

The 45-minute presentation usually begins at 7:15 in the Celebrity Cafe of C. Y. Stephens Auditorium. The sessions may include the background of the company, a synopsis of the story, information about the people involved in the production or some of the show's music.

Each pre-performance program is different from any other. Presentations are aided by slides, films, music, photographs or demonstrations.

Shumate said she is trying to incorporate local professionals into the pro-

gram, noting that they are often better informed in certain areas than she is.

"In the future, I hope to see more sessions where the artist himself comes down to talk to the group," Shumate said. William Windom did this before his presentation of "Thurber."

"I feel the program has been really successful. I've received good, interesting feedback," she said.

Audience education is vital to the performance audience, Shumate said. "When the common audience people become more educated, they keep coming back. These people end up supporting the arts."

Through efforts such as the Center's pre-performance programs, comments concerning Iowa's "hick" audiences may soon be obsolete.

# CCC, Center succeed in booking 'big names' contemporary productions, inc.

Many students see the product but few see the work.

The work is done by the Contemporary Concerts Committee (CCC) of the GSB. The members schedule and sign the artists for performances in Hilton Coliseum or C. Y. Stephens Auditorium. The CCC works with Bob Dagitz, Events Coordinator at the ISU Center. Dagitz and the CCC both say their cooperative relationship is an excellent one. "The general concert decision-making process is better now, I think, than it's ever been at ISU," Dagitz said.

"Our main objective is to find all the concerts coming through our area, find out what can be done, get that information to CCC and let them make the decision on what shows they want," Dagitz said.

The Committee has nine members, including representatives from Residence Hall Week, Greek Week, Misheba, Campus Chest, and Homecoming. The representatives take the best of available artists back to their

central committees for a decision on which groups they prefer. David Pfetzer, CCC Chairman, said the hard part is getting who they want, when they want. Pfetzer also said he thought the system was working well.

Concerts are usually handled in one of two ways, either a promoter brings the show to Ames, or GSB will sponsor the event.

Steve South, CCC Financial Advisor, said they avoid signing anyone that looks to be a financial risk. And what about ticket prices? South said that prices are generally the lowest in the Midwest, and many bands often drop the price even more for college towns.

Events Coordinator Dagitz said the Ames-ISU market is not very lucrative for most groups because of the low volume record sales. But that doesn't keep the CCC from trying to get the "biggest

names" they can.

Next comes the contract. It is quite detailed, especially the lengthy "rider" frequently attached. The rider contains all of the performer's catering requests. Chauffeured limousines, Maine lobster, Heineken beer, Tiparillo cigars, assorted pastries and more. Sometimes those requests become demands. South said he'd heard of one group that refused to go on stage because they had been given white towels in their dressing room instead of blue. Dagitz said they cater the artists to a "reasonable point."

There is one thing the CCC is concerned about on the local level — feedback from students. Dagitz, Pfetzer and South said they welcome student comments anytime regarding the job CCC is doing, and about the selection they're getting.

## The Turning point

# Toga! Toga!

Would you believe that a food fight, a sorority peep show and a bed sheet party could produce over \$60 million? Neither did the producers of "Animal House" who are now enjoying fame and fortune.

So what's the reason behind the big craze of watching a group of guys act like animals? On the whole, most people believe it's watching them rebel against the age-old system of academics and the process of growing up. As Bluto, John Belushi emphasized this point saying that, "seven years of college gone down the drain" when he was expelled from college.

Overall, the movie has been a smashing success. According to an article in *Time* magazine, the film was produced for a meager \$2.7 million, promoted for an additional \$4.5 million and had grossed over \$60 million at the time the article was written. Producer Marty Simmons, chairman of the company that publishes National Lampoon, expects the movie would gross over \$80 million by the end of 1978, not including foreign distribution. That alone will place "Animal House" in the top 15 movie earners of all time, or nearly in the ranks of "Gone With The Wind" and "Star Wars."

The actors, however, aren't reaping all of the cash profits, but are instead enjoying the fame. Belushi, for example, only received \$35,000 for "Animal House" (plus a bonus after it became a hit). Because of his popularity prompted by the movie, however, Belushi has been signed to a three-picture deal with Universal Studios at ten times the amount he received for "Animal House."

What, then, will eventually become of the "Animal House" craze? Will there be sequels like "Animal House II," "Final Chapter, Animal House" or "The Return of Animal House"? Will there be a new fashion trend next fall of the "toga look"? And finally, will Blurtarsky become a senator? Only time will tell.

## Nano!Nano!

"Mork and Mindy," ABC's newest hit, is a success not only because it is a new idea, but it is also written and performed well, said Janice Marvin of WOI's programming department. ABC has the luxury of trying new things because they have built up a potential audience that they didn't have a few years ago.

Marvin said she hopes that "Mork and Mindy" won't be imitated as many other shows have been. "Charlie's Angels," for example, is popular not only for its pretty girls but its production quality. Take-offs on the idea, such as "Flying High," haven't made as good a showing in the ratings, she said, because they aren't as well made.

Trends in television, Marvin said, will be toward more experimentation with content. Using "Paper Chase" as an example, Marvin said that even though the ratings haven't been great, the network thinks that it is a good show and will stick with it. She added that CBS has the financial market to allow for such experimentation.

Science fiction and action/adventure shows will continue, she said. Limited series, she added, will continue because they have shown to be quality shows which are well received by viewers.

— Patti Douglass

# Glassblowing:

an ancient art whose time has returned

Glassblowing. Most people see it as an art belonging to the past; forgotten with the advent of machine-made glass work.

But Iowa State doesn't see it that way. In fact, it offers a special projects course through the Material and Science Engineering department where students can learn about glassblowing first-hand.

By working a piece from beginning to end, the student can

see the form go from a hot, molten mass, through the expanding and shaping stages, until it becomes a finished piece.

The dynamic nature of glass complicates the glassblowing process and makes it necessary for the craftsman to interact with it constantly.

With this involvement with glassblowing, perhaps it isn't forgotten art after all.

Agan works with the hot gather of glass which is cooled and shaped with a water-soaked wooden tool called a block. The mass is attached to the block on which it will later be blown.

A metal rod has been attached to the flattened bottom of the bubble. This allows the neck and rim of the piece to be reheated and shaped.

# Heavy hitting

In spite of one of the strongest hitting teams in Cyclone history, the 1978 baseball team finished 17-25, its worst season in five years.

The season began early in March with a 10-day tour in Florida. The Cyclones came away from the tour winless, but Coach Clair Rierson said the tough competition gave him a good chance to check out his team. The Cyclones played the Chicago White Sox, and top ranked Michigan and Missouri.

The team see-sawed through the first 13 games of the season losing six and winning seven over opponents Southwest Missouri, Simpson, Wichita State, Oklahoma City, William Penn, Missouri Western and Minnesota.

Following a two game split with the University of Nebraska-Omaha Mavericks, the team went into the worst slump of the season, losing eight in a row. Four of the losses came at the hands of Kansas in the opening series of Big Eight play. However two of the games were lost by only one point.

Coach Clair Rierson watches as a Cyclone baserunner takes a big lead at second. Rierson took over as the Cyclone skipper in 1975 with that year being his best: a 23-19 record.

Some of the players share a joke in the shady confines of the ISU dugout.

Catcher Rick German disputes a close call at first base. German was the Cyclone's fourth leading hitter with an average of .277.

# fails to help Cyclones

One point games plagued the Cyclones the entire season as Rierson's team dropped seven games by a one run margin.

The losing streak came to an end in the third game of a four game series at Missouri. The Cyclones were able to hold onto an early lead and beat the Tigers 5-3. For the top-ranked Tigers, it was the first loss in 13 straight games.

Cyclone right-fielder Jeff Truninger came out of the Missouri series with a red-hot .446 batting average for the season to that point. Teammates Kelley Summy and Al Benson were close behind with averages of .386 and .372, respectively.

The rest of the season saw splits with every opponent. Rierson's charges split with Iowa, Central, Nebraska, Creighton, Oral Roberts and Wartburg.

The leading hitter for the season remained Truninger but his average fell to .363. Three other Cyclones broke the .300 mark as Benson came in with a .354 average, Summy a .329 average and third-baseman Pete Seyfer with a .315 average.

Catcher-designated hitter Dave Wood was close with a .297 average. The Cyclones ended the season with a team batting average of .278.

In the pitching department, Rierson got a pleasant surprise in freshman Dave Flattery. Flattery led the nation at one point in strikeout averages with 19.4, 48 strikeouts in 22 innings. He finished in the season with a high 16.4 average.

Overall, the pitching staff had a 5.21 earned run average (era) which proved to be the downfall of the Cyclones. Senior Keith Kangas had the best record; (3-2) with a 4.07 era.

## Women dominate tourney

# Grab Big Eight title

The women's softball team slugged their way to a 1978 Big Eight Championship in Norman, Oklahoma. It was their second title in three years. The Cyclones went 4-0 in the double elimination tourney and tallied more runs than the rest of the teams combined. Four team members were named to the Big Eight All-Star team: Vickie Smith, 1B; Mary Jo Collins, 2B; Faye Perkins, SS; and Tammy Rueckert, P.

Iowa State beat Nebraska in the first game of the tourney, 9-4 and returned later in the day to crush Kansas State, 11-1. Deb Thompson was the pitcher. The second day of competition saw the Cyclones battle Oklahoma, twice. They nipped the Sooners, 2-1 in the first game. Due to the double elimination ruling, they played Oklahoma again, for the championship. The Cyclones handled Oklahoma, 9-4, including a line drive by Nancy Faber, which rolled between the legs of the left fielder and ended up to be a home run. The Cyclones wound up the season with a very respectable, 22-9 record. "It was a short season," reflected Coach Lou Gecewicz, "thirteen to 14 of the games were either rained or snowed out." "We had such a tight schedule, that it was impossible to make them up." The Cyclones closed the season with a fourth place finish at the Iowa AIAW Tournament. The 16 team tourney saw only the winner advance to the regional competition. "I was a bit disappointed, basically we could have gone a lot further than we did," Gecewicz said. "But, there are a lot of strong teams in Iowa."

Mary Jo Collins was voted Most Valuable Player. She led the team in hitting, with a batting average of .435 and 22 RBI. Three regulars hit above the 300 mark; Greta Budweg, Sherry Cumpston and Lisa Hyland.

—Trudi Rebsamen

Shortstop Faye Perkins eyes first base after making a play at second. Perkins led the team in assists with 60.

# Tracksters Shine at Drake

Records fell like rain and for the second time in three years, Iowa State came away from the Drake Relays with a Champion relay team.

Nine school records were set as Cyclone distance runners overcame the loss of teammates Brian Vincent and Jeff Myers who lost their lives in a pre-season plane crash. Doug Kortemeyer also rewrote the record book in both his events, the shot put and discus.

Distance records set were Allan Zachariasen's 8:51.56 3000-meter steeplechase which qualified him for the NCAA finals. Sophomore Jim Ijams also qualified for the NCAA meet with a 14:05.8 5000-meter as did 800-meter runner Dave Korin. Kortemeyer also qualified for the Eugene, Ore. trip in both his events. Dennis Barker broke the 10,000-meter run mark with a 30:19.5.

An inspired 4 X 800-meter relay team set a new record in the Drake Relays as the Cyclones took the event for the second time in three years. The team of Ron Swanstrom, Brian Darrow, Steve Petrie and Korin finished with a time of 7:20.83, almost two seconds ahead of second-place Notre Dame.

Two other relay records were set as Mike Mortland, Elbert Winbush, Jay Bradley and Robert James covered 400-meters in :42.2. The same men, with Randy Shaver replacing Mortland, redid the 1600-meter relay in 3:16.3.

Coach Bergan's team finished the season with a 401 dual meet record. The only loss came at the hands of Big Eight rival, Nebraska. The thinclads cruised past South Dakota State in the season opener 117-33. The team also took the crown as the top Iowa track team beating Iowa and Northern Iowa in the Iowa Inter-collegiate Meet.

Following the loss to Nebraska, Bergan's team bounced back and took the remaining two contests over Northern Iowa and Minnesota.

# 5<sup>th</sup> Big 8 Title

Ho Hum . . . another Big 8 Championship. The 1978 Women's Track and Field team captured their fifth consecutive Big 8 title, at Norman, Oklahoma. The Cyclones overwhelmed second place Nebraska, 163-97. Kansas was third with 95 points.

Lisa Morse set the pace early on the first day of competition, with a record breaking discus toss of 144'4½". Mary Seybold added another victory, winning the 5000m. Katy Schilly and Bridget Seip were third and fourth, respectively. Debbie Esser continued her Big 8 dominance of the hurdle events, winning both the 100mh and 400mh. Teammate Ellie Mahal was second in the 400mh. Schilly took the 3000m. Seip was fourth. The mile relay unit of Celeste Johnson, Carol Davis, Esser and Mahal clicked for a victory in 3:48.59. The Vettors combined for a total of 28 points. They were 1-2 in the 1500m. Debbie won in 4:27.65, Diane was right behind with 4:25.42. Debbie also placed second in the 800m with a time of 2:08.83, Diane was fifth in 2:11.98.

In the field events, Kim Blakeslee earned a second place in the javelin with a toss of 136'5". The toss however, was several feet short of her record setting performance earlier in the season at the Arkansas Relays of 146'1½". Johnson leaped 19'2½" for second place in the long jump however, a foot short of her 20'3¾" record setting jump at the Arkansas Relays. Nebraska posted an upset victory in the two-mile relay, nudging Barb Brown, Sue Deppe, Seybold and Schilly to second place.

"We won the Big 8 on team depth

and generally high contribution by all members of the team," Coach Chris Murray said.

Rain, cold temperatures and Iowa State victories have become as much a tradition as the Drake Relays themselves. Esser won her 400mh, for the second consecutive year. Her time of 59.18 was a new Drake Relays record. Debbie Vetter won the 800m in 2:05.89, running against a tough field which included Olympian Francie Larrieu. Diane Vetter broke from the pack with 300 meters to go and held on to win the 1500m, in 4:20.79.

The Cyclones traveled to the University of Tennessee, Knoxville, May 25-27, for the National AIAW Track and Field Championships. The 11-member squad tallied 39 points for a fifth place finish. They fell just two points short of fourth place Arizona State. Cal State-Northridge won the meet with 57 points.

Debbie Vetter won the 1500m in 4:16.07 and set a new stadium record. Diane Vetter was 7th. Esser enroute to her third consecutive championship in the 400mh, set a stadium record. Mahal was 7th. The 800m event saw Deb Vetter third, in 2:06.43. The two-mile relay unit of Schilly, Brown, Vetter and Vetter pushed Cal State-Northridge to an American record. Iowa State was second. Their time of 8:35.36 established a new school record. The mile relay team of Esser, Johnson, Mahal and Diane Vetter, consisting of no true quarter-milers placed fourth and established a new school record for the event in 3:39.56.

"If we fell short, it couldn't have been by much," Coach Murray said. "When the important meets came around, the athletes came through."

— Trudi Rebsamen

Diane Vetter rounds the curve during an indoor meet against Iowa in Iowa City. The two-mile relay unit established a new American Record for the event.

**Dale Young**

Barb Brown exemplifies the intense concentration and mental discipline vital to becoming a championship athlete.

## ATHLETIC TWINS POSE DOUBLE-TROUBLE

If the tumbling bodies at gymnastics meets have you a bit confused and all the faces seem to blend together, it could be more than that Friday night hangover. Iowa State fosters the athletic prowess of four sets of twins, two on the men's gymnastics team and two on the women's track team.

Sophomore gymnasts Doug and Dave Smidl came to Iowa State from Fremd High School in Palatine, Illinois. Both compete in the all-around for ISU. Doug was the only collegiate freshman in the nation to qualify for the 1978 United States Gymnastics Federation National Championships.

Juniors Dan and John Copeland hail from Topeka, Kansas where they attended Topeka High School. Both are specialists; Dan on the high bar and John on the rings.

The third set of twins, juniors Deb

and Diane Vetter compete for the women's track and cross-country teams. At the 1978 Big 8 Championships the Vetter twins earned 28 team points, including a one-two finish in the 1500m.

Newcomers to ISU and the United States are the McMeekins, Evelyn and Christine. From Glasgow, Scotland they attended the Queens College and Dunfermline College of Physical Education, respectively. Christine is a Leisure Services major and Evelyn is studying Community Nutrition.

### The Twins

In form and feature, face and limb,  
I grew so like my brother,  
That folks got taking me for him,  
And each for one another.  
It puzzled all our kith and kin,  
It reached an awful pitch;  
For one of us was born a twin,  
Yet not a soul knew which.

One day (to make the matter worse),  
Before our names were fixed,  
As we were being washed by nurse  
We got completely mixed;  
And thus, you see by Fate's decree,  
(Or rather nurse's whim),  
My brother John got christened me,  
And I got christened him.

This fatal likeness even dogg'd  
My footsteps when at school,  
And I was always getting flogg'd  
For John turned out a fool.  
I put this question hopelessly  
To everyone I knew —  
What would you do, if you were me,  
To prove that you were you?

Our close resemblance turned the tide  
Of my domestic life;  
For somehow my intended bride  
Became my brother's wife.  
In short, year after year the same  
Absurd mistake went on;  
And when I died — the neighbors  
came  
And buried brother John!

# Cyclone linksmen have "par" season

Cyclone Mark Runge starts through a drive on Veenker's number five.  
**Riad Yakzan**

The Iowa State "links" team made a fair showing in the 1978 spring golf season. Of the six major tourneys the Cyclones competed in, they finished in the top half of the field three times.

Coach Dale Anderson's team started off the season with a sixth place finish in the Shawnee (Okla.) Invitational, 41 strokes behind the hot-shooting Wichita State Shockers. Cyclone Dave Quellan finished 12 strokes behind the meet medalist in the 13 team field.

The next meet found the Cyclones facing the same tough Wichita State team at the Great Plains Invitational in Wichita, Kan. The Cyclones struggled to a 10th place finish in the 17 team field.

The Northern Iowa Invitational saw the best finish for the Cyclones as they captured second place honors ahead of 13 other opponents. Following the UNI meet, the Cyclones finished ninth out of 18 at the Drake Relays Invitational, and 19th out of 25 at the Spartan Invitational in East Lansing, Mich.

At the Big Eight tourney, the Cyclones managed to finish seventh ahead of Kansas State. Harry Lockwood, low man for the Cyclones missed the all Big Eight team by one stroke.

The Cyclones' low man for the season was Dave Quellan who finished with a 13 round average of 76.8 strokes. Teammates Harry Lockwood, Craig Reid, Clay Davis and Greg Wolff were close behind with averages of 78.2, 78.4, 79.3, and 79.4 respectively.

Senior Rachel Reicher shows the form that earned her top player status throughout the golf season. Reicher led the Cyclones with an 82.5 scoring average for 12 rounds. She also set a school record at the Missouri Invitational with a two-day round score of 157.  
ISU Photo Service

## Golfers swing to season of records

The 1978 women's golf team finished up their season with record breaking performances at the Missouri Invitational in Columbia. A strong Oklahoma State team won the meet, however, Iowa State was second, their highest finish of the season. Iowa State's top four combined scores for a 315, the lowest single day score in Iowa State history. Their total for the two day, 36 hole competition was a 641, also a school record. Golfers Rachel Reicher and Ann Barnes shot identical scores of 157, for another school record and a tie for third in the tournament.

Reicher was the team leader with a season average of 80.2 for the lowest 7 of 10 rounds. Ann Barnes took second laurels with 81.8, Mary Jo Cunningham followed with an 82.1

The Cyclones had a weak spring season, but came on strong in the fall. They finished their spring season with a sixth place finish at the Big 8 tourna-

ment in Lincoln, Nebraska. Reicher was the top scorer for ISU, with a two-day score of 172 and a 19th place finish.

At the ISU Invitational, the Iowa State "A" team finished 6th. Reicher and Cunningham tied for 14th, with scores of 169. The Iowa State "B" team was 9th.

The fall season saw the women golfers capture runner-up positions in three tournaments, Missouri, Kansas and the State AIAW.

Coach Joan Gearhardt, in her ninth year of coaching, was happy with the team's performance and felt the women gained confidence as the season progressed.

"It was an enjoyable season. The young ladies were easy to work with, worked hard and respected me and each other. There's more to coaching than winning," Gearhardt said.

# Troubled times for ISU tennis

Cyclone co-captain Bob Klawitter hits a backhand return against a UNI opponent.

The sun sinks low on a long match at the women's gym courts.

Photos by Tim Kuntz

The 1978 season was an up and down time for the men's tennis team. On the court the team compiled an 11-12 record, while off the court the netters went through two coaches. A third coach was hired this fall.

To start off the year, Paul Kelly was the men's coach on an interim basis. Kelly was unable to continue because his business interests increased. To finish the season, associate athletic director Max Urick became the supervisor.

Finally a new coach, Bill Landin, was hired full-time. Landin, in addition to his duties as tennis coach, also serves as an assistant to the athletic department's ticket manager, Richard Mathias.

The tennis team had a frustrating beginning to their season as they were forced to cancel all six matches scheduled for a swing through California during spring break.

"It was very frustrating in San Diego," said Paul Kelly. "We didn't play one single set and out of the nine days, we were able to get in only eight total hours of court time, something that we needed very badly."

When the Cyclones did open their season, they were rudely greeted with a pair of 8-1 losses to Iowa and Western Illinois. Freshman Joe Nieman was the Iowa State winner in both of those matches. In fact, Nieman posted the best won-lost record (12-6) on the team. Of Nieman, Kelly said, "Joe has been outstanding. He has great potential."

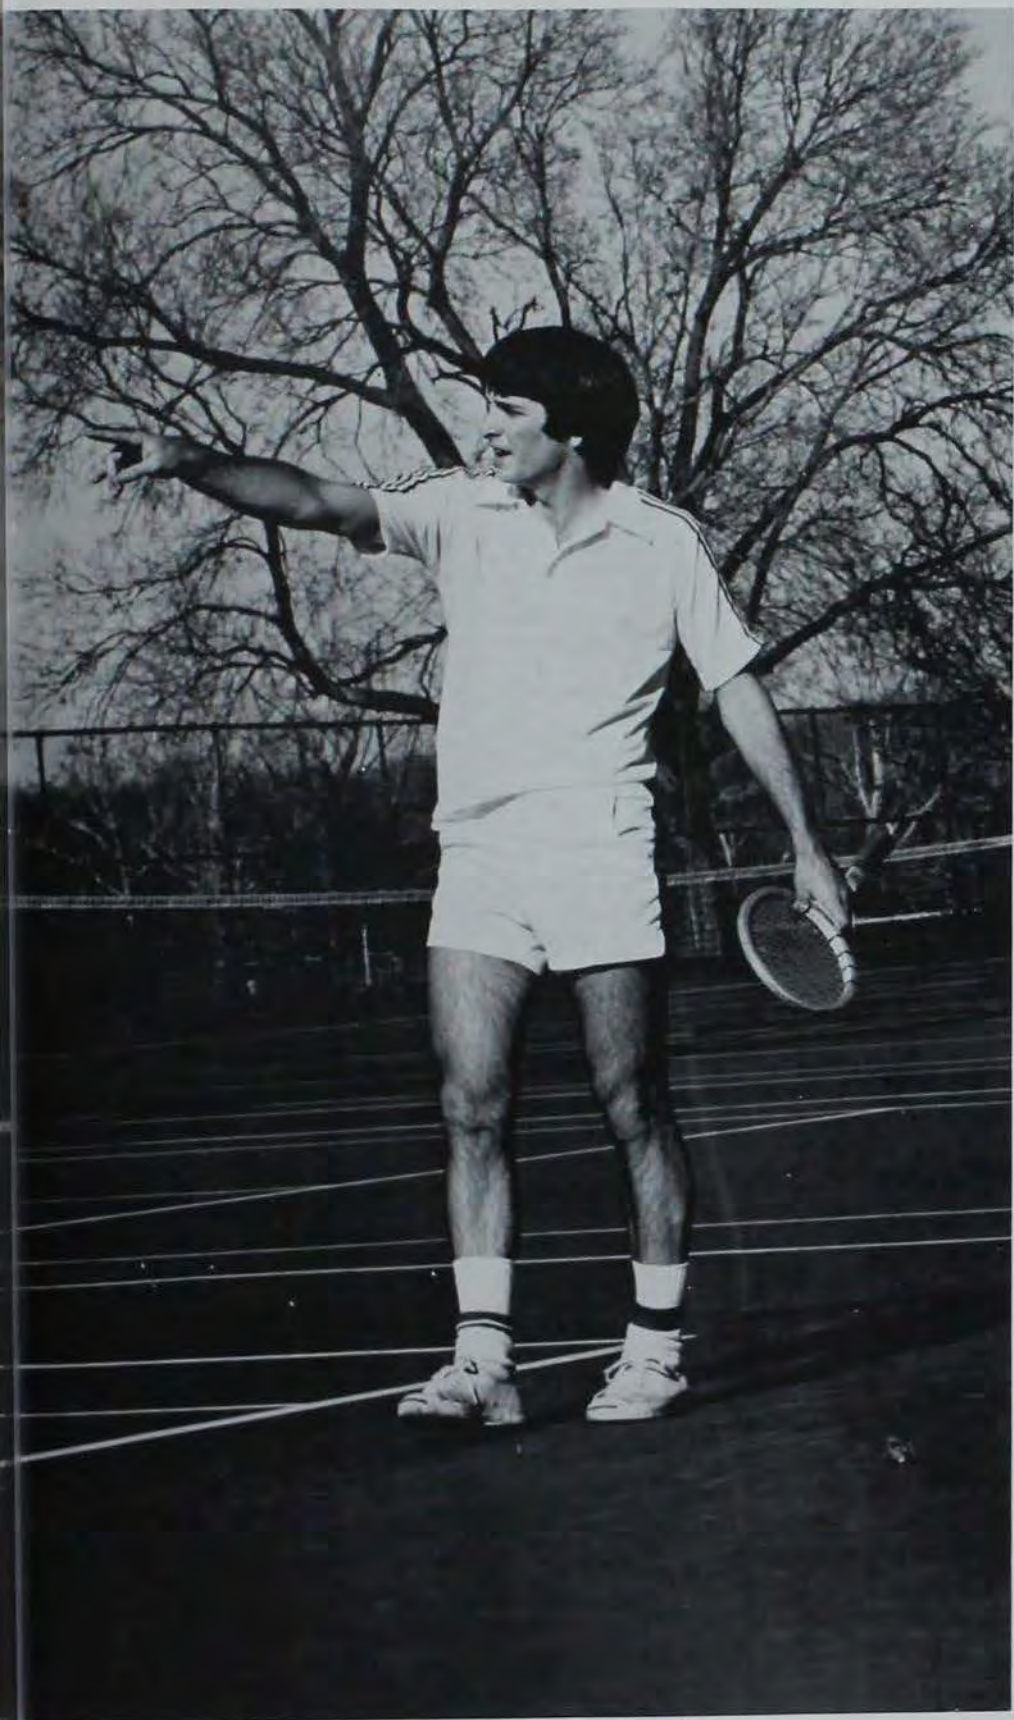

After the first two losses, ISU rallied and won five of their next six matches to get their record to 5-3. Nieman kept up his steady play, but a few other Cyclones broke out of the early doldrums and began playing good tennis. Standouts were sophomore Kevin Shoemaker, junior Fred Budde and senior David Maurer.

Other team members were freshman Bob Wilson, sophomore Scott Feldman and juniors Bob Klawitter and Paul Curtis.

**Dale Young**

## *Losses for young team*

While the Iowa State women's tennis team finished their 1978 spring season with a 2-3 record, they dropped to a disappointing 0-6 record in the fall.

The fall team missed the talents of several former teammates including number one singles player Barb Kunnert.

Coach Christa Townsend said her eight-member team consisted mainly of freshmen and sophomores. "They were untrained and inexperienced, at least as far as collegiate competition goes. However I was pleased with all my freshmen who played. They all have lots of talent and they'll improve. It's just a matter of getting some experience and some matches under their belts," Townsend said.

Townsend said the team will be practicing eight to ten hours a week this winter in preparation for their first match in March.

Last spring the team finished third in both the Missouri Valley and Minnesota invitionals and tied for fourth in the Big Eight Tournament.

The team also defeated both Drake and Colorado College but fell to Iowa 1-8 and Northern Colorado 3-6.

Barb Kunnert competed in the national AIAW tennis tournament in Salisbury, Md. last June. She lost her first match to Tracy Tanner of Brigham Young, 3-6, 2-6, and fell to Kelly Kruk of Rollins College, Fla., 3-6, 0-6.

# Dual meet winning streak ended

Cyclone harrier Finn Anderson follows the chalk line through a wooded section of the Veenker course.  
**Sue Deppe**

Sophomore Gene McGivern moves on the inside to overtake four more opponents. He was consistently a top finisher for the Cyclones.  
**Garry Weyhrich**

The loss of four standout runners proved too much to overcome for a young men's cross country squad and they fell from their perch near the top of the Big Eight conference, where ISU has been since 1974.

The deaths of Jeff Myers and Brian Vincent last spring, the graduation of Steve Manley and an unhealed injury to Jim Ijams combined to doom the Cyclones to a sixth place finish in the Big Eight.

A bright spot for coach Bill Bergan was the performance of freshman Richard Kaitany. Kaitany finished third in the Big Eight and qualified for the NCAA championships.

Senior Dennis Barker, junior Dan Gilchrist and sophomore Gene McGivern supported Kaitany with some steady performances. Other runners who saw varsity action were Steve Wikner, Tim Holton, Finn Anderson, Steve Gering and Andy Dunlap.

The lone home meet was the ISU Invitational which the Cyclones won for the ninth consecutive year. Kaitany was the individual winner while McGivern placed seventh to lead ISU.

The harriers dropped a 23-35 deci-

sion to Division II power South Dakota State, ending a streak of 22 consecutive dual meet victories, compiled since 1974. Kaitany and McGivern's first and fourth place finishes could not counter-balance the strength of the Jackrabbits.

The next stop was the USTFF Nationals in Madison, Wis. as ISU was tenth out of 13 teams. Barker's 52nd place finish led the Cyclone effort. The Cyclones rebounded with a 26-29 victory over Nebraska. Gilchrist and Anderson held off opponents in the last quarter mile to insure the victory.

The Big Eight meet was held in 80 degree weather in Norman, Okla. and was dominated by Colorado which placed four runners in the top five. Kaitany lost the lead in the last mile and had to settle for third. Kaitany went on to place fifth in the NCAA Regionals and 127th in the Nationals.

Barker and McGivern were elected team co-captains. Wikner received the Most Improved award and Kaitany took the Outstanding Freshman award.

— Gene McGivern

Standout freshman Richard Kaitany breaks the tape at the ISU Invitational which the Cyclones won for the ninth year in a row. Kaitany also qualified for the NCAA championships.

Garry Weyrich

Steve Wikner and Dan Gilchrist drive up the cinder path at the far corner of the course. Both runners turned in solid performances throughout the season.

Sue Deppe

Kaitany, all alone and in the lead, charges down the hill on the way to his Invitational title. Kaitany placed third in the Big Eight and 127th in national competition.

# National Champions Again

The 1978 women's cross-country team captured their fourth straight National AIAW title, a feat that has never before been accomplished in women's athletics. Deb Vetter led the Cyclones with a seventh place finish on the 5,000 meter course and earned All-American honors for the second year. Diane Vetter was second for the Cyclones and earned 23rd overall. Bridget Seip was 49th. Mary Seybold 61st and Katy Schilly placed 63rd.

Iowa State successfully defended their title with 119 points. North Carolina was second with 144, followed by Penn State with 145. Host Colorado was fourth with 147.

While the altitude played havoc with many of the teams' performances, Iowa State had little difficulty. The Cyclones had run the same course earlier in the season for the Colorado Invitational. Wisconsin won the meet, beating Iowa State by two points (46-44). It was Iowa State's first loss in collegiate competition.

"Several runners between the two teams were a yard apart, the meet could have gone either way," Coach Murray said. Murray explained that he was not peaking his runners for the Colorado meet, but using it more as a learning experience, because it was the same site as the Nationals.

"But, I don't mean to make excuses. Wisconsin ran a real good race," Murray said.

Iowa State also won the Big Eight Championships for the fourth consecutive year and the Regional title for the second straight year.

## Pre-season polls had Big things in store for Cyclones

A pair of trophy-candidate all-Americans, a half-dozen pre-season all-stars, a top 20 rating and with all this the possibility of another post-season bowl invitation: it looked like this could be *the* season for the Cyclones and Earle Bruce.

For Dexter Green, there was the quest for the Heisman Trophy, football's most coveted award. After rushing over 2,500 yds. in the past two seasons, Green was being touted as a contender. To win the Heisman he'd have to have his best season ever and the Cyclones would probably have to win the Big Eight Championship, yet those goals didn't seem too far beyond grasp.

It was another trophy, the Outland, that Mike Stensrud had his eye on and his chances looked even brighter than Green's. The all-Big Eight tackle, with 53 "sacks", was named to four pre-season all-American squads including *Playboy's* team.

Rounding out Bruce's all-star squad were a host of return-

ing veterans both offensive and defensive. Offensive nose guard Brian Neal was named to one all-American list and joined Ray Hardee, Dick Cuvelier, Al Grissinger, Guy Preston and Terry Rubley on area all-stars list.

Defensively, linebacker Tom Boskey, end Rick White and safety Mike Schwartz headed the all-star lists with rover Tom Perticone and cornerback Mike Clemons returning to starting positions. Freshman Chris Boskey, younger brother of Tom, was the only Big Eight player mentioned in *Playboy's* 20 top newcomer list; he chose Iowa State over Ohio State, Michigan and a string of other schools.

So with all this talent, possibly his best team ever, Coach Earle Bruce set out on the '78 football season to live up to the expectations of the polls and most of all, the Cyclone fans.

— Kerry Gibson

# Non-Conference

## 31-0 win over Hawks

Non-conference foes have not traditionally been quite up to par with the Cyclones' Big Eight competition. And so it looked this year. The opener pitted ISU against the Owls of Rice, a team which went 1-10 last season in the tough South-west Conference.

The game was played on a rain-drenched night in Houston, Texas, and was marred with many Cyclone errors. The Owls led 19-10 with 12 minutes left in the game before the Cyclones put together two successful touchdown drives to win 23-19.

Fans at the home opener saw the Aztecs of San Diego State play inspired ball against a lackluster Cyclone squad. Despite the heat and humidity, which both approached 100, the ISU offense remained cold and again had to come from behind in the fourth quarter to win. With the Iowa game only a week away, Bruce's squad looked far from ready to avenge last year's loss. Not all was bleak though, as Dexter Green rushed for 294 yds. in the two games and scored four touchdowns to lead the Big Eight in both categories.

Ready or not the Cyclones invaded Kinnick Stadium in Iowa City for the second "Corn Bowl." Earlier in the week Coach Bruce had promised that the offense would mix up the plays more. That they did and along with it the Hawkeye defense. After a scoreless first quarter, Bruce put Walter Grant in as quarterback replacing Terry Rubley. On the first play from scrimmage, Grant hit split end Stan Hixon for a 47-yd. touchdown.

Following a Hawk fumble on their own 30-yd. line, Grant went to work again in the air and on the ground, this time finding Ray Hardee open. Less than a minute had expired on the clock and ISU had scored as many points as in the previous game. Steve Johnson added a field goal to make it 17-0 at the half.

The second half saw more of Grant's aerial show along with some fine ground work by Victor Mack and Rocky Gillis. But if all this offense overwhelmed the Hawks, then ISU's defense devastated them.

End Rick White dropped the Hawks for losses totalling 18 yds. and caused two fumbles. The secondary — Mike Schwartz, Mike Clemons, Jerry Washington and Tom Perticone stymied the Hawk passing game; only 27 yds. on 11 attempts.

As the final minute ticked down, Cyclone fans swarmed the field and down came the goal posts, a tradition started the year before by Iowa fans. The 31-0 shutout gave Cyclone fans a chance to return a long year's grief and silence their Hawkeye counterparts; at least until next year.

The final non-conference game came at home against the much improved Drake Bulldogs. Again the Cyclone defense controlled the game, yielding 225 yards but only one touchdown. They also left the offense in great field position which ultimately resulted in ISU scores.

Offensively, the Cyclones again went to the air with Rubley, Grant, Lempke and even Green connecting for a 158 yd. passing total. But Green was busy on the ground too, as he became Iowa State's all-time leading rusher and moved into seventh on the Big Eight list.

At the final gun the score was ISU 35, Drake 7. In out scoring opponents 66 to 7, in two games, the Cyclones looked ready to face the Huskers in the Big Eight Opener.

— Kerry Gibson

Tailback Dexter Green gets congratulations from Tom Boskey and Mike Stensrud in addition to the game ball after he became ISU's all-time leading rusher in the Drake game.

Kerry Gibson

After lackluster opening performances, Coach Bruce cracked the Cyclone offense loose and mixed things up a little.

Cyclones Tom Perticone, Tom Less and Mike Stensrud move in to bury Drake's Dwaine Ball.

# Conference 0-3 start

Coming off a four game winning streak, the Cyclones looked ready to face the Huskers of Nebraska. For the Cyclones it was a chance to make it three-in-a-row but for the Huskers it was time for revenge and the pregame publicity made it only too clear that this was to be a grudge match.

And a grudge match it was. The Huskers totally shut down ISU's offense and despite a valiant effort by the Cyclone defense, Nebraska put 23 points on the board and handed ISU its first shutout loss in four seasons.

Offensively the Cyclones weren't able to execute and converted on only four third down situations. That meant that the defense was on the field for the greater part of the game. Mike Stensrud had one of his best days ever though, as he was in on 13 tackles, four for losses totaling 18 yards, knocked down two passes and caused a fumble for another 11-yard loss. Linebacker Tom Boskey also had a great day as he dogged the Huskers for 19 tackles, 13 of which were solo.

Head Coach Earle Bruce expresses the frustration of starting the Big Eight schedule against Nebraska, Missouri and Oklahoma: all in a row!  
Luis Barrantes

How to stop a Heisman Trophy winner: Mike Sims, Tom Boskey, Jerry Washington and a host of other Cyclones gang up on the elusive Billy Sims of Oklahoma.

Luis Barrantes

continued from p. 172

The next stop on the Big Eight route was Columbia and the Tigers of Missouri; a tough team for the Cyclones to bounce back against. Yet Bruce's forces seemed to have their act together. The offense moved the ball well against the Tiger defense with one exception; they couldn't put the ball in the endzone. ISU had 23 first downs to Missouri's 11 but the Tigers came out on top, 26-13. One of the two ISU touchdowns came after defensive end Jim Nissen blocked a punt and linebacker John Less recovered it in the endzone.

The outlook was dim for a turn-around victory as the Cyclones faced none other than number one ranked Oklahoma. And the day didn't pass any brighter as Heisman Trophy winner Billy Sims and the rest of the Sooner backfield tore the Cyclones for a total 507 yards rushing. They also scored 21 of their 34 points in the first quarter.

Again the Cyclones could not sustain an offensive drive and when it was all over, ISU was down 34-6.

The Cyclones finally got back on the winning foot before a smaller than usual Migration crowd in Lawrence, Kansas. Dexter Green put the Cyclones in the lead with a first quarter touchdown but sat out the rest of the game with rib injuries he received on the TD carry. Victor Mack filled in at tailback and helped put six more points on the board for ISU. The defense played exceptional ball, namely a goal line stand in the fourth quarter to keep ISU on top at the gun, 13-7.

Homecoming was the scene of the second conference victory as Bruce's forces shut-out the K-State wildcats, 24-0. The offense put together a show which garnered a total of 439 yards compared to the Wildcat's 162. Walter Grant and Terry Rubley alternated at quarterback and hit tight end Guy Preston for a record-tying seven receptions in a single game. Preston surpassed the 100 yard mark as did Dexter Green, despite an injured knee and ribs. With that win, the Cyclones were assured of their third consecutive winning season. It had been 70 years since an ISU team had accomplished that. Two games left and things were looking up.

Under a full head of steam and out for revenge, the Cyclones invaded Stillwater to meet the Cowboys of Okie State. It was a day for newcomers as the Cyclones dropped the Pokes, 28-15. Freshman Joe Brown blocked a field goal attempt and later returned a punt 43 yards. Freshman Tom Roach picked up 63 yards in his first start at the tailback and Chris Boskey collected 16 tackles including three sacks.

The season finale pitted the Cyclones against a couple of things. First, the Buffs of Colorado, a team which ISU hadn't beaten since 1963. Second, they had to overcome a history of stage fright, having never won a televised game. There was also a rumor that the winner would be offered a spot in the Hall of Fame Bowl.

With all these things at stake, the Cyclones played inspired ball and held off a last minute charge by the Buffs to take the contest 20-16. Earle Bruce had led his team to its third straight 8-3 season and for the second year in a row taken them to a bowl game. But it was to be his last season as head coach at ISU.

Say, "Hallelujah." The officials and quarterback Walter Grant leave no doubt that Dexter Green reached the endzone.

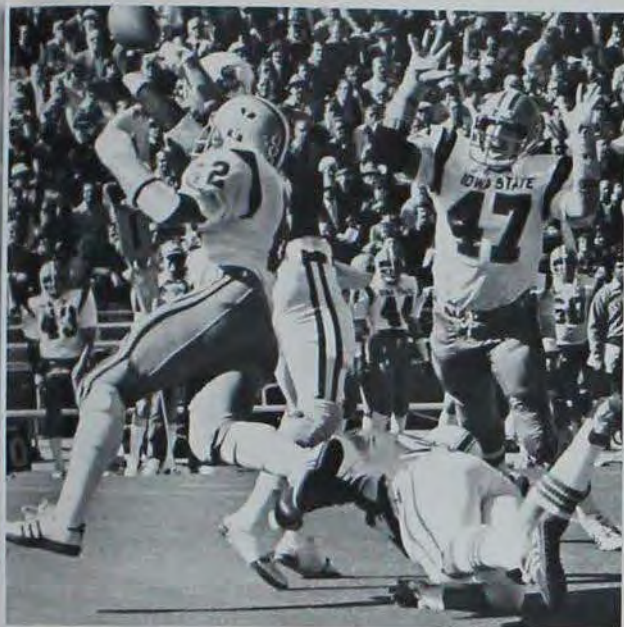

John Gaps

Split end Stan Hixon makes a fingertip catch as a Colorado defender looks on. The Cyclones pulled out a narrow victory over the Buffs, ISU's first since 1963.

# Hall of Fame finale for Bruce and Cyclone seniors

When Iowa State took the field on December 20, 1978 to play Texas A and M in the Hall of Fame Bowl, no one, least of all Earle Bruce, knew that this would be his last game as coach of the Cyclones.

Even if everyone knew, it probably would have made no difference to Curtis Dickey, Texas A and M's speedy tailback, ripped through Iowa State's defense for 276 yards and one touchdown to lead the Aggies to a 28-12 win. For his efforts Dickey was awarded both the most valuable player and the outstanding offensive player award.

In a word, Dickey was awesome. Aggie quarterback Mike Mosely said, "That's the hardest I have ever seen Curtis run. Our line opened up some good holes for him, but when the holes weren't there he just lowered his head and hammered through."

Iowa State defensive end Rick White, who was named the defensive player of the game, said, "We knew about his (Dickey's) speed and that he would be a dangerous man, but he's also strong, very strong, and we just couldn't stop him."

White played one of his finest games as a Cyclone as he made 13 tackles, including three for losses of 31 yards.

A Cyclone who got shuffled into the background was a player not accustomed to that role, Dexter Green. It's not that he played a bad game. Quite the opposite, he played an excellent game, but Dickey's heroics overshadowed Dexter. For the night Dexter ran for 148 yards on 21 carries and a touchdown and also caught two passes for 13 yards and another touchdown.

When the game started it looked as though Iowa State would dominate play and have things the way they wanted. The first time the Cyclones had the ball they marched 57 yards from their own three before they were forced to give the ball up. However, inability by both squads to capitalize on third down plays left the game tied at the end of the first quarter.

To open the second quarter, Iowa State moved the ball 62 yards in eight plays to open the scoring. Steve Johnson missed the extra point and the score stood at 6-0.

After that score, it was all Texas A and M. The Aggie strategy boiled down to giving the ball to Dickey. For as well as Dickey ran, the rest of the team could come nowhere near his production. The rest of the Aggies combined could generate only 90 yards of offense. But the strategy was good enough to give the Aggies a 14-6 lead at the half.

Iowa State fought back to 14-12 in the third quarter when Dexter Green took the ball on a fourth and two situation at the Aggie 29 and ran unmolested into the end zone.

The situation looked bright for the Cyclones at this point, but mistakes in the kicking game enabled Texas A and M to seal the victory.

Not all for naught. Despite being on the losing side, defensive end Rick White capped his Cyclone career with a win; the Hall of Fame Defensive Player Award.

Rod Mickels

"We made some damaging mistakes in our kicking game that cost us dearly," Bruce said. "We had a bad snap on an extra point, we hit a Texas A and M punt to lose the ball and we fumbled another punt. Those were three big mistakes and we also punted very poorly ourselves."

Bruce was very pleased with both the performance of Green and White. "Rick White did an exceptional job and I was happy to see him win the defensive award. Dexter also played a very fine game. They have both been great seniors for us."

"This whole group of seniors has been standing," Bruce said. "They've woe'd hard and always kept coming back. It's too bad we couldn't have won the game."

There was a degree of personal satisfaction in the game for Green. For one, he became only the second Big Eight back to gain 1,000 yards three years in a row. The only other player to do that was Oklahoma State's Terry Miller. Green's total of 3,750 yards placed him in the number one position on the Iowa State career rushing list and fourth on the Big Eight

Cyclones John Less, Mike Leaders, Randy Koch and Steve Weidemann corral Aggie quarterback Mike Mosely.  
Rod Mickels

chart behind Miller, and ex-Oklahoma Sooners Greg Pruitt and Steve Owens.

The success of Iowa State's program has caused other schools to tap the Cyclones' resources of coaches. Before Bruce left to replace the fired Woody Hayes at Ohio State, the Cyclones had lost five assistant coaches.

Offensive coordinator Tom Lichtenberg took the head coaching job at Moorhead State in Moorhead, Ky. Football programs coordinator Van Holloway and graduate aide John Fritsch will go to Moorhead State with Lichtenberg.

Defensive coordinator Pete Rodriguez subsequently accepted the head spot at Western Illinois in Macomb, Ill. Rodriguez hired freshman coach Jerry Kaminski as one of his assistants at Western Illinois.

— Dave Dawson

Kelley Johnson, Barby Smith and Jill Foley wait in anxious anticipation of the serve.

# sets up 1978 Volleyball Season

Teamwork, enthusiasm and a new coach combined to make the 1978 Cyclone volleyball season one of the best ever.

"The team's attitude and sportsmanship were terrific. Even coaches from opposing teams and officials said they thought the Iowa State team had a great attitude." Coach Sharon Hitsman said. A Seattle, Washington native, Hitsman came to Iowa State after playing with the United States Volleyball Association team in Seattle for four years.

The 1978 volleyball team was 19-29-3 for match play and 55-78 for total games. An increase of 24 games from last year's schedule had the team playing one night during the week and every weekend throughout the three month season. Only three matches were played at home.

"All that traveling really put a strain

on the team, but I was pleased with their performance this year," Hitsman said.

The highlight of the season was the Regional Tournament in Lincoln, Nebraska. Iowa State petitioned and received an at-large berth for the AIAW Region 6 Tournament. The Cyclones wound up in a three-way tie for third place with Kansas and Iowa. Usually the top four teams in each pool advance to the semi-finals, but because of the three-way tie, the two teams with the best win-loss record for individual games during the tournament advanced. Both Kansas State and Iowa had one less loss than did Iowa State.

"I felt the girls played really well. They were in a tough pool," Hitsman said.

Earlier in the season the Cyclones placed third at the Missouri-St. Louis Invitational in St. Louis. They beat the

host school, Chicago State, Bradley and Benedictine (Ill.) before losing to a tough Dayton team in the semi-finals.

ISU placed sixth at the Big Eight Tournament in Lawrence, Kansas. Nebraska downed Missouri for their third consecutive title.

Hitsman said she felt the team made definite skill improvements throughout the season. "but they need to develop a winning attitude and become more comfortable in playing."

Hitsman singled out captain Kathy Klooz, as "a strong all-around player and team leader." Freshman Kathy Baker was also named for her strong hitting ability and steady improvements. Senior Barby Smith and junior Mary Thissen, both played well coming off the bench to play the back court, Hitsman said.

"The caliber of play here in the Midwest is not as good as the West Coast, but that gap is rapidly diminishing, through increased high school participation," Hitsman said.

— Beth Gross

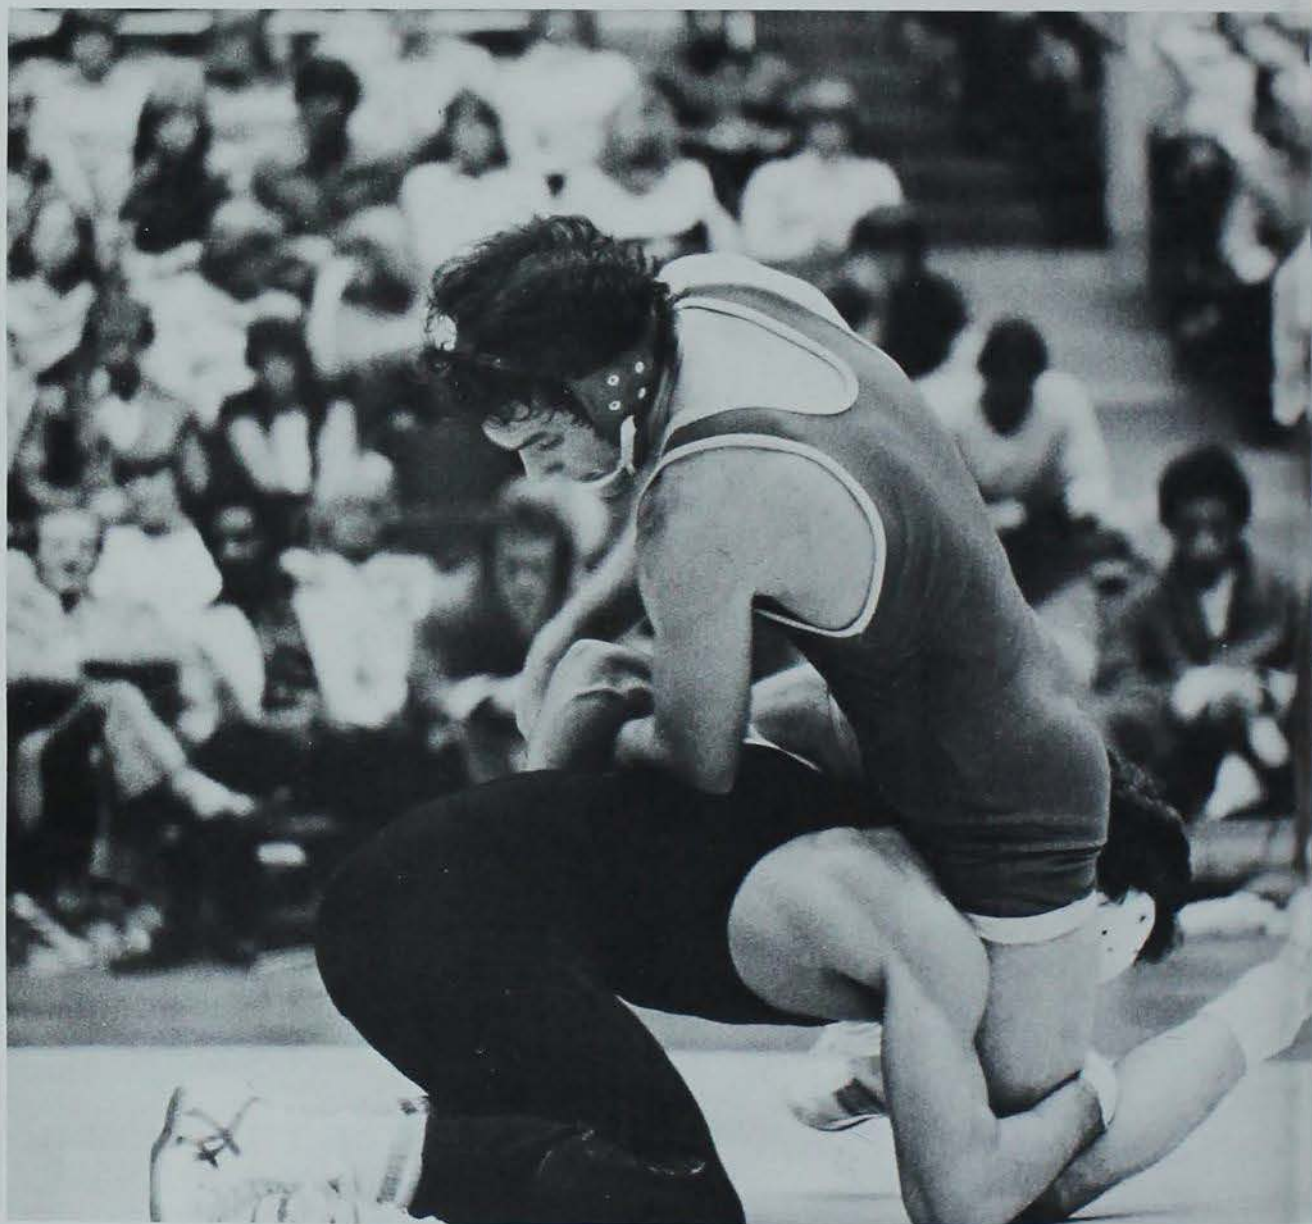

The team meets at center court for some pre-game cheer.

Jill Foley keeps her eyes up as she bumps the ball back into the court.

## *NCAA Champ Land paces Cyclone*

NCAA Champion at 126 pounds, Mike Land shows why he won the title. Wrestling this season at 134 pounds, Land ran up a total of 74 consecutive victories with four dual meets left in the season.

**Kerry Gibson**

# Grapplers

As it happens every year, the wrestling season continued on long after the final deadline for the yearbook. As a result, the Big Eight Championships, the NCAA Championships and the AAU Championships, all of which were held in Ames, could not be covered in this year's book.

The team, led by captains Mike Land, Kelly Ward and Dave Powell ran up an impressive record of 15 wins against only one loss, that coming against defending NCAA Champ, Iowa. To that point, the Cyclones were ranked number two behind the Hawks. There were four dual meets left before the Big Eight Championships including a rematch with the Hawks.

This season's schedule pitted the Cyclones against the top ranked teams in the country, but the team recorded wins over Wisconsin, Oklahoma, Minnesota, Lehigh and Cal Poly.

In addition to the 19 dual meets, the Cyclones competed in the Northern Open in Madison, Wis., the Midlands Championships and the ISU Invitational where they took 12 of the 15 championships.

Mike Land, the 1978 NCAA Champ at 126 pounds, moved up to 134 and continued his winning streak to at least 73. Other standouts for the Cyclones were Kelly Ward who had a season record of 20-2, at 158, Dave Brown at 20-5 at 142 pounds, Dave Allen 19-5 at 177 and freshman Jim Lord with a 14-9-2 record. Lord provided some of the most exciting matches for the fans as he came from behind numerous times to win in the final seconds.

In his 26th season as Cyclone head coach, Harold Nichols received honors of his own as he was inducted into the United States Wrestling Federation's National Hall of Fame.

— Kerry Gibson

Co-captain Kelly Ward started the season as the number one ranked 158 pounder but two upsets moved him down in the ratings. Ward finished runner-up in the past two NCAA Championships.

Dave Powell came off a redshirt season to rejoin the Cyclone starting lineup at the 167 pound spot. Here Powell is in action against Oregon State.

## Consistency key to young team's success

Youth, talent and depth spurred the fifteen member 1978-79 women's gymnastics team to new heights. The young team, nine of the 15 are freshmen, tallied their highest score of the season against nationally ranked Southwest Missouri State. A strong SMSU team led by former Olympian Kolleen Casey maintained their 3rd ranking with a score of 133.30. However, Iowa State was pushing them with 130.70.

Freshman Sue Van Erdt captured 1st on the balance team with an 8.85. Laurie Kick was 2nd with 8.35. Olympian Kolleen Casey took 1st in the remainder of the events and the all-around. Van Erdt was second in all-around.

Wisconsin State all-around champion her senior year, Van Erdt, was consistently the top all-around scorer for Iowa State.

The increased talent and depth of the squad has been the key to their successful season, coach Booth said. "And that's great. We're beating teams because we have depth and quantity. We may not have the spectacular tricks or risk, but we're consistent."

ISU topped Wichita State 125.45 to 122.40. Coach Booth recalled her excitement at the meet; "I was the proudest I've ever been. No one got down, everyone hit their sets — no quitters," Booth said.

Cyclones Keck, Van Erdt and Meg Davis, grabbed 1-2-3 respectively, on floor exercise. Keck and Van Erdt teamed up again in vaulting, capturing 1-2. April Schrieber won the uneven bars with an 8.0.

The energy and enthusiasm of newly appointed assistant coach, Yvonne Sandmire, has been "one of the best assets to the team," Booth said. "She is technically sound in gymnastics and gets a lot out of the kids."

The team travels to Boulder, Colorado for the Big Eight Championships, February 16-17 and hosts the Region 6 AIAW Championships, March 1-3.

1978-79 Women's Gymnastics Team: Row 1: Laurie Keck, Diane Ernewein, Janet Scoville, Meg Davis, Mary Sullivan, Lori Kladstrup, Julie Allender, Row 2: Sandi McGrath, Sandy Donato, Lori Lieberman, Sue Van Erdt, April Schrieber, Sue Couve, Sue Loth.

# Cyclones face change in 'routine'

This season saw some big changes for coach Ed Gagnier's Cyclone gymnasts. The most important was an NCAA rule-change which did away with "one team per conference" rule. The new rule set up four regional qualifying meets with two teams from each of those meets going on to the NCAA Championships. In the past ISU has had the second best team in the country but because the number one team, Oklahoma, was also in the Big Eight, the Cyclones were left out of the team competition.

That rule could really make the difference, because the Big Eight is now a three team power as witnessed by a meet held in Hilton Coliseum January 27, 1979. ISU was host to the Oklahoma Sooners and the Cornhuskers of Nebraska. In what some called the meet of the decade, only 2.65 points separated the winner from the third place team. Nebraska, behind their top all-arounder Jim Hartung, took first with 220.90 points followed by Oklahoma with 219.95 points and the Cyclones close behind with 218.35.

That meet showed another change for the Cyclone squad. In the previous seasons, specialists were the power of the team. But the strength this season lay in the all-around as five Cyclones tried for the all-around honors. Led by junior Stacy Maloney, last year's high point scorer, the all-around team included four sophomores; Tom Hardin, twins Doug and Dave Smidl and Mike Lyons.

Specialists rounded out the squad with one strong performer in most events. Dave Graham and Bob Krause were the top pommel horse performers, Mark Gedstad was second to Maloney in the rings, Bob Duffey, second, vaulted behind Lyons' 9.65 effort, Doug Walkup was second in the parallel bars and Dan Copeland second in the high bar.

An unexpected change came with the transfer of a two-time NCAA champion. Ron Galimore, came to ISU from Louisiana State where he won two national titles in floor exercise. He sat out this season but competed unattached in several 'open' meets.

Sophomore all-arounder Mike Lyons gets ready to swing up into a full stand.

# One-shot games sink cagers

Squeakers. In a word that sums up the '78-79 season for Lynn Nance's Cyclone cagers. Oh, there were a couple of big busts, but most often than not when the final buzzer sounded, only a couple points separated the Cyclones from the opposition. The only problem was that most of the time ISU was on the bottom end of the score.

The season opener saw a record-setting blasting of North-eastern Illinois, 129-69. It was the most points ever scored by a Cyclone team as a record number of field goals were attempted (98) a record number made (52) and a record point total set (71) for one half of play. Andrew Parker also tied his own record for most points in a single game at 33.

Squeaker number one came on the road against Creighton as the Blue Jays won a controversial 55-54 victory. The controversy arose at the buzzer as Bob Fowler attempted a tip-in follow on a Jon Ness jump shot. A Creighton player got a piece of Fowler, but officially the time had run out. The Cyclones claimed that the foul came before the gun but Nance's complaints fell on deaf ears and the score remained the same.

Drake handed the Cyclones their second loss as Bulldog "Pop" Wright gunned in 26 points but most importantly held Parker to only 15 points. The contest ended with Drake on top 8-6-77.

Iowa State got turned around and evened their record at 2-2 as they defeated the Spartans of San Jose State 91-73. But the winning streak was short lived as another squeaker lay ahead.

That squeaker was against cross state rival, Iowa. Reminiscent of the game last year, it came down to the final seconds. The game was tied five times in the final 11 minutes, as Charles Harris kept ISU in the game with a total of 22 points. With 10 seconds left, Harris pulled the Cyclones within one but his shot at the buzzer just bounced off the rim and Iowa had squeaked it out, 67-66.

A small crowd of 6,500 was on hand to watch the Bearcats of Northwest Missouri go down to defeat as ISU outclassed them 77-54. Fans got a chance to see some new faces as coach Nance substituted freely for much of the second half. It was the final home game before a southern road trip that paralleled the football Cyclones' trip to the Hall of Fame Bowl.

The win record was also paralleled as the basketball Cyclones dropped a contest to Mississippi State and like their football counterparts lost the game in Birmingham. With those two losses the Cyclones headed for Kansas City and the "last ever" Big Eight holiday tournament.

In the first round of the tourney, Kansas dumped the Cyclones 75-55 to put the ISU cagers in the bottom bracket. Then came squeaker number three; but this time the Cyclones came out on top as they beat Kansas State 62-61. Their final action in the tourney pitted the Cyclones against the Cowboys of Okie State. But due to Nance's disciplinary action, top scorer Parker was on the bench. Freshman Robert Estes led

the ISU effort with 16 points and center Dean Uthoff hauled down a season high 18 rebounds. But it wasn't enough and the Pokes won, 87-75.

One game remained before the start of the Big Eight schedule and the Cyclones broke it big in defeating Mankato State 102-63. Although he still did not start, Parker came in and shot a 31 point game and redeemed himself.

Nebraska and television came to Hilton Coliseum for the Big Eight opener. After trailing the entire game, the Cyclones charged from 13 points back to make it 70-68 in favor of the Huskers with just 32 seconds left in the game. Estes failed to pull off a Nance trick play on a free throw and the Huskers put it away 72-68.

All-Big Eight center Dean Uthoff soars above an opponent to pop off a shot. The big junior was the leading returning rebounder in the U.S. Rod Mickels

# Squeakers . . .

After a snow postponement, the Cyclones came on strong to end an 11 year drought in Kansas State's Ahearn Fieldhouse. The 79-66 win sent Nance's cagers into an eight way tie for the conference lead.

Squeakers four and five came in succession with ISU on top in both contests. First the Cyclones, led by Parker's 27 point effort, edged the Buffs of Colorado, 60-59. The last "two" came with 18 seconds left on a shot by Parker, and Eric Davis sealed the Bugg's fate with a steal at the 3 second point.

Parker shot the eyes out of the basket again as the Cyclones escaped with a 72-70 win over Oklahoma State. Twenty-six of Parker's 32 points came in the second half.

Kansas put an end to the winning streak and the Cyclones, chance to be all alone in first place. The Jayhawk defense caused numerous turnovers and when it was over Kansas was ahead 80-71.

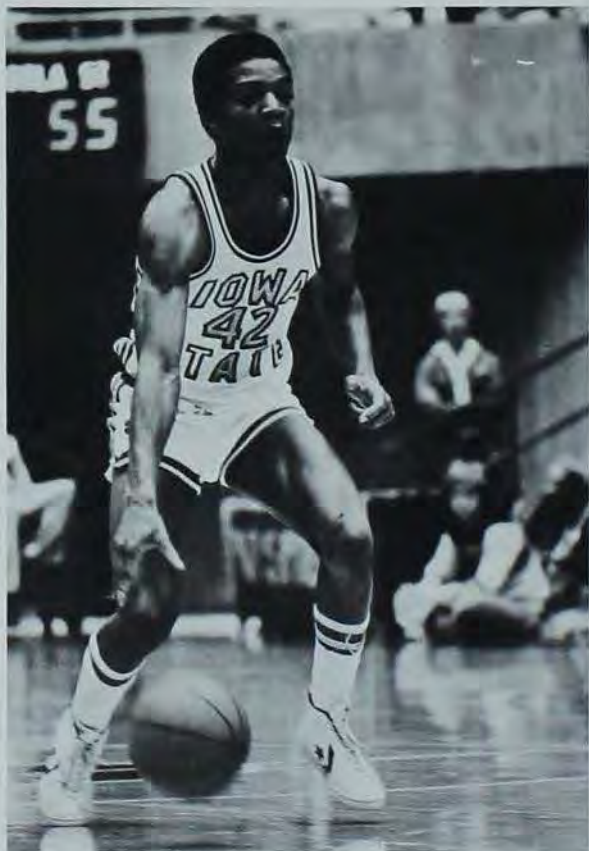

ISU dropped the next contest too as the hot shooting Oklahoma Sooners had six men in double figures in the 98-83 victory. The Cyclones cut the lead to five with 1:45 left in the game but late fouls and Sooner freethrow accuracy prevailed.

Parker scored 22 points to bring his total to 132 points for five games. His career total of 1,340 moved him into 21st on the Big Eight all-time scoring list.

The next two games qualified as squeakers but ISU's turn on top had ended. Missouri sent a game into overtime before they took the win at 84-80. The Cyclones led much of the way; 46-36 at the half, but injuries late in the game hurt them. Estes and Ness both had to leave the game and joined Chuck Harmon who was out already with an ankle injury.

A 35-foot jump shot at the buzzer gave Kansas State revenge for the two earlier losses to the Cyclones. ISU let an early 11-point lead dwindle away. Bob Fowler and Ness came through late in the game to keep things tied up but an in-bounds pass and shot from the baseline by Wildcat Jari Wells gave K-State the edge, 62-60.

Due to publication deadlines, it was impossible to know just how the Cyclones would fair in the final six games of the season. But with a 3-5 record in conference play, it would take quite a turnaround to avoid a division II finish in the Big Eight playoffs.

Eric Davis of Chicago came to ISU as one of the 12 top prep shooters in the country.

# Women cagers 7th in Big 8 tourney

Up and down.

That's one way to describe the young Iowa State women cagers, as they posted a 9-13 record by early February.

Fifth-year women's cage coach Lynn Wheeler had only two seniors on her squad — co-captains Carol Ruby and Terri Helgeson. It was a freshman-dominated team, with seven first-year players in the Cyclone lineup.

Through 23 games, frosh Sue Reitsma led the ISU scoring with a 10.5 per game effort. The Fort Dodge native also led in rebounding with 6.9 boards per game. Following Reitsma was another freshman, Gileen Gleason of Ames, with 9.9 points per game and 6.7 rebounds per contest.

Karry Crafton, another first-year player, scored 7 points per game, and pulled down 6.7 boards per game in a reserve role. Crafton, from West Burlington, had never played offense before coming to ISU. Yet another freshman, Tracy Eckert, led assists with 6.1.

A highlight of the women's basketball season was winning the championship in the Lady Badger Tournament, Jan. 26-27, in Madison, Wisconsin.

ISU downed host Wisconsin, 76-62, in the opening round of the tourney. Karen Weise had 17 points, and Gleason put in 14 to pace the Cyclones.

In the championship tilt, ISU downed Illinois-Chicago Circle, 59-54. ISU trailed, 33-23, at the half, but play by Crafton and Reitsma kept the women alive. Crafton scored 12 points, and Reitsma had 11.

Gleason was named to the Lady Badger all-tournament team. She scored 33 points and pulled down 13 rebounds in the two wins.

A shortage of guards caused further woes at mid-season. Ruby, the most experienced player on at the guard spot, suffered a knee injury in the 77-68 loss to Drake on January 27, and missed much of the rest of the season. Michelle Coady, a junior, also missed several games with injuries.

Eckert, who played much of the season wearing a protective mask to guard a facial injury, was hampered in the Lady Badger tourney, Central, and Nebraska contests with a leg injury.

The women cagers were part of an important first this season. For the first time, the women played basketball doubleheaders with the men cagers in Hilton. Four men-women games were played this season.

# Tankers preserve Beyer win streak

Despite a change of coaches for the third year in a row, the ISU tank team kept alive a five year string of Big Eight Conference dual meet victories.

New head coach Bob Groseth inherited a thin but solid squad from his predecessor Rich Quick, who left after one season to take over coaching duties at SMU. Quick came to Iowa State to replace longtime swim coach Al McGuire who retired after the 1976-77 season.

Groseth coached at Tulane last year where he led the Green Wave to a second place finish in the Metropolitan Collegiate Athletic Conference. Prior to that he coached in Cincinnati where he compiled a 21-9 record.

Two of the swimmers Groseth inherited were seniors who had never been defeated in Big Eight Competition. Drew Walden and Chuck Graves were part of the long tradition of winning that stretched back to McGuire's time. Neither had been defeated in their respective event; Graves in the 200 freestyle and Walden in the 200 butterfly. Junior sprinter Jay Leigh rounded out the top returnees to the team.

The highlight of the season came against Kansas as the Cyclones defeated the Jayhawks 61-52 in the Beyer pol. Groseth said that the first event, the 400 medley relay, was the deciding factor in the meet.

"We knew they were going to throw in their big guns; so we did too. When we won it, they had to catch up to us and that made all the difference," Groseth said.

The only loss of the dual season through the first part of February came at the hands of Wyoming. Cyclone victories included Kansas, Colorado, Nebraska, Missouri and Oklahoma State. A meet with Oklahoma was cancelled.

A tough schedule remained ahead as the Cyclones faced Big Ten foes Minnesota, Wisconsin and cross state rival Iowa in preparation for the Big Eight Championships. That meet will be held March 1-3 in Norman, Oklahoma.

# Divers qualify for Nationals

Mary Ann Eadie performs a reverse one and a half somersault in a pike position on the one-meter.

The ISU divers stole the show in a duel against Illinois State, placing one-two in both diving events. Mary Ann Eadie and Nora Brown qualified for the AIAW National Championships in both the one-meter and three-meter. Eadie tabulated 432 points, Brown 428, easily over the 385 standard. On the three-meter, Eadie totaled 431, Brown 426, again over the standard of 410. "They're better on the one-meter, because they lack the experience on the three-meter board," Brian Roberts, assistant swim coach said. The three-meter event is not contested on the high school level.

"The divers will definitely be going to the national meet, and hopefully a couple of swimmers", Coach Bottger said. "We have a good chance to qualify the medley relay."

The swimmers also clicked against Illinois State, winning 87-44. The Cyclones broke five school records and avenged a 79-52 loss, suffered last year.

The tempo of the season was set in their first meet, the Cyclone Relays. No team scores were kept, but ISU won five of the 10 events. Coach Bottger commended Sue Wyatt and Theresa Morse for their outstanding efforts.

At the Nebraska Invitational, ISU placed sixth out of nine schools. Florida State was the team winner in a very competitive field. The Cyclones tallied 309 points. Last year they could manage only 65. Colleen Brodin and Sue Lentz had "super swims", in the 1600 freestyle. Brodin went a minute

and a half faster than her personal record.

Iowa State whipped Iowa, 97-32, in Iowa City. Breaststrokers Deb Goetsch, Marla Anderson and Wyatt were singled out by Bottger for excellent performances. "Last year we couldn't beat Iowa in any event," Bottger said.

The 1978-79 squad had 18 members, twice as many as last year. Sixteen of the 18 already set life-time bests. Twenty-six of the 27 school records have been broken. The Cyclones concluded the dual meet season with a 5-1 record. They were working towards the State AIAW meet, February 9-10. "Last year Iowa beat ISU in every event, but this year we should have no trouble winning the state meet," Roberts said.

# sports quiz

- Iowa State wrestling mentor Harold Nicols began his coaching career at which university?
  - Michigan
  - Arkansas State
  - Michigan State
  - Iowa
- The most points scored in a single game by an Iowa state basketball player was 43 by:
  - Gary Thompson
  - Don Smith
  - Hercle Ivy
  - Andrew Parker
- Who set the women's US collegiate record of 58.5 in the 400-meter hurdles while running for ISU?
  - Katy Schilly
  - Deb Esser
  - Dona Lane
  - Marjean Nielsen
- The 1976 Iowa State Athlete of the Year was Pete Galea; in 1978 it was Mark Trippel. Who was the 1977 Athlete of the Year?
  - Wayne Stanley
  - Doug Wood
  - Luther Blue
  - Jon Mixdorf
- Who was the first Cyclone women's cager to score 1,000 career points?
  - Beth Greiman
  - Colleen Peterson
  - Pat Hodgson
  - London Reile

Dave Hoppmann

- Who set a school rushing record of 271 yards in a single game against Kansas State?
  - Dave Hoppmann
  - Mike Strachan
  - Jim Wingender
  - Dexter Green
- Who among the following was not a two-sport star at Iowa State?
  - Mal Schmidt
  - Gary Thompson
  - George Amundson
  - Matt Blair
- One of the following Cyclone athletes was named Iowa Prep Athlete of 1977. Who was it?
  - Brian Neal
  - Chuck Locke
  - John Ness
  - Karen Wiese

Mike Land

- Gymnastics Coach Ed Gagnier came to Iowa State in which year to start the Cyclone program?
  - 1955
  - 1960
  - 1963
  - 1967
- What women's gymnast captured two Big 8 Conference All-Around titles?
  - Margie Hudelson
  - Sue Cassidy
  - Laurie Keck
  - Diane Lary
- The Veenker Memorial Golf Course was named after George Veenker. He was an Iowa State:
  - President
  - Golf Coach
  - All-American Golfer
  - Football Coach

Deb Esser

- One of the following women set an all-time school 18-hole record for the Cyclone golf team. Who was it?
  - Deb Moler
  - Rachel Reicher
  - Kristy Vik
  - Carol Eich
- What men's gymnast set a school record while winning the 1978 NCAA floor exercise championship?
  - Doug Wood
  - Keith Heaver
  - Stacey Maloney
  - Curt Austin
- Last winter Mike Land won All-American honors for the fourth time. The only other Cyclone wrestler to accomplish that feat was:
  - Dan Gable
  - Ben Peterson
  - Al Nacin
  - Frank Santana
- What Iowa state football player holds the school record for most career pass receptions?
  - Keith Krepfle
  - Otto Stowe
  - Ike Harris
  - Luther Blue

. . . Key to your horizons

# Drinking age raised

It's been a long time since students at Iowa State had to show an I.D. to get a drink. But checking the I.D.'s has started again. Last summer the Iowa Legislature raised the legal drinking age in Iowa from 18 to 19.

The new law was passed in the middle of last summer. Anyone who was 18 and could legally drink before the law went into effect was "grandfathered-in". Anyone who became 18 after the law passed could not legally drink until he reached the age of 19.

One of the biggest reasons for the change was to stop drinking by high school students. Surveys had shown that high school drinking was on the rise and it's hoped that the new law will curb the problem. But, the new law is causing some problems at ISU.

This fall's freshman class was the largest ever, about 6500, and almost half of the freshmen were "grandfathered-in" as legal drinkers. That left the other half of the freshman class under age for drinking alcoholic beverages. Next fall, virtually the entire freshman class will be under age

because no new 18-year-olds will be "grandfathered-in." Because of the new law, the residents of the dormitories and the Greek system have had to review their party policies. The residence department developed a new party policy for its residents. Houses can only allow invited guests to their parties, thus insuring they are private affairs. They also must have a designated bartender to see that liquor isn't dispensed to anyone underage, intoxicated or simulating intoxication. In the last couple of years, the residence department had some legal problems with people getting intoxicated at parties, then leaving and hurting themselves. The department plans to end those problems with the new policies.

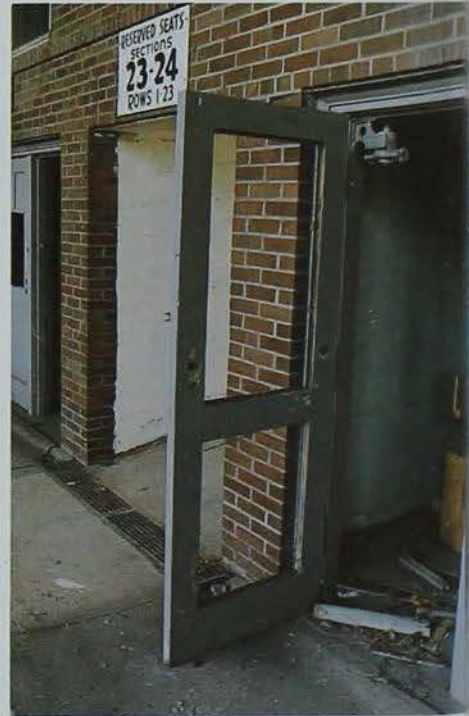

Basically the new law means a change for parties at ISU. Next year, almost a third of the students will be under age. Parties in the future will be supervised closer than in the past and will also offer more choices of beverages. And what the heck, who needs to get drunk to have a good time?

—John Riches

# Clyde Williams Field...

Photos by John Riches

After 60 years of touchdowns, field goals, victories and defeats, the stadium at Clyde Williams Field has vanished from the Iowa State Campus. Only memories of the field and the games played there live on . . .

It all started back in September of 1892 when the university assigned the Student Athletic Association a strip of ground and gave them \$200 to improve it "for athletic purposes." The area was seeded, leveled and named State Field. That first year the Cyclones were undefeated in their two-game schedule. They tied State Center 6 to 6 and defeated Des Moines Y 30-zip.

It wasn't until 1914 that the Athletic Council erected concrete bleachers on the west side of the field. The \$34,000 debt was paid off by gate receipts, alumni contributions, student assistance and donations. The eastern bleachers were built ten years later at a cost of \$74,500.

When the Cyclones smashed the Iowa Hawkeyes in a surprise 31 to 6 victory in 1932, the stadium was still called State Field. It wasn't until 1938 a few short weeks after the death of former Coach Clyde Williams that the stadium was renamed. Williams was Iowa State's first fulltime salaried football coach, and highly respected in his role as athletic director.

The Cyclones won their first game

against Luther College on the newly named Clyde Williams Field largely due to their strong running attacks. As Iowa State grew in size, Luther was dropped from the schedule. Kansas, Missouri and Drake continued to be chief opponents.

For a span of 29 years the Cyclones failed to defeat the Oklahoma Sooners. In 1960 the Iowa State spirit was restored with a 10 to 6 win. In 1961 4,500 new seats were added to the east stands and a new press box was installed.

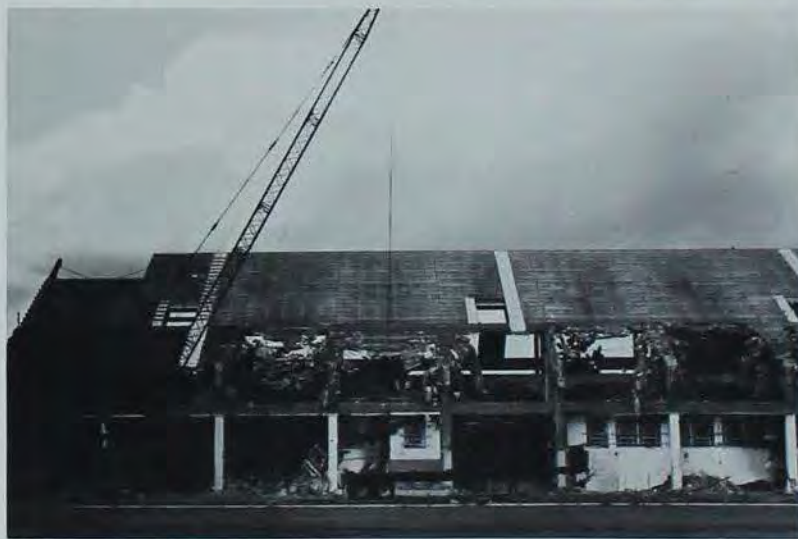

Cyclone football enthusiasm grew and in 1966 a 10,700 seat grandstand was erected in the south end zone. Little did the Cyclone fans know that in 1975 Clyde Williams would be replaced by a new \$7.6 million dollar stadium.

The final game played in Clyde Williams ended in a 23-23 tie with Nebraska. Iowa State scored a late touchdown to tie the score. Some of the record crowd of 36,690 fans poured out of the stands and onto the field. Cyclone Tom Goedjen missed the extra point which resulted in much controversy. The Cyclones finished their last year at Clyde Williams Field with a 5-5 record before their loss in the Liberty Bowl.

# Quarter/Semester

In an attempt to "enhance the learning situation at Iowa State," the university will convert to the early semester system in the Fall of 1981.

The switch to the semester system was approved by the Board of Regents on May 18. President Parks had proposed the change after what he called a "significant majority" — 59 percent — of the general faculty said they felt the semester system was better than the present quarter system.

The faculty vote came after a quarter of discussions, meetings, surveys and petitions in a debate of the pros and cons of the present system and a change to semesters. An Ad Hoc committee of the All University Community Council had made a detailed study of what could be done to improve learning at Iowa State and had recommended the change.

In April, the GSB passed a resolution asking the faculty to vote for the quarter system. A GSB telephone survey had shown that 64 percent of the students favored the quarter system.

Work has already begun on making the switch. The Semester Steering Committee has determined that the semester should be 16 instructional weeks long. Fall semester will begin in late August and end shortly before Christmas. This early semester system will avoid a term that spans the Christmas holidays, which had been given as one of the advantages of the semester system. Edwin Lewis, a member of the Steering Committee, said, "I don't know of any teacher who defends the winter quarter. It takes so long to get back into studying after the break."

No decision has been made on the start of the spring or summer semesters. Lewis said he thought the calendar would

run very similar to that of the University of Iowa. The spring semester would then begin in mid-January and end in mid-May.

The next, and most time-consuming, step is to change each department's curriculum from quarter credit hours to semester credit hours. Curriculum committees in each department have begun to meet and discuss changes based on guidelines from the Steering committee.

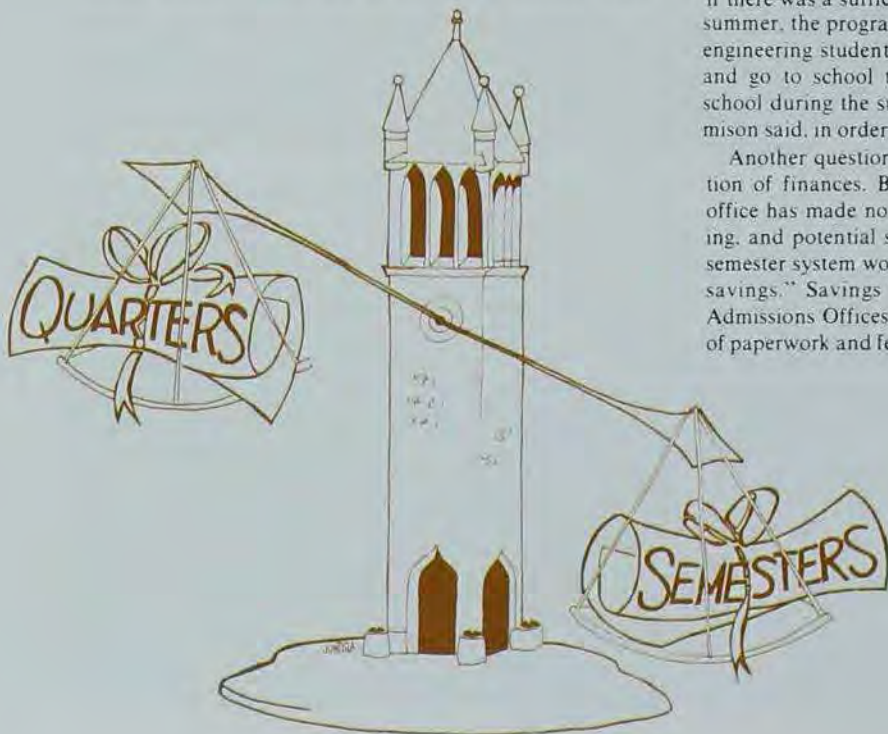

The work being done in the committee is only tentative. "We have not come to any firm proposals yet," Charles Kniker, chairman of the College of Education curriculum committee, said. He said courses need to be and evaluated repackaged.

James Cornette, chairman of the College of Sciences and Humanities curriculum committee, agreed with Kniker. "We haven't done a lot of work (on the semester curriculum) yet, because we've been concentrating on the '79-81 catalogue."

A change to the semester system will mean changes not only in the curriculum, but in special programs. For example the status of the Farm Operations winter program is unsure. Don Woolley, head of Farm Operations, said that this program must depend on other departments for courses, because Farm-Op teaches only two classes. "If other departments don't do it, I don't know what will happen." Woolley said there may be a partial semester package beginning in January for those who farm during the summer and spring, and go to school in winter.

Another program whose status is in doubt is the Engineering Co-operative Program. "It'll survive but not well," Herbert Harmison, head of the Co-op program said. He said that if there was a sufficient number of courses offered during the summer, the program would work. The Co-op program offers engineering students a chance to work half the year on a job and go to school the other half. The students who attend school during the summer need a wide array of classes, Harmison said, in order to graduate in five years.

Another question that has not been settled yet is the question of finances. Bernard Randol, Controller, said that his office has made no formal study of fees assessment and billing, and potential savings. However he said he was sure the semester system would result in "significant changes . . . and savings." Savings would come in the Registrar's and the Admissions Offices. And he said there would be a reduction of paperwork and fewer extra staffers would be needed.

Tim Paslay, Arch 3, pulls an "all nighter" trying to finish up an architecture project. It almost seems like the quarter is over before it starts.  
Photos by John Riches

The semester system would mean a savings for students in that they would only have to buy books twice a year. Managers at both the University Bookstore and Campus Bookstore said they had not thought much about the change to the semester system, but they anticipated no changes in book prices and the buy-back policy.

Work has not progressed very quickly on converting to the semester system, but Lewis feels it is going smoothly. "We're trying to review things carefully. We want to give people a chance to have input."

—Julie Hagemann

Don Schaffer, AgEd 3, and Mark Reichenauer, Dy S 2, head for home during one of the quarter systems breaks. (below) Ray Thom, E Sci 4, and Mike Kutz, Mteor 2, pack up for Christmas break. It might not be quite the same with semesters.

# Financial aid ... how to get it

If you've ever thought about applying for financial aid, you're probably like most students and just figure you won't qualify because your family is too middle class. You probably didn't know that over 45 percent of the financial aid administered through Iowa State last year went to people with family incomes ranging from \$9,000-\$21,000.

Family income isn't the only consideration when evaluating for financial aid, according to John Bannister, financial aids director. He also said to generalize that anyone with an income over \$15,000 can't qualify is a fallacy. If you're interested in some kind of financial aid, it might be a good idea to visit the financial aids office in Beardshear Hall. Aid comes in several ways; grants, loans or work-study. Last year, Bannister's office passed out nearly \$10 million worth of aid to about 4,500 students.

Program	# Assisted	Amount
National Direct Student Loan	3032	\$1,838,736
Supplemental Educational Grants	524	219,136
College Work-Study Jobs	626	464,516
University Scholarships/Grants	2600	1,572,748
University Long Term Loans	323	185,645
Health Professions Loans	139	236,924
Basic Educational Grants	2218	1,737,786
Federally Insured Loans	2101	3,270,858

One of the biggest factors in determining whether or not you will get any aid is the time you apply. Bannister said almost anyone who applies before the first of March can get a good financial aid package if they qualify. After March 1, students take a chance on just getting the "table scraps" of the aid left.

The Basic Grant program has been a big influence on the financial aid scene Bannister said, adding that next year the number of students eligible for the program is expected to double. That may mean another \$2 million for ISU students. Bannister said education is a very sound investment that will repay society many times over, and that's why the government backs these programs.

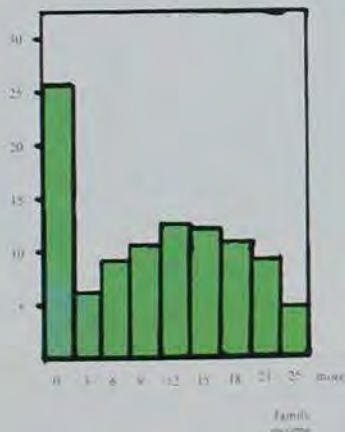

The philosophy for awarding financial aid at ISU says the student's total needs should be met. It also says each student's financial package should include either a loan or work-study. The first \$700 is awarded in the form of a loan with the option to change it to work-study. The next \$1,400 of need is met through gift assistance.

Even though there are many ways to qualify for financial aid, there are still students who don't qualify for aid and really do need some type of assistance. Bannister said those students should look into federally funded loans directly through their bank. The bank loans are not based on the financial needs of the student. Students can borrow up to \$7,500 and until nine months after graduation the government picks up the tab for the interest. Bannister said that can add up to as much as \$1,700 that the government will pay for anyone to go to school. Sounds like it might be worth checking out.

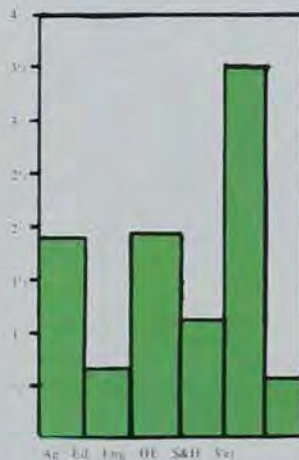

— John Riches

% of aid awarded

aid \$ millions

**ADD**

## Preclassifying ... only 19?

Adding and dropping classes . . . That's something most ISU students are pretty good at by the time they finish their four years here. During the last year, some major changes were made in the drop policy. A by-product of the new drop policy, limiting to 19 the number of credits a student can preclassify for, went into effect this winter.

One of the aims of the limit on preclassification was to decrease the problem of students being cut from a class. In the past, many students have been guilty of preclassifying for a larger number of credits than they want. When they got their schedules, they would choose which classes to keep

and which to drop. Well, that sounds really nice to be able to pick and choose like that, but it also caused a problem. Some students were canceled out of courses because others were filling up all the classes first.

The 19 credit limit seemed like a good solution, but alas, even the best of plans sometimes go astray. Figures from the registrar's office show a two per cent increase this winter quarter from last winter when 28 percent of undergraduate students were cut from one or more classes.

However, all might not be lost for those students stuck standing in long lines. Edwin Lewis, assistant vice president for academic affairs, said the

Photos by John Riches

**DROP**

number of students cut from classes this fall was much higher than the preceding fall, while the figures from the previous winter show only a slight increase this winter.

You might ask what all this means, and that's a good question. Basically, it means students preclassifying for more credits than they really intend to take isn't the only problem in the system. Many of the other problems have no immediate solution and it looks like students will be forced to stand in line for some time to come.

Most of the other problems are related to funding not keeping up with increased enrollment. Lewis said every attempt is being made to make more

class space available to students. A request has been made for extra money to cover increased enrollment needs, but any funding from that request would be used next year.

I guess the only thing to look forward to is the fact that 1980 is predicted to be the peak enrollment year at ISU. Maybe after that, enrollment will start to decline a little bit, and after a few years of declining enrollment, maybe the funding will start to catch up with the need for class space and instructors.

Until then, it looks like the add and drop lines will be a good place to stand around with your friends. See you in line!

—John Riches

*Robert Parks*

*George C. Christensen*

*Paul Hamilton*

*Tom Thelen*

*Wayne R. Moore*

*Daniel J. Zaffarano*

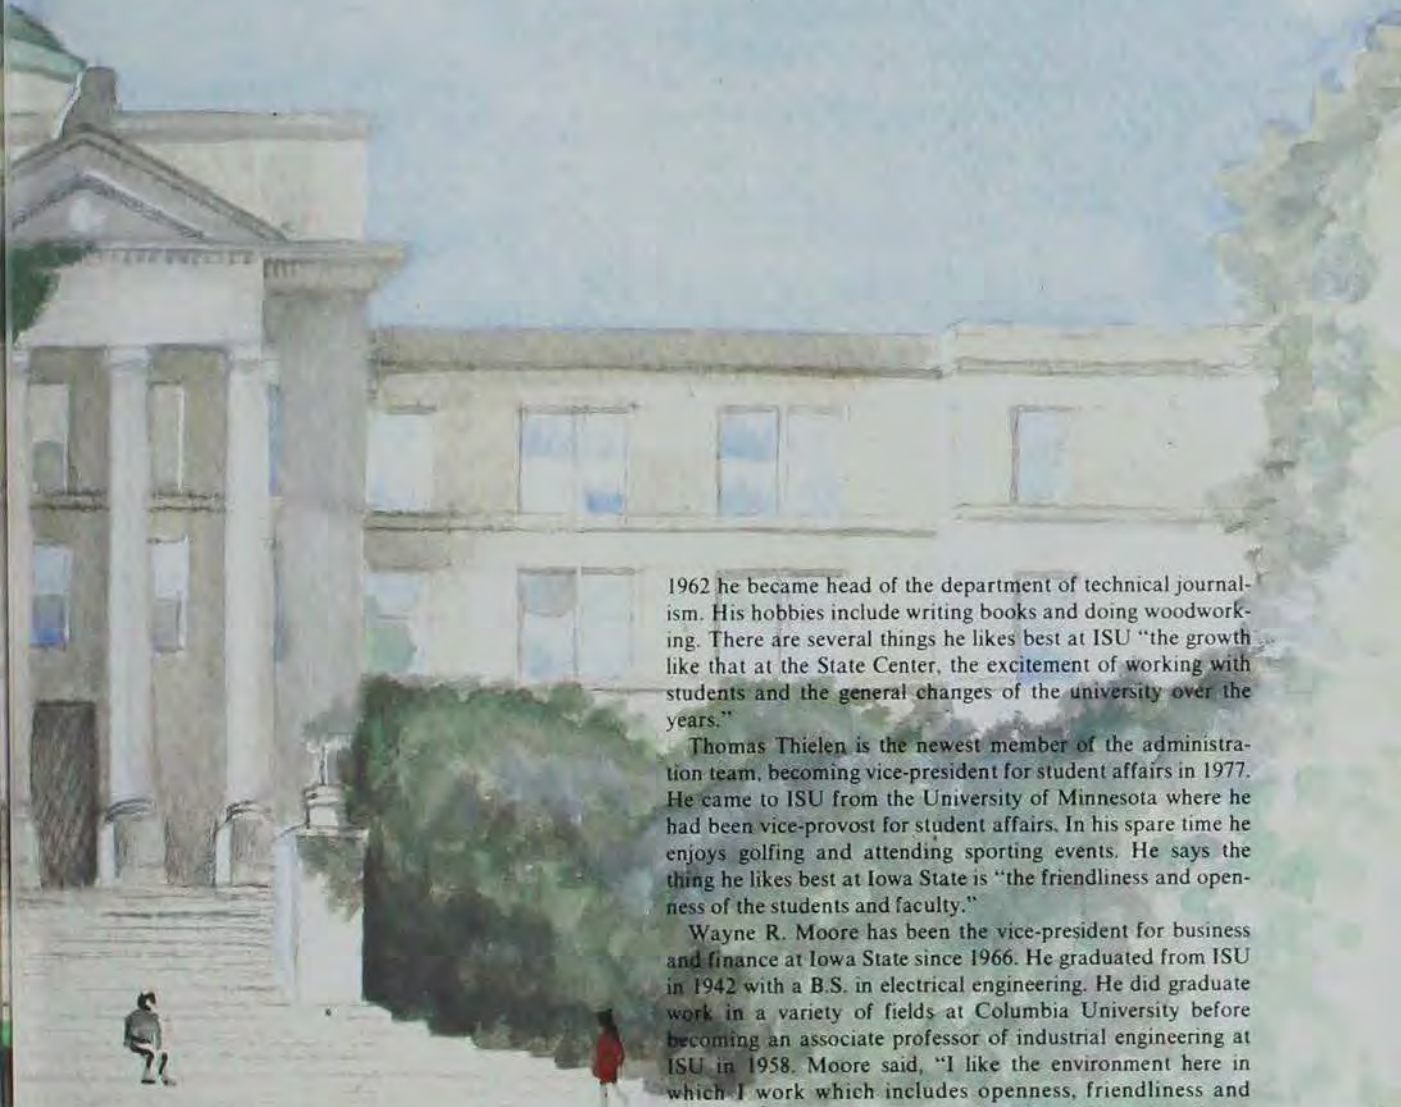

Students come and go at a university like Iowa State every four years. But that's not usually the case with the people that run the place. This year we decided to tell you a little bit about the people in charge at ISU.

W. Robert Parks is the eleventh president of Iowa State and has been since he assumed the position in 1965. Before his appointment he served as a professor of government, dean of instruction and vice-president for academic affairs. For a hobby he enjoys gardening. When asked what he likes best at Iowa State he said, "It's students, faculty and staff and the beautiful campus which is almost without parallel."

Dr. George C. Christensen has been vice-president for aca-

1962 he became head of the department of technical journalism. His hobbies include writing books and doing woodworking. There are several things he likes best at ISU "the growth like that at the State Center, the excitement of working with students and the general changes of the university over the years."

Thomas Thielen is the newest member of the administration team, becoming vice-president for student affairs in 1977. He came to ISU from the University of Minnesota where he had been vice-provost for student affairs. In his spare time he enjoys golfing and attending sporting events. He says the thing he likes best at Iowa State is "the friendliness and openness of the students and faculty."

Wayne R. Moore has been the vice-president for business and finance at Iowa State since 1966. He graduated from ISU in 1942 with a B.S. in electrical engineering. He did graduate work in a variety of fields at Columbia University before becoming an associate professor of industrial engineering at ISU in 1958. Moore said, "I like the environment here in which I work which includes openness, friendliness and mutual trust by faculty, staff and students." He enjoys listening to records and tapes and snow skiing.

In 1971 Daniel Zaffarano was appointed vice-president for research and the dean of the graduate college. He has taught at ISU since 1949 and became head of the physics department in 1961. In 1967 he was named a Distinguished Professor of Science and Humanities. When asked what he liked at Iowa State he said, "I like the fact that in many ways it is continually changing in the direction of becoming a more exciting university." He says he also likes the fact that the climate for research is constantly improving. As a hobby he likes music, singing and playing the piano.

— *John Riches*

demie affairs at Iowa State University since 1965. He held several other positions at ISU prior to his appointment including associate professor of veterinary anatomy and dean of the college of veterinary medicine. He is internationally known for his work in the biological sciences. He says one thing he likes about ISU is "the cooperation and interest in working together by students, faculty and staff for common goals." As hobbies he enjoys photography and oil painting.

Carl Hamilton became vice-president for information and development in 1967. He is a graduate of Iowa State in agricultural journalism. As a student he was editor of the student newspaper and chairman of the student body government. In

# Cheating

"Gee, I think I'm gonna have to scope on this test," Ever heard that line before?

When a student scopes on a test, he has "roving eyes", in short, he is cheating. There are many different ways to cheat, but this is not a "how-to" story. But how much cheating goes on at ISU?

"It's not rampant, but it does occur," said Virginia Arthur, a member of the All-University Judiciary Committee. "Most faculty members are aware that a certain amount of it goes on . . . there is always going to be some degree of it, and that degree seems to stay about the same," said Edwin Lewis, Assistant Vice President for Academic Affairs.

"It's hard to get statistics on it," Lewis added.

Cheating — why does it happen?

In two student hearings that she has been involved with, Arthur said the students felt they were under a lot of stress to perform, and that cheating was their only alternative to get the grades. "A lot of the pressure that students feel is self-imposed, and peer kinds of pressure," said Russell Canute, Assistant Director of the Student Counseling Service. A non-random sample of some reasons students give for cheating are: "I didn't know the material, and I wanted to pass." "The pressures of college life are so great at times, that I cheat just to stay ahead." "It was an important class, and I didn't want to take any chances on getting a low grade."

Another reason given by students was a fear of losing financial backing from their parents if they didn't get good enough grades.

Cheating comes in different forms — spying on another's answers, plagiarizing papers or copying lab reports.

For example, regarding the Chemistry 141 labs, "I'm sure there's a lot of cheating going on there," said Wilbert Hutton, Jr., Chemistry Professor. "It's

a difficult thing to do anything about." "I think this is true in most laboratory situations, the students have got you in a bind if they cheat because you can't control it," Hutton said.

He said it's a problem since the material can't be changed very often, the change requiring a different experiment, report form, and lab supplies for every student, every quarter. If instructors had to do that, they couldn't do a decent job of teaching and evaluating, Hutton said.

Cheating — how can it be reduced?

Hutton said if students aren't given the opportunity or the temptation, it is minimized. Should teachers make an extra effort to reduce possible test anxiety? "Pressure and anxiety are all part of the game, you have to be able to work under pressure," Hutton said.

Lewis said the best thing an instructor can do is to make it as difficult as possible, and set up the testing situation in such a way that it's clear the students are being carefully observed.

"If the students feel the instructor is paying no attention, they're more likely to try it, I think," he said. In this case, he said, students may also cheat because they think everyone else is. Lewis suggested using alternate exams, different exam forms, and supervision by teaching assistants as possible ways to alleviate the problem.

I think the best thing the instructor can do to alleviate cheating on, say, term papers, is make it clear to the students the value of doing the assignment," he said. Lewis also said if the students feel an assignment is just busy work, and not something to learn from, the chances of cheating increase.

"Some instructors may not bother to explain the purpose of such an assignment," he said, "and if there is no good purpose, then it probably should not have been assigned."

Arthur said she would rather see the problem dealt with on a more individual basis than by a "policing" type of effort. Dealing with the pressure to perform aspect, Arthur said she preferred to "help them to better deal with that stress, and develop other ways to cope

with it."

Canute said proper supervision (in the testing situation) was important, but "you don't breathe down people's backs, that causes anxiety." "I think we would have much less difficulty with the whole area of cheating if we could help students reduce their anxiety."

Cheating — there are different forms, reasons, solutions, and punishments.

"There are some real problems when the instructor becomes both the prosecutor and the judge," Lewis said, "and I see problems in using the grade as a punishment."

He said "I think it is more fair to have an objective, neutral group, such as the Judiciary Committee, decide whether the evidence is sufficient to conclude that the student did cheat."

Cheating — no matter what the cause, the consequences are something to think about.

— Mark Halverson

## Earle Bruce leaves a winner

A legendary coach with a known temper . . . a bowl game . . . and an intercepted pass. Put them all together and it means Iowa State lost its head football coach. It began when Woody Hayes, the mentor of Ohio State football punched a Clemson player after intercepting an OSU pass, sealing a victory for Clemson in the 1978 Gator Bowl.

Well, Woody had finally gone too far and after 28 years as head coach he was fired and Ohio State officials started looking for a new coach. Their choice was Earle Bruce, the head coach of the Cyclones for the last six years. At one time Bruce had been an assistant coach under Hayes.

Bruce's first three years at ISU were marred with losing seasons, and after the 1975 season many people wanted to see Bruce replaced. But, through it all he held on and put together three straight 8-3 seasons in a row. He led Iowa State to two bowl games during his last two years here. The Cyclones didn't win either of the bowl games, but that's beside the point. The point is Bruce helped to make ISU a team to beat rather than just another 'pud' conference game. In both 1976 and 1977 the Cyclones beat Nebraska, something they hadn't done for quite a while let alone two years in a row. Even though ISU wasn't as strong this year in the conference, the Cornhuskers head coach tabbed the Cyclones as one of the teams in the conference he had to worry about.

All that's behind the Cyclones now, as they look forward to putting together a winning season with a new coach. Less than two weeks after that announcement came that Bruce would be leaving, Iowa State officials named Donnie Duncan as the new Cyclone head coach. Duncan comes to ISU with a winning tradition back in Texas and more recently as the assistant head coach of the Oklahoma Sooners under Barry Switzer for six years. Having a winning team to work with is nothing new to Duncan . . . let's hope he doesn't have to get used to having it any other way.

—John Riches

Iowa State's new head coach, Donnie Duncan, made his first appearance at a press conference in January. He said he plans to stick with the Cyclones basic offense.

Turning out good farmers — that's what the College of Agriculture is about, right?

That is an important part of it. But when you consider that in the academic year between summer school, 1977, and spring quarter, 1978, approximately 100 students graduated with B.S. degrees in Farm Operations, and that about 4,000 students are enrolled in the College of Agriculture, there has to be more to it than that.

The Aggies in cowboy boots and leather-tooled name belts may be the ones you can pick out in a crowd, and in a few years many of them will probably be establishing themselves in the business of farming. But ag students, like the College of Agriculture, are going in many directions, and not all or even most of them lead directly back to the farm. The college added new curricula in seed science, agricultural biochemistry, and extension education this year, following the trend of the past to broaden the fields of study in agriculture as necessary to prepare graduates for jobs in modern agriculture.

And it doesn't stop there. While College of Agriculture faculty prepare students for the future, their research works published around the world have important, immediate effects and carry the weight of years of tradition of excellence in

Agriculture at ISU.

The U.S. government often calls up on ISU researchers to study issues in agriculture.

For example, two ISU Animal Science professors participated in a national controversy this year over the Food and Drug Administration's consideration of a ban on the use of nitrites in processing cured meats. The two are members of CAST, the Council for Agricultural Science and Technology, a consortium of 25 food and agricultural science societies which is very active at ISU.

Charles Black, professor of agronomy and executive vice president of CAST, said CAST works at "getting sound scientific information out to decision-makers and consumers on issues of current national importance." Most CAST task forces work at the request of members of Congress, Black said. Contributing to the nation's agricultural technology is part of what the College of Agriculture is about. So is preparing students for leadership roles in government and industry related to agriculture. And equally so is that most obvious part — turning out good farmers.

— Betty Lou Oxley

What do a 24-year-old ISU junior and a 10-year-old blond boy have in common?

For Bob Weeces, an elementary education major from Marshalltown, and 10-year-old Chris Nelson, of Ames, it's jumping tires, catching frogs, building stilts and balsa wood airplanes and enjoying an occasional ice cream cone together.

Bob and Chris are just one of 17 pairs matched together through the Big PAL program sponsored by the YMCA in Ames. Matched with each other for over a year, Bob and Chris have become "best buds."

The YMCA's PAL program recruits male and female volunteers from Ames and Iowa State. Julie Kent, PAL Director, meets with each volunteer and child individually to fit personalities and interests before matching the pals. The program's purpose is a worthy one, offering an adult relationship to children from one-parent homes. Based on friendship, the PAL program is similar to the Big Brother-Big Sister programs in many cities.

"Many single parents who have the entire responsibility of raising a family are often faced with the problem of providing the extra care and friendship they know their children need," explained Kent. "We hope the relationships that develop through the PAL program can help 'fill-in' this area."

Although not a steadfast rule, the program, which is funded by the United Way of Ames and the GSB (Government of the Student Body), serves children ranging in age from seven through 12. Kent cited this age range as the most important in

needing attention and developing sound relationships for youngsters from one-parent families.

Twice a month group activities for all the Big-Little PALs are sponsored by the YMCA. These scheduled events give the Little PALs a chance to meet a variety of people and other children their own age with similar family backgrounds. "It also helps the Big PALs out by letting them enjoy an afternoon or evening without having to do all the planning themselves," she added. Holiday parties, campouts, ice and roller skating and other special events highlight the activities planned for the PALs.

Carla Nelson, Chris's mother and coordinator of special projects at ISU, heard of the program a little over a year ago. Both her sons have had PALs this past year and she feels it has been a great experience for both of them.

In addition to a busy class schedule and working 15 hours a week Bob still sees Chris twice a week for two or three hours. "Chris is a great little boy," Bob chuckled. "He's very easy going and fun to be with. I enjoy doing things with Chris that I wouldn't normally take the time for such as paddle boating, swimming or going to the circus. It's good for me to clear my mind doing other things besides school work, and it's good for Chris to have another friend."

What does Chris have to say about having Bob as a big PAL? "It's fun. Fun. FUN!" he proudly pronounces with a grin from ear to ear.

# Music building

If you've ever had a music class at Iowa State you might be able to understand the excitement felt by music students and faculty last spring. After several years of lobbying and many more of dreaming, the Iowa Legislature allocated \$3.6 million for a new music building at ISU.

The new building is being erected just south of Carver Hall where Music Hall had stood since 1869. Dr. Arthur Swift, Music Department Chairman, said, "Music Hall was the oldest building on campus still being used academically." But having the oldest building isn't the only problem the department has been facing. The department is spread out all across campus. Last spring there were about nine different buildings housing parts of the Music Department, including Morrill Hall, Exhibit Hall and Pope Cottage. Swift was even giving private trumpet lessons in part of Clyde Williams Stadium until it was slated for razing.

By the time the legislature gave the "OK" to the building project, inflation had pushed the price up and slowed

down the bid letting process last summer. It was finally decided the rest of the money could be raised through private donations. Swift estimated the building would take about two years to complete. Swift says the new building will bring the entire department together under one roof. The new structure will be three stories high on the side that faces Lake Laverne and two stories high on the north side. It won't be as wide as Carver but it will be longer stretching closer to Alumni Hall. The main floor will have departmental offices, two large practice rooms, a recital hall and classrooms. The upper level will have faculty studios and the lower level will have individual student practice rooms.

So, by the time the fall of 1980 rolls around, music students at ISU should have a new building. One other benefit is the students won't have to wonder where on campus their next music class will be.

—John Riches

Music instructor Robert Molison leads music students in song. The occasion last May was the signing of a bill providing money for a new music building at ISU. Governor Ray signed the bill May 10th. Photo by John Riches

Dr. Arthur Swift, Music Department Head, gestures with pleasure the day funds were approved for a new music building.

University president W. Robert Parks looks on as music students sing for joy about their new building.

Music Hall had sat atop this hill on central campus since 1869. The building was razed last summer.

You might say the CCC has been a success in its first year at Iowa State. Then again you might just ask what the CCC is. CCC stands for Contemporary Concert Committee. The committee was formed in the spring of 1977 to replace the Rock Pop Music Committee.

There had been a lot of controversy over the popularity of the concerts chosen by the Rock Pop Committee. The controversy came to a head in '77 when the Greek Week concert with Chubby Checkers lost about \$16,000. Dave Pfetzer, CCC Chairperson, says the Rock Pop Committee didn't have any real solidity.

Pfetzer says he sees the CCC as a group that should try to bring in concerts the students want to hear. And it seems the students do approve of the concerts. During the 1977-78 school year the CCC arranged 12 concerts including Jackson Brown, Eric Clapton, Willie Nelson, Linda Ronstadt, Steve Martin, George Carlin and even Music From Outer Space.

In the three years prior to the CCC there were 18 concerts and all together they showed a profit of \$43,000. In just one

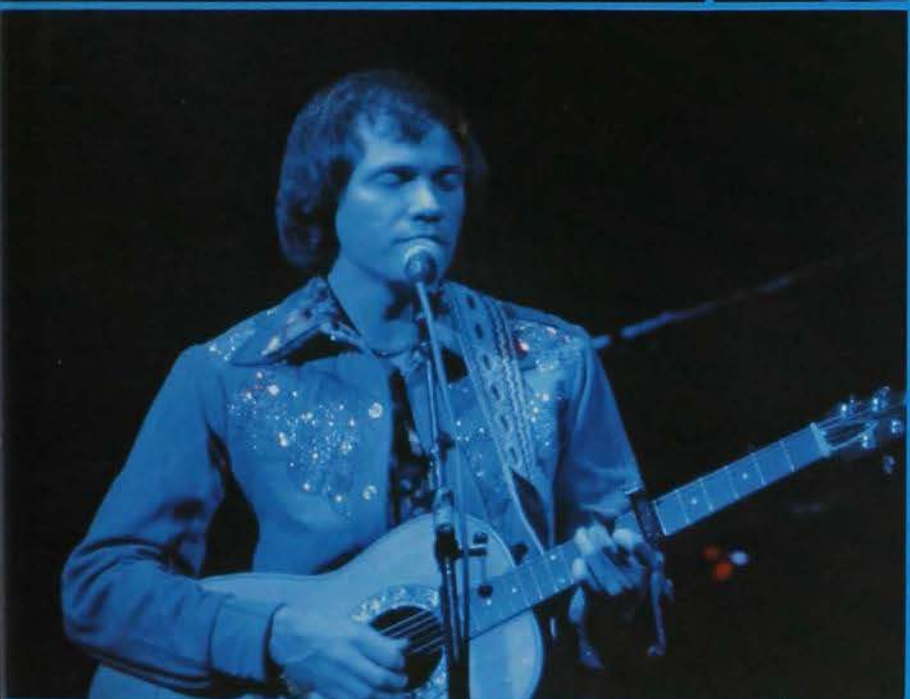

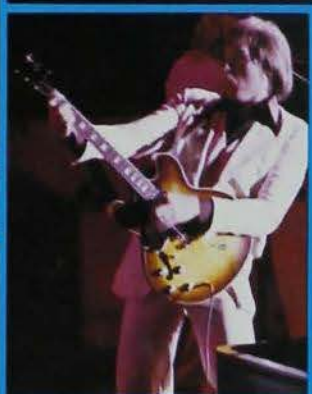

year with 12 concerts the CCC showed a profit of about \$50,000. The last year of the Rock Pop Committee there were six concerts, including Chubby Checkers, the concerts showed a loss of \$2,000 for the year.

Student input is one thing Pfetzer says the committee needs more of. He says there has been very little feedback from the students with only a few complaints about the concerts. One complaint that has been mentioned is the price for tickets to the concerts. However, Pfetzer says ticket prices for concerts here is usually quite a bit lower than in any other major Midwest cities.

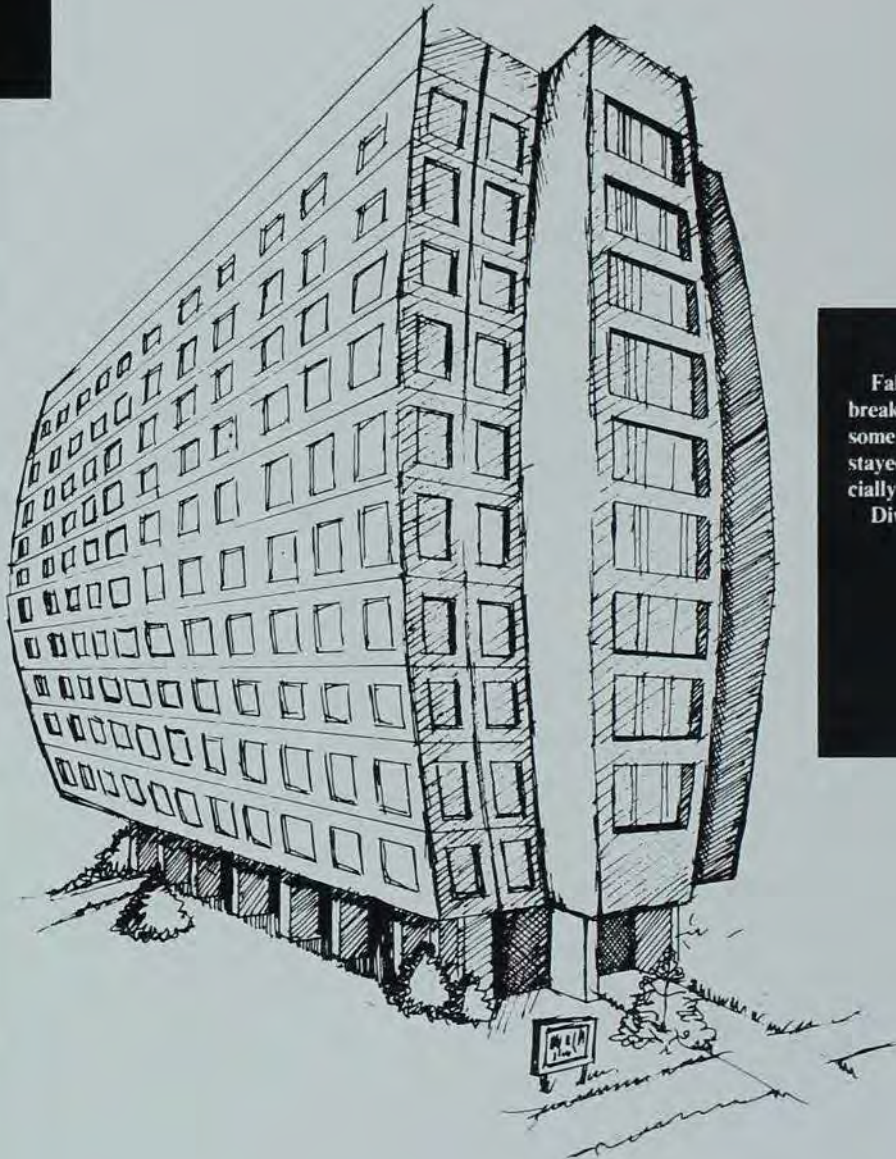

A well rounded schedule of concerts is what the CCC has been trying to provide, and Pfetzer says last year's slate of concerts did offer a wide variety of listening experiences. And he says this year should be no different with a lot of concerts and different kinds of concerts. As far as evaluating the job the CCC has been doing he said, "For the first full year it has been very successful."

— John Riches

Fall quarter, 1978, was another record-breaker in enrollment for ISU. Although some may have shown up late, or maybe stayed in bed, 23,052 students were officially enrolled for the first day of class.

Divided by class, the figures were

Freshman 6,459  
Sophomore 4,266  
Junior 4,522  
Senior 4,253

**Special 246  
Graduate 3,306**

Carolyn Harryman, Admissions Information Analyst, said there are no plans to limit enrollment on a university-wide basis in the future.

Harryman said the predicted figure for Fall '79 is 23,470, and for Fall '80 is 23,540. The Fall '80 is the predicted peak for enrollment at ISU, she said.

JUNTA

# ORGANIZATIONS

. . . Key to your horizons

## ISU Memorial Union — 50 years young

"By far the most effective single agency in uniting college interests and in giving expression to the distinctive features of college life and thought has been the Memorial Union."

— Earle D. Ross  
*ISU historian, 1942*

On September 23, 1928, Iowa State College opened its impressive memorial to the men and women who had died in World War I. Three wars and 50 years later, a week-long celebration of the Memorial Union's golden anniversary marked the Union's first half-century of existence.

Rededication of the Gold Star Hall was the theme of the opening banquet held Sept. 15 in the Campanile Room. In his rededication speech, Dr. H. P. "Pete" Sandberg, president of the Iowa State Memorial Union Corporation, said, "It is appropriate, that we here tonight, rededicate Gold Star Hall and Vestibule to those Iowa Staters involved in all the armed conflicts of our nation and further rededicate the entire Memorial Union to continued service to Iowa State students, faculty

and alumni."

Nelson Wagaman, assistant director of the Union, said the banquet was held also to honor the board of directors and special friends who have contributed time and/or money to the building and maintenance of the Union.

The public was invited to a dance held Saturday night, Sept. 16, in the Great Hall and adjoining ballrooms. The Ralph Zarnow Band of Des Moines provided the big band sound, along with some swing and rock, of songs popularized over the last fifty years.

More than 5,000 people stopped in at the Great Hall Wednesday, Sept. 20, for free cake, coffee and punch. ISU President W. Robert Parks was on hand Wednesday morning to cut the first piece of cake. A special cake, shaped like the Memorial Union, was

Visitors examine the photo display of the Union's 50-year history.

on display throughout the day, but was not cut into. It was later donated to Campus Chest.

A picture display of the Union's 50-year history was assembled by Earl Swan and Paul Potter, editor of the Iowa State Student in 1922. The pictures were displayed in the lobby across from the main desk throughout the week.

Wagaman said he feels students and faculty today have a tendency to take the Memorial Union for granted. The Union would not be what it is today if it weren't for the attitudes and enthusiasm of the students, faculty and alumni in the 1920's.

The student body voted in 1920 to build a memorial to Iowa Staters who had served in World War I. Eighty-seven percent of the voters favored building a memorial student union. In the fall of 1920, total student and staff pledges had reached more than \$330,000, and in 1925, the goal of \$1 million in pledges had been reached. At that time, Iowa State's student body and alumni totaled fewer than 10,000 persons.

By the spring of 1922, the project had been organized as a non-profit corporation.

The five acres of ground on which the Union now stands was officially broken April 26, 1927.

Financial disaster threatened the entire project as construction of the first units neared completion. Cash resources had been depleted. L.B. "Bud" Maytag, a 1910 graduate from Newton, saved the Union by loaning the corporation \$75,000 on unsecured notes.

The Union staff moved into the building during the summer of 1928, and the first paying guest slept in a third-floor motel room early in September. Food Service opened September 23, the official opening date of the Memorial Union. Harold Pride, who had been promotional secretary for the memorial project and was active in other campus organizations, was named the first managing director.

By 1939, the fourth and fifth floor guest rooms, and the South Wing, including six bowling lanes, expansion of the Commons, the '39 Room, Pine Room and South Ballroom had been added to the original structure.

Eight more bowling lanes were added under a new South Terrace, and

a three-story "dish plant" was added in 1948. The Northwest Wing and West-side Terrace were complete in 1953.

A major addition, including the bookstore, loading dock and the Sun Room, was completed in 1958. The building then contained more than 100 rooms and was valued at \$4.9 million.

In 1966 the Northeast Wing, including offices, craft workshops, the Cardinal Room, Regency Room, Campanile Room and the Pioneer Room, was completed. A year later, the 640-car parking ramp was opened.

The latest addition, to be completed in 1979, will be occupied by the ISU Alumni Association and the ISU Achievement Fund. The addition also has dining room and conference facilities.

Through the years and its constant expansion, the Memorial Union has maintained the original grace of its Italian Renaissance design.

Student enrollment is now almost six times that of 1928, and the Union continues to serve as a hub of student activity. It is the most popular gathering place on campus, whether the occasion be a Veishea committee meeting, a game of pool, a cola in the Commons between classes or a Friday afternoon beer in the Maintenance Shop.

The Union is a great and lasting memorial to the brave Iowa Staters who served their country in war. May the living always appreciate the Union for "uniting college interests and giving expression to the distinctive features of college life and thought."

— Pam Drum

Cake and punch were provided by the Union as it celebrated its 50th birthday last fall.

## Ag and Engineering honoraries maintain friendly rivalry

Who carries a pitchfork, sings derogatory songs about engineers, and wears a wooden Greek letter around his or her neck for a whole week in April?

Who else — an Alpha Zeta pledge!

Alpha Zeta is an honorary fraternity in the College of Agriculture at Iowa State. Alpha Zeta, which stands for "Agriculture — From A to Z," was founded in 1897 at Ohio State University by two ag students who wanted to upgrade the image agriculture students and others had of the profession, and provide an honorary, professional, and service fraternity for ag students.

The fraternity spread throughout the United States, coming to Iowa State in 1905. Iowa State's Alpha Zeta chapter took the name "Wilson" in honor of the first, and at that time current, Secretary of Agriculture, James (Tama Jim) Wilson.

Last spring, Alpha Zeta initiated 20 new members during its week-long pledging process in April.

Alpha Zeta initiates are required to wear the wooden AZ paddles on a ribbon around their necks for the entire pledge week, according to pledge instructors Nick Francis and Randy Palmersheim. "We want people to know who the new Alpha Zeta members are," they laughed.

Pledges are also required to dress up all week, except for one day when they are allowed to "dress down." On Farmer Day, initiates must wear

"farmer clothes" and carry a farming utensil of some kind with them for the entire day. At noon, the pledges gather on the steps of Curtiss Hall, the ag building, to sing songs about the "friendly rivalry" between the aggies and the engineers.

Other pledge activities include singing to the Greek and dorm houses, a 7 a.m. breakfast at the Memorial Union with Alpha Zeta faculty and student members, and signature collecting.

The week climaxes with Alpha Zeta's annual spring banquet and the formal initiation ceremony for the new members.

Other spring events include a steak fry and picnic planned by the newest members, and the traditional St. Patrick's Day rope pull with the Squires of the Knights of St. Patrick, the engineering college honorary. Alpha Zeta also collects books from ag college faculty for its annual charity book drive. The books are donated to countries in the Philippines.

Alpha Zeta participates in Veishea by sponsoring a milk-off contest between agriculture and engineering professors. The "aggies" won the milk-off again this year.

Initiation takes place each fall and spring of the school year. So, come spring or autumn, if you happen to see a self-conscious farmer's son or daughter lugging their pitchfork or hoe down the central campus sidewalk, you'll know that it's Alpha Zeta pledge week again.

What weighs 35 pounds and must be kissed by every "squire" being initiated into the Knights of St. Patrick? It's the Blarney stone. At the time the squires are kissing this stone, they are also being baptized with beer.

Herb Harmison, the Knight's advisor for the past eight years, said these practices are only part of the initiation activities. During initiation week, the students being activated, or squires, must wear green and white robes (the honorary's colors) and a large cardboard shamrock.

Knights of St. Patrick is an engineering honorary at Iowa State begun in 1920. It serves the functions of acquainting engineering students with others in the college and providing social services.

Some of these services, Harmison's aid, are a Muscular Dystrophy money collection on St. Patrick's Day and clean-up and painting around Ames. One service project a year is done by the squires as part of their initiation.

The Knights, like any other organization on campus, also have parties and have had floats in Veishea parades.

Squires serenade the sororities and dorms, and a spaghetti and wine dinner is served the night of initiation into the honorary.

The requirements necessary to become a Knight are few: junior standing, being active in campus functions, and election by present members.

This year there are 35 members in the Knights of St. Patrick; Bob Roth is president.

Harmison said the honorary got its name from the "tradition" that St. Patrick was the first engineer.

Every St. Patrick's Day, the Knights and Alpha Zetas, an agriculture fraternity, attempt a tug o' war across Lake Laverne. There is a standing rivalry between the Knights and the Aggies, but Harmison said he didn't know how or when it started.

As another part of the rivalry, the Aggies try to swipe the Blarney stone. Harmison said this hasn't happened for a few years because the stone is in the watchful care of the Knights.

## Extension Service: The long arm of ISU

Any Iowan who chooses can become a student of agriculture or home economics and never leave his or her own county. Such is the extent of the Iowa Cooperative Extension Service in agriculture and home economics.

The organization of the extension service is unique in that it involves the Department of Agriculture, Iowa State University, county governments and local people. The extension service operates out of ISU because it is the state land-grant college.

Some 200 University specialists, whose work centers mainly on campus, gather and record any and all information which is available as research or instruction material. This information is extended to all Iowa counties via the county extension directors. These county directors are jointly employed by the University and an extension council. Every county has an extension council which is made up of local lay persons. Members of the council are elected locally, and each member comes from a different township within the county.

Besides county division, the state is also divided into 12 extension areas. Area directors are employed by the University. Each area is also served by staff specialists — usually six or seven to an area. The specialists advise and inform in specific areas such as management and production.

Extension workers at the area and county levels number about 300. Their work is done mainly in the field.

Information is extended to the local level by three main channels: individual staff specialists and directors who

Curtiss Hall, home of the Iowa Cooperative Extension Service in agriculture.

Dan Geiser

work in the field; group meetings such as workshops and conferences; and the mass media. The ISU Information Service sends daily releases to the county level. There the county director can update or add to the information and distribute it throughout his or her county.

Farmers and agri-business people are the biggest users of the extension service, but certainly not the only ones. Anyone who desires the information can have it. This is the objective of the extension service.

Extension service has been around as long as the University, although it was not formally organized until 1913. Iowa's Farm Aid Association law and the federal Smith-Lever Act provided the basic legislation under which extension work was first conducted. These and other acts were condensed into the County Agricultural Extension Law

passed by the Iowa General Assembly in 1955.

Training in home economics and youth activities has been a part of the extension service since its beginning. Each county now has an extension home economist and an extension 4-H and youth leader.

Through its unique organization, the extension service can pass on the most current and complex information compiled by University researchers to any farmer, nutritionist, veterinarian, housewife, 4-H club member or anyone else who desires it.

And all these people are being taught by the best. More than half of the extension workers who are in the field have an advanced degree in an area of agriculture or home economics, and nearly all of the University specialists have at least one advanced degree.

Information and service — available to any Iowan compliments of the Iowa Cooperative Extension Service in agriculture and home economics.

— Pam Drum

Are you interested in canoeing? Or is the quiet contemplation of yoga more your style? Where can you meet other fellow ceramic engineers? And how could you find out where your volunteer services are needed most?

The answers to all these questions could be found in the Great Hall of the Memorial Union last fall at the first annual Activity Fair, co-sponsored by the Office of Student Life (OSL) and the Student Union Board (SUB).

The fair, which featured 39 ISU and Ames clubs and organizations open to Iowa State students, was held Friday, Sept. 29, 1978, and will become an annual fall event at the Union.

"We want to hold it in the fall," said Clarinda Nelson, program director with the OSL, "so clubs and organizations can recruit new members for the beginning school year."

Booths at the Activity Fair ranged from the colorful display of Turkish clothing, jewelry, and architecture by the Turkish Student Association, to slide shows by Orchesis, Iowa State Equestrians, and the ISU Handball Club, to a computer game at the Libertarian party booth which enabled fairgoers to determine their political leanings.

A silent Raggedy Ann clown from the Wesley Foundation Clown Club pantomimed with passersby, pamphlets and leaflets decried the problems of abandoned pets and the Boundary Waters Canoe Area, and a gentle-looking, bearded man explained the philosophy of Surat Shabd yoga at his booth complete with photographs of respected yogis and a plant.

The crowd for the first Activity Fair was light, according to Nelson, but the club and group members manning the booths "hung in there" from noon to about ten Friday evening, she said.

"Most of the organizations were pleased with the results of the fair,"

said Nelson. "Many had signed up new members or signed up people to come to their meetings."

Vicki Hensley, Assistant Union Director for Programming and advisor to the Student Union Board, noted that the overall reaction to the activity fair was positive. "The organizations that participated thought it was a really good idea," she said.

Performances by several groups highlighted the fair. The ISU Volunteers presented a slide show, Judo Club and Orchesis put on exhibitions, and members of the Intervarsity Christian Fellowship sang for the fair-goers. The Ballroom Dance Club and the Onion Creek Cloggers danced and played later in the evening.

Both Nelson and Hensley were disappointed with the slight attendance for the fair, but were convinced that the activity fair was beneficial to the clubs and organizations that participated.

"This was a start," said Nelson. "We've got lots of ideas for next year."

— Debra Bell

## Activity Fair offers something for everyone

This Onion Creek Clogger provided a little sample of his organization's "activity" as he fiddled for fairgoers.

Her smile says it all as Miss Clown entertains passersby at the first annual Activity Fair in the Union last fall.

All photos by Dan Geiser.

# NROTC "boots" toe the line

Patrolling Lake Laverne in rowboats, collecting signatures on a wooden paddle, and early morning calisthenics all made the week of May 8-12, 1978, a memorable one for the seven new members of the Order of the Sextant, the naval ROTC honorary at Iowa State.

The "boots," as new members are called, were selected for initiation into Sextant on the basis of academic excellence and aptitude for naval science. Boot Week, their week-long initiation ordeal, included raising and lowering the flag each morning and evening, lake patrol duties, signature collecting, and a night of guerrilla war games with active members of Sextant for the boots. Induction into the order and a well-earned party followed the mock war games of the final night.

These photos chronicle the boots' activities during their week of initiation into the Order of the Sextant. President of the honorary is Donn Stiner and Lt. James Theis is advisor. Sextant sponsors such events as the annual Navy Ball and the NROTC Mess Night during the school year.

Wayne Klaiber, 15 Dr. Robert Lohnes, 16 Philip Knotts, 17 Corinne Bakker, 18 Carol Ringlestein, 19 E. Mark Sterling, 20 Dan Brennecke, 21

Wayne Overman, 22 Jon Baker, 23 James Bouquet, 24 Dr. Wallas Sanders, 25 Marlene Schultes, 26 Dr. Roger LaBoube, 27 Gary Krupicka, 28 Tom Moore, 29 Kathleen Krager, 30 Susan Holderness, 31 Dan Holderness, 32 Mike Beirna, 33 GERALYN Reinart, 34 Dan Johnson, 35 Dr. Edward Kannel, 36 Mike Hemesath.

## American Society of Interior Designers

Row 1: Miriam Buhler, Terry Rice, Cheri Dodson, Janet Simonsen, Sheila Schuppert, Anthony Nie, Rita Beving, Donna Carney, Nan Ryder, Carol Moore, Cindy Duff, Erin Reilly. Row 2: Jenny Boynton, Gerald McGee, Denise Lenr, Kris Whyt, Melody Knauer, Gayle Hudson, Priscilla Spell-

man, Ann Grothaus, Barb Doermann, Mary Lou Griggs, Linda Kearney, John Willcox, Ted Bosker, Nadia-Nikbin, Carmen Sylvester. Row 3: Brenda Quintero, Nancy Goodwin, Jori Jones, Meg Duffield, Mary Beth Ziis, Rebecca Barkley, Kim Fritz, Lark Dearing, Kathy Bailey, Cindy L.

Wilson, Keith Meyer, Ann Peters, Harry Crouse, Ella Agee, Janet Lambert, Jan Runnelberg, Debra Bocitcher, Mary Heaton, Kay L. Trandsen, Noreen Simpson, Holly Probst, Audrey Gerrish, Beth Strub, Carol Cook, Tama Miulenburg. Row 4: Wane Spurgeon, Tricia Feyersen.

## Organization of Arab Students

Row 1: Mohammad Mismar, Sami Nadra Hajjar, Hassan A. Jurdi, Sulaiman, Al-Najdi, Maher Al-Soufi, Akram N. El-Hout, Nael Mahmoud El-Hout. Row 2: Ahmed A. Sasso, Nasser Aboura, Adil A. Al-Khafaji, Jalai

D Jabro, Ibrahim Ahmad Ghoul, Farid Hamad. Row 3: Matin Miratab, Samir Faiz Nimry, Mahnoud Al-Soufi, Saleh Mahmoud Alaeddin.

## Army ROTC

Row 1: Steve Schirm, Ed Ross, Marc Shearer, Connie Wilkening, Whit Scully, Roger Kessler, Peg Thomson, Leann Little, Marc Miller, Jeff Poss, Jim Rupp, Ed Cook, Chris Mueller, John Radio, Emmer Shipley. Row 2: Bill Spearman, Diane Bunting, Dave Moss, George Weaver, Charles Vanderlaan, Mark Whittaker, Lee

Ddy, Brian Funk, Mark Smith, Rod Grandon, Paul Critchlow, Lisa Christensen, Gretchen Kerber. Row 3: Phil Lavalee, Jim Fletcher, Donna Nixon, Bruce Hoover, Bill Jennings, Scott Lage, Alan Noe, Chris Stewart, Bob Owens, Bob Sovers, Bob Carey, Kirk Graham. Row 4: Darrin Meyer, Dale Gillet, Pete Delanoit,

Dave Radloff, James Speirs, Steve Rohlf, Mike O'Conner, Todd Ermine, Lance Thomson, John Kraemer, Jan Ingram, Betsy Parry, Steve Briggs. Row 5: Mike Carnahan, Don Bothwell, Kevin Lonergan.

# Block and Bridle Club

Row 1: Anne Weymiller, Melanie Wagner, Dana Hanson, Ted Greiman, Randy Millsap, Sherieda Bender, Brad Knudson, Dr. Joe Sebranek, Dr. Peter Hoffman, Row 2: Shelly Leitzau, John Wilson, Brant Massman, Betty Coughenour, Marci Jacobsen, Sue Henderson, Kim Maynes, Sarah Brown, Elaine Verkade, Steve Miranda, Cindy Casey, Roxanne Randolph, Jayne Pierce, Mike Mullins, Mike Kraklow, Mark Vagts, Jim Peters, Jan Powell, Jackie Fain, Janet McNally, Row 3: Eldon Droessler, Deb Hoffmann, Nancy Hibma, Del Ray Martin, Lori Pelz,

Tammy Rueckert, Heidi Sauser, Bruce Carrothers, Randy Roseboom, Luann Kemmerer, Stan Gable, Dennis Stepp, Kathy Inman, Terry Gray, Unidentified, Tom Venner, Robin Kirkner, Rick Williams, Jeff Wolff, Jeff Cornick, Row 4: Dale Ritter, Dixie Hoffman, Jeff Schlichting, Roger Olsen, Randy Nelson, Joe Broders, Dave Peck, Roy Budlong, John Fank, Kurt Forman, Hal Maddox, Carol Van DeKrol, Jim Klindi, Doug Rozendaal, Reagan Robertson, Mark Blomquist, Brian Kirkpatrick.

Row 1: Lisa Murray, Shelley Yates, Melinda Beeaker, Marsha McKee, Cathy Adamec, Sue Johnson, Jim O'Connell, Suzanne Michel, Pam George, Lori Clark, Kit Kading, Lisa Peters, Sandra Wilson, Mary Berns, Row 2: Mary Sorensen, Deb Wagler, Cindy Oldfather, Jeff Williams, Eileen Peterson, Lynn Mac Vey, Jennifer Deter, Rhonda Brumley, Cheri Hemmen, Cindy Barkema, Unidentified, Penny Thomsen, Hwei Tay, Melanie Fullmer, Colleen Armstrong, Chris Stroberg, Row 3: Patti Talbott, Terry Goering, Al Tank, Doug Hamlin, Dan Hansen,

Peter Bahnser, Mike Mann, Denise Dickman, Eric Ziel, Cathy Schumm, Sue Koenke, Jean Wilger, Unidentified, Todd Turner, Brian Scramlin, Row 4: Lyle Kuiper, Lewis Todtz, Ron Klahn, Kirk Goettsch, John Paschen, Roger McGregor, Grant Ferguson, Harold Woodward, Unidentified, Kevin Brady, Keith Bohnker, Karol Keppy, Dave Soorholtz, Tom Flöy, Dave Cook, Bryan Miller, Brad Smith, Dave Holm, Don Roose.

## Studio 53

Row 1: Kevin McQuaid, Ed Dahir.

## Dairy Science Club

Row 1: Dr. W. W. Wunder, Brenda Eernisse, Mike Sherman, Lisa Engelken, Dona Van Wyk, Darwin Sneller, Greg Lyon, Cathy Adamec, Pam Bohin, Dave Bohin, Dr. C. F. Foreman. Row 2: Randy Palmerdink, Ray Scott, Dave Ostrander, Joe Peiffer, Dennis Erpelding, LuAnn Engelken, Kathy Collier, Pam Tigges, John Becker, Sherry

Newell, Diane Cook. Row 3: Loren Punt, Janice Keene, Deb Hoffman, Lynne Maylahn, Heidi Mills, Gil Weber, Patti Pound, Kim Olson, Val Lyon, Alice Kunde, Jan Conradi, Angela Metz. Row 4: Amy Boden, John Telleen, Milton Peterson, Terry Engelken, Greg Palas, Lori Kuehner, Steve Ledvina, Lewis Olson, Jim Regan, Paul

Chase, Chris Showalter, Wes Johnson, Jay Mattison, Stan Gable. Row 5: Chuck Boden, Mark Reichenauer, Darryl Keehner, Matt Hamlet, Mark Sollein, Gary Lien, Don Dreesman, Dave Cook, Doug Opperman, Matt Stewart.

## Delta Swags

Row 1: Trudi Rebsamen, Barby Smith, Betsy Olberding, Barb Brown.  
Row 2: Eric Swanson, Chris Klug, Paul Hamilton, Bill Stover.

## Eta Kappa Nu

Row 1: Paul Corbin, Dave Allen, Jon Lofquist, Karen Meinert, David Stephenson, Advisor, Row 2: Daniel E. Klem, John Friesz, Ken Moss, Kurt Rentel, Edwin F. Kemp, Row 3: Curt Stephany, Gary Fritz, Donn Mulder, Richard Neuroth, Dave Dahms, Holmes Lundt.

## Farm Operations Club

Row 1: Neil Manternach, Ron Hanson, Mark Borchers, Dave Brue, Joel Paulson, Kevin Curoe, Norman Schmitt. Row 2: Clay Zellmer, John Olson, John Melvold, John Mors, Gerald Marlay, David Baird, Ralph

Altmaier, Norman Brus, Ken VonGlan, Don Woolley. Row 3: Donnie Moran, Jeffery Drake, Unidentified, Unidentified, Todd Allen, Wendell Finer, Unidentified, Paul Benning.

ICHTHYOSAURUS  
INTERMEDIUS

## Geology Club

Row 1: Carol Smith, Ginny Riggert, Carla Follensbee, Sue Green, Pat Ringgenberg, Sarah Chadima. Row 2: Bob Ladd, Greg Thompson, Erik Kvale, Ken Manahl, Scott Thieben, Dave Hayes, Dave Prose, John Peter-shagen.

## Homecoming '78 Committee

Row 1: Annette Juergens, Barbara Sakala, Nancy Dowden, Susan Allgood, Julie Fie, Didi Virden, Edna Boschat, Bari Wetmore, Pam Chelavig, Ann Gastner, Row 2: Sue Evans, Shelley Lein, Beth Murray, Suzy

Ghrist, Mary Larsen, Sarah Robbins, Kathi Evans, Diana Graham, Pauline Olson, Jane Norman, Row 3: Larry Hoefer, Paul Christians, Doug

Goslee, Kurt Ritter, Scott Braucht, Dale Anderson, Tom Nutty, Brad Myers, Andy Smith, Greg Borutt.

## Home Ec Education Club

Row 1: Beverly Downey, Marla Wilkens, Donna Beane, Nancy Willis, Connie Halsted, Laurie Seward, Berleen Dostal. Row 2: Elizabeth Bowers, Brenda Klaassen, Teresa Christensen, Mary Whitmore, Lisa Berger, Toni Smith, Elizabeth Venner, Vicki Westergard. Row 3: Carolee Wat-

horn, Mary Beth Vittetoe, Renea Butcher, Kathy Erlemeier, Regina Benning, Unidentified. Row 4: Holly Vogt, Virginia Wilson, Lois Hargrafen, Kathleen Bock, Anita Stevens, Mary Sorensen, Kay Moen, Marian Frederes, Sue Sanders, Kathy Pedersen.

## Horticulture Club

Row 1: Sharon Harmsen, Janela Becker, Ross Peterson, Pat Smith, Sue Soderblom, David Robson, Nancy Price, Marie Deutsch, Janice Leytem, Row 2: Tom Wisner, Barbara C. Smith, Sheryl Drug Dunston, Steve Hanson, Mike Watson, Kathy Lockyer, Lisa Garrison, Glenda Liddell, Mary Becker, Roxanne Willers, Mary Beth Christ, Pat Bauer. Row 3: David

Jepsen, Ron Halsrud, Rex Bastian, Todd Brockshus, Laurie Solberg, David Palm, Richard Jauron, Justi Nicoll, Sheila Dotts, Linnea Egger, Gwentyth Waalkes, Nancy Hoard, Kathy Hering, Cathy Neal, Kirsten Held, Dr. Paul Domoto, Jim Dyvad, Dawn Carney.

# Institute of Electrical and Electronics Engineers

# Phi Kappa Phi

Recognition and encouragement of superior scholarship in all fields of study is the foremost objective of the Iowa State University Chapter of the National Honor Society of Phi Kappa Phi. The national society was founded in 1897, the Iowa State chapter in 1911. The motto of the society is "philosophia krateitō phōtōn," which translates very freely as "Let the love of learning rule mankind."

Those eligible for election to membership at Iowa State include generally the upper 6 percent of graduating seniors and the upper 10 percent of gradu-

ate students, provided that certain other requirements are met. Embracing all areas of scholarship, the Iowa State University Chapter of Phi Kappa Phi elects from all colleges and curricula at Iowa State. The chapter also elects a limited number of faculty who have made outstanding contributions to scholarship.

The Iowa State University Chapter of Phi Kappa Phi proudly presents and salutes all its Scholar-Initiates known at press time for the 1978-79 academic year:

#### Faculty

# Phi Kappa Phi Executive Committee

Row 1: Richard VanIten, Larry Ebbers, Melvin Hofstad. Row 2: Donald Hotchkiss, Ruth Wildman, John Heer.

## Pep Council Exec

Row 1: Joe Erceg, Debb Crawford, Pat Gude, Jim Plantan. Row 2: Craig Kruger, Gene Turk, Randy Kirchner, and Bob Strauel.

## Football Cheersquad

Row 1: Craig Boretzky, Bruce Meyer, Peter Southard, Dave Hunt, Kevin Moss.  
Row 2: Ken Hanneman, Paula O'Conner, Tom Hemphill, Patty Moore, Greg

Schroeder. Row 3: Janet Rodgers, Lisa Lindhart, Karen Porter, Maureen Donahue, Lori Kromminga, Jane Eischeid.

## Junior Varsity Basketball Cheer Squad

Row 1: Donna Erps, Kirk Powers, Shawn Stevens, Scott Haugen, Brenda Reiman. Row 2: Craig Lave, Dave Contag, Chris Contag, Jim Stanislav. Row 3: LeAnn Larson, Dianna Stone, Rae Marie Finshand.

## Diamond Darlings

Row 1: Jennifer Speer, Lori Southard, Jeanine Smith. Row 2: Donna Christensen, Jan Cornick, Becky Bushlow, Kathy Stewart. Row 3: Leigh Ann George, Nancy Overturf, Sandy Julius.

## Goodtimers

Row 1: Clicket Schallenberg, Karen Runice, Julie Jarrard, Jan Frahm, Debby Housenga, Sue Hermanson. Row 2: Pam Farris, Liz Dekraay, Lani Martin, Anne Woodruff, Janet Johnson, Laura Schultz, Michelle Lewis, Robin Tychsen, Linda Orvis. Row 3: Kim Raeside, Pam Allen, Leslie Berkshire, Lisa Kirchner, Kris Johnson, Sue Roderick, Sue Livermore.

## Hockey Cheersquad

Row 1: Linell Klinkenberg, Lorie Wilcken, Kim Brandt, Cheryl Ceretti. Row 2: Kandie Deike, Joan Foster, Shari Ramas, Ann Still, Peggy Mott.

## Pom Pon Squad

Row 1: Donna McConnell, Kathy Thompson, Lori Larson. Row 2: Evans Sassen, Kim Pace, Connie Guenther, Harder, Carla Ehemke, Linda Barnett, Cindy Young. Row 3: Jyodi Bal, Ruth

## SAA Executive Board

Row 1: Susan Gulliford, Lynette Broders, Buzz Newton, Don Nickerson, Mary Shugart, Susan Inouye, Barb Kole, Morrison, Row 2: Curt Peterson, Carla Nelson, Renea Butcher, Tory Sitter, Jeff

## SAA Publicity Committee

Row 1: Brad Cook, Claudia Corning, Pam Cross, Patti Margeas, Row 2: Jeanette Lowers, Craig Tatro, Tom Waldron, Tory Sitter, Hunter, Tam Steffen, Margo Pullman, Cynthia Heider, Liz West, Row 3: Rick

## Cyclone Guides

Row 1: Brad Langguth, Nancy Gray, Sue Jensen, Bill Harris, Brant Massman,  
Row 2: Jan Powell, Jaci McCormack, Alanna Kellogg, Karen Kennelly, Sue  
Stewart, Ann Witte, Barb Staffin, Dave Matheason. Row 3: Jay Hipkhouse,

Dave Blie, Tom Long, Jeff Podlesak, Doug Ricke, Joel Kleiven, Steve Detrick,  
Jay Mattison.

## Student Ambassadors

Row 1: Don Nickerson, Claudia Corning, Francy Ford, Kristie Smith, Mary  
Severson, Lisa Hamlett, Mary Cornwall. Row 2: Greg Nickerson, Julie Beattie,

Residents of a house on Welch Avenue decorated themselves and their abode to resemble the infamous Delta House.

## Bedsheets and ivy

### Essay Question (50 pts.)

In four words, what do you do when you: 1. Just flunked your math test? 2. Have three books to read for history tomorrow? 3. Owe your parents five weeks of letters? 4. Haven't been to a single econ lecture this quarter and it's already final week? 5. Have nine weeks of beer cans to clean out from under the bed before your parents come to visit?

Answer: Have a toga party!

The toga party fad was spawned by National Lampoon's "Animal House," whose John Belushi and other Delta House zanies captured the hearts of

students everywhere. During fall quarter last year, the cry of "TO-GA, TO-GA" was heard from ISU dorms, greek houses and off-campus residences.

Quite simply, a toga party consists of dressing up in a bed sheet (undergarments are optional), wrapping your head in some sort of foliage for a garland (half of the ivy on Helser Hall disappeared fall quarter!), an abundance of alcoholic beverages and having one helluva good time.

The essence of the toga party craze is summed up by a T-shirt seen on campus which proclaimed, "We can do anything, we're college students."

— Dan W. Geiser

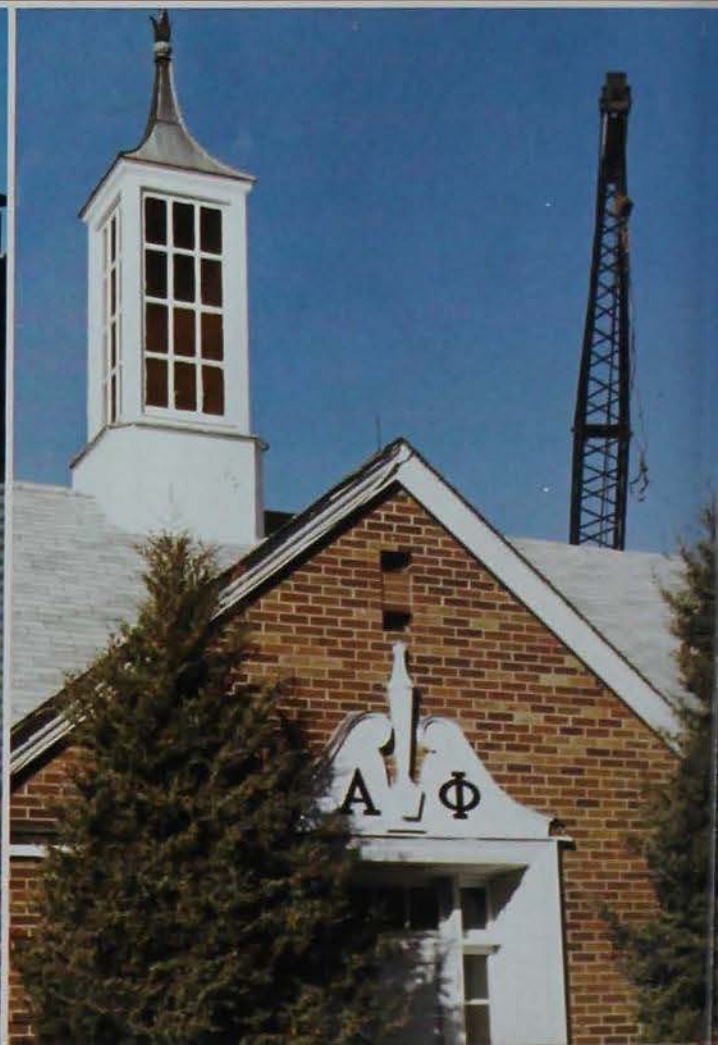

Fashion-conscious toga wearers displayed a few of the latest Roman styles at Carpenter House's fall quarter toga party. Photos by Dan W. Geiser.

JUNTILA

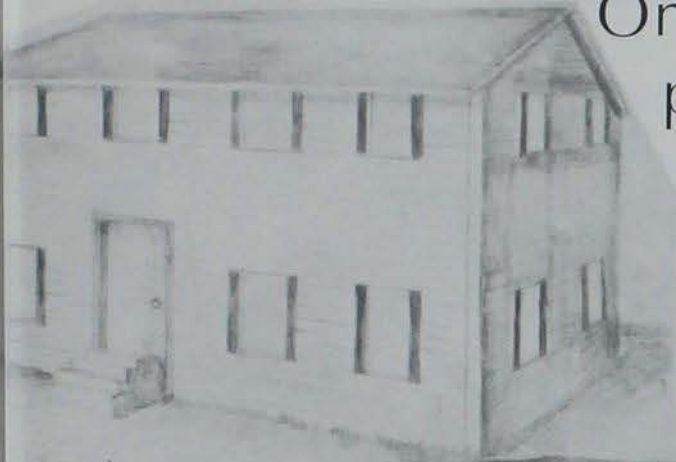

# HOUSING

. . . Key to your horizons

# On-campus or off, people make it “home”

The transition from home to school — cheering crowds in the stadium on a Saturday afternoon, dens crowded with students eating popcorn and watching a movie, students scurrying to classes — can't be late!

A cold, impersonal room to return to in the evening, laundry done in a room where there are people you don't even know, food served as you wait in a long line or as you sit in a dining room with 50 or 60 other people.

It doesn't have to be cold and impersonal, dorm rooms, sororities, fraternities and apartments can be more than just a place to live.

At night, instead of thinking that you're going back to a cold, impersonal room, believe that you are going home, to friends, with different life styles, in different rooms.

Each of you is sharing something special.

# They traded tradition for a tipi

Living in a tipi is the sort of thing most of us would try for about two days. We'd miss luxuries like electricity, telephones, running water and toilets within easy reach.

And we'd get tired of chopping wood and getting up in the middle of the night to keep the fire going.

But Jeff and Jim Edmondson, Biology and Animal Ecology majors respectively, and Leslie Palmer, Biological Illustration, didn't seem to miss any of those luxuries.

They seemed to be perfectly content living in tipis out in the country surrounded by sweet-smelling Scotch Pines.

The Edmondsons' tipi was a 20-foot-high construction that provided about 225 square feet of living space which is larger than many three-person dorm rooms which provide about 185 square feet. Palmer's tipi, 16 feet high, was erected about 30 yards from the Edmondsons' and was designed ideally for one person.

Jeff Edmondson was the only tipi dweller to last out the entire winter. His brother, who lived in the tipi fall quarter, quit school winter quarter because he was out of money and Leslie moved in with her brother in Ames because she had trouble getting school work done at the tipi. Jim and Leslie lived at the tipi occasionally in the winter.

Jeff said he wouldn't live in a tipi again while going to school because it was too much trouble in the winter. "It was hard to keep up with classes, studying, a job and the tipi all at the same time," he said.

Jeff said he decided to try living in a tipi because he hated the dorms and didn't like paying rent in apartments because he had nothing to show for his money.

"I could buy a tipi every quarter for the money I would have paid to live in a dorm or an apartment," he said.

The Edmondsons' tipi cover and liner from Nomadic tipi makers cost \$438. They went to the Big Horn Mountains in Wyoming for their frame poles which are lodge pole pines.

The Edmondsons have always been interested in Indian lore and are traditional Sioux dancers, so the idea of living in a tipi came pretty naturally.

Leslie had done a lot of camping and liked the Indian idea of being close to the earth and to nature. She met the Edmondsons after seeing their ad in the paper saying they were looking for a place to live in a tipi. Leslie arranged for them all to live on a tree farm where she had previously worked.

Jeff said that another reason he decided to live in a tipi was to help keep himself in school by doing something he was really interested in.

"Since I was twelve years old I've wanted to go to Alaska and live in the mountains, but I had never really lived in anything like a tipi and there was the possibility that I wouldn't like it," he said.

Jeff said this was a way to try something different while still in school and then maybe try it someplace else like Alaska or the Rockies.

Jeff kept warm in the tipi with the use of a 55 gallon oil barrel stove which could burn any kind of wood when it got going and could really radiate heat on cold nights, he said.

He wore a down jacket and gloves most of the time and flannel shirts or wool sweaters.

He used kerosene lanterns for light but did most of his studying at the library before going home for the night.

"I didn't accomplish anything at the tipi because there were too many distractions," Jeff said. At the tipi he always had wood to chop, water to haul or snow to ski on.

The Edmondsons' uncle had given them \$500 worth of wood which they had burned by January.

Because of the smoke, the originally white canvas had darkened to a dark brown and was almost black toward the top near the smoke flaps.

The inside of the tipi was homey and comfortable. The stove stood in the middle of the floor surrounded by rugs of every color and style which were sprinkled with wood chips from firewood that had been dragged in.

The two beds were piled high with blankets and each had a kerosene lantern hanging above it. Traditional Sioux dancing bustles trimmed with pheasant, duck and turkey feathers hung near the lanterns.

Other furnishings in the tipi consisted of a few trunks and book shelves and two stick tripods with a stick crossbar for hanging up clothes.

The biggest expense while living at the tipi was gas used to get to and from campus every day. Food and other essentials didn't cost them much money.

Jeff said that neither he nor his brother plan to be in Ames next year. If they were they would live in a mandarin lodge or a log cabin. He said that the most conventional life-style he would consider now is a trailer.

— Marla Glenn

Brian Boswell, Doug Collins, Joe Blow, Steve Hauser, Larry Diemer, Craig Meyers, Frank Spanorknucke, Gene Moeller, Phil Czosnyka, Kevin Russell, Dave Lerch, Chris Nekby, Todd Sutton, John Hart, Harry Bald, Steve Stuck, Mike Brune, Dave Mackowski, Tim Brewer, Dave Hoffman, Dewayne Breen, Larry Molacek, 'Fozzie', Joel Jess.

Remember when you had that big date in ten minutes and you couldn't get a sink to shave in?

Remember when you finally got into the stall and someone had used all the t.p.?

## *Remember . . . the fonder times in the dorms?*

Living with a roommate and a group of people can be a fun, rewarding experience. There is always someone to go drinking with or borrow popcorn from. Or you can sit up and talk to your roommate until 3 a.m.

Sometimes that same roommate or those same house members can make you want to buy a goat, move to the Himalayas or become a hermit.

Remember when you heard you might be put in a three-man room but you didn't think the third "man" would be your roommate's girlfriend?

Remember when you found out that you and your roommate had different literary tastes?

# Ag-adjusting to

The College of Agriculture has gradually revised and improved its program, according to Louis Thompson, associate dean.

"The department is continually adjusting to change," Thompson said.

The creation of the College of Agriculture in 1868 eventually led to the creation and growth of Iowa State University as it is today. The college has contained twenty percent of Iowa State's students for approximately a twenty year period.

Today, the college consists of a twenty course curricula including the insertion of agricultural biochemistry, extension education and seed science.

"Iowa State is considered one of the top five agricultural colleges in the country," Thompson said. "The reason for this fact may be due to the writing of text books by Iowa State professors. A second reason for this rating is the number of deans and department heads of major colleges and universities who have graduated from Iowa State," he said.

One of the college's main advantages is its excellent advising system. All students receive a strong advising emphasis.

Teaching seminars are held during the summer in order to compile more effective information techniques for new curricula. Also, \$500 is awarded to the outstanding academic advisor of the year.

"This is aimed at the creation of an outstanding advising program," Thompson said.

Thompson stressed the fact that advising is just as important as teaching. This provides a humanistic approach similar to one-to-one teaching."

Lee Kolmer, Dean of the College of Agriculture, said, "Our advising system is unique. With the advising system we have, all programs can be tailored to fit the individual students needs."

The college compensates for change. Courses that were offered in past years have become either drastically altered or dropped from the present curricula, according to Kolmer.

The Ag 450 Farm is a student-run farm where students get practical experience for credit. It is located south of campus on State Avenue.

# change

Poultry and dairy centers have recently become bigger operations and are confined mainly to the larger metropolitan areas.

Although the College of Agriculture has tremendous programs with a strong advising area, improvements are needed in many areas of curricula and in regard to the teaching facilities.

"Better equipment is needed for teaching programs and the department needs more space for offices, classrooms and laboratories," Kolmer said.

Better facilities are needed for agronomy, agricultural education, journalism, and agricultural engineering, according to Kolmer.

"Improvement is needed in just about any program. A solution to the problem would be to cut class size down or employ more instructors," said Kolmer.

"Increased allocations from teaching funds is needed. If the entire university receives funding it will improve the situation in agriculture as well as other colleges," Kolmer said.

"We can keep changing our curricula to meet with the demands of society, but along with that we need new facilities. Not only will that better our students' training but also promise them a good future."

## Key to Your Horizons

Harvesting, feeding livestock, and managing a 360-acre farm was part-time work for Kirk Weih this year.

Weih worked 20 hours a week on the University Farms while pursuing his farm operations major.

The experience he gained helped him in choosing his career options. He was at one time set on farming, but now his interests are geared towards a job in agricultural business or finance.

Weih feels his farm background was also helpful in making his decision. He worked on his family farm in Tipton, Iowa and was active in Future Farmers of America (FFA) and 4-H before coming to Iowa State.

Weih plans to find a job in the Midwest, but he also has international interests. He worked on farms in Germany during the summer of 1977 and would like to go back someday. Set up through the FFA, "the experience was a good chance to work with people," he said.

Weih said his work experience will definitely help him find a job, but he also feels college is important too.

"College makes you think and react under pressure. This is just as important as job experience," he said.

Lynette Broders was this year's Student Alumni Association vice-president.  
Richard Bruce

## Key to Your Horizons

Confidence in herself and her major are qualities exhibited by Lynette Broders, who is majoring in Public Service and Administration in Agriculture (PSA). And this program she pretty much set up herself.

Under the honors program, Lynette was able to combine into her major the areas of sociology, economics, political science, and agriculture. She has three minors in animal science, ag business, and extension education.

Lynette said she likes the diversity of her PSA major.

"Because it's so broad, so diversified, it leaves a lot of jobs open. I'm confident about being able to pick my own job."

Lynette has tried to gear herself for people-oriented jobs so that she could work at an Extension Service, in the public relations department of a farm company, or in a student programming position at a university.

At Iowa State, Lynette has been involved with the Student Alumni Association for two years and was this year's vice-president. She is also on the PSA Club executive committee and a member of the Ag Council and Alpha Zeta, an agriculture honorary.

## Key to Your Horizons

"I believe in a balanced education. Academic life is only a small part of education. A large part comes from campus activities and involvements," said Brad Peyton, outstanding senior from the College of Agriculture, majoring in Farm Operations.

In addition to his academic life, Brad believes extracurricular involvement adds an important balance to college life. "Activities put pressure on me to budget my time and discipline myself."

He has been actively involved in various clubs and organizations since his freshman year. He was in Greek Week 1976 and worked as a Greek Aide. His responsibilities included attending meetings and working on the Kick-Off ceremonies.

Brad was Student Ambassador for the Student Alumni Association. With this job he visited high schools across Iowa presenting facts about Iowa State

University.

Throughout his years at Iowa State, Brad has taken an active part in Veishea. He obtained a Veishea Leadership Scholarship his freshman year and has been involved in other activities the past three years. He took part in the Events Committee in 1977 and was general co-chairman in 1978. This year he is co-interim for Veishea 1979.

Brad also is a member of Alpha Gamma Rho fraternity and has been the social professional all four years. He was Summer Rush chairman and secretary for the fraternity in 1977.

Brad says the key to his success is attributed to the following belief: "Persistence is the main thing. Get a good foundation laid, that way it is much easier to build off that foundation."

## KEY TO YOUR HORIZONS

# Design has high hopes

The new College of Design is still in the post moving organizational and transitional phases, but has great potential in the next few years, both Dean Brooks and Carole Remele, student classification officers, said.

"The Dean needs more help," Remele said. There are no associate deans as in the Education college where Remele came from. Design has four administration people as opposed to twelve people in Education, she said.

"And we have 1800 students to their 1200," she said.

"But," Remele said, "in just a few years this is going to be just an outstanding college with an excellent reputation.

"This is an interim year for us, a makeshift year, I guess. We're the only college without a permanent placement officer. We hope to rectify this next year," she said.

The dean said a lot of the placement slack is being taken up by the departments themselves as well, since they are professional programs.

Remele added that the old placement officers in the three departments' old colleges (Applied Art — Home Economics, Architecture — Engineering, and Landscape Architecture — Agriculture) as well as an Architecture staff member, Kain Laurie, are taking placement duties on a temporary basis.

Brooks said that after the move one more department was added, the Community and Regional Planning department.

"This department was derived from the old Urban Planning curriculum, and has been expanded," he said.

In addition to this they are trying to develop a Liberal Arts major as a possible fifth major for Applied Art. Remele said.

The new Design Center, above and opposite, is, in great part, what made the College of Design possible. It enabled the university to bring three departments, previously scattered, together.

Craig Trumbo

Brooks said, "We are currently exploring how we can develop an interdisciplinary program with courses for all departments which could eventually become a fifth department."

He said that this course, if developed into a department, could be the start for more majors in the Liberal Arts areas.

"A new college is sort of nice," he said, "in that we are essentially starting from scratch and can come up with new programs on our own."

Brooks also said that they are currently trying to make the various departments more of a unified whole so as to better serve students needs.

"We are exploring how we can cooperate between departments and combine resources, so we have less duplication of effort," he said.

## Key to Your Horizons

The highlight of Mary Overman's four years at Iowa State was an internship in London during the 1978 Winter and Spring quarters. Mary worked in a planning office in London doing surveying, drawing and learning in general about her major, Urban Planning. She also attended classes at London University.

Mary was impressed with England and intends to go back some day. Other plans for the future include getting a job. "There are a lot of aspects in Urban Planning," Mary said. "I'd be happy to get a job in any area." However, she would prefer to get into the preservation and historic planning realm of Urban Planning. After a few years of professional experience, Mary would like to go to graduate school.

Mary has been active in campus organizations while at ISU. She's a member of the Design Council and was on the Agriculture Council. She's also active in developing Student Organization of Urban Planning at Iowa State.

All in all, Mary feels that Iowa State has given her a good background in Urban Planning. She also likes the new home of the Urban Planning Department, the Design Center. "I think the new Design Center is super," she said.

"It's great for the department and it's a good place to exhibit the work of the designers at Iowa State."

"Iowa State has been a great school to go to," she added.

— Julie Hayden

Mary Overman says that the Design Center has been a great place to finish her last year at Iowa State.

## Key to Your Horizons

"There's so much more to college than just learning about your major," said Holly Hovels on, an Advertising Design major. She said she felt belonging to such things as Navigators and the Communications Group helped her to grow as did spending a quarter in Europe.

Holly joined the Navigators, a Bible study group, two and a half years ago. She said belonging to the group helped her to grow spiritually.

After she graduates, Holly may possibly spend six weeks in a Navigators training program. The program is designed to get to "know God better and for letting others know about Him," she said.

Holly took off school in spring 1977, to spend two and one half months in Europe. She and a friend backpacked on the continent, spending about \$10 a day.

"I learned more in that quarter in Europe than I would have here. You can learn so much." Holly said it was easy to learn art history through the architecture. She also learned how advertising designers work in European countries.

In order to find out more about advertising in this country, Holly joined the Communications Group, the student branch of the American Advertising Federation (AAF). This year the group is entering a competition sponsored by the AAF to develop an advertising campaign for Wella Balsam shampoo. Holly is competing as part of this independent study.

"It's a really practical application (of what I've learned)," she said. "It will look great in my portfolio."

Holly said, "I think a portfolio is the most important thing — more important than grades or the interview."

"Advertising agencies don't come to campus to interview. You have to hit them when they have an opening," she said. "You have to be in the right place at the right time."

Holly would prefer working in the publishing line

Holly is a member of the Communications Group, Iowa State's advertising club.  
Sean Baxter

or with a private company rather than an ad agency, she said.

"I'm pretty open to what I'll be doing. I'm not worried, I figure something will come up," Holly said.

## Key to Your Horizons

Ever since he was in junior high school, Rady Patton knew that he wanted to be an architect.

He got his first taste of actual experience six years ago, working with a Des Moines architecture firm. "The president was a friend of the family, so that helped a lot," he added. Randy has continued working with the firm throughout college and this year he

will graduate with a degree in architecture.

His future plans involve extending his education at graduate school at Rice or Washington University in St. Louis.

Randy has been active during his four years at Iowa State. He's president of the Associate Student Chapter of The American Institute of Architects at Iowa State. He also belongs to two honorary organizations, Tau Beta Pi, an engineering honorary, and an allied arts honorary. Randy also is active with the ISU Volunteer Service, participates on faculty committees in the architecture department and the Design Council.

"I think there should be more interaction between students and faculty, on a one to one, social basis," he said. "I've had the opportunity to get involved with the faculty because of the committees I'm on and I think students and faculty can learn from each other," he said.

Randy feels that the students at Iowa State have a very positive attitude. "The students here are positive oriented," he said. "The total atmosphere is conducive to good academic and good social life."

However, he feels that students should get more involved with current political and social issues. "As professionals we're going to be responsible for these things," he said. "So it's important that we get involved now."

# Education— joint ventures with students

One of the top priorities of the College of Education is the remodeling of its facilities. The legislature has appropriated funds to remodel the old Vet Quad, pictured above and on opposite page.

**Craig Trumbo**

A "free and open climate" is the ultimate goal in the College of Education. "We emphasize that the closer contact the students keep with us the better job that we can do together, jointly," Trevor Howe, Education Placement Director, said.

While working on a one-to-one basis with students, the major education courses are always less than 30 people. This allows the student and the professor to develop a closeness. Dr. Jess Beard, Elementary Education professor, said.

Not only are the students communicating more freely with the faculty, but new courses have been added to familiarize and help students get acquainted with other people. The human relations and multicultural awareness class, required by the state of Iowa, makes students aware of different cultures.

The Cooperative Urban Teacher Education Program (CUTE) allows students to go into the inner cities and learn about and teach minorities and the disadvantaged.

Students are required to participate in the Involvement Program where the students go out to the public schools and observe. Also, each student does a full quarter of student teaching.

For students who don't want to teach, Howe said, they gave them an option. "The placement office offers 24-hour service for listing vacancies in teaching and non-teaching for those going into business and industry," Howe said.

Once students have graduated from the College of Education, they aren't forgotten. Howe said they have a follow-up of graduates asking what they are doing and also for suggestions.

The advising system for the college is unique. There is a staff of professional advisors who work as a team. These advisors are always available and get to know the students very well.

Virgil Lagomarcino, College of Education Dean, said they had the best record of teacher placement in 1978 and that they expect it to increase. In 1977, 71 percent of graduates got full-time teaching jobs.

This year, the College is involved in attempting to get their facilities remodeled. Lagomarcino said there is a need to remodel since, "the quality and excellence of the college lies in the hearts and minds of people. When these people use outmoded facilities, it affects their motivations adversely," he said.

## Key to Your Horizons

When Kent Vermeer first came here after graduating from high school, he majored in engineering. But before his junior year, he switched to Elementary Education. Kent decided he wasn't going to fit into an engineering job. "I wanted a job I could look forward going to," Kent said.

He's glad he made the switch, and has enjoyed Elementary Education since then. About two years ago, Kent found something he was really interested in. What he found was the "CUTE" program — Cooperative Urban Teacher Education.

CUTE involves teaching inner-city, culturally disadvantaged youths, and dealing with their special problems. Kent worked in the program from Febru-

Kent Vermeer says he switched to Elementary Education so he could look forward to going to work.

ary to May of his senior year.

While at ISU, Kent got involved with intramural sports, which he considered a good way to meet people.

"I've really enjoyed participating in intramural sports," he said. Kent is also a member of Kappa Delta Pi, an Education honorary.

Kent would like to teach either in Iowa or the Pacific Northwestern States. But he may continue his education.

"I'm interested in juvenile law, and I may go on to law school," Kent said.

## Key to Your Horizons

"I love it here," Laura Young, education major said. "It's going to be hard to leave."

Laura said that through all her activities, she has met many nice people who are so willing to help, especially in the College of Education.

"The professors in the Education College give you their views that you are going to be a good teacher and that you will be a unique teacher. They let you figure it out for yourself," Laura said.

Leadership roles and volunteer jobs enabled Laura to become president of Kappa Lambda, which does service projects for children. Through this job, Laura said she got to know the dean and professors as friends.

Laura participated in an independent study of culturally disadvantaged children at a school in Des Moines during spring quarter. Laura said this gave

Laura Young says that the PAL program helped her to better relate on a one-on-one basis with a child.

**Sean Baxter**

her a view on the problems of the inner city and to also learn about them.

Through the Volunteer PAL program, Laura also learned to relate one-on-one with a child. She enjoyed watching her little boy grow, both physically and emotionally.

In the future, Laura plans on teaching in kindergarten through the sixth grade in a large school.

"As far as kids go, the opportunities are larger at a big school. The more you introduce them to, the broader and more interesting they'll be," Laura said. "Then it's the little special things that mean a lot."

## Key to Your Horizons

When Michael Ptack first came from Chicago Junior College to visit a fraternity friend at ISU, he was so pleased with the university that he returned as a student. Like many, he was attracted by the excellent engineering and architecture programs and by the unbeatable campus.

Mike began as an Architecture major but was promoted by the job potential to switch to Industrial Education. I Ed allowed him to continue with his interests in architecture by taking an emphasis in graphic communication. At the same time he received a broad educational background. His classes in education itself gave Mike the opportunity to view courses and professors in a unique and objective sense.

The Industrial Education program is a small

department with a big future. As the job market opens more and more to vocationally skilled workers, teachers will be in great demand in the high schools and vocational technical institutes. The areas of instruction vary from carpentry to silk-screening to photography and more. Students in I Ed have the fringe benefit of forming many strong friendships in four hour a day/five day a week classes.

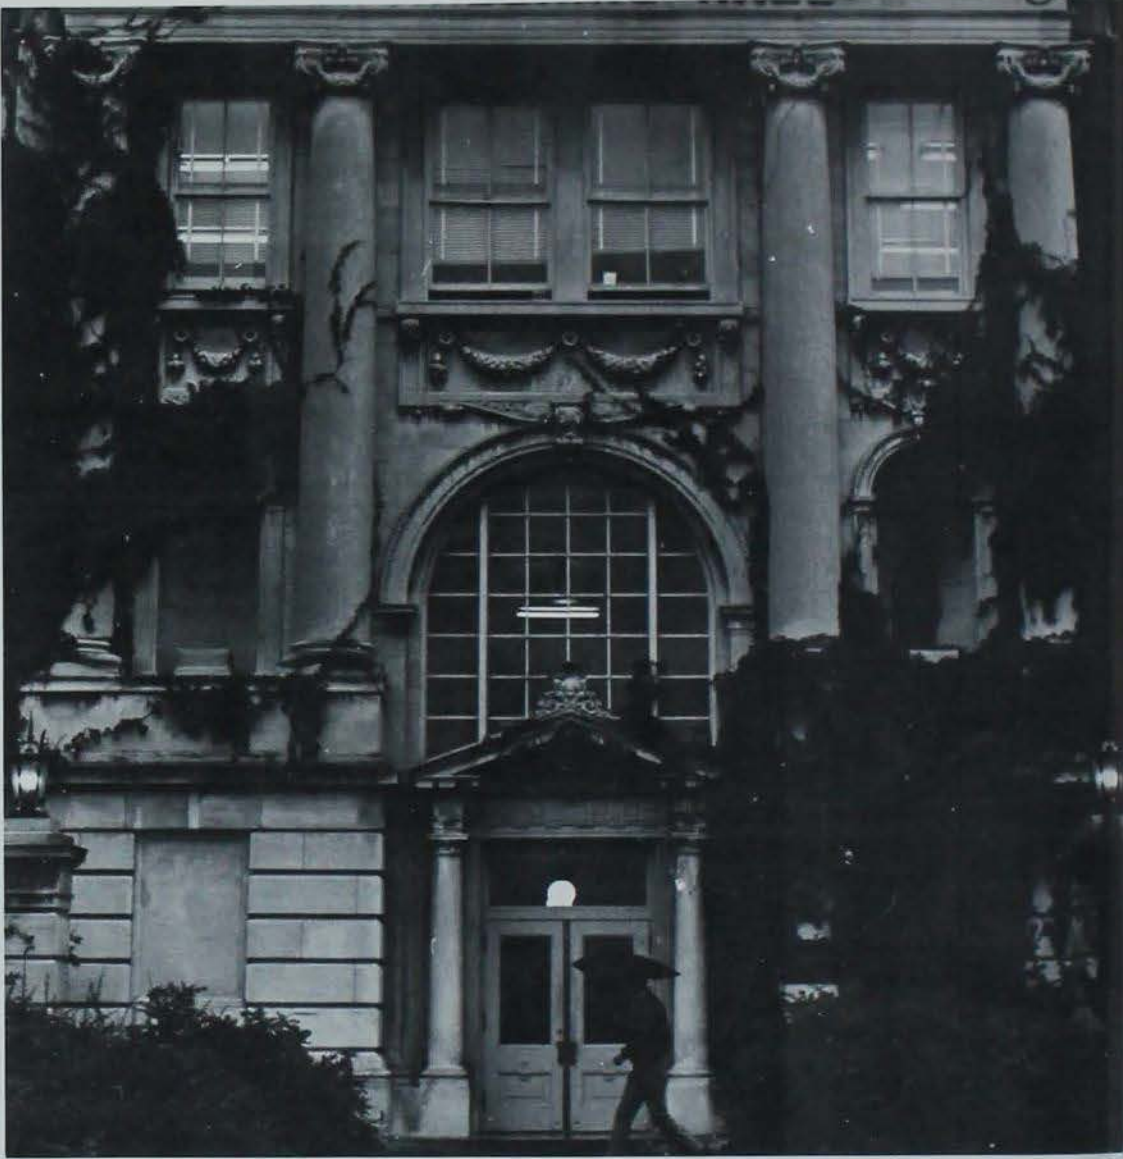

Mike emphasizes the diversity of his major. His education has combined theory (in the form of such classes as calculus and physics) with practical (building a complete house with Boone high school students).

Large increases in enrollment and the result of overcrowding in classes at all levels, is raining on more than a few student's hopes for graduation in four years.

**Doug Potter**

The College of Engineering is really beginning to feel the pressures of the University's increasing enrollment according to Rollie Knight, classification officer for the university.

"This problem is really getting bad," Knight said. "We had a 375 student increase over last year which is typical of what we've had since 1974."

Dean David R. Boylan said that there is an overcrowding problem resulting in some problems with scheduling, but that it shouldn't be exaggerated.

"I don't like to classify it as a problem — it's more of a concern, although we're teaching beyond capacity here."

Engineering and Sciences and Humanities are the only colleges which experienced an enrollment increase this year; all of the others experienced a decline or stayed about the same, Boylan said.

"Personal instruction is going out of the curriculum. Individuality has gone," Knight said.

"The only moves I see are away from individuality," he said. "For example, construction engineering has had to drop Con E 460, which is their senior projects course, because they don't have the faculty to teach it."

"We're backlogged and it's really hitting us in our senior level courses," Knight said. "One of the biggest problems is that often they (seniors) have to take sequential courses out of sequence."

According to Boylan, one of the major problems is that as enrollment has increased, the size of the faculty hasn't.

"Sure we're way short of faculty," he said, "we requested 16 more faculty just to meet our immediate needs — we got one instructor."

"Some students won't graduate on time because of this," he said, "and they will have to extend their programs a quarter or two."

"Over the last four years, as enrollment has increased from 2300 students to 4000, the size of the staff has only increased by about two.

"Last year we added two new curricula — Computer Engineering and Nuclear Engineering — with a first year enrollment of 210 and 62 respectively, and had no new staff increase," Knight said.

Knight said that there isn't any money for new staff positions, and on top of that, even if there were, qualified people are hard to get since salaries at ISU start at about \$1200 for engineers, while \$17,000 to \$18,000 is the beginning rate out in the business world.

Therefore, he said the department is trying to hire people on a temporary, quarter-by-quarter basis, with very limited success.

"It's hard to get temporary people in engineering. You just don't find engineers today sitting around unemployed," Boylan said.

"We're on the top of the tidal wave," he said, "and we'll have to weather this peak, although some students will have to suffer."

"There are two ways to solve this problem — limit enrollment or get more faculty — it's that simple," Knight said.

— Doug Potter

## Key to Your Horizons

Stephen Parsley left a good job, and despite social pressure from his friends, returned to school to fulfill a goal "to become a professional." He said it was the best career decision he's made.

Steve worked for several years as an industrial engineer before coming to ISU to receive his degree. His goal is to "be a professional and make a difference because of it."

Professional activities fill much of Steve's time. He is a teaching assistant responsible for conducting classes in industrial engineering computer applications and materials handling.

Steve also works at the Center for Industrial Research and Service (CIRAS) where he is a special assistant for energy policy council contracts.

Steve belongs to a number of professional societies: MTM Association for Standards and Research, the Society of American Value Engineers and the American Institute of Industrial Engineers. He belongs to the national scholastic honorary fraternity Phi Kappa Phi, the national engineering honorary fraternity Tau Beta Pi and the national industrial engineering honorary fraternity Alpha Pi Mu.

In 1976 Steve received the Material Handling Institute Scholarship and a year later he received the Catt Lane-Wells engineering Scholarship.

Above all, Steve said, he is a family man. He was married in 1967. He and his wife have two children. Steve said he owes a lot to his family and if it weren't for the support of his wife, he wouldn't be where he is today.

Steve said he makes sure companies interviewing him understand that his family comes first. He prefers not to work in large industrial areas where family deterioration is common. Other than that, he said, he has no geographical preference to locate.

Steve should have no problem landing a good job. He has had offers from 23 companies to make trips to their industrial sites.

A winter quarter graduate, Steve was named Outstanding Senior, Class of 1979, in the Department of Industrial Engineering.

Steve Parsley is a special research assistant for CIRAS as well as teaching a computer course in Industrial Engineering.  
Randy Catron

Steve doesn't often have spare time, but when he does he likes to participate in community and political activities. He has done some public speaking because, he said, he "enjoys being in the limelight. I enjoy being a leader." He also enjoys playing the piano, golf, tennis, and football.

## Key to Your Horizons

One ISU construction engineering senior doesn't want to just be part of the crowd. Brett Nuckolls said, "I don't want to be in a company where I'm one in 20 guys doing the same thing."

Instead, Brett would rather work for a small contractor. This presents difficulties since usually only the large firms send their representatives to interview on campus.

Brett hopes to find a job through his contacts in AGC, Association of General Contractors. The Iowa group includes contractors from large and small companies, professors and students.

The contractors give engineering seminars on aspects of the field and employment opportunities. For the past two years Brett has received a \$500 scholarship from the organization.

He planned to use his spring break writing letters to owners of small corporations. "I'm going to have to show I'm interested in them," Brett said.

He said that ISU graduates in construction engineering receive job offers from all over the country. "My advisor warned me to not take the first job offer I got," he said. His advisor feels that graduates often accept their first job offer out of relief and are unhappy about it later.

Brett would like to eventually become involved in management, however, he doesn't believe that it is necessary to have a master's degree to do so. He said that the curriculum for undergraduate construction engineers is management oriented.

Secondly, Brett said, "I think that the two years I could get in field experience are more important than a master's degree."

Brett has worked on construction in the summer during high school and throughout college. "The experience means the difference in starting pay for the graduate," he said.

## Key to Your Horizons

Brian Perry would someday like to obtain a Ph.D. in aerospace engineering and become a space shuttle mission specialist astronaut. But, for right now, he has been content with taking an active part in the engineering college.

In 1977, he signed up to serve on the Central Committee for Engineering Week, and in 1978, stayed on to serve as co-chairman of the annual event. "I was tired of watching others do everything," he explained.

"I wanted to do something."

Engineering Week is a student run, student organized event with the main purpose of acquainting non-engineering students with the different aspects of the college. Some of the features of the 1978 week included displays brought in by a record 31 different industrial displayers, a backgammon tournament, a new car display, and a calculator contest in which contestants were given a complex problem and timed on how long it took them to get a correct answer.

One of the main features of the week was the presentation of "outstanding senior" award in each category of engineering. Brian was the recipient of the award in the aerospace engineering division.

Brian added that the week also served to bring the engineering students together. As co-chairman, Brian's job was to oversee all the planning for the week, provide guidance for the Central Committee, and serve as the engineering counsel representative.

Besides Engineering Week, Brian is active with the national aerospace honorary, Sigma Gamma Tau, and served as its vice-president. The aerospace program itself kept him busy, too.

"Currently," stated Brian, "engineering needs to be extended to a five-year program. It's tough for the first couple of years, but you just have to be patient and things will begin to fall into place."

## Key to Your Horizons

July 1, 1978 marked the official recognition of the Nuclear Engineering program for undergraduate study at ISU, and as of spring quarter, Peter Werp will be one of the first graduates of the new program.

Enrolled in Engineering Operations for his first three years of study, Peter was able to satisfy most of the requirements of Nuclear Engineering and make the switch officially during fall quarter of 1978, after which he completed filling the remaining requirements.

"The only thing wrong with nuclear engineering has really nothing to do with the structure of the program," Peter said, "I think it's more of a flaw in society. People tend to fear nuclear engineering because they feel it's a hazardous to your health."

The Nuclear Engineering program is looking in to how justified this belief is and Peter has done his part by belonging to the American Nuclear Society, and working for the Nuclear Safety Research Group which is a project of the Engineering College geared towards studying human reliability in a nuclear environment.

One thing which Peter feels makes the Nuclear Engineering program special is the fact that the students have access to a nuclear reactor.

"In a sense, the undergraduate students are learning on graduate equipment and learning graduate level material," he said. He also said that most of the professors for Nuclear Engineering are graduate professors.

During the 1978 Engineer's Week, Peter was

Peter Werp was named outstanding senior in the Nuclear Engineering Department this year.  
Sue Deppa

named the "outstanding engineering senior" in the field of nuclear engineering, and during the summer of 1978 was granted a government sponsored internship in Richland, Washington as a NORCUS trainee. Because of the training in Washington, Peter stated that he felt he had gained experience in working with nuclear equipment that would greatly enhance his career. He also explained that his ability to believe that the models made representing matter work will aid him in his career. "The concepts are somewhat intangible," he said, "and you always have to remember that and be able to live with it."

# Home ec— emphasis on daily living

Meeting and fulfilling the needs of students is a primary concern for the College of Home Economics, according to Ruth Deacon, Dean of the college.

"We make direct and indirect contributions to their daily living. We prepare them to meet their individual and family needs," Deacon said.

From the start of the student's freshman year, the college of home economics helps students get what they want.

"Through our advising system, we encourage continuing relations between students and faculty. We are trying to create a sense of concern," Deacon said.

The home economics department helps students by making the employer aware of their potential. Career Day is an example of this.

Career Day helps the guidance counselors and employers broaden their understanding of what the students actually do.

Julia Anderson, assistant dean for the college, said that for Career Day, employers come in and conduct actual interviews with the students. "This helps students try to determine what they want to do," she said.

The college also has a careers placement program. Dr. Lois Meerdink, head of this department, said they provide opportunities and information on jobs and career placement.

"Placement of those seeking jobs is very good," Anderson said, "despite the fact that the bulk of our students is women. Females are not as flexible as men in the job market. However, the more adaptable the student is the better," she said.

In 1978, employment placement in home economics was ninety-plus per cent, Anderson said.

Alumni can be very useful in job placement, according to Meerdink.

"Through contact with the office more job opportunities can be seen. The constant feedback from the job world helps the office direct students in their future plans," Meerdink said.

Not only does the college of home economics offer help in the way of the students' futures, but students also can and are urged to participate in a practicum. This field experience is an enrichment program to get the student more involved.

Deacon said there is a broad range of jobs available for the practicums. Students can work in child care centers, nursery schools, a social agency, housing developments for family environment, and dietetic programs in hospitals and food service institutions.

"The practicum enables the student to move into a professional situation with a sense of having an orientation to the professional role," Deacon said.

## Key to Your Horizons

Student teaching a quarter helped Mary Jo Eckert choose her future career.

Eckert's child development major qualified her to teach either nursery school, day care children or kindergarten.

But, she wasn't sold on teaching kindergarten until after she student taught at St. Cecilia this fall. Eckert chose kindergarten because she liked the structured atmosphere over the looser teaching methods of day care children. Her day care experience came from working in the ISU child development labs.

Eckert praised the department for its student teaching opportunities and for the close friendly contacts students have with professors. "Iowa State has

Mary Jo says she has never taken a Child Development course she didn't think was worth it.

**Frank DeVaul**

always seemed like home to me," she said.

Belonging to Omicron Nu, the Home Economics honorary, also helped her make her career decision, she said. "I learned about other jobs in my major field and had a chance to talk to professionals through Omicron Nu."

Eckert feels her education here has been meaningful. "Other students feel classes are a waste of time, but I've never taken a child development class that wasn't worth it," she said.

## Key to Your Horizons

Do many seniors actually know where they're headed after college? The indecision can be frustrating.

In that respect, Karol DeWulf has been fortunate. Karol hasn't changed her goals since high school. She decided in high school to aim her career towards her major, home economics work for a publication such as *Better Homes and Gardens*.

Karol chose Iowa State University for its excellent program in Home Economics Journalism. Her emphasis is in interior design and family environment.

During the summer of 1978, she got some first-hand experience working as an editorial intern in the Furnishing Design Department of . . . yes, *Better Homes and Gardens*!

In addition to her re-writing, proofreading, editing, research, and writing tasks, she attended several of the magazine's business meetings.

"The job really reinforced my future goals," Karol said. "I know more specifically what I want to do now."

At ISU, Karol has served on the Home Economics Advisory Council, and as editor, copywriter and copyeditor, for *OUTLOOK*, a Home Economics magazine published quarterly. Karol was also a member of the Home Ec honorary Phi Upsilon Omicron, and the Senior Honor Society of Cardinal Key.

— Mark Halverson

## Key to Your Horizons

Tracey Halvorson wants to teach consumer economics to high school students because she feels it's necessary for people to be aware of what's happening around them.

Tracey is a Home Economics Education major with a special emphasis in consumer awareness. She also has a background in clothing, nutrition, housing and other basic areas of Home Ec.

Tracey got interested in Home Ec during high school because she had an excellent Home Ec teacher who was an ISU grad.

Tracey developed an emphasis on the consumer end

of it after living with politically active parents.

Her family owns an insurance and real estate company in Monona, Iowa. And her father is presently the majority leader in the Iowa House of Representatives. Tracey hopes to get into some form of government or legislative process one day.

Tracey said she hopes to stimulate her students to be interested in the day-to-day aspects of living in our market economy in such areas as knowledge of consumer protection agencies, comparison shopping and basic home management of economics.

"I'd like to relate to students that they're living in this society every day of their lives and they need to be aware of what's going on around them and understand how they can be economical consumers," Tracey said.

She said she will also be qualified to teach the family living side of Home Ec which deals with goal definition, morals, marriage and realistic attitudes toward parenting and learning about yourself and others.

Tracey said she has really gotten a lot out of ISU. She thinks it has an excellent Home Ec. department with a lot of resources available to students. "You can take courses in just about anything you're interested in and that's really valuable," she said.

Tracey said she really appreciates the education she has gotten at ISU.

Her major goal after finding a teaching job in a large metropolitan school is to get involved in community and student activities. Then one day she may look into politics.

"I think teaching will really be worth the work I put into it when I see the kids come out of school knowing that the things I taught them are going to help them when they're out on their own."

## Key to Your Horizons

"It's four years I don't think I'd trade."

That's how Donna Van Wyk, a home economics education major, looks at her experiences at Iowa State.

Donna said she often tired of all the hassles of college life but she's learned a great deal.

Donna said she'd like to teach home economics in a high school and coach track or basketball. After about five years of teaching, Donna said she'd also like to go to graduate school.

Because Iowa State's education requirements are higher than those required to get a teaching certificate in Iowa, Donna said she's optimistic about the job field.

"Teaching is a shaky field right now but I feel confident. My coaching will help," she said.

One of her professional concerns, she said is the image of the home economics education field. "I'd like to change the image of home ec teaching. People have a real stereotype of home ec teachers. They're seen as perfectionists in cooking and cleaning," she said. "But they are not. They are people just like everybody else."

Donna's extracurricular activities include being a member of the Home Ec Club and of Tomahawk, the residence hall honorary. She was the secretary for the Dairy Science Club and vice-president of Phi Epsilon Omicron, the home ec ed honorary. Donna was also active in intramural sports and was the Resident Assistant for Harwood House in Lyon Hall.

Warren Dolphin, associate professor of zoology and director of the biology program, is currently working on new teaching methods for large lectures, called Phase Achievement System (PAS).

"It involves testing outside of class, with the course being divided into seven testing units. The student must pass seven units to pass the course, and he can't place them in just any order," he explained.

During this time the lecture is going on at a regular pace.

"And finally, the student can retake tests if he flunked one, or he can try again for a better grade."

Dolphin is currently using this method in three courses — Biology 101 and 103, and Zoology 155. He personally handles curriculum development for Biology 101, but Dr. Yola Forbes handles it for Zoology 103, and Dr. Lawrence Mitchell does for Biology 103.

He says they have found that students study more for this course and that's why they are smarter,

despite criticism that test retakes raise the grading scale deproportionately.

"Teaching is what I'm in, not grading," he said. "We don't give all A's in this system, people do fail."

"We do give more A's than B's but the feedback is encouraging. Students who took the courses a few quarters back will stop me and say, I learned a lot."

Dolphin said this program is meant to help two kinds of students — those with poor science backgrounds and aptitude, and those with high test anxiety.

Another program he's working on is Self-Paced Instruction as a supplement to, not a replacement for, lectures, he said.

He said they produced 130 video tape cassettes on lectures and some advanced topics and bought 35 VTR machines for the library, along with eleven copies of all tapes.

These tapes have the content of the lecture with

## KEY TO YOUR HORIZONS

# S+H moving toward a more student

This year, the College of Sciences and Humanities is moving much closer to gearing its degree programs and curriculum toward a greater student emphasis.

"The trend is toward a greater emphasis on more individualized instruction," Dean Wallace A. Russell said.

Included in this are new developments in the honors program. Special education possibilities to enrich the more advanced student include taking an individual study course in depth, in one subject area for up to twelve credits per quarter, Russell said.

For the student who isn't quite as prepared as the average student upon coming to the university, much work is being done in the English and math departments. "An example is English 103, which is structured for students who aren't ready to enter 104 or 105," Russell said.

Russell said that a \$250,000 grant was recently awarded to Warren Dolphin, a zoology professor, to further develop his individualized instruction methods. These methods include video taped lectures and exams to be taken at the students own pace, with credit given when he completes the course work, Russell said.

Quite a bit of work is being done in the area of majors, Russell said. For students who are undecided, S&H 100 is a course in which they may study the

range of majors available and how they relate to career goals.

Individual majors can be obtained if none of the 35 areas with programs is quite right. "There are some students doing this right now, but not a lot," Russell said.

Russell said that a career development series of thirty-minute video tape cassettes, relating jobs with career opportunities is being worked on right now. "This is for students who say, 'What can I do with it?'"

"Eventually we hope to get all 35 majors in the can," he said.

Russell also said he thinks the trend is toward a more structured curriculum. "We owe it to the student to give some kind of structure," Russell said.

In line with this Russell said the trend is toward fewer survey type introductory courses, and toward courses that explore a discipline's methods of obtaining knowledge through studying a part of the discipline in depth.

"Einstein said, 'An education is what you have after you've forgotten all you have learned,'" Russell said.

— Doug Potter

better audio visuals due to the better production taping provides, he said.

"For one of the advanced tapes we showed how anaerobic respiration applied to brewing beer, and had a Budweiser demo tape included," Dolphin said.

He said that last year they had over 33,000 "free-will" uses of these tapes.

And he said that as with PAS, students do better — not just the better ones, but all across the board — if they use the TV.

All of this work was funded by a \$270,000 grant from the National Science Foundation, along with ISU monies for equipment maintenance taping at WOI, and library distribution of VTR tapes, amounting to about \$200,000.

Dolphin said, "I feel that overall, we've justified our existence and we have one year left on the grant. We could make a successful report to the foundation now."

## Key to Your Horizons

Mary Howard came back to ISU in fall 1977, to become an English teacher. She took several creative writing classes and got hooked on writing fiction. It has since become her main interest.

Mary still intends to become certified to teach because "you can't make a living as a creative writer unless you're very good — and I'm not that good."

Mary was one of the recipients of the 1978 Pearl Hogrefe Grant-in-aid, given for her three short stories and several poems. She said winning the award was a "big vote of confidence. I've always dreamed of being a writer, but I had no confidence in myself before."

One of the stories, entitled "Long Trail of Blue," has been selected for publication in *Georgia Review*, a quarterly journal that publishes original fiction. Selling the story "just blew my mind. I couldn't believe it. Then I was hooked," she said.

Mary credits her teachers with encouraging her. "I've had really good teachers. You have to have critics who know the writing craft themselves and who know how to apply critical standards." She cited Peter La Salle and Joseph Geha as two English professors who have helped her a great deal.

Another forum for criticism is the Writers' Round Table. Mary said that as a result of joining the Round Table, she started writing poetry to practice good phrasing and the visual imagery she uses in her stories. She also tries to get a good sound and rhythm in her language, she said.

Mary has had only a year and a half of formal training in writing, even though she began college as an Eng-

Sean Baxter

lish major in the 1960's.

After two years, she dropped out and went to California, where she met her husband. She then lived in Woodstock, Illinois, and was the director of a day care center.

Mary said she needed something more challenging, so she began taking junior college courses. "I had all the things I thought I wanted"— a house, kids, but I realized other things are more important." She and her family moved to her hometown of Ames, and Mary began school in earnest in 1977.

Mary has applied for graduate school in Creative Writing here at ISU. She said she wanted to stay at Iowa State so that she could get the same help and encouragement that she experienced as an undergraduate.

## Key to Your Horizons

Russell Herrig started at Iowa State as a freshman in Pre Vet. studies. But by the end of the year he knew that he wanted something different. Not finding a suitable program in the University's curriculum, he began to construct his own major. He wanted to incorporate his skills and interests in people, biological sciences and mathematics. An introductory letter from another college gave him the clue, Biomedical Sciences. He researched the possibilities of a major in Biomedical Sciences and decided to develop an individual major plan toward that degree.

Russell's program covers a wide range of sciences with an emphasis toward biological applications. His courses include organic chemistry, biochemistry, biophysics, zoology, selected electrical engineering studies and some grad level courses.

Declaring an individual major is not just the process of research development of a program. In some cases, it also means a lot of paperwork and red-tape. Russell's original degree title was Biomedical Engi-

Russell Herrig is one of only 25 students at ISU who isn't taking a catalogued major, he designed his own in Biomedical Engineering.

**Richard Bruce**

neering. But because he is enrolled in the College of Science and Humanities, he needed approval from the College of Engineering to use the term engineer. He also needed their approval to take courses in engineering. When they would neither approve or disapprove his program, Russell took his problem to the administration. He received a waiver of approval to take classes and compromised by changing his title to Biomedical Sciences.

As a Biomedical Scientist or Engineer, Russell will have a range of job opportunities from research to study and application of techniques in a hospital setting. Specific possibilities include the development of artificial organs, surgical devices, patient safety and electrical safety in hospitals. His immediate plans as a graduating senior are to enter a graduate school in Biomedical Engineering.

## Key to Your Horizons

Randy Compton was a graduate student in psychology when he decided he would rather teach choral music. In spring 1977, he left graduate school to become an undergraduate music education major. "I decided I wanted to be a music teacher. I knew that I had the tools. I knew I could do it. I always had music education in the back of my mind." He said he wanted to teach at the junior high or high school level.

Randy says he has no plans to finish his Master's degree in psychology. However, since graduating in 1976, he has taken the proper courses to obtain teacher certification to psychology.

As a psychology major, Randy was active in the Chamber Singers and the Oratorio Choir. He also took music theory classes.

In the last two years, he's been even busier. He gives voice lessons to a student and to anyone else who asks for help.

Randy also sings in his church choir, performs as part of the Opera Studio and the Shop of Barbers (SOB's), the campus barbershop quartet.

The Opera Studio is a group of music majors who study opera and its staging techniques. They have presented operas and scenes from light operas and musicals. Last year, they performed the "Play of Daniel," in which Randy sang the lead. He sings tenor with the SOB's and serves as its manager. He says the quartet has given several performances this year. At the ISU Madrigal Dinner, a medieval music spectacle, he played the executioner and sang.

Music education majors seek a Bachelor of Music (BM) degree. From then, a graduation recital is required. Randy held his recital January 13, a weekend of heavy snows. "That weekend was a blizzard. I had almost 50 persons come. That's pretty good," he said. Randy sang English, German and Italian songs from several different time periods for his recital.

Randy said the music department faculty at ISU is good. "The instruction at all levels can stand up against any university in the state." He said the

Dick Bruce

department provides a lot of opportunities, but when the new music building is completed, more activities could be offered. In the future, Randy would like to teach in Iowa, near Ames. "I'd like to find a place where I could still sing. Every town has a church choir. Some have town groups." Randy thinks Iowa has many opportunities to be exposed to the arts. There is the New York Philharmonic and the Concertgebouw from Amsterdam. "It's obvious that anyone who doesn't appreciate good music doesn't know what he's talking about. Iowa is the heart of high school band and choral music. It is known for the musicians it produces." Randy said.

Randy said his last big projects before graduating include student-teaching at Ames High School and singing the Mozart requiem with the combined ISU choruses and the Los Angeles Philharmonic in May.

Dick Bruce

"I don't know what to say," Jennifer Dunham said in reference to being interviewed. "I usually do the listening." Jennifer spends a great deal of time listening and, in fact, would like to make a career out of it.

Jennifer is interested in criminology, specifically in adolescents. She would like to work as a probation officer in the juvenile court system and counsel children in trouble with the law and also work with the parents.

"You have to do a lot of listening (as a probation officer). You have to gain the trust and the confidence of the children in order to help them," she said. Many of the problems of the teenagers in juvenile court come from the family. She believes it is important to keep the family together, and to counsel the members so they understand one another better.

She would eventually like to go to law school and

work in the prosecution side of the juvenile court. She said she could be more effective as a lawyer than as a counselor. "Lawyers have a greater say in where the kids are placed," she said. But, they take enough time to listen to the kids."

Jennifer spent the summer of 1978 working with a Des Moines probation officer for her practicum. "It was a really good experience to have." I had my own caseload and I got to do everything he (the probation officer) did."

She was assigned cases. She then investigated the situation to determine the best solution and took the case before the juvenile court judge.

Jennifer works with the Ames Youth and Shelter Services program. It is a home where teenagers can turn to if they are having problems in their own homes. The program insists on family counseling to work out the problem, she said.

Within this home is another program called the Partner program. "It's a one-to-one relationship. Once a week we get together to do things, like go to a basketball game. My partner is teaching me all about photography. It's an ego-booster for my partner, a ninth-grade boy," Jennifer said.

I'm more prepared by experience than I am with classes," she said. Iowa State does not offer a criminology major, so Jennifer is majoring in sociology and political science with a pre-law emphasis. She has a minor in psychology.

## KEY TO YOUR HORIZONS

# Vet med is still a good deal

The instate veterinary medical student at Iowa State is getting an excellent education for his or her money, according to Dean P. T. Pearson.

"If they apply themselves and take advantage of all the opportunities, Iowa students are getting their money's worth," Pearson said.

The typical cost of a full education program for a Doctor of Veterinary Medicine degree would be approximately \$15,000 per year, and Iowa State students are getting their education for about one-tenth of that, he said. "But they have to work for it," he said.

Students are also getting a quality education for this low fee, Pearson said. "A survey conducted a few years ago had us in the top six nationally in almost every category," he said.

The advising system for the college is unique in the university according to Pearson. One individual takes care of all of the medical things such as pre-classification. We can do this since all students are automatically signed up for classes as they go through the program, so little time is spent with preclassification."

For advice on other matters, students usually seek counsel from the faculty since they are a small college, Pearson said.

"The student versus faculty ratio is very favorable since we have about one instructor per four students. "We feel responsible to help students get through and get a good education. We have a very low attrition rate — very few don't make it through."

Pearson said, "While we feel that we have a very good program here, we don't have the flexibility such as you do with other colleges in the university."

Vet Med works on the block system, he said, with block encompassing the various sections of the field, elective blocks, and a free block — for work practice with a practitioner or organization such as the National Animal Disease lab here in Ames.

"We are engaging in constant programs to educate students on the various facets of the field," Pearson said. "These include marine biology, which is getting more national emphasis; animal diseases, especially wildlife and foreign animal diseases; and pollution, the effects of which can be detected in animals sooner than in humans."

Class size and lack of individualized instruction are not a problem, Pearson said. While lectures are getting up to 120 students per class, surgery is still a one-on-one experience.

Pearson said that moving into the new building "didn't provide us with an abundance of space since we upped our enrollment to meet the new space." Old enrollment was limited to 80 students, and now it is 120.

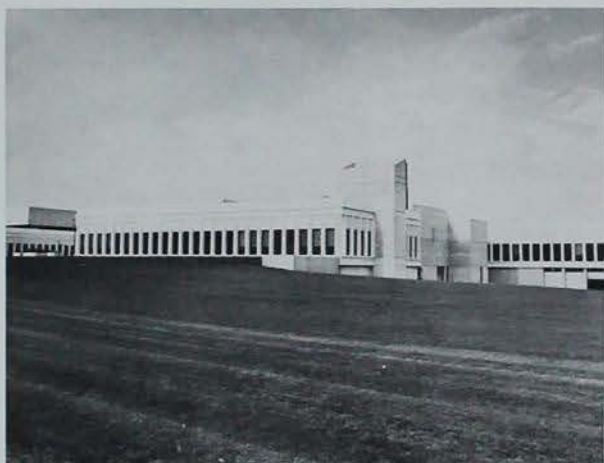

"Right before we left the old building we had 98 students in a facility designed for 60. Although we had to cut one-third of the present building out due to building costs, we are still much better off than before," Pearson said.

— Doug Potter

The new Vet Med complex hasn't given the college large amounts of extra space, since they increased enrollment allowances from 90 to 120. However, instruction facilities have been vastly improved.

## Key to Your Horizons

"Enjoyment is 95 percent of life and that's important to me," Francis Schobert, Vet Med major said. "Money doesn't mean a thing if you don't enjoy your job."

Francis is planning to be a large animal practitioner. Francis said he has often dreamed about being a veterinarian.

"It's an everyday challenge. You never know what you're going to find until you get there. It's not an assembly line. The animals can't talk, so you can't check it out. It's a diagnostic challenge," Francis said.

Francis Schobert has always wanted to be a veterinarian.

**Richard Bruce**

Francis, who is a member of the student chapter of The American Vet Med Association, said Iowa State's Vet Med school is a tough school but an excellent one.

Francis said, "This is another goal in my life to reach for something."

"I feel qualified, the instructors work you hard and keep you busy," Francis said. "This is what I want."

*Congratulations  
graduates of*

*1979!*

*Thank you for your  
patronage throughout  
your years at ISU*

**Hardee's®**  
**Charbroil Burgers**

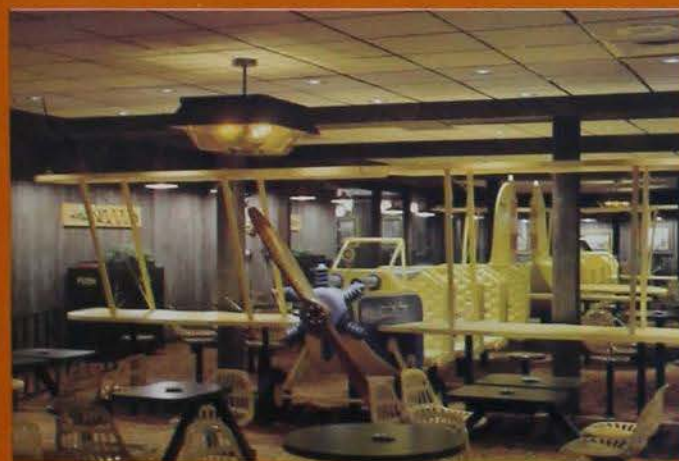

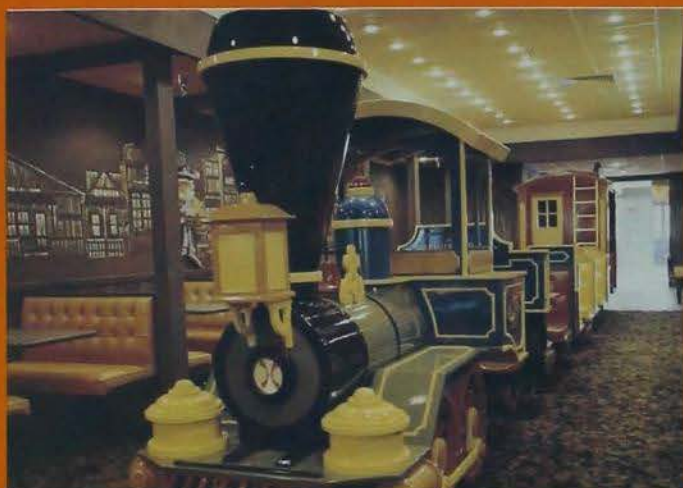

Newly remodeled Hardee's on campus, 218 Welch, was the first home for Hardee's in 1971.

Unlike  
the others . . .

Hardee's — opened at North Grand Mall in 1973. It has a Western Atmosphere with a train down the aisle!

The new Hardee's on Duff Avenue opened in 1976. It was built with the history of aviation theme.

Memories

today, yesterday,

the key

to our horizons . . .

# Jargon

from Jasper

It would be impossible to put out a yearbook of this size without the help and encouragement of many, including the following people, who helped make *Bomb '79* the best book ever.

My staff, who made it, even though sometimes they saw wild ponies. Just remember guys, as Robin (Mark) Williams said, "You've got to be crazy, it's too late to be sane — cause what is reality?"

Tom Rolnicki and Liz Hansen, our advisers, who served in many capacities, and especially as an inspiration to us all.

Jan Wells, my secretary, who was always more than that and who was always there to listen.

Dr. Dale Boyd, who offered advice, suggestions and most of all, moral support for an editor who wasn't always sure those "giant steps" were the right steps.

Dick LoPachin from Taylor Publishing Company, whose creative contribution and support of our staff and ideas was invaluable.

Bob Kerdus from Taylor Publishing Company, who was always understanding and had the ability to speedily deliver layout sheets to the only yearbook staff who, he believed, ate them for lunch.

And most of all, Patti Douglass, who I couldn't have made it without. She was always there with support, enthusiasm and rationalization. Patti, you're the best.

All these people plus many more helped to put this yearbook out. To them, I wish to say thank you and God bless.

*Beth Jasper*
