IOWA STATE COLLEGE

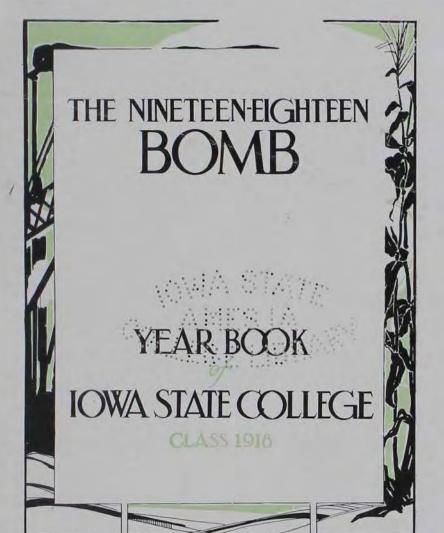

Agriculture and Mechanic Arts

STORAGE

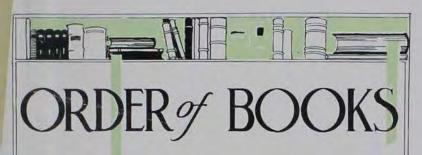

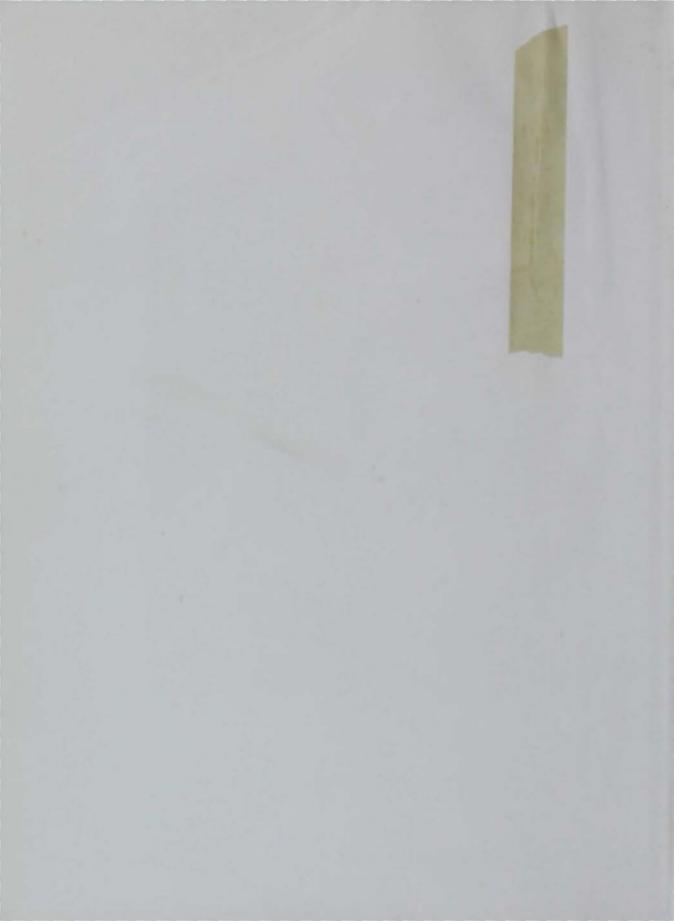

How the campus and everything about Iowa State
College has changed in the past ten years!
Of Course it has changed; so has the world.
Theories of yesterday are facts of today.
Iowa State College holds a large and important place in the affairs of the state and of the nation; it is therefore necessary that she should change with that state and with that nation. This book, The 1918 Bomb, records in serious thought and in mirth the response that this college has made to the twentieth century demands.

Dedication

o Dr. LaVerne W. Noves of the Class of 1872 in recognition of all that he has contributed toward the beautifying of our truly artistic campus, we the class of Nineteen-Eighteen dedicate this Bomb.

LA VERNE W. NOYES

IDA NOYES HALL University of Chicago

La Verne Noyes

LaVerne Noyes is a true "Forty-Niner," having been born January 7th of that year, at Genoa, N. Y. Being too young to join the rush of gold seekers to California, he waited five years before starting west. Then, with his parents, he became a pioneer settler in Linn County, where, on one of the best farms in Iowa, he acquired sturdy muscles, an extensive knowledge of agriculture and a great fondness for machinery.

His earliest education was obtained at the regulation country school, supplemented by home instruction from a wise mother and father. Later he studied at Coe College, Cedar Rapids, and for one term at Cornell College. When the Iowa State College was organized he felt it to be his opportunity and joined the first class, graduating as B. S. in 1872. In those early days, conditions at the college were very different from those now existing. Possibly the thirst for knowledge was no keener, but the smaller number of students permitted more intimate acquaintance with the faculty and perhaps deeper and more lasting friendships among the students.

From early boyhood, the guiding ambition of LaVerne Noyes was to become a manufacturer, and one year after graduation he was established at Batavia, Illinois, where, for some years, he made and sold successfully a line of haying tools of his own invention.

In 1879 he sold his hay-tool business and moved to Chicago to begin the manufacture of the Noyes Dictionary Holder. This wire bookholder was something entirely new, but the business grew rapidly and was very successful financially. Meanwhile

Mr. Noyes took out a number of patents on harvesting machinery which he sold to makers of that line.

In 1887 he became interested in windmills and organized the Aermotor Company to manufacture the steel windmills of that name now so well known in all parts of the world. Mr. Noyes has taken out a great many patents for improvements in connection with windmills and steel towers. The Aermotor Co., which he owns and controls, occupies some nine acres of ground in the center of Chicago's manufacturing district. In addition to windmills, the company makes gasoline engines, pumps and water supply goods, as well as electric transmission towers. Mr. Noyes made the first steel towers for windmills and also built the first line of steel towers for electric transmission. From the first he has been a pioneer in developing new lines, and has not hesitated to break away from old fashioned methods when a new idea gave promise of improvement.

Notwithstanding his business cares, Mr. Noyes has found time to devote to many public enterprises. His leading position in the business world has been recognized by election to the presidency of such organizations as the Illinois Manufacturers' Association. The National Business League, and Board of Trustees Chicago Academy of Sciences. He is a member of the leading Chicago clubs, and his success in out-door sports is shown by the numerous cups and other trophies won in golf tournaments.

Mr. Noyes has been extremely generous in his gifts to many good causes. The numerous free scholarships given at Lewis Institute have helped many deserving young men to an education. His liberal contributions to the Chicago Academy of Sciences

HOME OF MR. NOYES 1650 Lake Shore Drive Chicago

have enabled that organization to greatly extend its influence and to increase the number of its splendid exhibits. Those recently erected are remarkable for the life-like manner in which they show native birds and animals together with their natural surroundings.

The largest and best known of his public gifts is Ida Noyes Hall, erected on the campus of the University of Chicago as a memorial to his talented wife (also a graduate of Ames). This beautiful Gothic structure is dedicated entirely to the young women of the university, and from this social center radiate all their numerous activities.

During the last three years the many improvements that have been made on our Campus are directly due to the generosity of Mr. Noyes. He has employed the services of Mr. O. C. Simons, landscape gardener, for the past three years and the shrubbery which is now found around all buildings and on every part of the campus shows the success of his work. The College Lake, more correctly known as Lake La-Verne is entirely the gift of Mr. Noyes. The expressions of praise heard on every side regarding our beautiful campus is proof in itself that Mr. Noyes' work has not been done in vain.

WHERE ROMANCE BEGINS

Honorable William L. Harding, Governor of the state of Iowa, has been the chief executive of our commonwealth since January 1st 1917. Born and raised on a farm in Osceola county in 1877, graduating from the state university of South Dakota in 1905 and commencing the practice of law in Sioux City in 1906 is the brief history of Governor Harding's start in politics. He was elected representative to the state legislature in 1906, re-elected in 1908 and 1910, serving in the thirty-second, thirty-third and thirty-fourth general assemblies, was elected lieutenant-governor in 1912, re-elected in 1914 and elected governor in 1916. He has always shown much interest in the educational institutions of the state and his administration will undoubtedly show a betterment in the educational fields of Iowa.

Daniel D. Murphy, president of the State Board of Education, graduated from the University of Iowa in 1887 and has been engaged in the practice of law at Elkader for the past twenty-three years. He is a member of the Iowa State Bar Association and served as president in 1907 and 1908; is also a member of the American Bar Association, and of the American Academy of Political and Social Sciences. He has been a member of the school board at Elkader for the past ten years and has served as president for the past three years. A staunch democrat who has done much to put the institutions of Iowa on the high level which they have attained.

Raymond Allen Pearson has been president of Iowa State College since 1912. He graduated from Cornell University in 1894 and has been closely associated with Agricultural work ever since. He received his M. S. degree in 1899 from Cornell after which he served as Professor of Dairy Industry at that school. He was Commissioner of Agriculture in New York State from 1908 to 1912, receiving his LL. D. degree from Alfred University in 1910. In January 1917 the University of Nebraska conferred the degree of Doctor of Agriculture to President Pearson. He is a member of Alpha Zeta, Gamma Sigma Delta, Gamma Alpha, Phi Kappa Phi, Sigma Xi and Scabbard & Blade.

Herman Knapp, the treasurer and registrar of the Iowa State College, was born in Vermont in 1863.

The subject of this sketch came with his parents to Vinton, Iowa, in 1866. In 1879 his father having been elected to the professorship of agriculture in the Iowa State College, he entered upon his college course, graduating with honors in 1883. He became at once deputy treasurer of the college and the following year was elected assistant of agriculture. He had full charge of the department during 1886. In 1887, upon the death of General James L. Geddes, he became treasurer and registrar of the college, which position he now occupies.

Outside of college circles he is recognized as a leading citizen, having been honored by many positions of trust in city affairs, at present as a member of the library board. He has served as adjutant general of the First Brigade of the Iowa National Guards with the rank as Major. He has also been honored with the state presidency of the Iowa Society of the Sons of the National Revolution.

Edgar Williams Stanton is a member of the first class, 1872, graduating from the college.

He received the degree of Bachelor of Science, and was the first graduate presented with a diploma from this institution.

On the day of his graduation, he was appointed instructor in Mathematics. In 1874 he was appointed Secretary of the Board of Trustees, which position he held until the Board was abolished in 1910, since which time he has served as Secretary of the College. In 1875 he was appointed Assistant Professor of Mathematics; and in 1877 he was given a full professorship in Mathematics with Political Economy added.

At the death of President Beardshear, Aug. 5, 1902, he was given the added responsibility of Acting President, which office he held until July 2, 1903. In August, 1910, he was again given the duties of Acting President, and was the incumbent of this position for more than two years. On Sept. 11, 1903, he was elected Dean of the Junior College. In July, 1913, he was elected Vice-President of the College. This position he holds at the present time in addition to that of Dean of the Junior College, Secretary of the College, and Head of the Department of Mathematics.

Charles F. Curtiss, Dean of the Agricultural Division and Director of the Agricultural Experiment Station, Iowa State College, has received the degrees of B. Agr. from Iowa State College in 1887, M. Sc. from Iowa State College in 1892, and D. Sc. from Michigan Agricultural College in 1907.

Following graduation, he returned to the farm for three years. He then came to the position of state statistical agent of the United States Department of Agriculture from 1888 to 1891, after which he served as assistant in the Agricultural Experiment Station.

Dean Curtiss is a member of many important committees and organizations, including:

Member of Delta Tau Delta Fraternity-Iowa State College

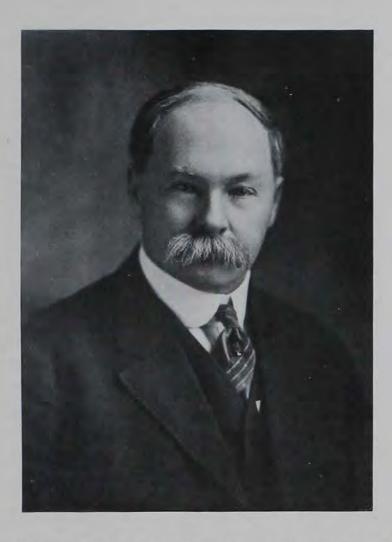

Member State Board Agriculture

Director and Member of Executive Committee of International Live Stock Exposition Member of Board of Directors and Executive Committee of National Society of Record Associations

Member of Board of Directors and President of American Berkshire Association

Member of Board of Directors of Percheron Society of America

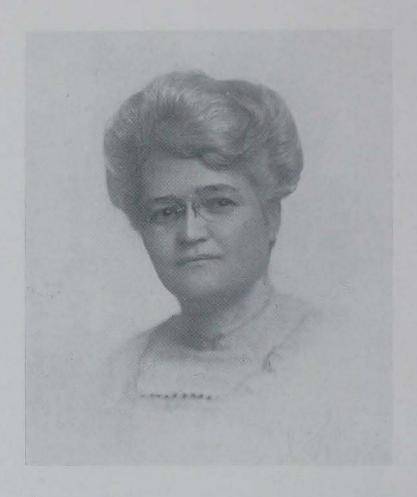

Judge of Shorthorns at International Exposition of Rural Society of the Argentine Republic

Dean A. Marston graduated from Cornell University in 1889 with the degree of B. S. in C. E. The first three years following graduation were spent in the field, mainly with the Missouri Pacific Railroad. On March 1, 1892, he came to Iowa State College as Professor of Civil Engineering, which position he still holds. With the creation of the Iowa State Highway Commission, in 1904, he was made ex-officio member of the commission, which office he still holds. Since 1904 he has served also as Dean of the Division of Engineering Experiment Station.

Dean Marston has also been active in technical society work. He is a member of the American Society for Testing Materials, one of its executive committee, and chairman of its Committee on Specifications for Drain Tile; member of the American Society of Civil Engineers; member of the Western Society of Engineers; member and past-president, Society for the Promotion of Engineering Education; member and past-president, Land Grant College Engineering Association; member and past-president, Iowa Engineering Society.

He is also a member of Tau Beta Pi, Sigma Xi, Phi Kappa Phi, Acacia, and the Crockets.

Catherine J. MacKay, Dean of the Division of Home Economics, Professor of Home Economics, Phi Kappa Phi, Omicron Nu, member of the Home Economics Department for the past six years, head of the Division of Home Economics for four years, graduated Drexel Institute, attended Boston Cooking School, Teachers' College, Columbia University.

Recently Miss MacKay has been elected President of the American Home Economics Association. It was through the efforts of Dean MacKay that the two-year non-collegiate course has been outlined and developed. This course is designed for the purpose of training girls in the work which they can apply in their homes and use in all phases of scientific and practical homemaking.

Robert Earle Buchanan has been the Dean of the Industrial Science division since 1914. He graduated from this school in 1904, receiving his M. S. degree two years later and his Doctor of Philosophy degree from the University of Chicago in 1908, after which he was made head of the Bacteriology Department at Iowa State. Since that time he has held various offices of importance to the scientific field, among them being Bacteriologist of Iowa State College Experiment Station, Vice-President of American Bacteriologists, Advisory Editor Journal of Bacteriology and a member of the Fellow American Association for the Advancement of Science. He has had an active part in the affairs of the College, serving on the Social and Faculty-Fraternity Committees for several years. He is a member of Delta Upsilon, Acacia, Gamma Alpha, Sigma Xi, Phi Kappa Phi, Phi Lambda Upsilon, Gamma Sigma Delta, and Scabbard & Blade.

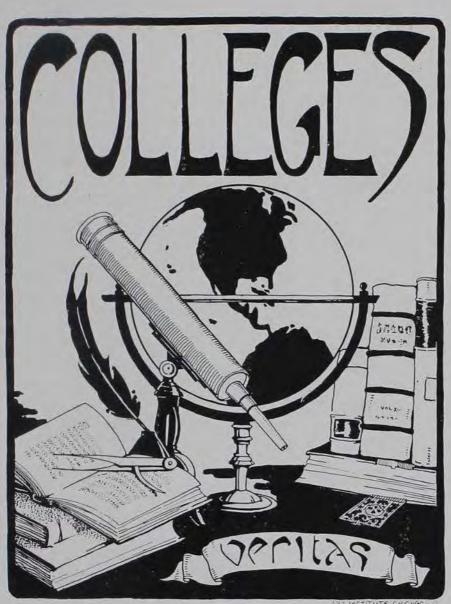

Dean Charles H. Stange is a native of Iowa. He grew up on a farm and received his education in the German and public schools of this state. He received his degree in Veterinary Medicine from Iowa State College, taking post-graduate work in Pathology and Bacteriology at the University of Chicago. Heavy responsibilities were thrust upon him one year after graduation, when he was made Dean of the Division of Veterinary Medicine with only four men on the teaching staff, and with practically no equipment.

On his appointment to this position in February, 1909, the President said: "While but twentyeight years of age, he is a man of progressive ideas and executive ability, and the Division will doubtless grow to immense proportions under his supervision and direction." The present Divi-

sion is the result of his efforts.

His ideals and ambition for higher standards of education and the elevation of his profession have become those of this state, as well as of other state institutions. Notice has just been received of his election to the Executive Board of the American Veterinary Association as the representative of ten states, as well as Alaska, Hawaii, and the Philippine Islands.

Dr. Stange is a member of the Acacia and Phi Kappa Phi fraternities.

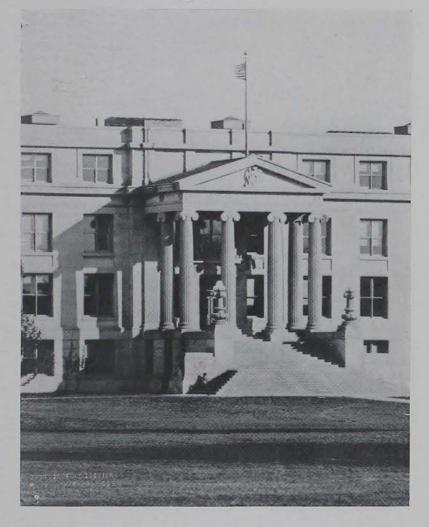

AT INSTITUTE CHICAGO - 17

DAIRY FARM SCENE

Agriculture

AGRICULTURAL EDUCATION DEPARTMENT

PROFESSOR WILSON

The purpose of the course in Agricultural Education is to prepare secondary and college teachers of agriculture, home economics, manual training, and the related sciences. The demand is growing stronger and stronger for teachers who are professionally trained. In fact, it is becoming difficult to secure a position in public school work without adequate training in education. The work of the department now includes not only general courses in educational methods, but also practice teaching and observation. This work serves the same purpose in the preparation of teachers as is served by the stock pavilion in animal husbandry, or by the dairy farm for students in dairy production.

The work in agriculture, of course, is carried in this course as in other agricultural courses, a total of sixty hours in technical agriculture being required for graduation. This makes it possible for the graduate who desires to teach several years and then go on to the farm to have a course that is

thoroughly practical from the farm standpoint, although his immediate purpose is preparation for teaching.

AGRONOMY

PROFESSOR STEVENSON

The work of the Agronomy Department along the lines of farm crops and soils is of peculiar interest to Agricultural students in these days when there is a world-wide shortage of food supplies, and an ever increasing demand for productive soils.

The work offered in farm crops provides definite information regarding the most successful methods of producing and improving the various field crops. The more important crops such as corn, small grain, legumes and grasses are studied in the classroom, is supplemented by actual field practice in such a greenhouse and laboratory. This scientific training way as to train the student to successfully handle crop production problems on the farm.

All successful farming is based on the maintenance of the fertility of the soil. For this reason, the Soils Department emphasizes the principles of soil fertility in all of the work that is offered. Each student is urged to study the soils from his home farm, in order that he may learn how to handle the soil problems that he will be called upon to solve when he engages in real farming.

ANIMAL HUSBANDRY

PROFESSOR PEW

The Department of Animal Husbandry offers instruction in the selection, breeding, feeding and development of all classes of farm animals including beef and dairy cattle, horses, sheep, swine and poultry. Its technical work is based on a knowledge of chemistry, physics, zoology and other related sciences. Fundamental work in anatomy and physiology are required.

Experimental work is conducted along the lines of nutrition, management, breeding and marketing problems. The work of the sections in the experiment station is in relation to the problem confronting the live stock farmer.

DAIRYING Professor Mortensen

The Dairy Department offers a four-year course which qualifies students to become competent teachers and investigators in agricultural colleges and experiment stations; inspectors of dairy products and dairy establishments in municipal, state, and government service; or superintendents of creameries or other dairy establishments. The Dairy Department occupies the entire four-story dairy building. The milk from the college herd, together with the milk and cream shipped and hauled to the college, supplies all the needs of the creamery.

DAIRY HUSBANDRY

PROFESSOR GILLETTE

The work in dairy husbandry is designed to meet the needs of the practical student who desires to breed an approved type of dairy cattle capable of economical milk and butter fat production. Opportunity is also offered for investigational work dealing with the important phases of operating an efficient dairy.

The rapidly increasing demand for instruction in this department is being met by additional facilities furnished for such study. On the college dairy farm of 175 acres, which is operated as a separate unit, are maintained herds of the four leading dairy breeds to the extent of 100 pure bred cattle, in addition to 30 head used for experimental purposes, which permits due consideration being given the student specializing in dairy husbandry.

FARM MANAGEMENT PROFESSOR MUNGER

Farm Management is the science which considers the organization and operation of the farm from the point of view of efficiency and continuous profits. In 1914 a department was formed, as part of the Department of Agronomy, to study the problems of farm management. In 1915 Farm Management was made a separate department.

Since its establishment the department has conducted survey investigations including over 2000 farms in different parts of Iowa. Through these surveys many of the underlying causes of success and failure in farming are determined. Cost Accounting in co-operation with farmers of the state has given important information on cost of production and farm organization. This line of work will be enlarged in the future. In connection with the survey and cost accounting work, further attention is being given to tenancy and land tenure investigations.

FORESTRY AND HORTICULTURE

PROFESSOR BEACH

A staff of about thirty men is engaged in collegiate, sub-collegiate, extension and experimental work in Horticulture and Forestry. In the collegiate work the department offers one hundred fifteen different courses of study. The work is divided into the major groups of forestry, landscape, architecture, floriculture, truck crops and pomology. By this group system a student can elect one definite line of work in the department and become a specialist in that line. It is the purpose of the department to emphasize the practical side as much as possible. The lecture work is supplemented by considerable laboratory practice, field work, summer work, and forestry camps.

The equipment of the department in the way of orchards, nurseries, forest plantations, gardens, greenhouses, and collections of woods and other museum material is of such a character that the students are offered excellent opportunities to become acquainted with the various horticultural and forestry operations. The demand for professionally

trained men in the above mentioned lines of work is on the increase. Both the educational and the practical fields offer attractive opportunities to graduates of the department.

POULTRY HUSBANDRY

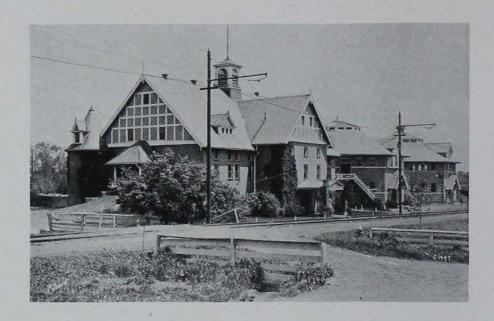

PROFESSOR TURPIN

As in many other departments of the institution there has been a record number of students in the poultry department the past year. Over one hundred students have been enrolled in the

various poultry courses offered. Most of the instruction given deals particularly with the management of poultry on the general farm and town lot from whence comes practically the nation's entire number of poultry products. A considerable number of students have been registered in the more advanced and specialized courses which are offered to prepare men for positions as managers of poultry breeding farms, central hatching plants, feeding and poultry packing stations, and for positions as poultry specialists in the various agricultural educational institutions of the country.

During the year a number of important additions have been made to the equipment and stock of the department, the most important of which is a new model poultry house having a capacity of from four to five hundred laying hens. The most important poultry organizations of the state and many prominent poultrymen have asked the college to initiate an egg laying contest which the department hopes to provide for the poultry interests of the state during the coming year.

Engineering

AGRICULTURAL ENGINEERING

PROFESSOR COSTELLOE

Agricultural Engineering developed as a phase of Agronomy and was recognized as a separate department in 1907, with Professor J. B. Davidson in charge. The first degree was granted in 1910. Since then the number of graduates has increased to 69. When Professor Davidson resigned in 1915 Professor Costelloe was assigned general charge of the work of the department.

ARCHITECTURAL ENGINEERING

PROFESSOR KIMBALL

The Department of Architectural Engineering and Rural Structures, formerly known as the Department of Structural Design, was established at Iowa State College January, 1914. Two separate courses are offered, one leading to the degree of B. S. in Architectural Engineering and the other to a two-year Collegiate Certificate in Rural Structures. The work was established in response to a demand from many parts of Iowa for men technically trained in the design of industrial buildings and rural structures.

The department has its quarters on the fourth floor of Engineering Hall. Its equipment is being gradually increased and at present consists of many fine architectural casts for free hand drawing work, hundreds of blue print drawings for class work, as well as several thousand lantern slides of buildings in existence in this country and abroad. The two courses are planned to give thorough instruction, and from the number of students enrolled in the same the work is becoming more popular every year.

CERAMIC ENGINEERING

PROFESSOR STALEY

The purpose of the course in Ceramic Engineering is to prepare men to hold positions of trust in the silicate industries. These include the manufacture of rlay products, cement, glass, enameled metals, and various minor lines of manufacture. In the United States these industries are conducted in over 5700 plants, employ 300,000 men, represent an investment of \$700,000,000, and produce each year products valued at \$400,000,000. There are only five colleges in the United States which maintain departments of Ceramic Engineering; that at Iowa State College being the only one west of the Mississippi River. The graduates readily find places and rise rapidly to positions of authority and good pay.

CHEMICAL ENGINEERING

PROFESSOR MANN

The course in chemical engineering at Ames has been established in response to the increasing demands from manufacturers for men trained in the fundamental principles and applications of the sciences of chemistry and engineering. This course is administered jointly by the heads of the departments of Chemistry and Mining but the work is in direct charge of Dr. Charles A. Mann. The department occupies the entire west basement of the chemistry building, where sufficient room is supplied for offices, class room, store rooms, and laboratories for chemical machinery, industrial chemistry, electrochemistry and electric furnace work, municipal chemistry, and for analytical purposes. These laboratories have recently been fitted out with entirely new equipment of the latest and best design. Opportunities are offered to work out industrial chemical problems covering many fields of manufacture, some of which are the manufacture of chemicals both inorganic and organic, of electrochemical products; of metallurgical products; of food products, and the manufacture of gas with the recovery of by-products.

CIVIL ENGINEERING

PROFESSOR MARSTON

Instruction in Civil Engineering at Iowa State College was started March 17, 1869, when the College was first opened for collegiate work. Professor George W. Jones, later one of the most prominent members of the faculty of Cornell University, gave the first instruction in mathematics, architecture, and civil engineering, serving until 1873. A. Marston became our professor of Civil Engineering in 1892, and has held the position ever since. The Civil Engineering faculty now consists of eleven members, many of whom are widely know in their special lines of work.

The College did not give separate degrees to the graduates from its different departments until 1878. Since that date 604 bachelors degrees and 56 professional degrees have been granted in Civil Engineering. The number of civil engineering students increased slowly till 1897 and then very rapidly. The course has always been one of the principal courses offered at the College. The department gives a large amount of instruction to the students

from other courses, especially those in Architectural Engineering, Agricultural Engineering, and Forestry.

ELECTRICAL ENGINEERING

PROFESSOR FISH

The course of study in electrical engineering was established in 1891 and has been steadily strengthened from year to year, keeping pace with the developments in the theory, design, manufacture, operation, and use of electrical machinery and apparatus. Over 500 men have completed its four and five-year courses.

The training given and the studies required in the course are such as to fit young men with the best possible foundation for responsible positions in the profession. After completing the course and spending a reasonable time in the acquisition of practical experience, our graduates are qualified for employment as chief operators of power plants; superintendents of construction; managers of railway, lighting, or telephone properties; designers; sales engineers; consulting engineers; and in many other professional positions requiring training and responsibility.

MECHANICAL ENGINEERING

PROFESSOR MEEKER

The work of the mechanical engineer is very closely associated with the industrial and manufacturing interests of the country. The rapid growth and development of our American industries is in large measure due to the use of labor-saving and cost-reducing machinery and to the adoption of scientific methods for handling the product of such machines. The mechanical engineer is not only designing and building machines and mechanical appliances of all kinds but is also being called to executive positions in the manufacturing, operating and sales departments of our industrial organizations. His training in the laws of nature and in those natural sciences which are fundamental to his profession enables him to do independent and logical thinking and is a most excellent preparation for a successful business career.

Graduates from Mechanical Engineering at Ames have completed a course which has been planned to so far as possible, to meet the new demands on the engineer. A broad training in the fundamentals of

the profession is given together with such applications in mechanical engineering as the length of the course allows.

GEOLOGY AND MINING ENGINEERING

Geology appeared in the curriculum of the Iowa State College soon after its organization. It was associated with Zoology and Botany and for a time, at least, was taught by the professor of Botany, at that time Professor Bessey. Later it was under the jurisdiction of the Department of Zoology and Entomology.

In 1894 the Twenty-fifth General Assembly passed a law requiring the Iowa State College to establish and maintain as a separate department, a School of Mines. In 1898, Mining was combined with Geology, and designated the Department of Geology and

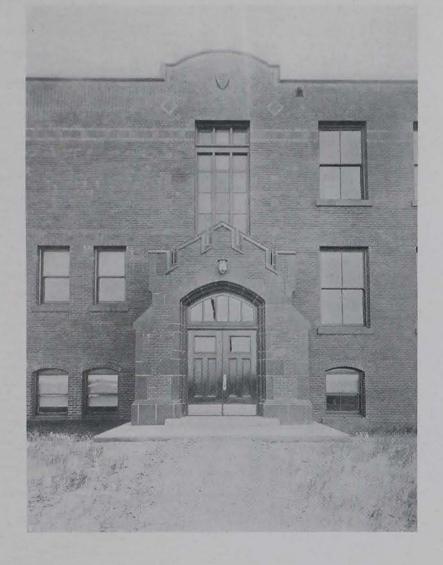

the new organization was conferred in 1901.

The course in Chemical Engineering which is at the present time administered jointly by the Departments of Mining Engineering and Chemistry was added in 1909, and in 1913 the Thirty-first General Assembly passed a law requiring the college to establish a course in Ceramics, which was also placed under the direction of the Department of Geology and Mining Engineering.

Mining Engineering. The present head of the Department was appointed head of the new department when organized. The first degree granted under

Home Economics

DOMESTIC ART MISS BRANDT

The Domestic Art department develops the training in all problems connected with the subject of clothing. The constructive side is emphasized in both hand and machine problems preceded by careful consideration of design and color best suited to the individual; the choice of materials as to durability, attractiveness, and cost; and the relation of the garment to the wardrobe as a whole. Special courses in textiles are given for students who are specializing in this work, consisting of a study of the values of textiles, loom construction, weaving, dyeing, etc. These courses are correlated with courses in the chemistry of textiles. In the millinery courses the girls design and make hats of all kinds and they make all trimmings for the hats. By handling the actual materials used in house furnishings they are led to appreciate beauty gained by the harmony of color and lines. By planning and drawing the floor plans and elevations of simple houses they gain a knowledge of the arrangement and construction as well as the quality of building material.

A young woman trained in these courses has a foundation to apply not only in her home but in many professional fields.

DOMESTIC SCIENCE

Miss Monsch

The Domestic Science Department gives the students a strong scientific and practical knowledge of foods, home nursing, and household management that will enable them to meet intelligently the needs of their families or to impart this knowledge to others.

In order to accomplish this aim the department provides three courses in foods, nutrition, and dietetics, one in home nursing, and one in household management with experience in a practice cottage of applying all this knowledge to the care of the home.

It also offers electives in experimental cookery for girls and camp cookery for boys, and graduate work in the study of feeding problems and the recent advances in nutrition.

Industrial Science

BACTERIOLOGY AND HYGIENE

PROFESSOR BUCHANAN

The work in general bacteriology, sanitary bacteriology, home economics bacteriology, and some of the work in pathogenic bacteriology is housed on the first two floors of the new Science Building where laboratories have been equipped to accommodate about 70 students at one time. Laboratories with special equipment have been provided for research work along each of these lines. The work in veterinary bacteriology is at present housed with the department of veterinary pathology in the Veterinary Building. The work in soil bacteriology is housed with the department of soil and has its own series of well-equipped laboratories in Agricultural Hall. The work in dairy bacteriology is housed in the Dairy Building where excellent opportunities are provided for undergraduate and advanced work in this subject.

BOTANY PROFESSOR PAMMEL

Botanical instruction in the college has been given ever since the beginning of the institution. The late Dr. E. C. Bessey at first had charge of Botany, Zoology and Horticulture. Later, however, the three departments were created and Dr. Bessey became the head of the Botany Department. When Dr. Bessey was called to the University of Nebraska Dr. Byron D. Halsted became the head of the department and served for several years. He was succeeded in February, 1889, by L. H. Pammel who was up to that time an assistant in the Shaw School of Botany, Washington University. In 1892 he was also made Botanist of the Experiment Station.

The department is divided into four natural divisions of the science of botany: Plant Morphology under Dr. Martin; Plant Pathology, Dr. Melhus; Plant Physiology, Professor Bakke, and Taxonomy and Economic Botany under L. H. Pammel.

CHEMISTRY PROFESSOR COOVER

The Department is organized to meet the demands for chemistry in a highly technical institution whose field is of almost university scope. It offers undergraduate and graduate courses in agricultural, analytical, food and sanitary, household, industrial, inorganic, applied organic, physical and physiological chemistry and nutrition. Students may major in applied chemistry and train themselves to become animal, dairy, physiological or pathological chemists; sanitary, industrial or manufacturing chemists; or they may train themselves to enter state or federal government employ in a number of the many branches of such work.

The Department is now well established in its large new building which affords ample room for growth. The building is so constructed that an abundance of light reaches all of its rooms. The ventilation of class rooms, laboratories and hoods is under the control of fans so that fumes are rapidly removed and cause the student no inconvenience.

Units of rooms are fitted and arranged for each division of the subject. Each of these units contains one or more rooms for investigational work. Closely related divisions are on the same floor. All physical equipment for carrying on laboratory and testing work is new and adequate.

ZOOLOGY

PROFESSOR GUTHRIE

The Department of Zoology with a staff of 11 teachers offers courses in general zoology to serve as a foundation for more advanced applied courses and as general culture courses, giving knowledge which society reasonably expects every college educated man or woman to possess. Beyond and founded on this broad and necessary basis, women are taught human physiology which is the basis for their dietetics. Animal Husbandry and Veterinary students learn the development of animals in the embryology courses. This knowledge is of value to them as stockmen and veterinary surgeons. To the Agronomy, Horticultural and Forestry students the entomological courses teach the life history and control of important economic insects, while troublesome household insects are treated in a course for women. Apiculture courses train in handling bees for pleasure and profit while bird study makes us appreciate our Iowa birds. More technical courses in evolution and histology and advanced courses for graduate work in all the lines are also available.

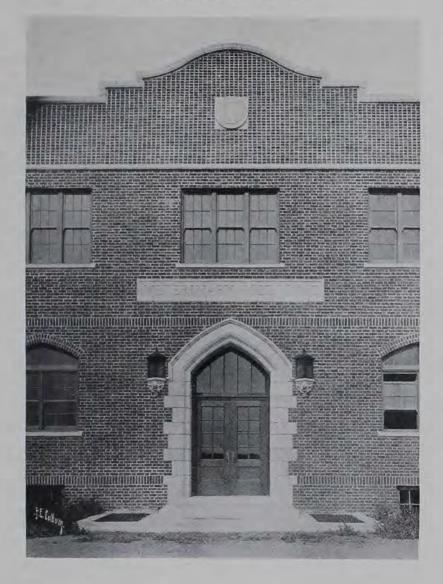

CHEMISTRY HALL

VET QUADRANGLE

Beterinary Medicine

ANATOMY AND HISTOLOGY PROFESSOR MURPHEY

The Department of Anatomy is located in the northwest building of the Veterinary Group. The apparatus, lantern slides and specimen collection is not excelled in America.

In addition to the undergraduate work given to the veterinary and animal husbandry students, the instructors in the department are constantly collecting specimens and data. Research work on the teeth and sinuses of the horse, "foot" of the horse, physiological histology of the epithelium of the digestive tract, the ovaries of the ox, X-ray studies of systematic Anatomy and Topography, is being prosecuted at present by members of the staff and graduate students.

PATHOLOGY AND BACTERIOLOGY PROFESSOR DIMOCK

By the term pathology is understood the science of disease, and by bacteriology the science of bacteria or "a little stick." The close association of these two great sciences is essential because of the fact that so many diseases are directly or indirectly the result of the action of bacteria.

In a course in medicine the work in pathology occupies an intermediate position. Anatomy, histology, physiology and biology serve as prerequisite, while the practical application of our knowledge of pathology is effected in the practice of medicine and surgery.

Since the fall of 1909 Dr. W. W. Dimock, the present head of the department, who started with his duties in the south end of the top floor of Old Agricultural Hall, working with only a few microscopical slides, and museum specimens, has built up this phase of Veterinary Medicine until the department compares favorably with any in the world.

PHYSIOLOGY AND PHARMACOLOGY

PROFESSOR BERGMAN

Located in the southeast building of the Veterinary group, this Department offers work in Physiology, Pharmacy, Materia Medica and Therapeutics. The laboratories, demonstration, and class rooms were planned for the investigation and teaching of physiological and pharmacological subjects, and are admirably arranged for the pursuance of general or research work along these lines. The laboratories are fully equipped, the most modern apparatus for practical physiological, pharmacological, and pharmaceutical work being available for student use.

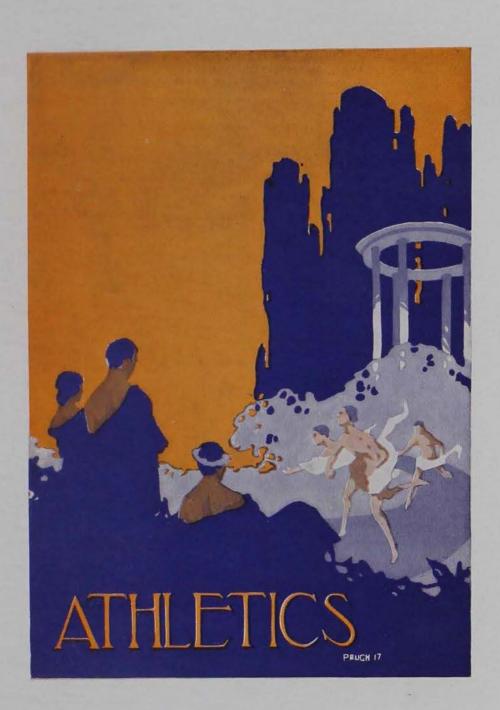

Aside from the work offered to veterinary, animal husbandry, and science students in this Department, a number of graduate students interested in problems of animal nutrition are engaged each year in advanced physiological and research work.

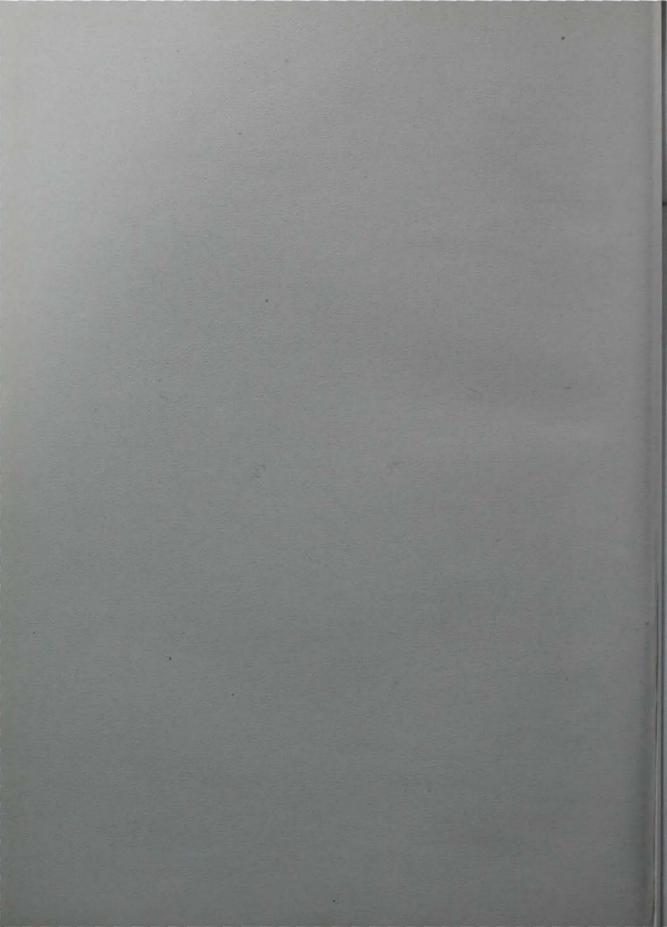

SURGERY PROFESSOR BEMIS

The Department of Surgery is concerned in the teaching of the principles of surgery, surgical technique, operative surgery, special surgery and obstetrics. A very important part of the work of the department is carried on in the hospital where several hundred animals are treated before the classes each year. These cases include every species of domestic animals and present a great variety of surgical conditions. Animals are constantly sent from various parts of the state for operation. The hospital is well equipped with diagnostic instruments, including an X-ray apparatus, operating instruments, sterilizers and tables to aid in the proper performance of modern veterinary surgery.

WILLIAMS

CLYDE WILLIAMS

It would be a hard job to find a more respected coach in the west than Clyde Williams. He is a firm believer in clean sport and what victories are won by his team are won on ability and not by any crooked means. He never takes an unfair advantage of an opposing team. As a coach he has the ability of putting pepper and fight into his teams. Last year he had a heavy load for he not only filled the position as Director of Athletics but also had charge of the coaching of the baseball teams. We look for Clyde to turn out a wonderful baseball team this spring, if he has any sort of material to work with.

C. W. MAYSER

Mayser is surely doing his share in putting Ames on a higher plane in athletics. He is a clean sportsman to the last word and knows how to take a defeat when it comes but defeat will be a much rarer event when Mayser's system is better established. His teams are always fighting until the last whistle has blown. A man who makes his teams never lay down. Besides football Mayser has started wrestling at Ames and in but two years has developed a wrestling team that has the championship of the state.

HARTER WALTER

This season, for the first time since he has been at Ames, Deac had a squad of men who went through the season without serious injuries and who were able to keep eligible. We have always said that if he had a fair chance he would put Ames on the basketball map. In the past two years he has had to rebuild his team after the mid-season exams and one of his stars was always on the sidelines with injuries. This year Deac has had to contend with neither. As a result Walter built up a team that finished third in the Missouri Valley and tied for the State Championship. The team was the best ever turned out at Ames and to Deac belongs no small measure of its success.

NED MERRIAM

It is to Ned Merriam that Ames owes her reputation in cross-country and track. Before he took up the coaching of these teams track and cross-country were never taken seriously at Ames. Today Ames has an unbroken row of victories in the Missouri Valley cross-country meets, and is always represented by a strong track team. Merriam has developed such men as Dickenson, Barker and others. This year with the Missouri Valley meet at Ames we feel sure that Ned will put a team on the field that will put up a strong fight for the first honors.

1916 FOOTBALL TEAM

Assistant Coaches

BRANN

YERGER

MARQUARDT

CAPTAIN-ELECT DENFELD

Gilbert Denfeld, tackle, for two years has been one of the strong mainstays of the Ames line. He is one of the headiest players of the game and his defensive work will always be remembered. We congratulate him on being chosen to lead the 1917 football team to what now looks like a successful year for the Cyclone eleven. So here's to you, Denny, now go to it.

PACKER

Review of Season

The football season of 1916 was one of upsets. This was not only true of football in Iowa but of Missouri Valley and Big Nine football as well. Teams admittedly strong were defeated by teams who were not regarded as being able to put up a good fight for the game. The defeat of Minnesota at the hands of Illinois was the biggest surprise of the year while Kansas upset the dope in Missouri Valley circles by defeating Nebraska.

It may be justly said that Ames experienced a successful year in

JONES

football. Considering the freak scores possible in the game as it was played in 1916, when no team had an assurance whether it would win 50 to 0 or lose 50 to 0, by referring to the scores made, Ames had a consistently successful season. Only two defeats were suffered by the Cyclones and each of these was only by three points. The team was inexperienced and the backfield had a weakness that cost them these two games. This weakness was fumbling. A team with the same power of the Cyclone team and whose backfield could hold the ball would be a hard team to defeat.

It is not good sportsmanship to go back now and explain why the team lost the

SLOSS

Iowa and Nebraska games, but nevertheless, fumbling gave defeat instead of victory. Fumbling is not named as an alibi but as a reason why the team did not fare as well as it might have. Ames has no tears to shed over the Iowa game nor do we wish to belittle in any way the victory that Iowa won for Iowa put up one of the best fights that has ever been seen on State Field. It was a hard game to lose.

About a hundred men responded to Mayser's first call for candidates. Of these only five were "A" men. Sloss and Aldrich in the backfield, Jones and Packer,

FIRKINS

ALDRICH

ends, and Denfeld at tackle were the only men of last year's championship team to appear. Captain Moss, quarterback, and Foster, end, did not return to school because of business; Evans decided to quit football, while parental objections kept Deffke out of the game.

The season opened on Sept. 30 with the State Teachers College as opponents. Mayser's opening line-up presented but four old men. They were Jones, Packer, Denfeld, and Aldrich. No attempt was made to run up a large score but the game was merely to try out the new men. Mayser

DAVIS

used thirty men in the game. As a whole the team showed up well for so early in the season. They were in good condition. They were frequently penalized for holding,—about 150 yards being inflicted for this offense. Tucker went over for the first touchdown of the season in the first quarter. The final score was 19 to 0.

Highland Park was the next victim; the Cyclones getting the same score as the previous week, 19 to 0. Ames was slow getting down to work and it was not until the second half that Davis, Paige, Aldrich, and Sloss started to rip the Highland Park line into bits.

JANDA

The first Conference game was with Kansas. The Cyclone team won by 13 to 0 but the score does not represent the superiority of the Ames team. They seldom failed to gain ground while the Jayhawkers were not able to penetrate the stiff defense of the locals for a first down until the last quarter when the Ames line was composed of substitutes. Sloss, Aldrich, Davis, and Paige and Tucker were always good for a gain and were never thrown for a loss.

Jones and Packer lived up to their reputation as being the best pair of ends in the Conference, Kansas was unable to get around

TUCKER

BARKER

either end for a gain. The whole team played consistently and fought every minute of play. The bad features of the game were the injuries to Tucker, who had his cheek-bone broken, and to Jones, who tore the ligaments in his knee.

The game with Missouri was a battle royal ending in a 0 to 0 score. This was the first time in years that Ames has not defeated the Tigers. Ames held like a stone wall when their goal line was in danger although they allowed Missouri to make many gains in the middle field. Four times Missouri was in striking distance of the goal but each time

BREEDEN

they were forced back by the strong defense of the Cyclones. In the last few minutes of play Ames took the ball to Missouri's one-inch line only to have time called with victory in sight. The team was materially weakened by the loss of Jones at end. The kicking of Sloss was the feature of the game. His kicks were long and high and were well placed. The defensive work of Packer was great. Aldrich was the most consistent ground gainer in the back field.

The first defeat of the season came on Nov. 4 at the hands of Nebraska. About 200 rooters accompanied the team to Lincoln to see the Cyclones defeat the Cornhuskers.

H. EVANS

They saw Ames go down to a 3–0 defeat but it was an even battle all the way and had it not been for a fumble which allowed Nebraska to get in kicking distance of our goal for the only time during the game the result would have been a scoreless tie. Neither team could gain with any regularity and both resorted to a kicking game. The game was hard and fierce, Erskine and Shoemacher being injured and forced to retire.

The lion's share of the defensive honors goes to Packer who put up one of the best defensive games of his career. Janda, Denfeld, and Barker also did good defensive

SCHALK

JOHNSON

work. The stars in the backfield were Aldrich, Sloss, and Johnson.

The Morningside game was played on a field covered with snow and ice, which proved a handicap to the speedy Ames backfield as time after time they had a clear field before them only to slip and be tackled from behind. The outstanding feature of the game was the offensive work of Tucker who made his first appearance since the Kansas game. Ames outplayed the visitors throughout but were only able to beat them 7 to 0, Aldrich crossing the line in the third quarter.

HEATER

Iowa came to Ames on Nov. 18

and went away with the State Championship, beating us 19 to 16. Ames played an uphill game, getting into trouble constantly by fumbling. Nine of Iowa's points were the results of Ames fumbles. The game was full of thrills and spectacular playing.

Iowa was the first to score when Davis kicked a goal from the field in the first quarter. Davis of Ames made a touchdown in the second quarter, putting Ames in the lead. This was soon reversed when Iowa crossed the line for a touchdown just before the half ended. Ames tied the score at 10 all when Davis made a dropkick. Then Iowa recovered a fumble and Duncan raced 50 yards for a touchdown.

PAIGE

The lead of the visitors was increased when they scored a safety after blocking a punt. In the last quarter the Cyclones resorted to the forward pass and were able to cross the line after a wonderful run of 70 yards by Packer. Soon after this the final whistle blew.

The work of Davis and Becker was the outstanding feature of the Hawkeyes' play. Packer and Davis were the stars of the Ames team while Aldrich played a stellar game while he was in the game.

The season closed Thanksgiving day at Drake, the game resulting in a 33 to 14 victory for Ames. The Bulldogs were outclassed in

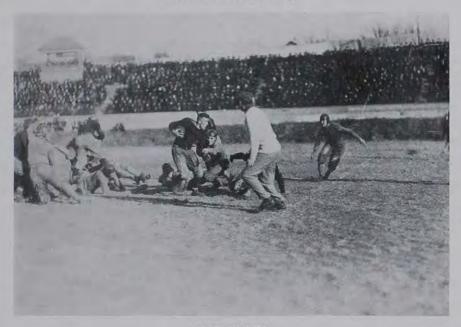

ERSKINE

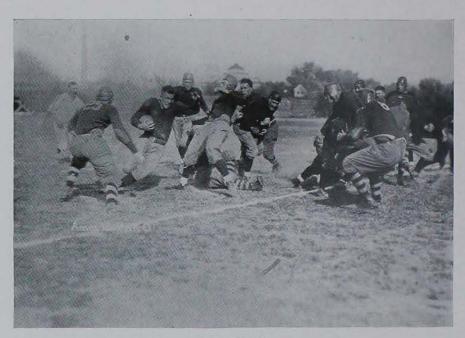

every department of the game. It was not until Ames had cinched the game that Drake was able to score.

CAPT. BOYNTON

Basket Ball Review

The season opened with Central College. It was merely a practice game to find the strength of the material. Simpson was the next foe and surprised us by administering a defeat. This was because the men were a little stale from the hard workouts during vacation. It may be said that Simpson failed to score as long as the first string men were in the game but the subs did not come up to expectations and Simpson won as a result. The State Teachers were taken on next and defeated.

The first Missouri Valley game was at Columbia with Missouri. The Cyclones came back with one Tiger scalp, winning the second game. The work of Janda and Paige did much to bring about the fall of the Tigers.

When Kansas played Ames they put up the best game of basketball that has been seen on the Ames floor for some time. They were apparently above their heads as Ames finished the season with a better standing. In this series however Ames lost both games.

Ames started her winning streak by defeating Drake. The work of Paige and Erskine featured. The next game was with Grinnell. For the first time Ames was able to defeat them on their own floor. Chicago was the next victim of the Cyclone machine, in one of the most exciting games ever seen at Ames. The Maroons led at the end of the first half by 17-14, but were able to score only 3 points in the second half, while Walter's men scored at will, the final score being 27-20. Picking the stars of the game is a hard proposition for every man comes in for his share of the glory. Bragdon led the scoring.

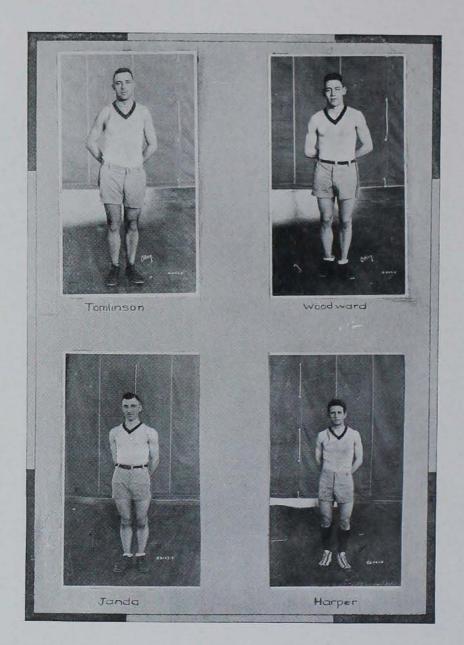

Drake offered little resistance to the Cyclone five and went down to defeat by 25-9. The close guarding of Morgan and Boynton featured,

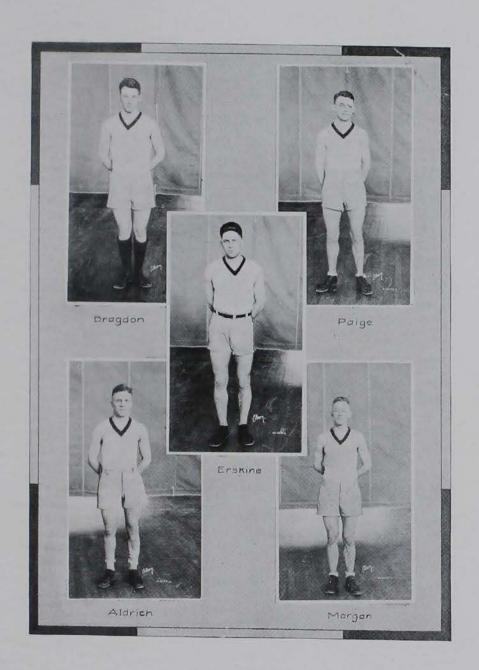

On February 17, Ames defeated Iowa for the first time. The game was decisive, Iowa losing by the score of 24-12. The Cyclones outplayed the Hawkeyes in every department of the game. Each man deserves equal credit in the victory. Morgan and Boynton proved stumbling blocks for any Iowa offensive, Erskine outplayed Dutton at center while Paige, Aldrich and Bragdon played rings around the Iowa guards.

Nebraska was the next victim of the Cyclone five, dropping two games. At no time were the Cornhuskers dangerous.

The winning streak was broken by Iowa on their own floor after one of the hardest fought battles of the season. The score was 13 all during the last few minutes of play and Iowa won by a basket from the field with only one minute to play.

The season closed at Lincoln with a two game series. The Cornhuskers copped the second game. Both games were hard fought.

Baseball Review

Although Arnes had the best claim on the baseball championship of the state in 1916, the season can hardly be regarded as the most successful in history. It seemed that a jinx was on the heels of the team the whole season, or at least in all the Conference games. It may be said, however, that the team never laid down but fought until the last man was out.

The season opened April 5, at Kansas, with a double defeat. Both games required extra innings in which Ames held the lead up to the 9th inning only to have the score tied and finally overcome by the Jayhawkers. The games were featured by the hitting of Jones and the fielding of Elder and Aldrich and Janda's pitching.

The first home game was with Simpson which resulted in an easy victory for the locals,

The next important games were at Columbia with Missouri. Generally Ames has beaten Missouri but this time the Cyclones were defeated in both games. Ames played good ball but failed to come across when hits meant runs. Jones made a catch in the second game that still has the Tigers talking.

Missouri played at Ames the next week and again administered a double defeat. In the second game Ames made 13 hits but was only able to cross the plate 3 times. Fourteen men were left on the paths in this game, telling the story.

In the Iowa game at Iowa City, Merrill pitched the best game of the year, holding his opponents to 2 hits, only to lose his game through poor support. The score was 5-4. The hitting of Davis and Firkins featured the game.

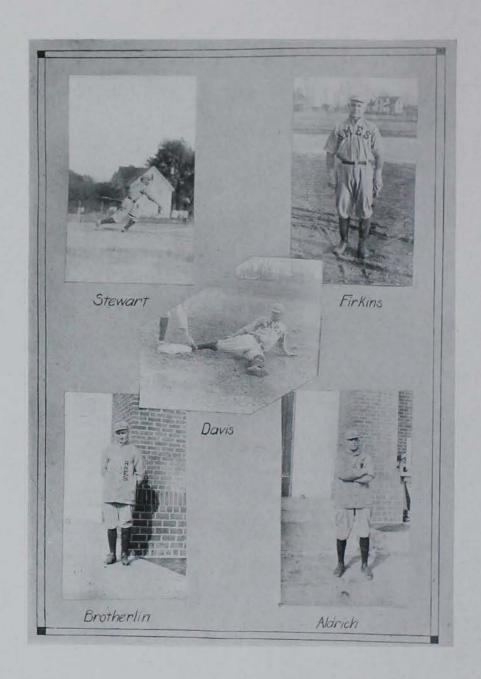

The Grinnell games were fairly good games both being won by Clyde's proteges. Aldrich made 4 hits in the second game.

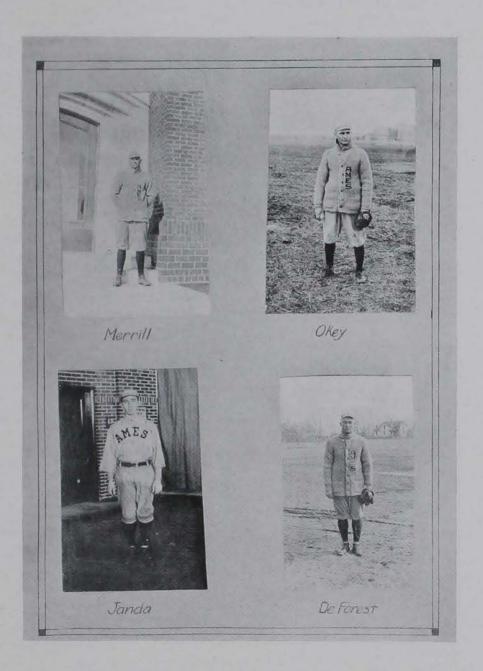

Waseda University of Japan played here on May 18-19. They failed to put up the brand of ball that was expected and were easy marks for the Cyclone aggregation. They played a fairly good defensive game but were poor hitters.

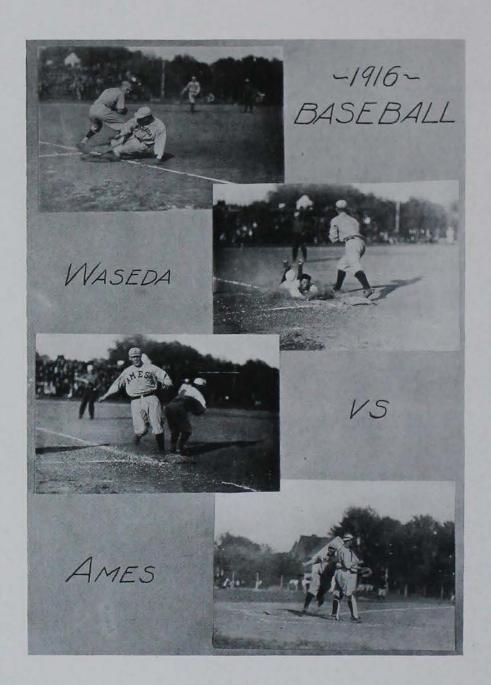

Ames was in a slump during the Kansas series and put up the poorest exhibition of the season, dropping both games.

Highland Park journeyed to Ames on Decoration Day confident of victory but were defeated in the fastest game of the season. The team had recovered from their slump and gave De Forest the best of support, Davis and Brotherlin making especially brilliant catches. The work of Stewart, behind the bat is worthy of special mention.

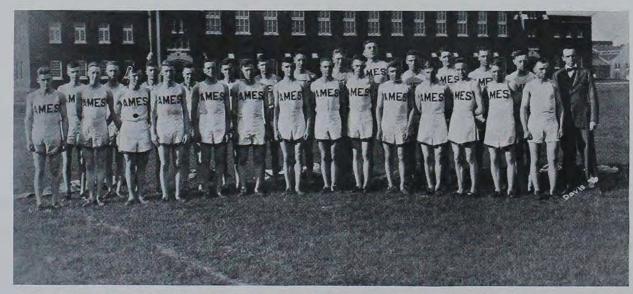

The season closed on June 2, with Iowa at Ames. The game was a thriller, Ames winning in the 11th, by a score of 3-2. This was the last game for Kerrigan, Davis and Okey. Captain Kerrigan brought his career to a close by scoring the winning run in the 11th.

Green, Merriam, Mellor, Carter, Williams, Bouy, Capt. Burrus, Uhl, Deffke, Holmes, Packer, Marsh, Coach Merriam, Gibson, Cornell, Hollister, Arnold, Zimmerman, Loy, Scroggie, Hawthorne, Crane, Paul, Christensen, Evans, Maakestad, Beanblossom,

Track

CAPTAIN BURRUS

Slim never failed to pull down some points for Ames. He seemed to have a monopoly on the high jump in the State Meet.

CAPTAIN-ELECT PACKER

Pack is one of the few men who have the distinction of beating Simpson in the high hurdles. He is the best hurdler Ames has ever had.

Cross Country

Beanblossom, Fritsche, Husted, Crane, Hawthorne, Williams, Merriam.

FINISH OF MISSOURI VALLEY MEET

Cross Country Results

CAPTAIN DICK WILLIAMS

Dick was one of the most popular leaders the cross country team has ever had. He was always among the first to break the tape.

CAPTAIN-ELECT HAWTHORNE
Hawthorne is one of the best distance
runners in the Missouri Valley. He should
run a wonderful race next year.

WILLIAMS

HAWTHORNE

Ames-Missouri Dual. Columbia, Missouri, Oct. 21. Ames 19, Missouri 36.

Husted, Hawthorne and Crane tied for first. Time 30:14. Beanblossom, sixth; Williams, seventh.

Ames-Iowa Dual. Ames, Iowa, Nov. 11. Score: Ames 15, Iowa 40.

Hawthorne, first. Time 27:44. Husted, second; Williams, third; Crane, fourth; Beanblossom, fifth.

Missouri Valley Meet. Ames, Iowa. Nov. 18. Ames 18, Kansas 38, Missouri 70.

Won by Husted. Time 27:44. Hawthorne, second; Williams, fourth; Crane, fifth; Beanblossom, sixth.

Big Nine Meet. Purdue, Nov. 25. Purdue 56, Chicago 63, Ames 72.

Won by Tenney, Chicago. Time, 26:25. Husted, third; Hawthorne, fourth; Williams, eleventh; Crane, twenty-sixth; Beanblossom, twenty-eighth.

Wrestling Team

Mayser, Kreber, Perry, Firkins, Yerger Loucks, Henderson, Albrook.

The wrestling team had a much more successful season than last year. They emerged with the championship of the state to their credit. The season opened with Iowa on the home mat. Ames won every event but one the final score being 32-7. The surprise of the meet was the fast work of Henderson in the heavy weight class. His opponent outweighed him by 25 pounds, but Henderson outclassed him in every department of the game. Firkins made quick work of his man putting his shoulders to the mat twice in a little over two minutes for each fall.

Nebraska with the exception of their star, Otoupalik, failed to put up much competition to the Cyclone grapplers. The meet was featured by the work of Henderson and the uphill fight of Albrook.

The Big Nine meet at Iowa City proved to be a disappointment for but one Ames man emerged with points to his credit. It may be said that the Ames men were early forced to meet the men who eventually won the championship and also that none of the men were thrown, but merely lost through a referee's decision.

This is the last year for Firkins, Albrook, Loucks, but as wrestling is being taken up by the student body, it seems that a bunch of good wrestlers will be developed by next year, by the coaching of Mayser and Yerger.

MINOR

ATHLETICS

Lollurs

Gym Team

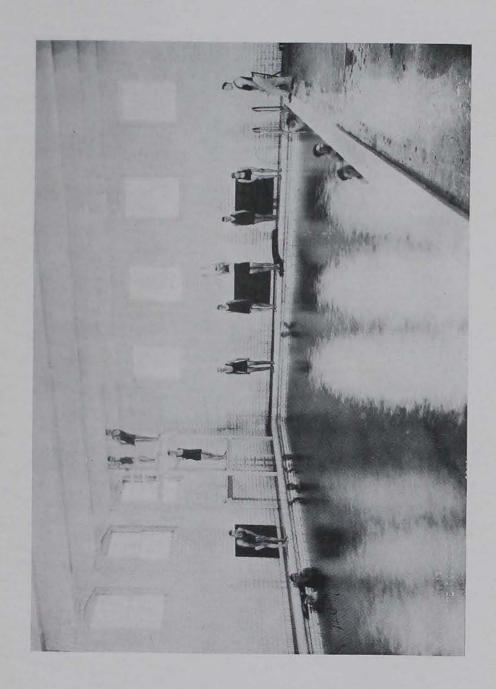

Snodgrass, Rogers, Bolon, Baker, Nicholson, Brown, Bendixen, Cresswell,

This was the first year that the gym team has been entered in the state meet, but in spite of the fact that they were inexperienced the team pulled down third place in meet. Luther College won with a total of 1,066 points, while Ames pulled a total of 1,048. In the individual honors Brown, of Ames, finished third, having 299.3 points to his credit while the winner had but an even 300 points.

Two men were also sent to the Big Nine meet at Iowa City. Brown placed fourth in the individual contest.

The team is being coached by Rogers of the Physical Training Department and he hopes to have more meets next year.

Swimming Team

Park, Turner, Linden, Emerson, Laubenfels Parsons, Schultz, Morrison, Breuner.

The swimming team had its initial dual meet with Iowa. They defeated the Hawkeyes in the first inter-collegiate swimming meet ever held in the state. The score was 49 to 28. Morrison grabbed the individual honors by winning 14 points. Summary:

Relay race; Ames 1st, Iowa 2nd, 1:35.8.

Fancy diving: Glapts (I), Turner (A), Young (I).

40 yard dash: Hanapel (I), Park (A), Morrison (A), :22.2.

200 yard breast stroke: Breuner (A), Schultz (A), Miller (I), 2:18.2.

220 yard: Morrison (A), Deppe (I), Parsons (A), 3:15.2.

Plunge for distance: Emerson (A), Tyler (I), Laubenfalls (A), 50 ft. 1 in.

150 yard back stroke: Breuner (A), Jacobson (I), Park (A), 2:01.

100 yard: Hanapel (I), Morrison (A), Stoner (I), 1:09. 440 yard: Morrison (A), Parsons (A), Deppe (I), 7:53.6.

Tennis Results, 1916

April 29. Nebraska at Lincoln. Score, Neb. 2, Ames, 1.

Singles. Marriott, Ames lost to Ellis, Neb. 6-4; 6-4.

Beach, Ames won from Gardiner, Neb. 6-2; 0-6; 6-4.

Doubles. Marriott and Beach, Ames lost to Ellis and Chatt, Neb. 9-7; 6-2.

May 13. Drake at Ames. Score Drake 2, Ames 1.

Instructing Staff

MISS WINIFRED TILDEN

MISS RUTH EDGERTON

MISS FRANCES PHILO

Miss Winifred Tilden, head of the Department of Physical Training, attended Dana Hall School, Wellesley, New York. Later she graduated from Mt. Holyoke College, receiving a B. S. degree. In 1904 and 1911 she attended Harvard and in 1913, she studied in the Chalif School of Dancing, New York. This year Miss Tilden has been appointed on the National Committee on Athletics for girls.

Miss Tilden has been an enthusiastic booster for Women's Athletics and this year through her efforts a new pool has been installed.

Miss Ruth Edgerton has charge of the playground, apparatus work and athletic basketball. She graduated from Manhattan in 1912, receiving a B. A. in Home Economics, and from the Teachers' College in 1914, receiving a B. S. in Education, and as teacher in Physical Education.

Miss Frances Philo has charge of the Freshman classes. She graduated from the Iowa State Teachers' College at Cedar Falls, in 1913, with a B. S. degree. Before coming to us she had the Y. W. C. A. work in Cedar Rapids.

Girls' Athletic Council

Tilden, Harper, King, Hanson, Pammel, Scott. Parker, Wheatley, Draper, Howell, Kollmansperger, Gettamy.

Women's Athletic Association

Scott, Curtiss, Schwartz, King, Harper, Overbaugh, Hinsky. Wilson, Wertheim, Draper, Haslam, Miss Tilden, Schouten, Bartley, Daniels, Liljedahl, Parker, Daubenberger, Wiese, McCarty, Lutz, Raymond, Busch.

Winners of Cup

Burgess Weise

Pammel King

Bourland Packman

Any girl who has won medals in three different sports is awarded a Silver Cup, Three medals the same or different entitle her to an "A" sweater. A recommendation for two successive years for the same position on an Athletic team entitles a girl to an "A" blanket and six medals entitles her to a double "A."

Cups are also awarded for excellence in Playground, Dancing and Freshman Drill Work. The following girls were awarded cups in these respectively:

Elsie Green, Verna Coulthardt, and Marion Rock.

The girl who shows the most development after two years of Physical Training is awarded a cup. Miss Jess Hayes received the cup last year.

VARSITY SQUAD

R. Hilton, E. Curtiss, M. Kollmansperger, C. Scott, E. Hafer.

This sport proves to be very popular with the girls at Iowa State, and besides giving the girls training in action, it develops a splendid feeling of good fellowship.

Many girls go out for Athletic Basketball and the inter-class games are a source of great rivalry. At the end of the season a Varsity Squad is chosen to play against a picked team.

SENIOR-SOPHOMORE BASKETBALL M. Morris, M. Aillaud, M. Kollmansperger, G. McCord, C. Scott, B. Wheatland.

Tennis and Golf

Miss Florence Draper, champion of Singles and Doubles, spring, 1916, is runner up in the Finals for 1917.

Miss Winnifred Raymond, runner up in Singles for Fall, 1917.

Miss Ethel Gates and Miss Bernice Wheatley, champions in Golf foursomes. Miss Gates is also champion in twosomes for Fall, 1916.

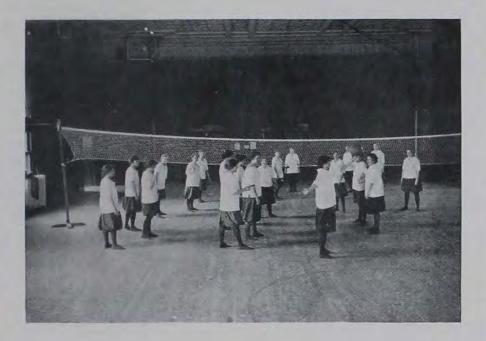

AESTHETIC DANCING

Twice a week this fascinating enjoyment is participated in by many young aspirants of the light fantastic. The swaying from side to side, the movement of the arms in the same rhythm as the body, all to soft music, makes the dancers appear to be in a fantasy of delight. The long mirrors at one end of the room give the girls an opportunity to see themselves as others see them.

FOLK DANCING

One might believe he had stepped into a Colonial Dance, but, no, just the interpreting of folk dances. Here the girls learn the dances of every nation, and indeed enter into the very spirit of the people they are interpreting. Here the girls receive grace and physical training.

PLAYGROUND WORK

What is this, a party? One might be led to believe it was, by the intense interest shown, but it is only girls training in playground work. Story telling, folk dancing, and dull work is taken up with much enthusiasm. Practical application is made by the story tellers at the Public Library, where groups of charming children gather to absorb the stories on Saturday afternoons.

APPARATUS WORK

Here the girls swing on the ropes, mount the buck, and travel by means of rings. Muscles are developed and the girls learn to be alert. Every Spring a "Gym" Meet is held and here the spectators are allowed to observe the feats the girls have accomplished by steady practice twice a week.

AGRICULTURAL CLUB

The Agricultural Club is an organization composed of all the students of the Agricultural Division of the College, its purpose is to foster all activities of that division. The work of the club includes the annual Agricultural Reception, held in the fall, and the staging of the Agricultural Day, which has been known until this year as the Agricultural Carnival.

The club consists of the following departmental clubs:

Saddle and Sirloin Club

Agronomy Club

Agricultural Education Club Agricultural Engineering Club

Curtiss Club

Dairy Club

Farm Management Club

Forestry Club

Horticultural Club

The Agricultural Council, the executive body of the club, transacts all business and is composed of two representatives from each of the above departmental clubs.

SADDLE AND SIRLOIN CLUB

Saddle and Sirloin Club is an organization among the students of the Animal Husbandry division for the promotion of the interests and activities of the department and the fostering of a closer fellowship among students and faculty. As a departmental division it comprises a part of Agricultural Club and carries a share in the activities of that organization.

Regular meetings are held on alternate Thursday nights and men of importance in the live stock world are secured as speakers. A special reception and mixer for the new students is held at the beginning of the year. The "Little International," a live stock show, featuring college livestock and student ability in showing and fitting, is held each year, in November. During the spring a mock auction of college livestock, fitted and consigned by students, is conducted by the Saddle and Sirloin Club.

Student Volunteer Band

Henry, Handy, Tregoning, Smith, Smith, Miller, Whitney, Conrad, Weiss, Porter.

Nearly every institution has a Student Volunteer Band consisting of students whose supreme desire is to serve their God on the Foreign field in whatever line of work they may be best fitted. The whole world is looking to America for Christian leadership because of the present great conflict and because of the great social unrest of the non-Christian nations of the world.

The object of this organization is to foster and keep alive the missionary spirit on the Campus. In addition to regular weekly meetings the Band leads at Young People's Societies in the various Churches at least once a year.

The officers are as follows:

President .					R. H. PORTER
Vice President			160		RUTH WEISS
Secretary-Treas	urer		*	F	EDITH WHITNEY
Chairman Prog		MARY CONRAD			
Chairman Publ	icity C	omm	ittee		CHAS. E. SMITH

D. W. C. A. Cabinet

Secretary .		4				PAUL	INE JACOBS
Treasurer	÷					BES	SIE PARKER
General Secreta	ry					-	DDA FOSTER

Last year the Young Women's Christian Association,

- 1 Held 36 religious meetings.
- 2 Conducted 19 house Bible and Mission Study classes.
- 3 Kept an employment bureau for college girls.
- 4 Gave 4 socials for women only and 15 in co-operation with the Y. M. C. A.
- 5 Maintained regular Association work during summer school.
- 6 Wrote during the summer, to 170 new girls, enrolling for the current year.
- 7 Had a delegation of 21 at the Geneva summer conference.
- 8 Gave \$175,00 to missions in China and assisted in the finance campaign for war relief work, faculty and student women giving \$900.00.

T. L. B.

DAIRY JUDGING TEAM

Wilson, Henderson. Mason, Prof. Gillette, Sturtevant.

The Dairy Judging Team composed of L. V. Wilson, W. L. Henderson, W. S. Mason, J. A. Sturtevant and Professor Gillette, Coach, won first place at the Waterloo National Dairy Show with a total of 1,528 points. Hoard's Dairyman and Kimball's Dairy Farmer presented cups to the schools who were high on reasons, the the Ayrshire Cup being won by Ames. L. V. Wilson was high man on placing and reasons. At the National Dairy Show held at Springfield, Mass., last October, Ames took fifth place. W. L. Henderson was second high man.

AMERICAN ROYAL STOCK JUDGING TEAM

Wheeler, Peters, Evans. La Grange, Prof. Pew. Hazen, Christensen.

Iowa State took first place in the American Royal held at Kansas City last fall, with a total of 3,280 points. Ames had excellent placing and reasons, the latter being largely accountable for the high final ranking. The team and their individual ranking were:

Chris Christensen	4
John Evans	8
L. E. Wheeler	11
W. F. LaGrange	12
Glenn Hazen	

V. B. Peters (Alternate), Prof. W. H. Pew, (Coach)

INTERNATIONAL

STOCK JUDGING TEAM

Wheeler, Buoy, Evans, Wilson, DeButts, Prof. Pew, Christensen.

December 2 the Iowa State Team composed of L. E. Wheeler, J. L. Evans, J. M. Buoy, F. F. DeButts, Chris Christensen and L. V. Wilson, as alternate, left for the International at Chicago. In a very close contest with fifteen teams and eighty-seven men entered, Iowa State took second place with a total of 3,950 points, just twenty points behind Indiana. Ohio, Texas and Kansas placed next in order. J. M. Buoy was high man of the entire contest, Wheeler was seventh and DeButts placed twelfth. The team as a whole scored first on hogs and second on horses.

THE FRUIT JUDGING TEAM

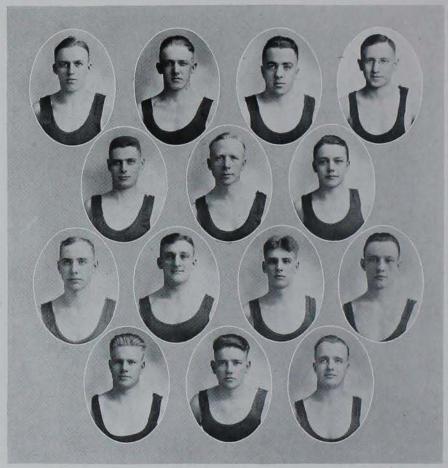

Goode, Cree, Stillwell. Cain, Harrington, Dreibelbis.

The Iowa State Fruit Judging Team, composed of L. S. Goode, Harold Cree, L. L. Dreibelbis, E. W. Stillwell and W. M. Cain was again able to bring back the Trophy Cup, donated by the "Omaha Bee" in 1909 for Missouri Valley fruit judging work. This makes two years in succession that Iowa State has won the cup. Three consecutive wins, however, are necessary for the permanent possession of this trophy. The contest this year was held at Des Moines, in December, in connection with the Iowa Horticultural Society. Ten classes of fruit were given and oral reasons given. The Ames boys excelled in all phases of the work and obtained a team score of 432.49 points out of possible 500, giving them a margin of fifty points over their opponents and a higher score than has ever before been made by a Missouri Valley team. It was a good year for the fruit judges.

Water Rats

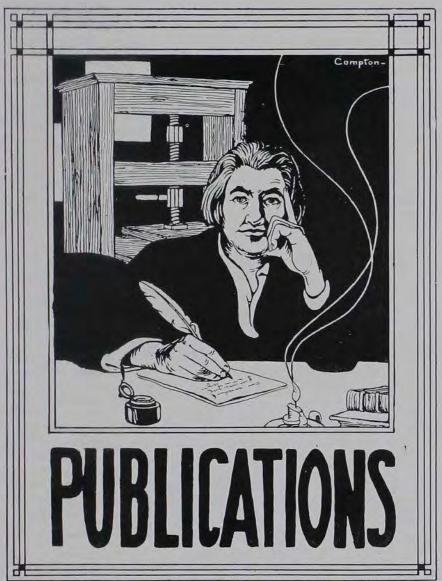

Thompson, Morrison, Breuner, Wice, Park, Linden, Eaton, Parsons, Cullmer, Schultz, Laubenfels, Emerson, Davison, Turner.

Organized in 1914 for the promotion of aquatic sports, all-around swimming and life saving work.

Tau Beta Pi

Founded at Lehigh University in 1885

Alpha of Iowa installed in December, 1907

Publication-"The Bent"

Colors-Seal Brown and White

The object of Tau Beta Pi is to foster a spirit of liberal culture in engineering schools of America and to promote high standards in the engineering profession. Undergraduate members are elected from those of the upper one-fourth of the class whose qualifications mark them as future leaders of the profession; honorary members, from those who have honored their alma mater and the engineering profession after graduation.

HONORARY AGRICULTURAL FRATERNITY

Founded at Ohio State University, 1905

Iowa Beta Chapter Installed 1907

The purpose of the fraternity is to promote the study and investigation of technical agriculture, to secure a higher degree of scholarship, to encourage those virtues which develop leadership and altruism in student activities, and to foster the spirit of brotherhood in the agricultural profession.

Student members are chosen from the upper two-fifths of the Junior and Senior classes in the courses in agriculture.

ENTRANCE TO AG. HALL

EAST HALL GROUP

BERT GERMAN, '95

Mr. German, who is President of the Association, has like Mr. Hook, who preceded him, made the office of President mean something. The reunion of the Original Cyclones last fall and the wonderful Pep Meeting the night before the Iowa Game were largely due his effort. He has also played a prominent part in the work of the Des Moines Association the past year. He is what we call a "live wire."

As Editor of the Alumnus and as Secretary of the Alumni Association, Mr. Jones has done more than any one else to keep the Association together. By his persistent effort and enthusiasm he has made the Association a real asset to the Institution.

WARD M. JONES, '97

The General Alumni Association

One of the most valuable assets an institution has is the organization of its Alumni. Individual effort and record is very important, but it is hardly as important as united effort.

Prior to 1913 a very loose organization existed but in that year a permanent bureau was established with Ward M. Jones as Secretary. Since that time the Institution has felt its influence more than ever before.

Some of the most active associations are Des Moines, Southern California, Northern California, Portland, Oregon, Seattle, Twin Cities, Chicago, Kansas City, Mo., Washington, D. C., Pittsburgh, New York City, and Davenport.

Under the able leadership of Mr. German the Des Moines Association has made its influence widely felt. Meetings are held the first Thursday of each month at the Chamber of Commerce, with an attendance of thirty to sixty. It entertains the Football Team every year after the Drake Game and this year they have offered bronze medals to those students who show extraordinary interest in wrestling.

When the Men's Glee Club was at Minneapolis a year ago the Association at the Twin Cities bought out the whole house and invited all the Ames people and their friends, thus securing a very appreciative audience.

The New York City and the California Associations bear testimony to the fact that there are organizations from coast to coast boosting for Ames.

Space will not permit the mention of more Associations but the Institution is in debt to the good work of all.

The officers of the Association are:

BERT GERMAN, '95, President WARD M. JONES, '97, Secretary
DON E. FISH, '06, Vice President MYRTLE FOWLER, '96, Rec. Sec'y.
HERMAN KNAPP, '83, Treasurer

The Executive Committee consists of:

BERT GERMAN, '95 DON E. FISH, '06 MYRTLE FOWLER, '96 J. S. DEWELL, '81 C. G. LEE, '94
WAYNE DINSMORE, '04
GEO. W. BLANCHE, '02
J. W. HOOK, '05
CHAS. A. WILSON, '95

GURDON W. WATTLES

Very few students know that Mr. Wattles is the founder of the Student loan fund, which under the directorship of Dean Stanton supplies funds to deserving students who are unable to obtain funds from other sources. Mr. Wattles, now a prominent business man of Omaha, was obliged to leave college during his Junior year, but this did not make him lose his interest in the old school. We owe him more than we can realize.

MRS. CARRIE CHAPMAN CATT, '80

Mrs. Catt has not only brought honor to her Alma Mater by her own personal record as a world leader of the Woman Suffrage Movement, but she has shown her interest and loyalty to the Institution in many ways. In addition to the Catt Library we are enjoying the use of 500 volumes on Economics, which, though left to her were immediately turned over to the school for our use. She is now the President of the International Woman Suffrage Association and by her leadership has made it a very influential organization.

The excellent work of the Alumni Association last year is partly due to Mr. J. W. Hook, '05 who served as President of the Association. By using his office for the betterment of the whole organization he has set a precedent which succeeding men must follow.

During the year thousands of letters were sent out to organizations all over the United States. These letters resulted in special reunions last June of the following classes: The Centennial Class '76, '86, '91, The Ten Year Class of '06 and the '11 Class. These reunions are the means of stimulating more interest in affairs at Ames for the year which follows.

Some time ago Mr. Hook became General Manager of the Allied Machinery

Company of America but was soon advanced to the Vice Presidency. He has recently superintended the organization of two new companies.

CENTENNIAL CLASS OF '76

CLASS OF '06

CLASS OF '91

Commencement 1916

The most recent addition to the large body of Alumni and the one best known to the present Student Body is the Class of 1916. We shall remember them for many reasons, chief among them being the gift which they presented to the College. It has long been the custom for each outgoing class to leave behind them some remembrance and the Class of 1916, has indeed left us something delightful, something which every one can enjoy. As we wander over the Campus in the beautiful winter evening we notice in front of the historic buildings of Margaret Hall and Agricultural Engineering, two inviting white structures beckoning for occupancy. Down by the beautiful lake shore is noticed another one of these structures. Surely it was the desire of the 1916 Class to encourage the enjoyment of the night air, the hoot of the owls and the measuring of the distance between this old earth and the white man in the moon. It is reported that a certain Prep, when wandering alone one evening thinking of the happy days at home, was attracted by a lone figure which upon closer inspection proved to be two. We are led to believe that, under such circumstances a coon in the moon would be most appreciated.

The Commencement Exercises were held June 8, 1916. The beginning of the day's exercises were marred by rain which prevented the impressive parade of graduates, faculty, and speakers from Central Building to the Gymnasium. After the 2,500 people had become seated the elements subsided and the remainder of the day was very pleasant. The following Program was renderd:

Commencement 1916

There were a total of 456 Degrees and Certificates granted, an increase of over forty the previous year. There were 195 degrees in Agriculture exclusive of the 48 certificates granted in the two years course. In Engineering there were 117 degrees and in home economics 70 degrees and 10 certificates.

Honor students of courses given out were as follows:

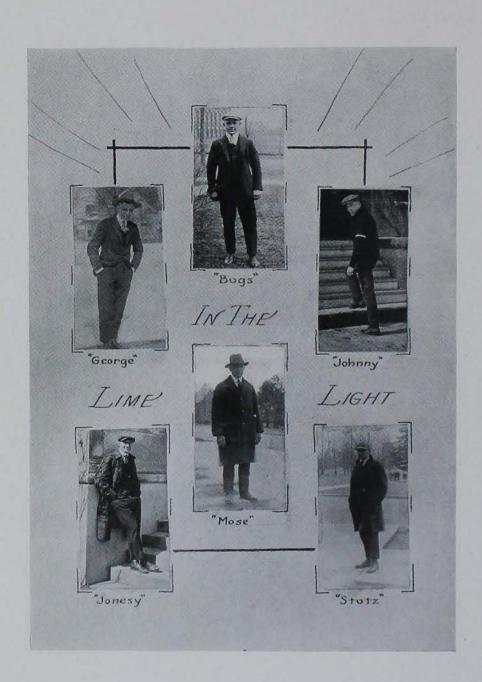

Rush B. Lincoln	Industrial Science
Henry W. Turpin	Agronomy
Glenn M. Smith	
Harold Conrad	Mechanical Engineering
Vernon C. Gibson .	Agricultural Education
Julia E. Brekke	
Earl W. Smith	Agricultural Engineering
Ernest W. Smillie	Veterinary Medicine
Abner I. Butler	Electrical Engineering
Max Geisler	Forestry
Wayne A. Kivell	Civil Engineering
Raymond B. Becker	Animal Husbandry

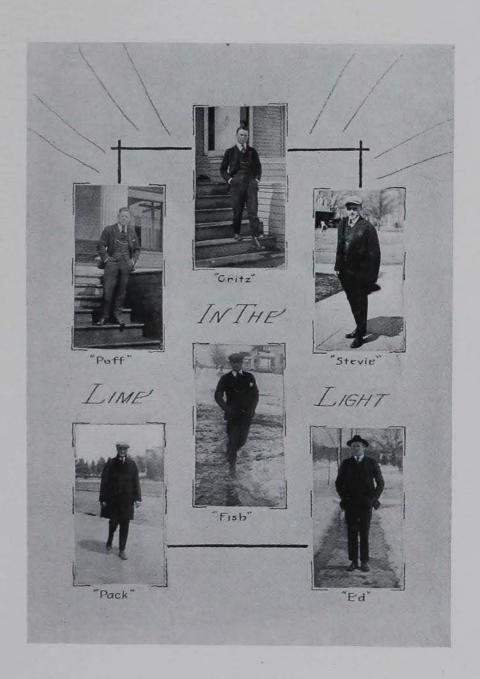

Winners of special prizes and medals were as follows:

Phi Lambda Upsilon Thesis Medal	
Phi Kappa Phi Prize	Leo Shippey
Zimmeran Memorial Prize Medal	
Story County Alumni Prize	Rush B. Lincoln
Sons of American Revolution Medal	Luverne Merton Matheson

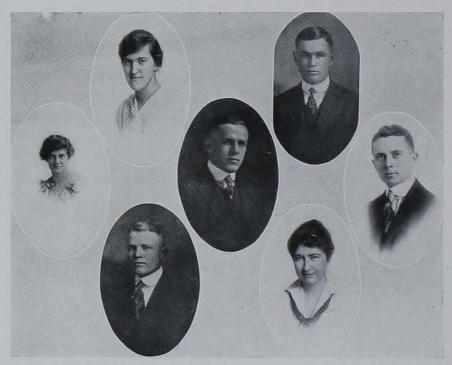

Thus was closed one of the most successful years in the history of the institution.

WEST HALL GROUP

SEPTEMBER, 1916

- 13. School begins. First 40 Freshmen to register are given Phi Gam pledge pins.
- 14. Phi Sigs pledge three preps with dress suits so type is unchanged.
- 15. Bernard Lawler dropped from football squad for breaking training.
- 16. Jack Ashford closes contracts for the semester's fussing at the Joint Reception.
- 23 "Dutch" Shambaugh speaks in Sunday Chapel.

OCTOBER, 1916

- 1. Two Phi Psis seen at morning chapel. Three women faint.
- 8. Krebs misses a Sunday night at the Pi Phi house.
- 14. Kansas comes up for her first annual walloping.
- 20. Tri Delts serve macaroons at their house warming. Ed. Allison stirs the soup. Hutcheson acts as guide.
- 23. Walt. Henderson gets to Soils Lab. on time but forgets his chewing.

NOVEMBER, 1916

- 4. Girls' Pledge Day. Neither Pi Phis nor Tri Delts lose a bid. So Lilah Mc-Auliffe and Mildred Edwards tell us.
- 8. Phys. Dept. sends three bushels of Cons to Junior Dean's Office.
- 9. K. Ds. dedicate the Sheldon Munn Jr.
- 10. Prof. Brindley tells class how he elected Harding.
- 18. Very quiet at night.
- 28. Roscoe Packer goes to a Zoo lecture.

DECEMBER, 1916

- 1. Sunshine Club adjourns pro tem.
- 2. Pi Phis throw Formal. Boylan and Sanborn in charge.
- International Live Stock Show at Chicago. A. H. Seniors have banquet with A. H. Faculty as chaperones.
- 5. George Cromer identified in the Chicago morgue.
- 12. Winter fences built on campus.
- 20. So-called Christmas vacation begins.

JANUARY, 1917

- 2. House bills start again.
- 6. All-College Dance. "Puff" imports. Pi Phis gasp.
- 8. Girls' new smoking rule goes into effect.
- 10. Girls are instructed not to tell anyone about the new smoking rule.
- 20. Ender changes his collar.
- 27. "Kirk" publishes 15 more books (all alike).

FEBRUARY, 1917

- 2. Short Course being held. Shorthorns and other varieties seen all over the campus.
- 10. Quartet sings in tune at the Convocation.
- 14. Valentine's Day. Bushman buys the cigars.
- Great consternation in Sheldon-Munn dining room. Bill Gates and Helen King fail to appear.
- 22. George's birthday. Fact not officially recognized, however.
- 26. Student Senate convenes. First case is that of a man caught chewing in Vet. Lab.

MARCH, 1917

- 2. Silver-tongued, leather-lunged Pollard addresses the students.
- 5. Street car goes clear round the loop on time.
- 8. Chess Team asks for A's.
- 9. Rifle Team asks for A's.
- 10. College janitors demand A's.
- 17. Engineers' Blowout. No standing room at the dance.

APRIL, 1917

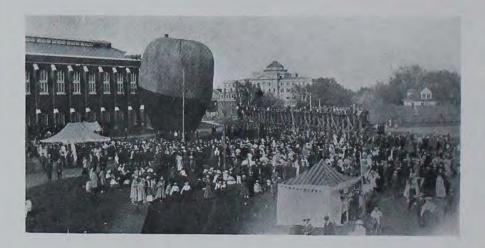

- 1. April Fool (by way of information).
- 5. Spring Recess.
- 14. Fulton Flick breaks World's Record for shot put at Home Meet.
- 19. Jonesy and Gladys select a house.
- 26. Ender changes his collar again.

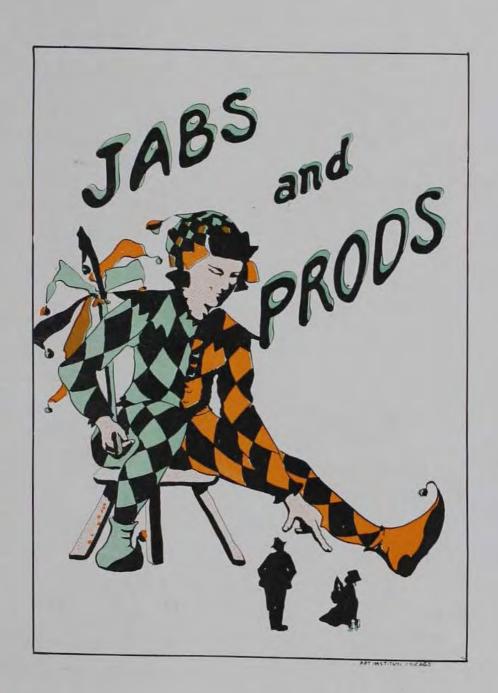

MAY, 1917

- 3. Ag. Day called off on account of the Kaiser.
- 5. Pi Phis throw a dance in great competition with the All-College affair.
- 11-12. "Moosic" festival. Mostly "Moo".
- 15. One hundred braves march to Fort Snelling.
- ? Gaylord and Krebs throw 1800 Bombs but make a safe getaway.

81918

And now the funny men will take a whack.

Please rise while the band plays I. S. C. and don't leave your seats until the editor has a ten mile start.

In the following pages we will show you a catalogue of our different styles in Eggs, Nuts and Prunes.

A ware to ware the comment

(i) elanograme elanograme

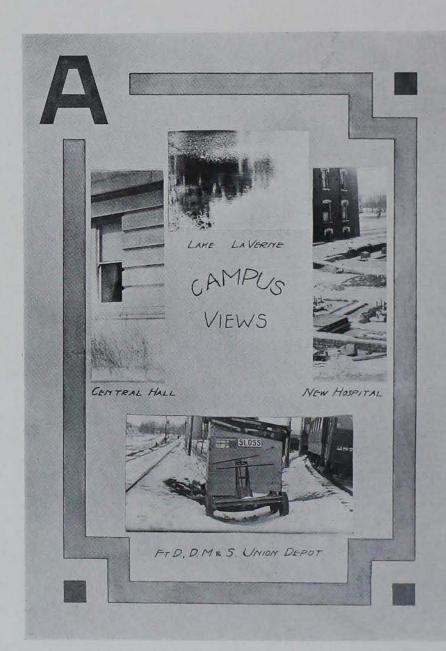

accommon solution for O

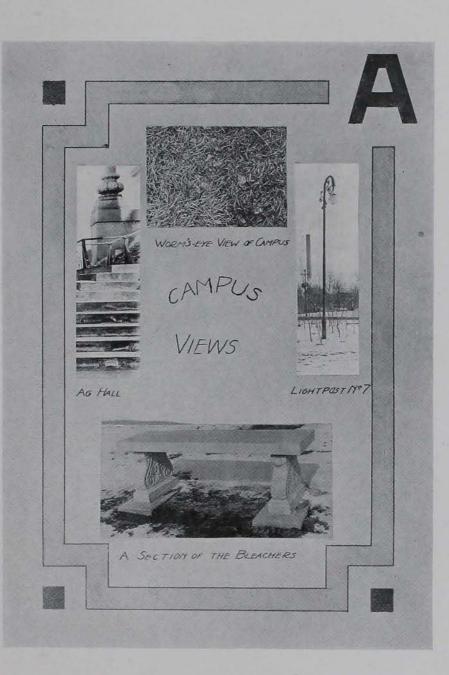

Dedication

Each year it is customary to round out the year book with a roast section. It is just as customary that we editors of the section get a hurricane of cusses from our victims who think that we are giving vent to time-worn grudges. So if we have said anything to hurt your feelings, don't establish a precedent by telling us that you enjoyed the joke, but honor the tradition and don't speak to us again.

This section is not guaranteed to be funny. In fact we spent the saddest moments of our lives trying to make it funny. We couldn't roast everyone. We could only record the events that came to our particular notice. We realize that this section has a great many faults, so remember, if you criticize it, you are not pulling anything original.

To you narrow-minded victims, who will laugh fiendishly when the other fellow is prodded and will gnash your teeth when your own sacred name is mentioned, we reverently dedicate this trash.

WHAT WE DON'T KNOW NEVER HAPPENED

We know

Who the Adelante was who smoked a cigar last semester.

The time when Don Bryant had a date in October.

All about the girls' new smoking rules. We do too.

A faculty man who believes that the Central office wants to make this a prep school.

The day last fall when there were enough seats in the library to go round. The dickens we don't.

The time Geo. Fisher passed a Phys. exam.

Who was toastmaster at the Quo Vadis banquet.

The day a Pi Phi and a Tri Delt were seen talking together.

The day Esmond Brandt didn't hang around Central. He was sick in the hospital.

The name of the person who cuts across the campus.

That Supt. Sloss knows the same person by several other names.

That there is a bench on the campus that hasn't a light above it.

A NEW DEPARTMENT CREATED

We are advised by the Faculty Committee in charge of the College Catalogue for the year 1917-1918 that they have decided to create a new department of Campustry. It well comprise various courses in Fussing to be taught by the most efficient and experienced instructors. There has long been a crying need for such instruction and this has been recognized by the Faculty in the founding of this department. The Dean of this department has not been officially chosen as yet but several men are being considered for the position, among them being Prof. Herzog of the Modern Languages Department and Dr. Ross L. Bancroft of the Department of Soils.

Below is given a synopsis of the different courses.

CAMPUS 1

BEGINNING FUSSING

Consists of walking on the campus and taking in the All College dances. Two picnics are given every month in North Woods. Fee \$3.50 and class dues. Course given for Freshmen only. Instructor A. Esmond Brandt.

CAMPUS 2

Sophomore year. Course is a continuation and variation of Campus 1. Includes Friday night dances. Three hours a week laboratory work in Central Rotunda also given. Fee \$17.20 Instructor, Jack Ashford.

CAMPUS 3

ADVANCED FUSSING

Prerequisites 1 and 2. Includes all athletic contests and Sunday evenings. Occasional research trips are taken to Des Moines. Library dates are had whenever possible. Seminar is given daily from 4 to 6 P. M. Fee, \$46.50. Instructor, L. P. Krebs.

CAMPUS 4

EXPERT FUSSING

Prerequisites 1, 2 and 3. Is a review of these courses to some extent. Dates each week-end night and hourly from class to class. Exchange of Christmas presents is practiced. Special attention is paid to telephone conversation. Chapel on Sunday is likewise included. A thesis is required on the subject, "Cases I have had." Final work given during Commencement Week culminating in the announcing of an engagement. Fee \$91.00. Professor, Eugene R, Scroggie.

There was a young feller named Bill, Who that he the Gospel, should spill So he got him a singer, She sure was a dinger! And then he the people could thrill.

JUST SOME PHI SIGS

WHAT IS SO RARE AS A DAY IN JUNE.

(With Apologies to One of Our Contemporaries)

What is so rare as a day in June?
The poet has harped on his long harpoon,
But our answer comes bubbling forth eftsoon,
Its a dear Tri Delta that will not spoon,
Or an A T O sober by Sunday noon,
Or a Pi Phi chapter without a prune,
Or a check from Dad that came too soon,
Or a vet class dismissed a minute before noon,
Or the Reuben on time from here to Boone,
Or a ukelele that's not in tune,
Or a college car with too much room,
Or an editor's desk without a gaboon,
These, oh, poet, I'd like to croon,
Are a damsiterarer than a day in June.

Teddy the lumberjack, Teddy the singer, Teddy the ruffneck, He sure is a dinger.

Overheard in West Hall. Geneva Heath: "Oh I just love Green(e) things."

From the Trident of Delta Delta Delta for Jan. 1917.
"November 18 was Homecoming at Iowa State College and with our new house and our new girls we attracted a great deal of attention."

PHIN'S BLUNDER (AS TOLD TO US BY IKELER)

And behold, it came to pass that upon the seventh day in the evening, the second event of the Music Course was to occur. And lo—multitudes were to arrive from the east from Marshalltown and Nevada, from the west from Boone and even from the nethermost parts of the earth. And Phin Shearer looked upon the advertisements and was much pleased and, placing his hand in his pocket, spoke thus to himself, "This square card is my ticket, I will hence to the spacious gymnasium and hear the noble warbler."

And so Phin gathered unto himself another of the twelve disciples, (alias the Bachelor's Club) and went forth to the concert. And it came to pass that when he arrived at the hall he reached into the pocket of his raiment and produced the card and proceeded to enter.

But lo—the card was but a judgment placement card and Phin should have been cast into outer darkness for he had forgotten his ticket.

But the gatekeeper, seeing Phin, took pity on him, showed him great mercy and allowed him to take his bench with others of the vast multitude where he listened to the marvelous warbler from the far east.

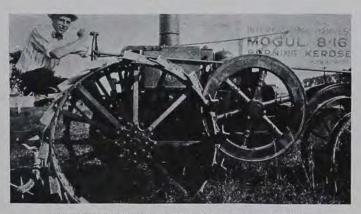

Grundman: "Awful accident over at the track last night."

Robertson: "That so? What was it?" Grundman: "Fellow broke his neck."

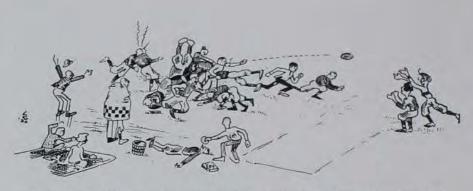

Robertson: "You don't say. How'd it happen?"
Grundman: "He was watching me go around."

She: Ouch! I've bitten my tongue."

He: "How I envy you."

THE BUSINESS MANAGER AND HIS ROADSTER

TELEGRAPHIC REPORTS OF THE DELTA TAU DELTA—THETA XI FOOTBALL GAME, NOVEMBER 21, 1916.

- 12:00 M.—Tau Delts serve bread and milk; Theta Xis pretzels and Budweiser.
- 3:00 P. M.—Betting 4 to 3 on the Tau Delts. Guards experience great difficulty in holding the crowd back.
 - 3:15-Rumored that Deffke not in condition to play-betting even.
- 3:20—Spec Collins with the rest of the fashion plates from the Phi Sig house enters through a hole in the fence.
 - 3:30—Great commotion at west end of field.
- 3:35—Cause of commotion discovered. Don Bryant brought his cigaret papers and tobacco.
- 3:45—Doty of Tau Delts protested by Theta Xis as ineligible,, having played three years on the Oelwein High School team. Protest referred to Faculty Rules Committee.
 - 3:50-Faculty bars Doty.
 - 3:53—Tau Delt team comes on field amidst funereal applause.
 - 3:55—Theta Xis, headed by Captain Boell, appear amidst thundering silence.
 - 3:58—Game delayed while Haugen is put out of the stand for selling peanuts.
 - 3:60—Tau Delt band marches around field, followed by 50 Phi Gam preps.
- 4:01—Considerable disturbance in Tri Delt section, one girl persisting in rooting for Tau Delts.
- 4:04—George Fisher and Max Ingwersen succeed in restoring order in Tri Delt crew.
 - 4:07-Trainer Pride of the Tau Delts arrives with field hospital apparatus.
- 4:10—Referee Dutch Steiner of Keeley Institute blows whistle. Tau Delts win toss and choose to kick off.
 - 4:101/2-Tuffy Wilkins kicks off to Staves who returns ball to 40 yard line.
- 4:11—Quarterback Yarn forward passes to Stan Reeves of the Tau Delts who gains 30 yards.

- 4:12—Scroggie makes one yard off tackle. Much enthusiasm manifested in Pi Phi section of bleachers.
- 4:13—Doc Atkinson and import from Logan arrive. Game called while they take their seats in front box.
 - 4:15-Game resumed. Theta Xis check onslaught of Tau Delts.
- 4:20—Wilkins kicks field goal from 10 yard line, Howls of applause. Score Tau Delt 3 Theta Xi 0.
- 4:22—Excitement in north stand—lady faints in Gyp Le Prevost's arms. Dr. Murphy is called.
 - 4:23-Whiteman kicks off to Dowell who falls and breaks his glasses. No gain.
 - 4:31-Time taken out for Fletcher to comb his hair.
- 4:33 Fletcher resumes game. Neasham and Evans forced to retire on account of injuries.
 - 4:37-Time called for half. Score D. T. D. 3-T. Xi 0.
- 4:40—Second half begins. Whiteman kicks off to Ptak who races to the nearest goal line, giving the Theta Xis two points. Score D. T. D. 3—T. Xi 2.
 - 4:41-Ptak removed from game for bonehead.
- 4:42—Reeves calls Zimmerman an Irish Carp and is banished from the game by Umpire Esmond Brandt of I. S. C. (International School of Correspondence.)
 - 4:44—Ball oscillates between two teams, neither team being willing to hold it.
- 4:45—Fullback Oscar Boell of Theta Xis freezes onto ball and makes brilliant dash down field for touchdown. Phi Psis swarm onto field and endeavor to pledge Boell, L. R. Ender wires Walter Camp to nominate Boell for All-American.
 - 4:46-Touchdown not allowed, Staves having been offside on the play.
 - 4:48—Fletcher retires from game with broken shoestring.
- 4:49—Time called while Boell receives floral tribute from dairymen. Tau Delts now have but six men in the game.
 - 4:53—Carmony tries field goal—Misses by 45 yards.
- 4:57½—Referee Steiner calls game on account of darkness and, accompanied by Head Linesman Rehmann and Timekeeper Rice, adjourns to Theta Xi cellar in search of refreshments.

CUPE FORD'S DREAM (After a Welsh Rarebit Dinner)

Ames won the toss and defended the South goal. Nebraska kicked off and Jones received the ball just back of third base. He dropkicked it to Aldrich who dribbled down the field and threw a basket on the ten yard line. Sloss called Paige around left end and he seized the ball and ran through Central building past the Postoffice and highjumped over the Engineering building. Hawthorn was sent in to pitch and from this time on Ames was never headed. Bragdon heaved a long pass to Wilkins who vaulted twelve feet and the whole cross-country team finished ahead of the Iowa gang. Packer received a forward pass as he leaped the last hurdle and his receiving was a feature of the contest. Merriam won the half in easy fashion, falling on the ball for a safety in the first period. Dick Williams' punting in this game stamps him as one of the greatest running guards that Ames has ever had. The game was clean although Aldrich was called several times for holding, probably from force of habit. Denfield was penalized for hitting a Kansas man with a loaf of rye bread who called him Gilbart. The game was delayed several minutes while Jock Sloss read a letter from Keokuk.

ZZZZZZZZZ (At this point Cupe turns over on his right side.)

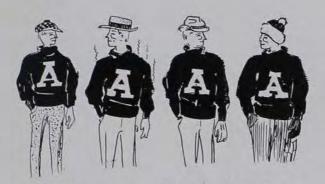

Some one told us to say something about Ted Ptak being a Bass viol creature. It is a pretty good joke only its a cello he annoys.

Hec Snyder: "Are you in love with some particular girl?"

Ed Allison (hoarsely): "Yes old man I am."

Hec: "Is she in love with you?"
Ed (tearfuly): "I think so."

"Then she can't be a particular girl."

ERNIE PEARSON AND HIS A SWEATER

A short time after Ernie Pearson received his A sweater a bad cold settled in his lungs. Of course he went to a doctor to see what could be done. The doctor gave him a thorough examination and told Ernie to wear a heavy sweater and to keep it on until he (the doctor) told him to take it off. Ernie went on his way rejoicing and put on his new A sweater.

A few days later the doctor died. This was several years ago and Ernie is still in doubt as to whether or not he should take off the sweater.

Prof. Gillette (when Dave Robertson tries to open a window during A H 60 lecture): "Go to it, I'm for you. The air is getting bad in here."

Did you ever stop to consider how absence makes the marks grow rounder?

DOC CESSNA BEFORE CHAPEL

AS THE DES MOINES REGISTER (IOWA'S GREATEST BLOT) SEES US

Iowa State College is located in Ames, just outside of the state of Iowa. It does not belong to the state of Iowa. Drake and Iowa University are the only schools that belong to the state. When Ames wins a game it is a strange accident. The other team didn't have a full team and had to use three members of the old soldiers home. By rights every time Ames wins a game it should be played over with a new referee and give the other team ten points to start with to cope with Ames luck. Ames cannot have bunch of good athletes because they are all big awkward farmers who don't know a football from a sprinkling can filled with Paris Green. They are all farmers because Agriculture is the only course taught there.

Besides the coaches at Ames are a bunch of poor sports who go around telling that their team is the best in the Missouri Valley. Every time Ames wins a game from State Teachers' College, school is dismissed for three weeks and the students get together and gloat and have bonfires and raise the coaches' salaries and then gloat some more.

Ames has no business monkeying with athletics. Her teams should be taken from her and divided between Drake and Iowa, because the student body at Ames is a bunch of hoodlums and don't give the visiting team a chance.

TWAS EVER THUS

Battle Creek Mich. Oct. 30, 1916

Mr. John Buxton Ames Iowa

As I no longer consider it a pleasure to wear your fraternity pin I am returning it to you today (American Express Collect)

Yours no more

Miss Lottie G. Battle Creek Sanatarium, Battle Creek, Mich.

HIS REPLY BY WESTERN UNION

Hold pin am writing full explanation. Special Delivery letter today.

Jno. Buxton.

Oh stay. Stay by my side. And the stay stayed. Cors-et did.

SAD SUNDAY MORNING

A MODERN PRAYER

Oh Lord, I implore Thee to bless all mankind, but the Physics department, Man's arch enemy—To Hell with them.

Dear Friend Fisher:

The above prayer has been received from my friend Don Bryant, who received it from Gil Denfeld, who received it from Dave Robertson, who received it from Ben Wells, who received it from Merriam McKenzie, who received it from Paul Boylan, who received it from a long line of friends.

It is stated that in ancient times that all who wrote it would be free from calamity and all who passed it by would meet with some great misforune.

It is to be copied and sent to nine of your friends and on the tenth day you will meet with some great joy.

Do not break the chain.

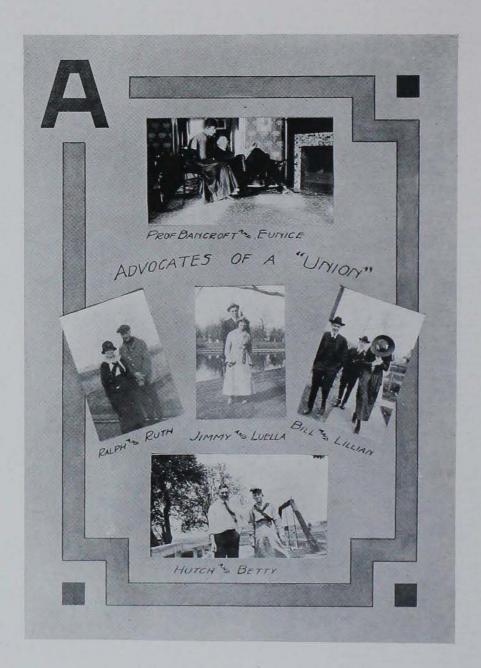

Yours very truly, Doc Atkinson

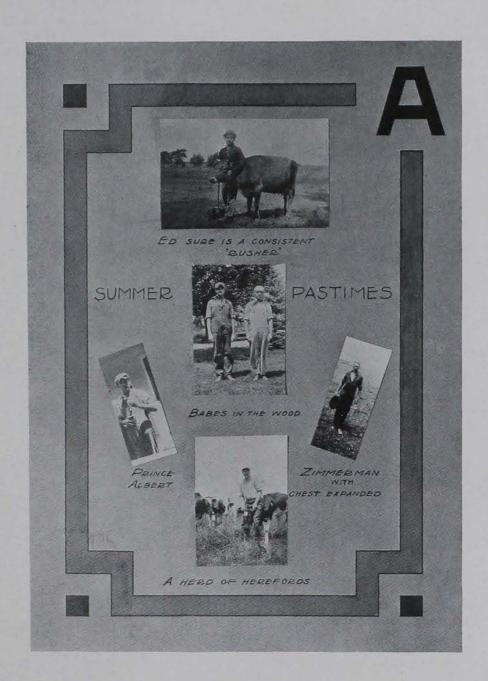

CASEY IKELER TOLD US THIS ONE

While travelling thorugh the South a few years ago Casey ran across an old colored gentleman who, from his looks appeared unusually jovial and happy. Casey inquired why everything seemed so bright to him on that particular morning. The old fellow replied that his reason was that it was the first of March.

"And why," asked Casey, "Has the first of March anything to do with your happy state of mind?"

"Because sah," answered the Negro, "Because I have always observed that when Ah lives until the first of March Ah genally lives the remainder of the yeah."

RESULT OF IOWA EXPERIMENT STATION PROJECTS

It has been found that under the same conditions oats will make better growth in rich sandy loam than on asphalt pavement.

Umbrellas may be raised in any part of Iowa.

That weeping willows will weep more if grown in an onion patch.

That coffee should never be planted until the ground has thawed out in the spring.

That more rain falls in some years than others because there is nothing to keep it from falling.

That bees will fatten readily on corn silage.

Prof. Anderson in his report to the Junior Dean's office states, "Stover is doing very good work in Physics, but I can't get him to hand any of it in."

Dr. Bergman in Vet. 22, "I'd like to cover the liver before the end of the semester."

Prof. Guthric-addressing class in Zoo 231 at 3 P. M.: "The discussion of this morning-"

Can you figure this out? If Lorraine were twins would Bill Merriam?

Spec Collins spent a few days in Marshalltown to have his eyes tested and then went to the Russian Ballet in Des Moines to have the job completed.

This is one on Prof. Harris. Before an orchestra concert he announced the following: "The gentlemen will kindly wear dark suits and the ladies, if you will, wear light dresses—I guess that will cover everything."

Prof. Eastman was having trouble deciphering a Soils quiz paper: "Oh, well, never mind, I can smell what it is."

Mac is here. And Cele is here.

Which seems so strange to me,

I've never yet seen them apart!

What can the matter be?

Fraternities

+3/

PHI SIGS

If you have a dress suit and will swear to dress forever as Fashion dictates, join this gang. Men have been known to come thousands of miles to become a member of this bunch, showing that they are looking for something easy. When they divide their average last semester by the number of members they had nothing left. You will be looked upon with favor by this crew if you own a racing car which can go at least 25 miles an hour down hill.

SIG ALPHS

You may wish to go Sig Alph. "In numbers there is strength." To find the number of Sig Alphs on the campus, divide the enrollment of the school by five and multiply by one-half. The chapter consists of three active members and hordes of inactive members. One of their leading lights is Harry D. Rice, alias Puff, who boasts of a personal acquaintance with the man who makes "Old Taylor." The watchword of Sig Alph is speed. Yes, Boy.

PHI DELTS

If you care to go Phi Delt, you are automatically pledged on entering school. Your social success will then be assured. Each semester the Phi Delts give a dance at which their badges are distributed for favors. The first thing learned in this frat is the path to the Sheldon-Munn Hotel. It is recorded that this fraternity was founded in the College Pesthouse by a group of buzzards who had the small-pox.

A. T. O.'s

If you are prejudiced against fraternities in general, join the A. T. O.'s. You will find nothing here to ever remind you of a fraternity. One glance at "Screeny" Bacon and you will wish you were in the trenches. They have, for many years, kept the purpose of their existence secret but it is a significant fact that most of the chapter attended the I. W. W. convention last fall. This crew has a particular weakness for Kappa Delts.

BETAS

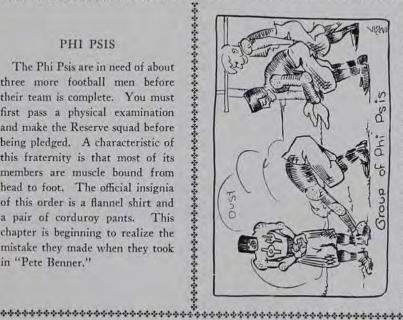

The national aim of the Betas is to overwhelm the Kappa Sigs in total number of chapters. So far as is known the chapter on the campus here has no aim. If you go to their house they will probably sing songs to you about their pin which is a delicate little affair about the size of an oven door. They gave a dance once but gave up in despair and didn't try it again for a year. The fraternity includes a number of hereditary offices, among them being Athletic Reporter on the Student.

DELTA TAUS

This society is said to have been founded by Peter the Hermit during a fit of dissatisfaction after the First Crusade. Their sole desire is to have their house filled with track men. The society maintains a home for the friendless here in Ames and eight to ten inmates are taken in annually. The Delta Taus point with pride to the great men on their roster, among them being Jesse James, Montgomery Ward and Dr. Jekyll and Mr. Hyde. Among their collection of curiosities at this institution are included Gleen H. Deffke, the college dwarf and James W. Doty, the pianist with the Clydesdale action.

PHI PSIS

The Phi Psis are in need of about three more football men before their team is complete. You must first pass a physical examination and make the Reserve squad before being pledged. A characteristic of this fraternity is that most of its members are muscle bound from head to foot. The official insignia of this order is a flannel shirt and a pair of cordurov pants. chapter is beginning to realize the mistake they made when they took in "Pete Benner."

PI KAPS

This gang is the forerunner of the American Veterinary Society and at present are considering steps toward making their organization national. It is well to warn you that the members of this club have a mania for getting engaged to be married and 13 of their number are in that unhappy condition now. This is perhaps desirable, in a way, as most of them never seem to be engaged in anything else. chapter was not materially improved by taking in Ted Rehmann but that is their affair and they doubtless have their reasons.

DELTA U's

The D. U.'s will probably annoy you to some extent. If you succumb to their advances and go into their house they will no doubt tell you about one of their number who has recently returned from a foreign land and who can speak three languages, Spanish, English and Davenport Dutch. They will also tell you of their long list of Faculty members, some of whom, by the way, believe that fraternities are a curse. Another thing you will note in connection with this fraternity is its vellow and white cur dog, whose record for getting in people's way and for terrorizing old ladies and children is as yet unparalleled. Among their members is included Paul Critz, one of the big men of the college.

A. G. R.'s

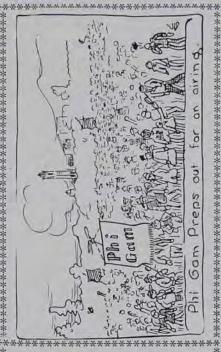

If your father owns a silo and at least 160 acres of land of which 20 are in alfalfa you are eligible to Alpha Gamma Rho. Their motto is: "Better Agriculture." Their national convention was held here this winter and both chapters sent delegates. A formal dance was held in connection with the convention and rope halters were given as favors. All A. G. R.'s ultimately become members of Alpha Zeta.

ACACIAS

If you have taken the third degree and are over 21 years of age you are eligible to this crew. You must also be able to lay brick for we understand that none but Masons are admitted into the membership of Acacia. Seeing that they named their organization after a tree we infer that the chapter contains quite a bunch of wooden ones. For further information see the Forestry department.

SIGMA NUS

The Sigma Nu movement is similar to the Swat-the-Fly movement, that is, it is nation-wide. Sigma Nu pins are as numerous as Red Cross stamps at Christmas time. The origin of this movement is somewhat uncertain, although it is thought to have been at a fudgemaking party at Lake Forest Seminary, way back in 1842. The Iowa State branch of Sigma Nu is not given to boasting to any great extent, and, after visiting their house once, the reason will be very apparent. Among its local members are Prince Albert Warner and Walt Henderson, both of whom are great men in their respective spheres.

THETA XIS

If your ambition is to become hard boiled and to go on a "Jas" party at least once in your life, join this herd by all means. They are a set of ruthless wretches and stop at nothing. It is averred on good authority that they even encourage their Freshmen to smoke. If this is true there is no telling to what lengths their depravity would go. They have some pretty good fellows, however. For instance, there is Oscar Boell, who is such a good sport that we decided to say nothing about him whatsoever.

PHI GAMS

Among the first things an incoming Freshman hears about is the new Phi Gam house. It has all the modern conveniences and next to Alumni Hall is the most desirable place to room on the campus. So if you care to join, pledge pins may be secured at the Registrar's office. Their policy is for rapid and extensive expansion and they have recently adopted for their motto: "Every Ford owner a Phi Gam." Aside from their house, this fraternity is noted for the fact that among its multitudes is to be found "Bill" Rist, who lives in Marshalltown and whose ambition is to be as "hard" as possible.

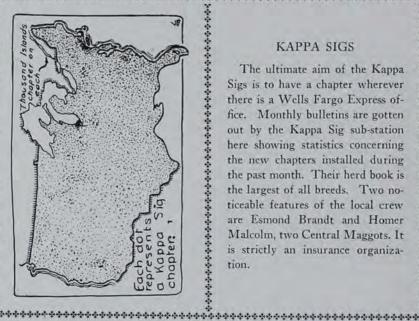

ADVERTISEMENTS **************************

T. K. E.'s

These men are very well known -to each other and are among the prominent inmates of the campus. They are strong for the idea of fussing, but seem to confine themselves to the theory rather than the practice. We have not, as yet, been able to find any good and sufficient reason for the existence of this sect. The scientists of the Experiment Station are spending considerable time at present in investigating the problem. However, "There's a reason," as Guy Bates Post said when he began the manufacture of Peruna.

SIGMA PHI EPS

This is sort of a supplement to the College Museum as there are all sorts of specimens to be found within the portals of their fine new house on Welch avenue. The Dean's office was compelled to hire an extra clerk to help classify them all in the proper species. They achieved more or less notoriety last semester by having their social privileges taken away from them along with two or three other bunches who should have known better. One of the members of this association is Charlie Wap who has the last word in mustaches.

KAPPA SIGS

The ultimate aim of the Kappa Sigs is to have a chapter wherever there is a Wells Fargo Express office. Monthly bulletins are gotten out by the Kappa Sig sub-station here showing statistics concerning the new chapters installed during the past month. Their herd book is the largest of all breeds. Two noticeable features of the local crew are Esmond Brandt and Homer Malcolm, two Central Maggots. It is strictly an insurance organization.

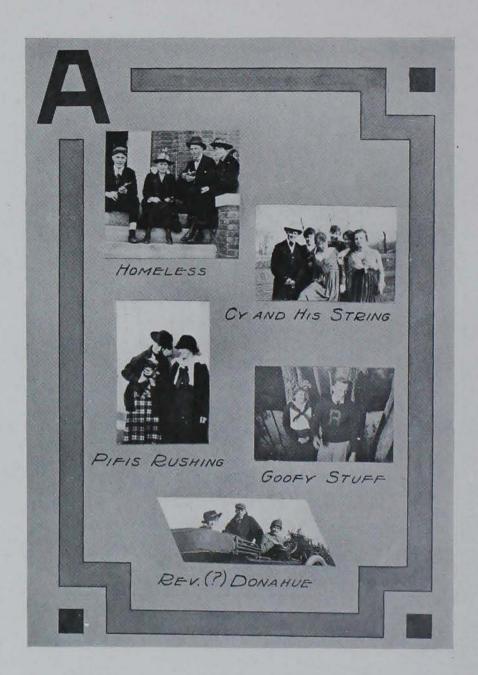

SIGMA CHIS

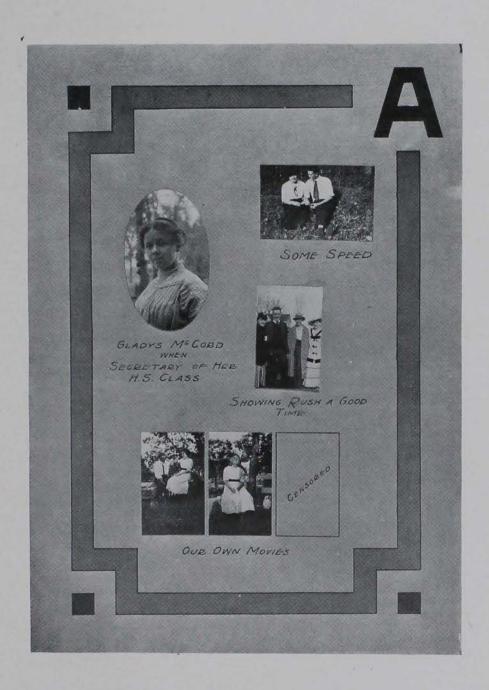

When we came to this bunch we lacked for words to express ourselves. So we went to Prof. De Board, the well known Bacteriologist and this is what he gave us—
This is the latest organism to be isolated. It grows in clusters and is characterized by short thick skulls. Is very immotile and does well on sucrose, i. e., Baby Food.
Came upon us without warning and has gotten quite a foothold in East Hall. The only remedy is to be careful and avoid all contact with the organism.

PICTURE OF QUO VADIS

Among the more important events of the school year was the appearance of Green Gander on March 31st. How flattered we would be if this book should get such a reception as was accorded the Gander. Never before were the campus people so shocked and never before were so many copies sold. The good people of the community were so shocked that the whole available supply was bought up by these people in order to get them out of circulation. The Gander was not allowed to go through the mails because no asbestos mail bags could be secured.

Among those severely shocked was Prof. R. A. Anderson, our only faculty member who writes for Snappy Stories and the Parisienne. His pale cheeks were tinged red from burning shame and his wrist watch stopped going. He was not harsh. On the contrary he was sad. It was he who pointed out the irregularities of the book to the less learned along such lines. It was to be expected that some member of the faculty should rise up in indignation, but when Prof. Anderson took up the onslaught as the champion of righteousness it reminded us of that old one about the pot calling the kettle black.

A TRIP THROUGH THE SLUMS

Gentle Reader:

Imagine yourself to be stepping from the lobby of the Sheldon-Munn Hotel in the metropolis of Ames, bound for an inspection trip through the engineering college of Ames University. After crowding on a street car along with a hundred and fortynine other sufferers and having been stepped on by at least a hundred of them you will finally arrive at what is called Central Station—so-called because it is half way between Kelley and Story City.

The large gray stone building to the southwest is Engineering Hall. Oh no, it isn't on fire. The haze which seems to envelop it is probably caused by the antismoker's club or an oration of Kirkham's. You say you think you've heard of Kirkham? Surely you have. He is Mexico's greatest athlete. Not content with writing a couple of books and innumerable magazine articles (never printed) he designed and constructed the Theta Xi house. The gentleman with him in his office is not an agent for Canthrox Shampoo. He is Mr. Myers, Kirk's assistant, who by his wonderful mastery of the slide rule was able to determine the secondary stresses to which limburger cheese is subjected.

The old gentleman with the walrus whiskers across the hall? Not so loud. That is the dean of engineering. Yes, he has a son, but he is just as ashamed of it as we are.

Down the hall to the right we have Sammy Byers' office. Sammy has the privilege of torturing the senior civils two hours a week in geology. His lectures are so dry that the class room is used as a dessicator for soaks. He is ably assisted by Prof. Galpin, another prohibitionist, on whom Moses had nothing when he dried up the Red Sea. Sammy is quite a hunter. The only bird he ever

killed was a squirrel, and it fell into the creek and was drowned.

The room just south of the dean's office is not a Siamese temple. It is occupied by Agg and Nichols and at present they are trying to suffocate the Dean's three wild canaries by the use of a couple of El Toro stink sticks. "Nick" tells the boys how to harden soft water, and why the dog shouldn't stray too close to the pump. Agg's job seems to be attending road conventions and smokers.

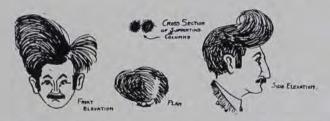

On the fourth floor we have a queer assortment of specimens headed by Allan Fred Kimball. Yes, that is Allan over there by

the statue of Purity. Isn't he cute? You know his ambition when he first arrived here was to be a brave, bold, fearless fireman, but he found the place so dry that a fire couldn't be put out if it got started. So he has given his time to designing prep uniforms and the all-college dance programs. Some class to his earrings—bought at Woolworth's, Main Street, Ames.

The party at the other end of the cage with the hard boiled face is John Hug, and he does too. He used to be steward for the squirrels' club, but on account of the scarcity of nuts he lost his job and now demonstrates John Sawin's perpetual motion machine.

With Johnny Walker's assistant we will enter Dante's Inferno of the present day. The chief bluffer of this ancient and highly disrespected order is Dr. (?) Douglas. That is Douglas by the gas tank inhaling ions. He's always up and atom. Wait till he pushes the brush from his serene and blank countenance, and you will have a fine picture of "Rooms to Let." The little short gentleman in the corner with the almost human look is Mr. Pomeroy. The report that he is a model for Pebecco Tooth Paste is absolutely without foundation. He was smuggled down here with a flock of sheep

from Canada, in 1892, the year the barbers struck. He doesn't know yet the strike is over. The yellow haired party sweeping flies off the ceiling is Mr. Thompson. He was originally hired for a sign post but on account of the weak constitutions of some of the students, the public health committee thought it best to place him in the Physics Department as another curiosity. Good grades in this department are as common as men in the girl's swimming pool.

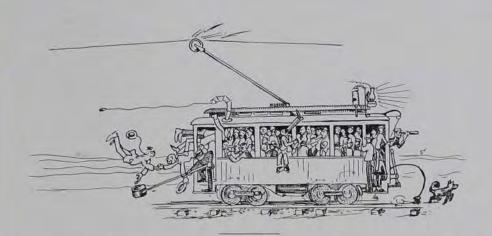

At the other end of the hall Velma Griffith with Prof. Meeker's aid runs the Mechanical Engineering Department. Meeker's department makes Fords, washing machines and mechanical engineers and is the only department that has a Heron. The members of the force under Meeker are too numerous and too insignificant to mention. The little wart over behind the waste basket is Prof. Major, instructor in Mechanics. He's about as popular as an evangelist at the Phi Psi house. That other man is Prof. Craug who is singing "Wash Me and I Shall Be Whiter Than Snow." His office is just across the hall from Meeker's. He is an Illinois man and after Billy Sunday's revival he was given his choice of cleaning up or leaving the state. He has been here ever since. His partner is Mr. Hummel who furnishes the gas for the Gas Engine Lab. He is quite often pointed out as an example of the results of too much food at the Hyland Beanery.

The building just west of Engineering Hall, is called the Annex and is the home of the Electrical Engineering, Surveying and Pottery Departments. That is Ford's office up over the door. Ford, an ardent admirer of Theda Bara, Valeska Suratt and other vampires and the inventor of Kelley Pool, has never been caught working, so there's no use stopping at his office. The only time when he can be found is when the female contingent of the Math Dept. is taking surveying. The short gentleman who is on his knees looking through the transit is Mr. Hopkins. He has offered his services to the Government to serve as a periscope on a submarine. With a few quarts of red lemonade inside of him he can hardly be distinguished from a thermometer.

That lisping lullaby tune you hear emanating from the southeast end of the building is either the ventilator or else it is Gladys Kenley reading Shakespeare to Edgar Allan Fish. Gladys in war? Never! Those aren't iron crosses she wears, those are fraternity pins. Somebody raised Kane and gave Fish a Paine and he put both of them in the same room because you'd have to look twice to see either one of them. If Prexy wasn't so dead and his spies weren't so busy watching fussers in Morrill Hall they would have found out long ago that Paine is a Revolutionist and is the personification of the spirit of St. Patrick.

No, I don't think he is hatching any new plans. That unearthly noise you hear just below is Prof. Staley trying out a new batch of cuss words he bought of Fred Hansen.

Prof. Guthrie: "Mr. Packer, will you trace the blood from this point until it reaches the allantoic circulation."

Packer: "I don't believe I can do that."

Prof. G.: "Nutty."

Packer: "I guess I am all right, but really, I didn't have time to study it."

Voice: "Hello, is this Xela?"

Xela C.: "Yes, this is she."

Voice: "This is Leonard."

Xela: "Oh yes-er-which one?"

Grace Gibson: "I understand that there were a hundred blue cards sent out this semester."

Fisher: "I wonder who got the other three,"

According to one of the most promising Freshman, Silicon is found in two forms, the crystalline and cobalt.

Every time a Prof. sneezes "Gyp" LeProvost answers, present.

Clipping from the Chicago Tribune for Dec. 3, 1916.

A peculiar accident befell Prof. W. H. Pew, head of the Animal Husbandry department at Ames University, while on his way en route from Ames to Chicago, where he is attending the International Livestock Show.

When he climbed into his berth on the sleeper, he left his traveling bag and a pair of shoes in the aisle. When he awakened the next morning he was surpirsed to find that the porter had shined the traveling bag and one of his shoes.

Doc Tilden: "Here young man take one of these each hour as long as you last."

Oscar Boell arrives somewhat late at his 11 o'clock class. "It is a fine morning," suggests Oscar. "Yes," replied the Professor. "It was."

Overheard in West Hall: "Why I didn't know the A. G. R.s were two year Ags."

"Everybody around here says that I have a big head. What do you think about it?"
"To tell you the truth I really don't think there is anything in it myself."

He (returning from the punch bowl): "Shall we sit this out?"

She (sniffing): "No. Let's walk it off."

—Cornell Widow.

She: "What were you doing after the accident?"

He: "Scraping up an acquaintance."

The only thing which has an original cost but no upkeep is a funeral.—The Siren.

-Cornell Widow.

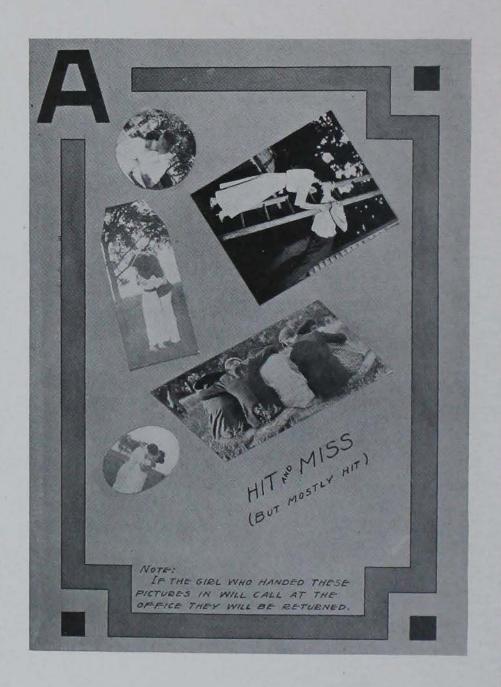

Freshman: "What is Pi Kappa Alpha?"

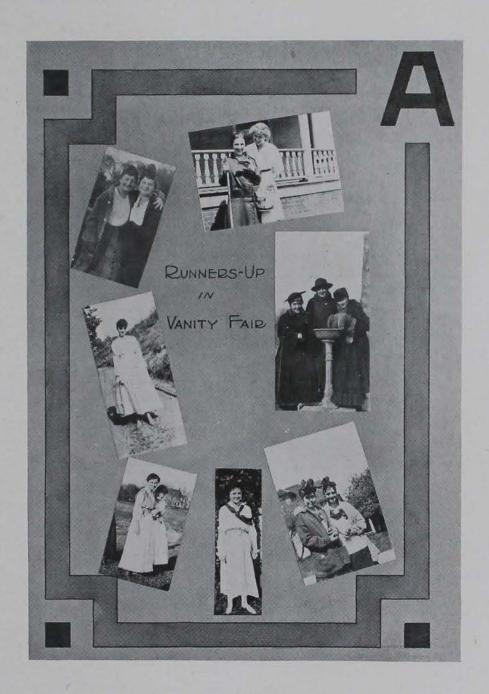

Senior: "That, my son, is the national Veterinary Fraternity."

Chaperone: "Who was in the parlor just now?"

Marie: "Why, that was Bernice."

Chaperone: "Well, will you please tell Bernice that she left her pipe here on the piano."

In response to the popularity which is enjoyed by the dancing habit at this institution has come the installation of a chapter of that well known organization the National Federation of Ballroom Stags. There are certain essentials which aspirants to this order must possess. Among these are a dress suit, and the various accessories that go with it, a good pair of feet and an inexhaustible "line." The organization was founded in the East and has rapidly spread westward. Its members are most zealous in furthering their noble purpose of rendering dances more enjoyable and attractive. So well is the Federation organized that an order of almost any size may be filled on 24 hours notice. "The dansants" and sorority formals are specialties with this organization and they receive especial consideration.

THE NATIONAL FEDERATION OF BALLROOM STAGS

In connection with their work the Stags have a code. It is as follows. One finger into the air means "I have one more with this one." Two fingers extended behind the fair partner's back means, "You may have the second one after this." Three fingers says, "Good for about three, no more." Four fingers means, "I have one spotted." Five fingers extended and waved frantically tells, "In distress send help at once."

The charter members in the local branch are listed.

Prof. Cameron in Forge: "Young man, your iron is burning." The Freshman retorts: "I don't smell it."

1918

Food for Thought

This page has no business in a section that is headed Jabs and Prods. It is as close to a roast as Alaska is to Brazil. We are taking this space to say what a good many loyal Ames men think. The coaches wouldn't care to have us say this. Each of our athletic mentors hates alivis. That's why they are the greatest group of coaches and sportsmen in the world.

A few years ago the students tired of the monotony of defeat at the hands of inferior schools rose up and cried for coaches worthy of our athletes, coaches who could take the valuable material on hand and reinstate Ames to her athletic prestige of former days. The request was granted. The have the coaches. And since the new coaches came they have had no bed of roses. Morking against sickness, poor scholarship, and the failure of men to return to school, never once, if there is the slightest element of luck in the game, has that luck broken their way. Who among us who witnessed the struggle November 18, or again, February 27, would take our opponent's team in preference to ours as the superior.

And so, the cry is no longer for coaches worthy of our athletes, but athletes worthy of our coaches. Whe, who think that we want good athletics, must see to it, that athletes worthy of our coaches come here instead of going outside of the state. We owe it to these coaches and to ourselves to bring that day nearer when other schools shall look up to us and we shall come into our own.

THE PAN-HELLENIC SMOKER

The doors of the Sheldon-Munn Ballroom were flung open and there stood Puff Rice, a genial smile on his face, arms outstretched; ready to welcome the fraternity men of Iowa State College to the annual Pan-Hellenic Smoker. Puff was the exact replica of "Ye old Englishe Host." His smile was expansive and alluring; the sufficient proportions of his body, lent a touch of comfort and hospitality.

To the left of the entrance was placed a long table, on which, cigars, tailor mades and Bull, with papers, for the rougher brothers, were piled in abundant quantity. At the far end of the hall an orchestra played soft subtle music.

Ted Ptak stood behind the cigar counter to protect the "smokes" from the ravishing appetites of such degenerates as: Short Russell and Lorey Brewer—a case of one criminal being pitted against another.

The evening began rather slowly; it took the brothers about half an hour to get up steam. As soon as the place was enveloped in a dense cloud of Turkish smoke the several "lines" were going in full blast.

Max Bacon and Glen Stern, two gentlemen who roll their own, sauntered in and enlivened the assembled multitude with their respective opinions, on the comparative value of silk vs. Crepe de Chene for feminine war.

The Phi Sig's wisely detailed Gyp LeProvost to look to the house supply of smokes for the ensuing year. Gyp wore a hunting coat and cleverly concealed several cartons of Fatimas—the Phi Sig preference—in the folds of his garments. LeProvost a wharf rat from Clinton can not be beat at the gentle art of give and take—mostly take.

Axel Grundman trying to be a good fellow, lit a ten center—five minutes later the Committee on Sanitation found him in the alley leaning against a telephone pole. Grundman is a rather good fellow, but he doesn't have a chance—perhaps if he would leave Short Russell alone—but who can tell.

Bert Brown, Grand Keeper of The Limitless Appetite from the Tau Delt house played chimney—like Vesuvius he is smoldering still.

Don McGee strolled in to the room about nine fifteen, rolling a pill with one hand,

a la William Hart, as he came. He took one look at the table full of tailor mades and immediately discarded his original.

Oscar Boell and Ted Raymond stood off in one corner immensely enjoying the change from Pittsburgh stogies. They smoked and inhaled the precious atmosphere. "Just like home, eh," Ted observed.

"Uh huh," his aesthetic companion answered.

When the smoke was as dense—as—well as some members of the faculty and the conversation was so animated as to fill the room with the monotonous—buzz—buzz of a saw mill—Coach C. W. Mayser mounted the rostrum.

It was not so much what the coach said as the manner in which he said it, that attracted his hearers to him. If you enjoy a sunrise, step around when Mayser is happy and watch him smile—that man could laugh his way through a brick wall; there is fight mixed up in that expression of general well being; but there is pleasantness too.

While the Coach was talking the room was quiet, flatteringly quiet; everything was still save the swash—swash—of the smoke as it beat against the walls. Now and then the heavy snoring of Ed Allison could be heard as he slept—and dreamed—and smoked.

The International Convention of T. O. C. was held in one of the rooms adjoining the dance hall. Prof. Eastman of the Soils Department, being of Swedish birth represented the foreign element—the German Policy of Ruthless Destruction making it impossible for the other three representatives to attend.

The Honorable Order of Yellow Dogs also held a meeting. The dogs growled, barked and ate meat. The meeting was called in order to discuss the matter of initiating dogs with screw tails—those of the pointer and setter types were becoming jealous—and declared themselves as being against these new fangled fashions—nothing definitely decided upon.

There were other meetings, Flees, Beetles and other vermin too minute to mention. Cupe Ford, one of the prominent Yellow Dogs, strolled out of the executive session smoking as usual. Cupe was sure there and he sure smoked much more—than he would have smoked if he hadn't have been there.

The attendants carried Tommy Smith out on a stretcher and Ed Allison slept peacefully on.

Bill Donahue arrived at about nine thirty; as there were no ladies present he departed, after filling his gunny sack with cigarettes.

A few minutes before ten o'clock a light luncheon was served; light because it did not take much muscle to hold one's portion. Bert Brown got started on the ice cream cones; fortunately John Evans had the halter with him and took Brown home. Rice cried for help when he saw Deffke approaching. Vic Peters, commonly known as "Pogie" Peters, lived up to his reputation and received the degree of Incomparable Eater. The D. U. men were very proud of their champion and paid his way home on the street car.

While the civilized brothers were eating, Rice, rubbing his hands together, slapping the men on the back and smiling after the manner of a minature Wallingford, asked; "Havin' a good time—some Smoker—eh?"

He got by with it too—something about that "Kaintucky" enthusiasm that goes without Iubrication.

As the dishes were set aside the men gathered in small groups: John Buchanan, Puff Rice, Ed Allison (now awake) Ted Rehmann in one corner. Bugs Summers, Doc. Atkinson, Axel Grundman, Ben Wells in another corner. Shorty Russell, Larry Brewer, Si Otstot, Don McGee, in still another corner. What they were talking about will ever remain a secret because the little bird was mortified and vowed never to tell—nevertheless something funny was going on, for the several groups laughed and slapped each other on the knees and shoulders. Finally being unable to withstand the competition—as is so often the case with small dealers—the several groups drew forth and formed a large circle. The other men in the room leaned over the backs of chairs and strained their necks and ears to hear what was going on.

It was a beautiful sight—provided you wore a gas helmet and were protected by a siren for sounding your exact position. The fog was so thick that one could easily become lost, if one did not sound for bearings at short intervals—one kind of a fog in which a compass would be of no value.

The last car leaves for the campus at eleven o'clock, in order that the brothers might make this car the party came to an abrupt and hasty end. At five minutes after eleven the hall was dark—and quiet—save for the audible snoring of Ed Allison, who was swept out with the cigarette stubs—next morning.

1918

THE PARTY DRESS

The party dress is a dainty little thing which hangs from the shoulders and doesn't reach the feet. Exclusive of flesh, is usually tests out about 39 per cent. skirt, 13 per cent. waist line and 8 per cent. shoulder strap. That part of the anatomy not protected by party dress is covered with silk hose, talcum powder, smiles and nerve. A sprig or two of chiffon or a lace scarf is sometimes used to relieve the smiles and the nerve.

Silk net, laces, crepe de Chine, nothing and next to nothing are promiscuously employed in the assembling of party dresses. Any color will do, because the color, like everything else about the dress, is immaterial. Party dresses may be tucked, plaited, shirred, embroidered, roped, hooked, or pinned; or left entirely to their own devices. Everything gross and material must be omitted from their make-up, for they are by nature sensitive, idealistic and hopelessly temperamental.

The party dress of real tone is never put on—entirely. It always attaches itself to some part of the body in a roguish, carefree fashion, poised as if to leap lightly to the polished floor in a crumpled, insignificant mass. But it is only fooling. Should it leap, nobody would give any heed, and its inutility would eventually be established. The party dress knows what it is about, as well as everybody else does.—Life.

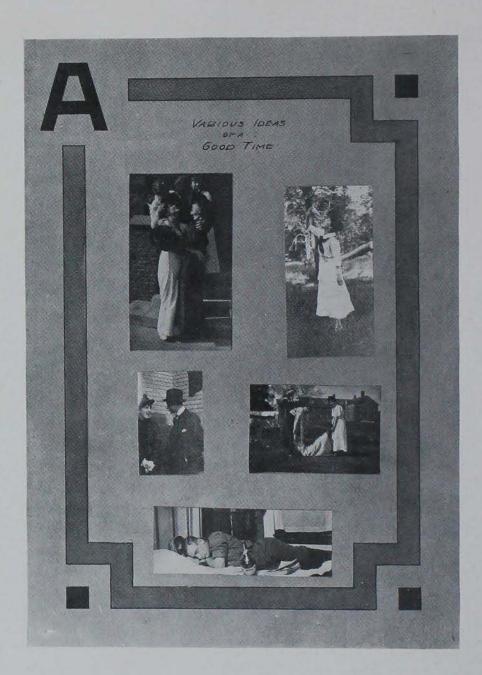

MERMAIDS

The young hopeful of the family had completed his first year at the Agricultural College and had returned home for the summer vacation. His father set him to work but seemed to be dissatisfied with the results which materialized. He gave utterance to his opinions.

"Say, my son," he began, "What good are you anyhow?"

"What good am I?" rejoined the younger generation, "Why I'm a consumer. Do you know what a consumer is? Why say, do you know that if it wasn't for the consumers the farmers couldn't exist? Do you know that—"

Whereupon the old man went out to the barn and proceeded to thresh the wheat within an inch of its life.

191B

THE FILOSOFY OF NAMES

Ye ancient filosofers, Mose Harrison, Roscoe Packer and Clarence Jones, did hold discourse in, Her Majesty's Audience Chamber, Aprile—16—1506. These same filosofers, being in good repute, gained attention of the Good Queen Elizabeth. When they had finished their debate the Good Queen ordered Ye Court Scribe, Si Grant, to mark and make note of what the learned meta-fisicians hade saide. The following is the substance of the lectures in as much detail as the meager comprehension of the afore mentioned Court Scribe permitted.

"Your majesty", saide Roscoe Packer, "We have agreed upon all things, with but one exception. We have reduced all learning to the apparently simple text of names. With your kind permission we will continue the discussion."

"Proceed," said the Queen, "And praye do notte mind me if I snore."

"Certainly notte", saide Packer.

"Names," continued Packer, "are of fundamental importance because they are the keys to further knowledge. I say horse—and it is by the name that I know the horse from the cow—notte from the state of material matter that makes up the horse or the cow."

"True, Brother Packer", spoke up Mose Harrison, "but here we have the name Beanblosom; that would suggest to you the blossom of a bean; but we have a man, W. F. Beanblossom registered at Iowa State College. Now this man differentiates himself from the vegetable of the same name by the use of two letters, W and E. Is he in truthe a vegetable—if notte would he be a vegetable if it were notte for the letters, W and E?"

"Your reasoning is deep and well founded, Brother Harrison", saide Jones. "The only way for Packer to do now would be to plant this man and see whether or notte he woulde grow."

"In the spelling of names, Brother Packer; here we have the man—no dispute that he is a man for he can drink his six quarts of butter milk and cry for more—his name is Oscar Boell; now the last name is pronounced as if it were bell and spelled to be pronounced, bowl. According to me there is a proof of a desire, on the part of some one of that family to depart from the commonplace. Perhaps far back in the history of the line they were aristocrats, though you would never guess it now. What do you think of this peculiarity that confronts us?"

"I think" saide Packer, whereupon the G. Q. jumped up in her seat and stared with w. o. m. "That the man Oscar Boell is a bowl that rings like a cracked bell".

"What saye you to that, Brother Jones?", asked Mose Harrison of the furniture model.

"Methinks, Brother Harrison, that Brother Packer has been influenced by some of our second rate thinkers such as Berkely or Hume", answered the F. M.

"Notte so, I am nothing if notte original."

"Brother Jones says that you are not original," smiled Harrison.

"Therefore?", inquired Packer menacingly.

"Nothing," supplied Jones.

"Oh well, nothing cannot be something and as the greatest things come from nothing—I am satisfied," mused Packer after the manner of the true filosofer that he did show himself to be.

"Tell me, Brother Packer", asked Mose Harrison. "What is C. L. Blackman?"

"He is a negro, Brother Harrison."

"Why?"

"Because a negro is a black man therefore a black man is a negro".

"But, couldn't a white man be a Blackman?"

"Not without the fourth dimension."

"To me," announced Jones coming out of his lethargy, "The saddest case of a misnamed man is the one of Jimmy Holland, called J. H. by the boys; Handsome Jim, by the ladies. A man named Holland should in some degree resemble a Hollander."

"Does he notte?" asked Packer.

"Notte at all, quite the contrary; a Hollander is slow, flegmatic, with a tendency to being thoughtful. Now this Jimmie Holland is a "man about town", he thinks no more of being on the street at ten o'clock than he does of smoking opium. He spits on the sidewalk, eats chocolate coated caramels and reads Joke books—Ah woe is me."

"I know of a case like that", saide Roscoe Packer. "There is a man named, Russell—now to rustle is to be industrious, to work hard for success; but this Short Russell is so lazy, that once he hade one girl he kept her for all the time, not having ambition enuf to procure for himself another."

"Well then, gentlemen", asked Mose Harrison, "Are we all agreed as to the fundamental significance of names?"

"That names, notte matter, open up the pathway to the infinite?—Yes," answered Packer and Jones in unison.

"That names notte matter are important, with exceptions", continued Mose Harrison.

"Ah! You have it, Brother Harrison", said Packer well pleased. "With exceptions --indeed, yes."

"Fine—wonderful—lovely", exclaimed Jones. "We now have our regular names catalogued and classified, now for study and diversion let us point out some more exceptions".

"Are any of you gentelmen acquainted with this man, Howard Aldrich?" asked Packer. "A rather likeable fellow, but laboring under a terrible handicap as to his fiscal appellation. The d in Aldrich from the Sanskrit, means low or not up to the average. Dropping the d we have the name, Al-rich, truth to tell the man to whom I have reference is a despicable pauper. He has been engaged to the same girl for over three years; it costs so much to get married that he just keeps right on being engaged."

"You all of you know Margaret Ford", continued Jones, "A demure, quiet, self composed young woman, who has a wonderfully dignified personality; Rolls-Royce

would not have been so bad for her, but a rattling, wheezy, loosely constructed name such as Ford for a girl like her—I cannot apprehend it."

"Well, now you are coming to the comic", spake Packer, "I am reminded, of the case of Mary Dunnigan, Dunnigan in shanty Irish means—done again—Mary has never done a single thing in all her twenty seven years of life, so how I ask you could she do it again—ah! inconsistency, thou are awful to contemplate."

"Do you know Ioana Bair", asked Harrison.

"No. I hadn't heard that you did", answered Jones.

"Oh!" saide Harrison smiling broadly, "I am speaking of a young lady named Bair, this instance proves beyond doubt that you can never believe what you hear. This girl as meek and innocent as a Spring morning must go through life weighted down by the close correllation between herself and the creatures of the wild, it is unjust say I."

"It is a calamity, Brother Harrison", added Jones.

"Think of the name applied to this man, J. Leo Ahart", saide Packer. "The ladies are all of them wild about him and he treats them with the utmost contempt—a heart, why he hasn't one. Endowed with all of the attributes of a social lion, I make no question but that he will live and die a bachelor".

"That name might better be applied to Rush Damuth as far as desire goes," saide Jones, "Only he hasn't the other qualities you speak of."

"True", saide Harrison.

"And now Your Majesty", saide Packer addressing the G. Q. "May I ask if you are satisfied with the outcome of our deep and serious discussion and if you have anything to add yourself."

"Gents", saide the G. Q. "On matters purely filosofical I find you to be all that could be desired. You have a very good understanding of your subject; but as to the vagaries and impulses of the feminine nature I find you sadly lacking."

"Explain, Your Majesty", saide Packer.

"A woman", continued the G. Q. "No matter what she may be named and no matter what she may seem to be is a woman, and therefore of a material state that forbids of filosofical research; to thoroughly understand a woman is to have attained the Infinite. Men are consistent beings and as you have pointed out should be named accordingly; but a woman is a will-o-the-wisp that can never be catalogued. My advice to all mankind is: to know woman, to bask in the sunshine of her smile and to enjoy her company; but aside from that, cease—do not take her seriously for she will fool you in the end. . . I now declare this Educational Convention at an end, I further nominate each one of you men as candidates for the hall of fame; as a small token of appreciation of your work I will have the Royal Exchequer credit your organization with one egg and one potato. Adieu, gentlemen, slave! pull my covers about me that I may sleep, the precipitous depths to which my mentality has this day descended, have worn me out completely.

THE CO-EDS

(With apologies to Gilbert and Sullivan)

The Co-eds that spoon in the Spring, tra

Don't always come back in the Fall.

When moonlight enfolds everything, tra

Their thoughts are of love and a ring, tra la.

If the Campanile goes ting-a-ling, tra la, They forget to return to the Hall.

The Co-eds that spoon in the Spring, tra la,

Can hardly be censured at all.

For everything's nice in the Spring, tra la, The bird to his treetop doth wing, tra la, And crickets and katydids sing, tra la,

There's pleasure and gladness in all.

That Co-eds should spoon in the Spring, tra la.

Is natural, as you will recall.

And if to me Fortune should bring, tra la,
The power to reign as a King, tra la,
I'm perfectly sure of one thing, tra la,

There never would be any Fall.

Mary: "Dorothy has been padding her thesis with irrelevant material."

Jane: "Humph! I suspected it all the time!"

AT HART'S

Now let's see. Some of you tallest men step back here. Now you here and you there. How many are there in this group? That's bad. An odd numbered group looks so much better.

Well, well, that won't keep us from making a fine picture anyway. I had a group of thirty here last Sunday and I got the best picture of them I ever saw, but better. That's it. Now let's see. You there's no reason why this shouldn't be come over here.

Now your heads aren't all level but I don't think that's a disadvantage. There's some that don't like a picture if the heads aren't all level, but I don't think you ought to expect that in a big group.

Now then, every body look right up here and hold still. It may take a couple of seconds to make this because the light is getting a little dim. But we don't care. We can make 'em just as good anyway by leaving the plate exposed a little longer. Now everybody still and look right here. Now when I count two. We'll make the picture whether everybody is ready or not. Just a minute, that man there, turn your face just a little. That's it. We want everybody to look right. Now then, when I count two. Everybody ready. Now, one, two. That man there moved just a Now, everybody still. Now I don't want to take the picture with everybody laughing. Can't you be still just a minute? Your wasting time and there's

another group waiting. Besides, the light is getting poorer.

Now. That's it. Turn your face just a little. Now sti-i-ll, one, two. I'll be back in just a minute.

Now everybody just as you were before. We make three plates of everybody. Now we don't know whether the others were good or not so we want to make this the best of the whole lot. Now some of the men moved a little on the last one. Everybody hold real still. Now, one, two. That man lean in just a little. That's it. Now, still-II-II. One, two. Thank you. Everybody step down easy.

OUR SLOGAN:

Quality is Remembered Long after Price is Forgotten.

OUR FORD JOKE

How does a Physics Class remind you of a Ford?

Because it's a bunch of nuts with a crank in front.

As Puff Rice was going down the street one day he happened to encounter "Shorty" Russell, who was standing on the corner with apparently nothing to do.

"I say, Short," ventured "Puff", "what are you-all standing around like this for?"

"Well, you see it's like this," answered "Short", "I believe that the job should seek the man instead of the man seeking the job and so I'm right out here where the job can't help but see me."

And "Puff" proceeded down the street, feeling much relieved.

It isn't just the pictures it is the way we show them Twin Star.

Lecto Dray Goods Co-EVERYBODY'S STORE

As soon as the styles originate on Fifth Avenue, New York, we present them to you here in Marshalltown.

Fresh and crisp from the designers' hands they are brought here as fast as the express trains can bring them,

FROCKS FOR SOCIAL FUNCTIONS For every occasion, for the bride, for the bridesmaid, graduating dresses, dance frocks have a great deal of our attention. If you can't come in person to Marshalltown to our store to make a selection, we will be too pleased to send out gowns on approval to reliable parties in any part of the state.

We are also leaders and authority on tailor made garments such as coats, suits and afternoon frocks, blouses and fashionable skirts.

Our silk department is also a great leading feature in this store as well as accessories, neckwear, hosiery and gloves.

We allow railroad fare to out-of-town customers according to the amount of purchase and distance.

LEVIN DRY GOODS CO.

FAMOUS BOOKS BY UNFAMOUS AUTHORS

"The College Youth," written by Miss Norma Daniels from the wealth of her three years' experience in combatting the methods of this wiley individual. You may be sure that when you are reading this book by Miss Daniels that you are reading something of vital interest by an authority on the subject.

"Treatise on School Name," by H. E. Pride, being a collection of data procured by Mr. Pride in his recent campaign for a change in name. Any of those interested in the nomenclature of any of the State Institutions should read this ponderous work. Consists of ten volumes of 1000 pages each.

"The Art of Fussing," by L. P. Krebs, In this book one can find methods for overcoming the knowledge obtained by the co-eds who have read Miss Daniels' book. This book is also written by an authority from his personal experience.

"How to Handle Children," by Pres. R. A. Pearson. This book needs but little comment. All readers know of the writer's experience along this line before the arrival of the Student Senate.

"I think this new fellow Briggs is an awful boob,"

"Is your girl crazy about him too?"— Gargoyle.

The Twin Star is the place to rest a while.

Love is the excuse man gives for doing what would otherwise be naughty.—The Siren.

"I may stick around now," says the sapling, "but I leave in the spring."

A MISFIT

They sat on the steps at midnight, But her love was not to his taste. His reach was 36 inches, While she had a "46" waist. They were dancing the one-step. The radiant brilliance of the ballroom, the soft swish of silken garments, the subtle music and the perfume-scented air all served to exhilirate the swaying couples.

"Do you know," said she, "you remind me of one of Whitman's poems."

At these words, coming from her, he seemed to feel a strange faintness. He moved as in a dream.

"Do I?" he asked. "Which one do I remind you of?"

"Oh, most any one," she returned.
"The feet are mixed in all of them."

EDUCATION FOR PRODUCTIVE EMPLOYMENT

Men and women with that kind of an education will be needed seriously when the world quits its strife and rehabilitates itself. To offer that kind of an education is the special province of

IOWASTATECOLLEGE OF AGRICULTURE AND MECHANIC ARTS

It conducts work along five major lines:

Agriculture Home Economics Engineering Industrial Science

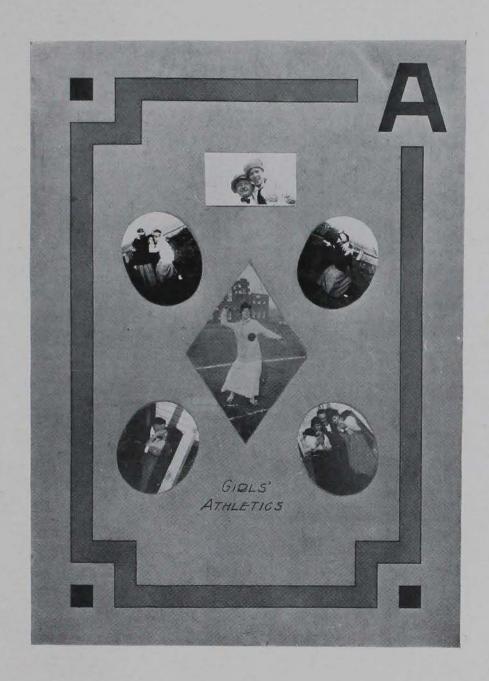

Veterinary Medicine

The Graduate Division conducts advanced research and instruction in all these five lines.

Four, five and six-year collegiate courses are offered in the different divisions of the college. Non-collegiate courses are offered in agriculture, engineering and home economics. Summer sessions include graduate, collegiate and non-collegiate work. Short Courses are offered in the winter.

Extension work is conducted at various places thru the state. Research work is conducted in the agricultural and engineering experiment stations and in the veterinary research laboratory.

Special announcements and catalogs sent free on request to Herman Knapp, Registrar, Ames, Iowa.

Dependability

The getting of experience is usually very expensive all parties concerned

YOU WANT YOUR AN-NUAL PRINTED AND bound the way you want it and when you want it, the logical thing to do is to place your order where you feel at ease about it being properly taken care of.

Editors, managers and others who have to do with the making of annuals have their time fully occupied without the anxieties and perplexities that come because of placing their order in the hands of inexperienced annual builders.

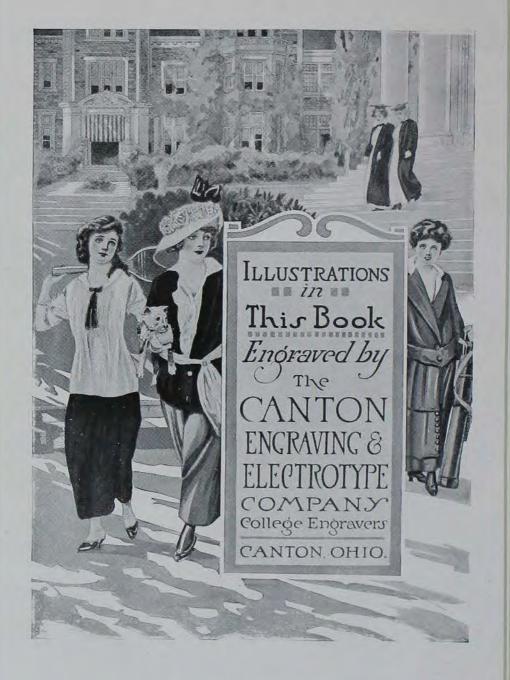

We are annual specialists. You can place your order with us with full confidence that you will get a high-class book.
