THE SIOUX CITY TRIBUNE

Speedy Progress Toward Reducing Floyd River Flood Menace

DAY BY DAY In federal and city govern-

DAY 3W DAY In Sederal and city governments are waging their battle against
future floods along the Bord river. The accompanying pottures taken their form
of the Floyd flood control project give some
idea of the progress being made.

Butteen hundred men are finding emfloyment through WPA in this effort to end
disastrous floods in the Floyd valley.

The federal government is supplying \$1,anticol for later white the city is spending
to later white the city is spending to
the floods in the sity is spending to
the flood of the project the sity of the
waters such as sweet down the Floyd Rule
June 7 and \$1,1934 driving 3,000 persons
from their nomes and counting property demage distincted at between \$300,000 and \$400.600.

The upper left hand picture shows the stream tridge at the confluence of the Floyd

and Missouri rivers, where activity began last June when the project was resumed. The space between the bridge piers, with the exception of a narrow strip where the Floyd emptied into the Missouri, was plugged with dirt aimost to the tops of the piers. Migh water coming down the Floyd under such circumstances would have caused untold

The picture at the lower left presents a group of woramen who are widening the river and constructing lesses just gooth of the Highlenenth street bridge. The photograph in the upper right corner is another street being in the street and street in the lates without and shows have there in the lates with the point to provide a 200-foot channel for

mines by George Newman. Tribune Staff Photographer the Ployd im place of the present 25-foot channel. The leves that are being thrown up will keep high water from spreading but as residents of nearby areas can recall it has
