

Some Black Hawk County W P A Projects

The problem of creating employment for the 752 men and women certified relief workers in Black Hawk county was met by a works program planned and sponsored by town and county officials with local business organizations, and conducted by WPA. The above map shows some of the projects. Farm-to-Market road building and improvement leads, including 30 miles of graveled roads. The opening and operation of a rock quarry, building an athletic field and bleachers at Waterloo, making thousands of warm garments for the poor in large sewingrooms at Cedar Rapids and Waterloo, and making park improvements are outstanding WPA projects. A river wall, water main extensions, a surplus commodity survey, paving school drives and providing student aid are additional WPA projects which are helping those engaged and materially adding to property values in Black Hawk county.
